Mercantile Summary

ESTIMATES are being prepared for the conversion of the New York and Ottawa Railway into an electric road.

ON March 3rd, at Chicago, the accounts of the Columbian Exposition of 1893 were closed with the payment of a final dividend of 4.65 per cent. to all the 2,000 stockholders. A dividend of ten per cent. had been paid in 1894. It was a great Fair, but financially a costly experiment. All told, the local organization spent $26,000,000, and the National Government and the States $7,000,000, the total spent on the Chicago World's Fair being $33,000,000.

A GROUP of Montreal grocery failures is noted as follows: J. E. Robichaud, who began business in 1902 on a borrowed capital of $1,500, has been asked to assign.——Mrs. E. W. Carignan, who for the past six years has continued the business of her late husband, doing also some jobbing in liquors, has made an offer of 35 cents on the dollar, which has not been favorably entertained. Within a year she claimed to have a surplus of $11,000.——D. Michon, is offering 25 per cent. cash, on small liabilities, and a demand of assignment has been made upon J. M. Chapdelaine.

J. E. VOYER, a boot and shoe manufacturer in a moderate way, at Ancienne Lorette, near Quebec, is reported seriously embarrassed, and two Quebec retailers, who are reported to have accommodated him, are seeking compromise indulgence. The first of these, J. Campbell, has been in business some sixteen years, and now asks his creditors to accept 50 per cent. of their claims, amounting in all to some $10,000. Chas. Binet & Fils, with previous favorable record of eleven years, offers 25 cents on the dollar, also showing liabilities of about $10,000, with nominal assets $5,000 or thereabout.

A DEALER named L. Leveque, carrying on general stores at St. Gedeon and St. Jerome, in the Saguenay district, has become insolvent through a serious loss made with a Montreal produce house, and his affairs are in the hands of a Quebec firm of accountants.——Ephrem Charbonneau, who has been a grocer at Lachine, Que., since 1886, has assigned. His business has been small, but his family is large, and he has had to throw up the sponge at last.——An unexpected failure is that of J. Z. Gagnier, general dealer at Howick, Que., who has just made a voluntary assignment. He only began business at his present address in the spring of 1903, and had previously been in the grocery line in Montreal, with a favorable record. Liabilities are stated at $8,000, and he claims to have assets of $11,000.——J. L. Roberge & Co., general merchants at Thetford Mines, Que., are reported as having assigned. They are said to owe some $15,300, while showing apparent assets of $20,000 odd.

IMPORTANT WORK.
"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning THE MONETARY TIMES.

WANTED.

The Great West Life Assurance Company require the services of a first class Life Insurance Underwriter for City of Toronto — or, better still— TWO BRIGHT YOUNG MEN could form a partnership and develop one of the best paying businesses in Toronto. An excellent opening for the display of energy and ability. First class references required.

Apply, Ontario Branch Office,
18 Toronto Street, Toronto, Ont.

P. S.—Read our Annual Report for 1903.

THE premises of P. J. Kelly, merchant tailor, Stratford, Ont., were last week destroyed by fire, at a loss of $15,000 for the stock, insured for something over $6,000, and of $3,000 for the building.

Mercantile Summary.

FOR the past two years T. Lalonde has been carriagemaking at Plantagenet, and previously eight years at The Brook, Ont. He now makes an assignment.

THE. James Bay Railway Company want an extension of time in which to begin and complete their lines, also for power to purchase or lease the Great Northern, the Chateauguay and Northern and the Irondale, Bancroft, and Ottawa lines.

ALPHONSE GAGNON, of Quebec, after a 15 years' experience as a grocery clerk, decided to open shop for himself last spring. Experience, however, without the necessary brains does not count for much, and he has already assigned, liabilities being reported at $7,700.

THE Huntsville, Lake of Bays, and Lake Simcoe Navigation Company have decided to build one or two additional steamers to accommodate their increasing tourist traffic. The company recently put in a short railway connecting Peninsular Lake with Lake of Bays, and will soon put in an extension from Hollow Lake to Dorset.

THE new steamsnip, "Canada Cape," which has just been built in Newcastle-on-Tyne for the Elder-Dempster Company, has arrived in St. John, and will load for South Africa, having been especially designed for the Canadian-South African trade. She is 360 feet long, 48 feet in breadth, and 28 feet deep, with a registered tonnage of 2,794 tons.

THE International and Southern Railway Company is asking the Dominion Government for a charter for the construction and operation of a railway from a point on the line of the Canadian Pacific Railway between Port Arthur and Savanne, through or near Kashabowie on the Canadian Southern to Helen's Island on the United States boundary.

A DEAL was carried through recently whereby the Canadian Lake & Ocean Steamship Company, the New Ontario Steamship Company, and the Fairgrieve line have been amalgamated under the name of the Merchants Montreal & Lake Superior Steamship Company. The vessels will run between Montreal and Fort William. Mr. Andrew Cowan has been appointed traffic manager of the company.

THE Montreal Silicate Brick Co., Limited, chartered in the summer of 1902, with an authorized capital of $100,000, to take over the brickyard and plant of C. Sheppard & Sons, and engage in making bricks by a new patent process, have themselves applied for an order in liquidation. The business has never got beyond the experimental stage, and the capitalists interested have apparently grown tired of being called on from time to time for further contributions.

PARRY SOUND and American capitalists are making application to the Ontario Government for the lease of a water-power at Canal Rapids, on Magnetawan River, near Georgian Bay, also for the lease of a building site. It is their proposal to start a pulp mill and other industrial enterprises at that point.

WE learn that Mr. C. D. Warren, president of the Imperial Lumber Company, of Warren, Nipissing, has been elected president of the Soo industries reorganized under the name of the Canadian Improvement Company, and that Mr. Thos. J. Drummond, of Montreal, will be one of the directors.

THE premises of the D. W. Thompson Company, manufacturers of coffins and upholsterers' supplies, Toronto, were on Tuesday last, completely gutted by a fire which arose, it is believed, from spontaneous combustion in a tank of japan varnish. The damage to plant and machinery is estimated at $50,000, and to contents of building about the same. The insurance on the building amounted to $28,000, and on the stock to $40,000.

THE Vermilion, Assiniboine, and Saskatchewan Land Company, Toronto, which recently purchased 40,000 acres of land for colonization in Assiniboia and has options on 40,000 more, lying along the lines of the Canadian Northern Railway, has elected officers as follows:— Col. Sam Hughes, M.P.; vice-president, Hon. R. P. Roblin, Premier of Manitoba; second vice-president, John J. Mearns, Toronto; managing director, L. J. C. Bull, Yorkton, Assa.

THE shareholders of the Grand Trunk Railway Company, at a meeting in London, on the 8th inst., ratified the agreement with the Dominion Government, of a line to the Pacific Coast. Mr. C. M. Hays, the general manager, was present, and, according to the dispatches so far received, it was chiefly owing to his forcible presentment of the case that the agreement was pushed through, several large shareholders being bitterly opposed thereto.

NOT alone the blocking of the railways by snow-drifts, but the scarcity of water used for power at various points at Canada has delayed business and disarranged manufactures. For example we learn that the Granby Rubber factory has been obliged to shut down for the lack of raw material delayed on the road by the freight tie-up, although the past year has been the busiest since the factory was started many years ago. And from Magog, Que., comes word that the Magog print works are running on short time owing to the continuation of water famine.

—The Board of Trade of Weyburn, Assa., held its annual meeting on the 15th ult., and elected the following officers: President, Jas. McBride; vice-president, Thos. Tucker; secretary-treasurer, Jos. Mergens; council, P. E. Metheral, John McTaggart and N. D. McKinnon.

Mercantile Summary.

ST. JOHN city council have awarded a contract to Jas. Fleming of the same city, for the construction of an iron ferry steamer, the price being $80,000.

A VANCOUVER engineering firm have just completed the construction of a large hydraulic plant for the Rosella Hydraulic Mining and Development Company's claims in Cassiar, B.C.

THE Ottawa, Brockville and St. Lawrence Railway Company is applying to the Dominion Parliament for an act to extend the time for beginning and completing its line, and to increase its capital stock to $1,000,000.

THE Montreal Carriage Leather Company, of St. Henri, (Ltd.), capital stock $250,000, has been formed to acquire the assets and goodwill of the business heretofore carried on by J. A. Stevenson, in St. Henri, Que. They will act as merchants, makers and dealers in carriage and other leathers.

A FIRE in Halifax, N.S., on the 4th inst., did considerable damage to some half dozen buildings, with a loss of nearly $50,000. The chief sufferers were T. H. Carrol, commission merchant, Leary's grocery store, Commercial Hotel, owned by E. W. Wright; British American Hotel, owned by John Dehehy, and the plumbers' shop of Donavan and Brennan. There was partial insurance on some of the buildings burned.

THE Kettle River Valley Company wants power from the Dominion Government to construct additional lines from a point fifty miles up the north fork of the Kettle River, thence northerly to Fire Valley, thence northwesterly to Vernon, thence westerly to Nicola, thence northwesterly to Spence's Bridge; and from a point on the line at or near the junction of the east and west forks of the north fork of Kettle River, to Franklin Camp, thence to Killarney.

THE exact quantity of construction work to be done during the coming season by the Canadian Pacific Railway Company, has now been decided upon. The first piece will be the extension of the Pheasant Hill line. It is now graded to Hayward and tracked to Pheasant Creek, but by the fall it is hoped to have it extended 200 miles west of the northern boundary of Manitoba. There will be two branch lines built eastward from the Calgary and Edmonton road, one starting at Wetaskiwin and the other from Lacombe, each being 25 miles in length. The important line from Arcola north-westerly, 115 miles to the main line at Regina, is to be completed this year. The statement is made that when the C.P.R. terminals are completed at Winnipeg they would have 85 miles of track, perhaps the largest railway yards in the world. The hotel in Winnipeg will also be pushed ahead, but as the new station is much needed, that will be finished first.

A Good Envelope

is the worker of business miracles. The greatest variety of sizes and qualities ever shown in Envelopes are to be found here, whether it be the smallest pay envelope or the largest official. It is something—much—to lead in variety; but it is more—a great deal more—to lead in values at the prices. Put both together: Have you any doubt where the envelope trade of Canada is being done? Enormous sales prove that our prices are right. They are figures which appeal to every careful purchaser. It will pay you to write to us for samples and quotations for quantities, or ask your stationer for Envelopes manufactured by

The Barber & Ellis Co.,
Limited Toronto

Mercantile Summary.

THE Consumers' Gas Company, Toronto, has been authorized to increase its capital stock from $2,000,000 to $3,500,000. It wanted an increase of $3,000,000, but was defeated in the private bills committee.

MR. N. ERICKSON is trying to organize in Winnipeg a stock company for the purpose of erecting a brick and stone factory. He was the promoter of the Devil's Lake Petrified Brick and Stone Company.

A COMPANY is being formed in Fredericton, N.B., under the name of the J. Sutton Clark Co., Limited, to take over the sardine canning business at L'Etang and New Edinburgh, by Mr. J. S. Clark. The capital stock will be $150,000.

IT is said that a deal has been consummated for the purchase of the entire plant of the Locomotive and Machine Company of Longue Point, near Montreal, by the American Locomotive Company. The plant is to be extended so as to be capable of turning out 150 to 200 locomotives per year, and of employing 2,000 hands. The purchase price was $1,500,000. The American Company will issue in all $1,500,000 of 4 per cent. bonds, of which $1,000,000 will be retained in the treasury. It will take the entire stock of the Montreal Company. Mr. Roger Miller, it is understood, will continue to act as managing director.

THE following is a record of patents granted during the past week to Canadian inventors in Canada and the United States: Canadian:—G. W. Walker, G. Ward and R. Chisnell, corundum or other abrasive wheels; L. McInnes, detachable cross-cut saw handles; E. B. Jarvis, moulding boxes for forming concrete blocks; C. B. Wainwright, centre boards; D. J. Archer, hot air furnaces; J. W. Harris, appareils a filtres l'eau sous pression; J. W. Martel, acetylene gas generators; M. Calvin and G. Black, hose clamps; W. Davis, show-cases or counters; J. E. Wright, tea kettles; W. H. Chenery, locking mechanism for faucets; G. M. Absolom, threshing machines; L. Picard and G. Bureau, automatic pumps; L. M. Jones and R. N. Verity, and A. Johnston, cultivator and seeder; J. Maxwell, hay loaders; G. Shaw, feed troughs; G. Beatty, hay carriers; J. H. Vivian, self-closing doors; H. P. H. Galloway, furnace draught regulating devices; J. D. Belcher, corset clasps; E. Holmes, lamp chimney holders; J. D. Landers, train signals. United States:—T. J. Baillie and S. Anderson, cattle guard; John A. Beam, threshing machine; A. J. Cross, upholstering for caskets; J. McIntosh, carriage pole; D. J. McLean, package fastened; G. L. Mott, puzzle; D. S. Sinclair, shaft coupling; W. Wilson and T. W. Baker, packing case or crate; W. Wilson and T. W. Baker, tray for holding eggs or fruit.

Mercantile Summary.

THE stock of D. A. McPherson & Company, cheese and butter merchants, Montreal, was last week damaged to the extent of $8,000.

FROM Ottawa we learn of the failure of Miss Clara Latremouille, who has done a small crockery and fancy goods business for several years past.

MR. C. H. WHITAKER has been appointed acting manager of the Massey-Harris Company's branch at Winnipeg, owing to the continued ill-health of Mr. Agur, and to the latter's desire to be relieved of the responsibilities of his position.

THE Suburban Tramway and Power Company has been organized in order to purchase and develop water powers in the counties of Terrebonne, Soulanges, Vaudreuil, Beauharnois, Hochelaga, etc., in Quebec province, and to generate power and build electric railways.

THE Macdonnell Construction Company, Limited, Montreal, with a capital stock of $500,000, has received a Dominion charter authorizing it to execute all kinds of public and private works. Messrs. Jas. A. Macdonnell, of Fernie, B.C., and N. C. Guthrie, of Ottawa, are the chief promoters.

A COMPANY is being organized in Ottawa and Toronto, under the name of the Nipissing, Ottawa and Montreal Railway Co., for the purpose of building a railway from the east end of Lake Nipissing to Montreal, also one extending west along the south side of the Nipissing and French rivers to Georgian Bay. It also proposes to develop water-powers, generate electricity, operate steamships, elevators, etc.

A FIRE which broke out on Wednesday in the premises of the Canadian Jewellery and Importing Company, Montreal, doing damage there estimated at $55,000, spread to the Comfort Soap Company, the Metropolitan House Furnishing Company, Genin, Trudean & Co., wholesale tobacconists, and the Guertin Printing Company. The damage to the building was about $6,000, while the total loss is estimated at $75,000. Mostly insured.

THE Statement of the Grand Trunk Railway Company for the half-year ended with December 31st last, shows that the gross receipts amounted to £3,138,468, an increase of £326,590. There was also an increase in the cost of maintenance of £239,263, owing chiefly to the higher price of materials and of labor. The net receipts were £924,400, less credits of £526,000, leaving a balance of £398,000. The total balance available for dividends was £404,300, admitting the payment of full dividends for the half-year of 4 per cent. on the guarantee and first and second preference stocks, also a first dividend for the year for third preference stock, leaving a balance of about £2,800 to be carried forward.

FOR the week ending March 5th, the shipments of ore from the Rossland mines were as follows: Le Roi, 5,248 tons; Centre Star, 1,080 tons; War Eagle, 780 tons; Kootenay, 180 tons; Jumbo, 280 tons; Le Roi No. 2, 590 tons; milled, 340 tons. Total for the week, 8,498 tons. For the year up to date, 82,690 tons. The outlook for enhanced activity at the mines in the coming spring and summer is now believed to be bright. Continued good developments in Le Roi deep levels assure a wider scope of operations, and Le Roi No. 2 Company are now expected to inaugurate an active programme of deep level exploration in the Josie mine, as the outcome of discoveries in Le Roi. It is practically assured now, says a dispatch, that the Jumbo mine will have a railway siding and compressor plant in the summer.

THE statistics of production of all kinds of pig-iron in Canada during the year 1903, as supplied to the American Iron & Steel Association, have been published. They show a decrease of 54,139 gross tons, or nearly 17 per cent., as compared with 1902, but an increase of 20,442 tons as compared with 1901, The total production in 1903 amounted to 265,418 gross tons, against 319,557 tons in 1902, 244,976 tons in 1901, and 86,090 tons in 1900. In the first half of 1903 the production was 132,930 tons, and in the second half it was 132,488 tons, a falling off of only 442 tons. Of the total production in 1903, 247,905 tons were made with coke and 17,513 tons with charcoal. Nearly one-half of the total production was basic pig-iron, namely, 126,892 tons. Less than 1,000 tons of Bessemer iron were made. Spiegeleisen and ferromanganese have not been made since 1899. The unsold stocks of pig-iron in Canada on December 31st amounted to 19,168 tons. On December 31st, 1903, Canada had fifteen completed blast furnaces, of which nine were in blast and six were idle. Of this total, eleven were equipped to use coke for fuel and four to use charcoal. In addition three coke furnaces and one charcoal furnace were being built or were, partly erected on December 31st, but work on at least two of the furnaces had been suspended some time ago.

THE annual meeting of the Dominion Coal Company took place in Montreal on the 3rd inst., Mr. F. L. Wanklyn in the chair, owing to the illness of Mr. James Ross, the president. The annual report was adopted. A resolution was passed empowering the directors to borrow money on the credit of the company from time to time, in such amounts as they may think proper, and may hypothecate, mortgage, or pledge the personal property of the company. The borrowing of money heretofore under the authority of the directors, giving of securities therefor, are hereby ratified and confirmed. The directors were re-elected as follows: Lord Strathcona, Sir William Van Horne, Mr. R. B. Angus, Mr. Jas. Ross, Senator Geo. A. Cox, Mr. H. F. Dimock, Mr. W. D. Matthews, Mr. F. S. Pearson, Mr. J. R. Wilson, Mr. W. B. Ross, Mr. F. L. Wanklyn, and Senator David MacKeen. The election of officers was deferred, owing to Mr. Ross's illness.

—Teacher—Now, Homer, a husband gives his wife $10 to go down and buy a $4 muff, a $2 plume, and a 50-cent veil. What does she bring back?

C. A. WADSWORTH opened a boot and shoe business in Trenton in 1901. He had formerly been employed as clerk in a similar line. In January, 1902, his statement showed assets of $8,000, and liabilities of $4,400. But he now makes an assignment.

HAVING previously worked as a farmer, and knowing nothing of merchandizing, Geo. Galbraith conducted a general store at Croydon, in Addington county, for a while. The result of his uninstructed efforts now appears, for he assigns. Another assignment to be recorded is that of R. J. Dodds, contractor, of Orangeville.

As long ago as 1874, C. E. Weldon opened a general store at the Sault Ste. Marie, and sold out in 1895. Two years later he re-opened the business, and made a statement in 1902 which showed a surplus of $3,800 over liabilities of $2,300. The condition of things in the Soo, however, caused by the Consolidated Lake failures has affected his business very materially, and he has assigned.

CANADIAN APPLES IN BRITAIN.

The report of Mr. P. B. Ball, Birmingham, to the Canadian Minister of Trade and Commerce contains some concrete information concerning the apple market which it would be well for our exporters to remember to their benefit another year. Referring to the shape of the barrels in which apples have been shipped, a matter which this year has shown more variation than usual owing to scarcity, he says, that the fruit seems to arrive in perceptibly better condition when barrels with large bilges are used. The fruit seems to pack better, and to withstand bruising better than in those of flatter shape. Numerous boxes have made their appearance but, adds Mr. Ball, he has not yet seen the proper box. Many of them were of ¼-inch material, with the corners glued and tightly packed, but they are not sufficiently durable to stand transportation. A box containing 50 pounds of apples, and made rather larger and wider than deep, so there would be a good surface for exposure, would be, he considers, a good design. Only the very highest grades should be sent in boxes. Another thing Mr. Ball animadverts upon is the tendency of Canadians to ship such a large quantity of apples just before Christmas. And this is a point upon which, if we remember correctly, they were repeatedly warned three months ago. Had they judiciously arranged with customers in various sections of Great Britain, and made regular shipments to them of, say, 500 barrels weekly, they would have realized a great deal more money. At the present time (end of February), it is almost impossible to purchase Canadian apples in the markets. Spys, Russets and Baldwins, which went for 12s. 6d. and 14s. a barrel, are no wcommanding any price from 21s. to 25s. a barrel.

Mr. Ball has no doubt that 10,000 barrels per week could be easily placed among the different towns in the Birmingham district alone. But he wants to impress upon shippers the fact that no fruit is too good for such a market. One barrel of good, well-packed apples will bring just as much as two barrels of inferior or carelessly packed, and the freight of say 5s. per barrel is exactly the same in either case.

NEWFOUNDLAND DUTIES.

Some important changes in the import duties of that colony have been made within a few days. The Government of the Island has decided to abolish the duty of 25 cents per barrel on flour; four cents per gallon upon molasses, and six cents per gallon upon kerosene oil. The total revenue thus lost, amounts on the basis of that collected last year to $192,431, the details being as follows:—

	Duty.
Flour, 383,697 barrels	$95,924
Molasses, 1,331,562 gallons.....	53,271
Kerosene oil, 734,222 gallons...	43,236
Total $192,431	

—At the meeting of the board of directors of the Toronto Industrial Exhibition Association, Mr. W. K. McNaught was re-elected president, Mr. R. J. Score first vice-president, and Mr. S. E. Briggs, second vice-president. The Furniture Manufacturers' Association has been granted the use of the transportation building for the purposes of an exhibition to be held from June 19th to July 6th, of the present year.

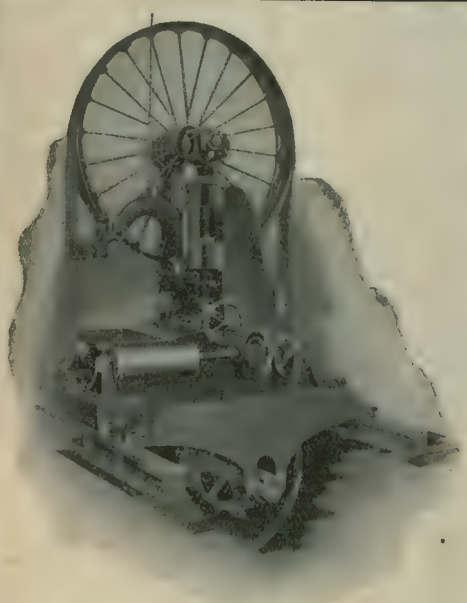
IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.



Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentag to daily cut reducing cost per thousand.

This Pony Band - Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

MINING ENGINEERS IN SESSION.

Mining is a subject of deep importance to Canada, blest as she is with a great variety of mineral deposits. But it is one on which Canadians are by no means well informed. The location of our mines, the character of their ores, and the means necessary for the extraction of these products, are matters about which the average man does not know enough and cares too little. If we had learned more about them, we should have been saved from the seductive (and expensive) wiles of the wild-cat operator in mining lands during the last dozen years or more.

A session of the Canadian Mining Institute has just been held in Toronto. It was the first held in this city, and but for snow-blocked railways would have been probably the best attended of any, the situation of the place of meeting being central. Of the 46 papers prepared for the gathering, 12 concerned localities in British Columbia and the Yukon, 8 places or industries in Quebec and the Maritime Provinces, 8 Ontario; the remaining 18 discussed general mining topics. Twelve had not been received during the three days of the session, and a number of others were read by title only, in the absence of their authors.

It is the part of wisdom for Canada to heed the conclusions of such a body of men, who have the skill and experience needed to advise in so precarious a business as mining in a new country often is. And it would be well if occasions could be arranged for their deliberation oftener than once a year, and in the hearing of the general public, upon subjects of so much consequence to large sections of our country.

The chairman's address was delivered by Mr. Eugene Coste, E.M., president of the body, and consisted in the main of a review of the work of the Institute since its founding. A paper on the Rossland Ore Deposit, by E. B. Kirby, E.M., explained by clear maps, evoked a good discussion; and one by F. Keffer, M.E., on the Boundary District of British Columbia was also full of interest. Professor Brock's paper on the Lardeau District was well illustrated; and that by W. Thompson, Rossland, B.C., on Mine Bulkheads, proved instructive. "Notes on Zinc Mining in British Columbia." by A. C. Garde, M.E., of Sandon, gave novel information, and was additionally interesting because of mining problems presented by the same metal in Ontario. A paper on Magnetic Separation of low grade Ores, by Mr. F. T. Snider, of Chicago, provoked keen interest because of the possibilities of the method over a wide field. Unfortunately, the paper on Gold Dredging, by John E. Hardman, S.B.E.M., was not submitted, owing to unforeseen circumstances.

Portions of Thursday and Friday were devoted to papers by students of the School of Science, Kingston, of McGill University, Montreal, and the School of Practical Science, Toronto. Their topics ranged from iron and other mines in Michigan and Minnesota to chlorination in Nova Scotia, the cyanide process, and the occurrence and production of mica in Ontario. These were all read by their authors and occasioned healthy discussion.

The Year's Progress in Mining in Ontario, by Mr. T. W. Gibson, Director of the Bureau of Mines for Ontario, was a practical resume of the work of the Bureau and the information that had come to it during the twelve month. Very suggestive, too, was the essay by Professor T. L. Walker, on the Geological Survey of Canada as an Educational Institution, but the one which produced perhaps the most excited discussion was that of the President on Suggested Improvements in Canada's Mining Laws. In this the author took the ground that considering the enormous area of mineral lands in Canada acquired from the Crown, and kept unworked and idle to the great detriment of the development of the mineral resources of the country, such lands in future, should be sold subject to an annual working condition or assessment work, failing in which the lands should revert to the Crown at the end of the year. This view commended itself to many in the gathering, but the rights to immunity of prospectors and holders for profit (unearned increment, so to speak) were also upheld strongly, but these, the author of the paper himself stated should be carefully protected, and he suggested that the discoverer and prospector should have a patent right of a fair royalty on the products from locations containing valuable minerals discovered by them, and which they are unable to work.

A paper by John A. Dresser, M.A., on a new area of copper-bearing rocks in the Eastern Townships of Quebec was an excellent one. Most interesting, too, was the dissertation on Minerals containing Radium in Quebec, by M. J. Obalski, Inspector of Mines for that province. A paper on the Nickel Deposits of Norway was read by R. G. Leckie, M.E. Sad circumstances prevented, in each case, the submission of promised papers by the late B. T. A. Bell, of Ottawa, and by W. E. H. Carter, M.E., of Toronto. A practical

and suggestive exposition was that by Prof. W. G. Miller, Provincial Geologist of Ontario, of the Undeveloped Mineral Resources of Ontario. He dwelt upon new uses found for mica, the widening uses of asbestos, and the possible value to commerce and to science of many substances now too little known or unfolded.

The sessions of the Institute were interrupted for part of Thursday, and the annual dinner was dispensed with altogether by reason of the lamented death, on the day before the meeting, of Mr. B. T. A. Bell, so long the secretary and the most energetic upholder of the Canadian Mining Institute. It is not too much to say that his demise cast a gloom over the entire gathering, and that his absence deprived the session of much of its usual ardor and intensity of tone. It was agreed that the council should name an acting secretary, in place of the deceased gentleman, to fulfil the duties of the office until the next convention.

The officers elected are: President, Eugene Coste, Toronto; vice-president, E. B. Kirby, Rossland; treasurer, J. Stevenson Brown, Montreal. Council, J. McEvoy, Fernie; W. F. Robertson, Victoria; A. W. B. Hodges, Granby; W. G. Miller, Toronto; Major R. G. Leckie, Sudbury; John Blue, Eustis; Frank D. Adams, Montreal; Graham Fraser, North Sydney.

BRITISH COLUMBIA AFFAIRS.

A lengthy and interesting account of the condition of commerce and industry in British Columbia is given in the address of the president at the annual meeting of the Board of Trade in Vancouver. Dealing first with the city, he said that the progress made by Vancouver during the past year was probably greater than ever before in her history, and this in spite of the unfortunate series of strikes which took place during the spring. Many business blocks and residences had been erected and been occupied so soon as completed, so that the building going on is not in advance of healthy requirement. The population has increased satisfactorily and would likely amount to 40,000 by the end of the year. Receipts by the customs, inland revenue and post office departments showed a healthy increase, and commercial houses as a rule show a larger volume of business. A feature mentioned by Mr. Lockyer, however, is one upon which the merchants of Vancouver are hardly to be congratulated. He declares that "Competition in many lines of business is exceedingly keen, so much so that in many cases the margin of profit is more imaginary than real, and many staple commodities are sold at a smaller percentage on the actual cost than is obtained on similar goods in Eastern Canada and United States points." We should have thought that Coast merchants really needed more profit, rather than less, to compensate them for the naturally more expensive conditions under which their business is done. Few business failures had to be placed on record and payments on the whole were good.

The small run of fish on Fraser river has affected local trade to some extent, the president said, but to offset this there was increased activity in manufacturing and mercantile centres, particularly in lumber, though the outlook for the latter industry at the present time is not so bright. The mining industry, after a period a few years ago of somewhat feverish excitement, apparently has settled down to a permanent and business-like basis. On this matter, that of the progress of inining in various centres, Mr. Lockyer's address was replete with valuable information. He took occasion to pay a tribute to the good work being done by the Provincial Mining Association of British Columbia, who aim to have the business of mining in the province placed upon a more equitable and workable basis. We are reminded that quartz mining has shown much development in the Mount Sicker section of Vancouver Island, while the Marble Bay mines on Texada Island continue to ship regularly a large quantity of copper-gold ore. Princess Royal Island, too, is promising in a mining way.

While agricultural prospects in the province were good, the past year showed several unsatisfactory features, owing to the wet summer in many sections. Butter making is progressing in the province, both as regards quality and quantity, and so is fruit-growing. In salmon-canning, 1903 has been an "off year," the catch, especially on the Fraser River, having been much less than expected. A word was said in favor of scientific salmon propagation. Efforts by members of the board to secure from the Canadian Pacific Railway Company for Vancouver shippers the same rates of freight to Calgary, on the main line, and Lethbridge, on the Crow's Nest line, as obtained to these points by Winnipeg shippers, has accomplished much. Considerable space was devoted in the address to a retrospect of the labors of the board in various directions, in some of which success had already crowned its efforts.

POSTAL STATISTICS.

The report of the Postmaster General of Canada for the year ended 30th June, 1903, was issued recently. It shows that the total net revenue of the post office from all sources, excluding the Yukon and Atlin districts was an increase of $478,001 over the previous year, and the total gross revenue exceeded that of the previous year by $523,339. The expenditure, excluding the above districts was $87,842 greater. The surplus was $395,268, as compared with $5,109 the preceding twelve months. The post office report, under its present head, seems to have grown more than ever interesting. This year it presents some novel features. During the year, the department used its influence to allow Canadian newspapers to be sent to Great Britain and several of the colonies at the same rates as between post offices in Canada, and the result of this concession has been gratifying. The new postal note system, doing away with some of the inconveniences and delays of the old money orders, has proved a great success, and negotiations have been begun whereby it is hoped to adapt the plan to other colonies.

The number of post offices in operation in Canada at the end of last June was 10,150, of which Ontario possessed no fewer than 3,359. Quebec's share was 1,932, and that of New Brunswick, Nova Scotia and Prince Edward Island between them 3,461. The estimated number of letters mailed in the Dominion during the same period was 235,791,000, and of post-cards, 26,646,000, and here again Ontario shows up excellently with 116,460,000 and 17,300,000 respectively. Registered letters totalled 5,470,000 and free letters 8,152,000. Closed parcels for the United Kingdom and other countries numbered 47,740, of which Ontario sent 21,721 and Quebec 9,611. Post offices increased in number from the preceding year by 192, while the letters were 22,163,000, or 10½ per cent. more numerous. The stamp issue for fiscal year ended June 30th last, was to the value of $5,305,452, compared with $4,662,354

in 1901-2, an increase of $643,098. The total number of money orders issued during the year was 1,668,705, with an aggregate value of $26,868,202 showing an increase over the previous year of 222,576 in number, and $3,318,800 in value. The business of the post office savings bank showed a steady increase in all respects in comparison with the previous year. There were last June, 934 saving banks in operation, and deposits for the year amounted to $12,060,825. The balance remaining to credit of depositors was $44,225,320. Altogether the postal department of Canada is administered with vigor, and, considering the wide spread, and in some parts sparsely settled character of the country, with conspicuous success.

CANADIAN INVESTORS AND LOSSES IN SECURITIES.

This is a subject on which something may be said with advantage at the present time. On 31st December 1902, there were held in Canada securities as follows:

By the chartered banks	$61,261,206
By insurance companies (fire and life)	93,035,755
By loan and trust companies and by building societies	15,194,586
	$169,491,547

Besides this large amount it is certain that the holdings of bonds, stocks, and debentures by schools, colleges, religious boards and societies, by railroads and other corporations, by estates and individuals, would reach a large sum. The Bank Return for 31st December 1903 shows that the banks, at least, augmented their holdings in the year just passed, their securities amounted on that date to $63,591,671. Until the Government at Ottawa compiles and issues the statistics furnished by the other companies mentioned in the above table, it will not be possible to say whether their holdings increased or decreased.

A good deal has been written lately about the losses resulting from the fall in quotations; we have seen banks in England, the United States and at home taking from their profits various amounts to make good "depreciation in securities," and as the banks have done, so will other companies have to do. The effect of this will be to reduce either the surplus assets over liabilities or the surplus earnings for the year. It would be well to bear in mind, however, that there is a vast difference between the nature of the losses made by investors and investment corporations through a general fall in securities such as we have witnessed, and the losses which speculators suffer through the same circumstance. To understand this clearly one has only to bear in mind the different objects sought by the two classes in making their purchases, and the different manner in which each approaches the seller.

A fall in securities very often occurs some little time before a depression in trade; not uncommonly it is stringency in money that precipitates the fall. The manager of an investment corporation in seeking an investment figures on the probability that during the time the investment runs there will be perhaps a couple of changes in the industrial situation; that prosperity will give way to depression and depression be followed again by more prosperity. He, therefore, asks to be satisfied first of all that the security under consideration can earn and pay with ease the interest with which it is burdened in either good or bad times. The present policy pursued by American railroads is very much to his taste. He sits back and smiles when he reads every year that railroads whose bonds he holds have applied millions from earnings to betterments and improvements, rather than pay the money all away in dividends as was formerly the fashion. Then when he has bought his bond he does not assume that it will rise in value, although it sometimes does; and if it rises he does not take the paper profits into his balance sheet (it is the conservative and prudent investor whose attitude is here described; there are plenty of them among our Canadian financiers); likely as not he will proceed to accumulate a reserve fund to cover possible depreciations, out of his earnings year by year, and thus fortify himself against such misfortunes as we have just witnessed. He is careful to limit his purchases of any one bond or class of bonds to a moderate amount so as not to have his eggs all in one basket. When all is done, depreciation in securities has few terrors for him; his revenue is not diminished, his margin of profit not impaired; and though quotations in general are down, some of his bonds are maturing each year and are redeemed at par. Lastly his securities are not of the kind that fluctuate from day to day. A great many of the bonds held by Canadian investors are provincial, city, town, and village debentures. When all these things are considered it is easy to see that in the public idea the effect of the fall in securities may well have been exaggerated so far as it concerns investors. With speculators it is a different matter entirely, the losses to them were real losses. The speculator buys the stocks and bonds which give either high returns on the investment or give no return whatever; and most frequently he buys them after they have risen considerably in price. Worst of all, he buys them on borrowed money, in most cases repayable at call. He intends to pay his loan not from income or savings, but by means of re-selling his stocks or bonds at higher figures. He carries his stocks often at a loss, that is to say, the interest which he has to pay on his loan is greater than that received from his securities. His property consists in the equity or margin between the amount of his loan and the market value of his security. His excitement is derived from the rapidity with which his property increases or diminishes. Like other gamblers he is deficient in self restraint, and doubles and trebles the stakes as his paper profits increase. His property may be destroyed altogether by the action of the bank, his real lender, with whom he does not deal directly and whom he never sees, or by any of the thousand and one factors which bring about collapses in speculation.

We would remark, however, that it is quite possible for dealings of banks in bonds, by way of purchase and sale, to be overdone. It is a question worth discussing whether bankers ought not to leave the bulk of the bond-dealing business to the modern bond-houses, now so active in the United States for instance, and cleave to the old fashioned commerce, aiding the movement of grain and the manufacture of goods. The fact that the banker is an expert buyer of bonds and is in a better position to judge things than the speculator who works on margins, has evidently not kept up the price even of consols. The stubborn fact is that a loss is a loss, and it surely is poor comfort to the shareholder of a bank that he is better able to stand it than some other classes of citizen. A bank must have liquid assets to a certain extent of course, to offset the tremendous responsibility of its perhaps mil-

lions of deposits of the public, but investment in the scores of industrial bonds offering is undoubtedly attended by risk of heavy fluctuation and should be strictly limited in amount.

THE FIRE WASTE.

Month by month, and year after year, the residents of the United States and Canada see the figures of fire loss in their midst mounting up, with apparently no particular heed being paid to them by the average man. The fire loss for February, as compiled by the New York Journal of Commerce and Commercial Bulletin, amounted to the extraordinary sum of $90,051,000. The following table gives a comparison of the losses for the first two months of the year and the same period in two former years.

	1902.	1903.	1904.
Jan.	$15,032,800	$13,166,350	$21,790,200
Feb.	21,010,500	16,090,800	90,051,000
Totals. ..	$36,043,300	$29,257,150	$111,841,200

The startlingly large amount chargeable against February is due to the Baltimore conflagration, swelled somewhat by the later loss at Rochester. But even if we deduct these two amounts, $70,000,000 at Baltimore and $3,200,000 at Rochester, from the total of $90,051,000 the remainder shows that the loss in the two first months of the present year is much greater than in January and February of either 1903 or 1902. So that matters are growing no better.

The compilation quoted from above states that in the month of February last past, apart altogether from the two conflagrations mentioned, there were no fewer than 286 fires of a greater destructiveness than $10,000 each, 36 of them ranging from $50,000 to $75,000 each and 32 from $100,000 to $800,000 each. Cincinnati had two extensive fires during the month; Oswego, Chicago, Topeka, Brooklyn, Knoxville, Waukegan, one each costing from $350,000 to $750,000, and Madison, Wisconsin, lost its state-house, estimated loss, $800,000, though the loss to insurance companies was trifling owing to the sapient resolve of the state authorities to do their own fire insuring.

There are many directions in which, by the exercise of thought and viligance, fires might be prevented or their spreading hindered. One is the taking pains, *day by day*, to see that fire alarms systems are in working order—that fire engines are ready for immediate work—that pumps, or water cisterns, or buckets and ladders, whatever means, great or small, are intended for fighting fire should be ready for use at any hour of the night or day. Another most necessary precaution is to see that no gathering of rubbish shall be allowed in sheds or cellars or storehouses. Inflammable rubbish such as "blows into corners," such as gathers at the bottom of elevators, such as finds its way into stables and outhouses, should be speedily cleared out. Accumulations of boxes or other packages in basement or attic, side by side with loose paper, straw, or excelsior, are a plentiful source of fire to merchants and manufacturers. It is not easy, perhaps, to do without a store of combustible materials for packing purposes, but it is easy at least to keep pails of water close at hand for use if a fire should start. What is needed most of all is that every one should realize the *ever present* danger of fire.

THE DRY GOODS TRADE.

As was generally expected, payments coming due early this month were not well met. For this unwelcome feature there is no reason to search for signs of depression of trade or poor profits; it is due simply to the fact that owing to the almost unprecedented severity of the weather since Christmas last and the consequent blockades on highways and railways, people have been unable to go out as usual and spend the money they were fully able to spend. Stocks, therefore, have moved out slowly. Naturally this state of things must to a certain degree be permanent in its effects, but probably not to such an extent as might be anticipated. Commercial travellers have met with great difficulties in going their usual rounds and have had to lose much time, but they report that the prospects for a good spring trade are very bright indeed. Their orders up to date bear out this contention in full, as in spite of the above drawbacks they have been pretty well up to the average in quantity and amount. A feature which helped during the past week to add animation to the wholesale stores in Toronto was the comparatively large number of outside visitors. Of these, many were the rearguard of the country visitors to the millinery openings last week, and some were people who preferred to remain in town rather than face the conditions springing from the blizzard of Monday week.

Values in all lines continue very strong. Raw cotton again touched 17c. this week. We hear that one of the large cotton mills has again advanced prices ½c. or more per yard, though at last report, no new circular had been issued. Cotton staples are bound to be very high priced for some time to come; some go so far as to say that a decline is impossible before May 1905 at the very earliest, and that even this would be a consequence only of a very full cotton crop next year. In the meantime, great care is being exercised in buying raw cotton, and it is done chiefly in hand-to-mouth quantities. In Great Britain, too, prices are similarly high, and stocks are by no means large. A report from Manchester says, that in some cases goods which have been set aside long ago as old stock have been pulled out and placed upon the market, selling at very fair prices. Linen goods are almost equally strong. Stocks are light, raw material is high-priced, and there is no prospect in view of any decline. Woolens are not far behind, not only in this country, but in Great Britain. On the 4th inst., there was a wool sale in London, of which the cablegrams say; "that the offerings numbered 3,212 bales. Fine and coarse grades were in active demand; prices for merino and fine cross-breds were unchanged from the January sales; medium and coarse cross-breds frequently sold at an advance of 5 per cent." In the United States markets, wool is at present described as steady and firm, but though the supply is decreasing and consumption increasing, prices have shown no material upward tendency since a month ago. The stock of merinos in comparison with last year is greatly reduced, but this reduced stock promises to be ample for the mills' probable wants until the new clip comes in. Last year the consumption of wool in the States was 490,000,000 pounds, as against 575,000,000 pounds, in 1902, the largest on record. During the present year much will depend upon the developments in the Far East, which already, there can be little doubt, have done much to harden the wool situation, preventing consumption and at the same time strengthening the price. Canada naturally is affected by the position of wool both in

Great Britain and the States. Canadian fleece holds its position well, but there is hardly any export demand; while as to pulled wools, the domestic mills are taking it in fair quantities. Products are very firm indeed, though there have been no recent marked advances.

One feature remarked by the dry goods dealers is the constant improvement in domestic dress goods materials. The Canadian mills are producing such goods which in texture and design compare very favorably with the British and American goods. It is satisfactory to learn, too, that the consumers recognize more and more the advantage of patronizing home industries, and that the call for dress goods made in Canada is becoming more insistent with each year. Plain stuffs with neat quiet designs apparently are those most favored this season.

OUR HALIFAX LETTER.

The Nova Scotia Legislature closed its session on Thursday with the usual pomp and ceremony. Our Parliament may not be as large as that which sits at Westminster, but its proceedings are of more importance from a local standpoint, and in all its ceremonies closely imitates the "great mother of Parliaments." Among the measures passed was an Act relating to loan companies. This was the result of the recommendations of a committee appointed to investigate the business methods of certain companies now operating in the province, and to which some reference was made in a recent issue. The chief point of the new law is that no loan or savings company shall accept business in Nova Scotia until all forms of contracts, mortgages, etc., are submitted to and approved of by the Government. The company has also to secure a certificate of registry, which will not be granted until certain conditions are complied with in the interests of and for the security of the public. In introducing the measure, the Premier said "he hoped it would prevent recurrence of the discreditable contracts which had already been made by certain companies." Another important matter was the bill providing for the appointment of a good roads instructor. This official is to visit all sections of the province and to confer with overseers, supervisors, etc,. and advise them regarding the most modern approved methods of roadmaking, so far as may be applicable to conditions throughout Nova Scotia. There is room for vast improvement in road-making methods in this province, and a lively agitation respecting it is being kept up. The appointment of a good roads' instructor is a marked step in advance, and if a properly qualified person is found for the position, great good will certainly result. The finances of the province are in a healthy condition.

The most disastrous fire that this city has had since Moir, Son & Co.'s large establishment was destroyed over a year ago, occurred here on Saturday morning, when five large wooden buildings in the heart of the wholesale district were burned causing a loss of forty to fifty thousand dollars. Fortunately, the wholesale warehouses which surrounded the burned buildings, all escaped damage. Two hotels were destroyed, and a large building in which a produce commission business was carried on. The E. B. Eddy Co.'s warehouse was also damaged. The other buildings were occupied as small shops with residences in the flats above. As the fire took place in what is known as the "brick district," the burned buildings will be replaced by stone or brick structures, which will improve the appearance of that part of the city. The fire was not unaccompanied with loss of life, as Patrick Shelley, a veteran fireman, dropped dead from heart disease while attempting to couple hose.

The rate of taxation for the City of Halifax for the current year has been fixed at $1.69 on the $100. This is an increase of three cents on last year's rate. In 1890, the rate was $1.24 and there was a steady increase until 1899, when it reached $1.72, the highest in the history of the city. The chief cause of this year's increase is the enlarged needs of the Public Schools.

We are shortly to have a "time ball" installed for the benefit of the shipping people. It will be operated at the Citadel, and will have a fall of 30 feet. The ball will drop exactly at noon, the release being directed from the head office of the Meterological Department, at Toronto. For generations the military at the Citadel have discharged a "noon gun," which will now come into competition with the latest scientific invention. The storm signal service at the Citadel is also to be improved. Hitherto oil lamps have been used for night signals, but these are to be replaced at once by electricity. Shipping people here now regard the storm signals as very important, and pay great attention to them, whereas a few years ago they were discredited, and the Old-Timers placed more faith upon their own predictions.

West India merchants here are very much pleased with the announcement that British Guiana has decided to grant Canada a trade preference. The opinion is expressed that the time is not far distant when the British West India Islands will adopt a like course. The change in the customs regulations, which prefers West India molasses, is also highly approved of by the traders in this city.

Halifax, N.S., 7th March, 1904.

CALGARY, ALBERTA.

We are reminded by a conversation with an Eastern man respecting the commercial information about Calgary and its neighborhood that was given in the Monetary Times of 26th ult., that Calgary floated some debentures in January or February, $43,000 worth of 4½ per cents, and realized 99½ for them. This indicates that in a stronger market for bonds, she would have no difficulty in realizing more than par for her securities. The enthusiastic admiration felt by the residents of that part of Alberta for their surroundings is well illustrated by a letter to a Toronto man by a gentleman who has been two or three years in Calgary. He applauds our resolve to have more Calgary correspondence, and says: "I had noticed that little attention was paid to this part of Canada, which has more advantages, and offers more inducements than any part of this great Dominion of ours." It is of moment, certainly, to recall what was said by Mr. Wm. Whyte, second vice-president of the C.P.R., in a recent speech to the Winnipeg Board of Trade, namely, that the railway authorities had fully made up their minds that Calgary would be one of the foremost cities of the West, and in proof of this they have just arranged for an expenditure of $50,000 at that place for a new railway station, and are increasing their car shops to enable them to put on a hundred more men. It is expected that there will be held in Calgary a convention of all the Boards of Trade in the North-West Territories in June of the present year, to discuss matters affecting the Territories as a whole.

MONTREAL INDUSTRIAL EXHIBITION.

As previously stated, much labor has been expended upon the project of an industrial exhibition for Montreal, which shall bear a like relation to the province of Quebec to that which is borne by the Toronto Industrial to Ontario, and by the Winnipeg Fair to Manitoba. The importance of the matter should readily commend itself. At last, on Tuesday morning of the present week the organization of the Montreal Industrial Association was completed. A very general representation of manufacturers, merchants, politicians, aldermen, financiers, railway men, members of agricultural and horticultural societies, and of the Board of Trade and La Chambre de Commerce was present.

Mr. Henry Miles, president of the Montreal Business Men's League, was called to the chair, and Mr. Louis Berube was requested to act as secretary. The chairman stated that the charter and the plan of the organization were along the lines of the Toronto Exhibition Association, which has been so successful. The aim was to make it a public enterprise in the strict sense of the word. A long debate ensued upon the

subject of representation on the board of directors, adjoining municipalities and agricultural societies looking for membership, the following twenty having been proposed as a permanent board: Mr. H. Laporte, Mayor of Montreal; Alderman Vallieres, chairman of the Finance Committee; L. A. Lapointe, Payette, Ekers, Carter, Messrs. D. L. Lockerby, R. Wilson-Smith, Lieut.-Col. Labelle, Senator Beique, C. H. Catelli, J. X. Perrault, Hon. J. D. Rolland, James Cochrane, Hon. G. A. Drummond, Henry Miles, Thos. Gauthier, Hon. W. C. Edwards, W. E. Davis, and A. H. Harris. Seven committees were appointed, which one would think must include everybody who wished to be included. Finally, the following officers were elected: Hon. presidents, Hon. S. Fisher and Hon. A. Turgeon; president, Hon. G. A. Drummond; vice-president, Senator Beique and Mayor Laporte; hon. secretary-treasurer, Mr. Henry Miles.

"BRITISH NEWS" FIFTY YEARS AGO.

Now that the slightest rumor from the Far East is received by the Associated Press a few moments after it becomes current at the scene of naval or military action on the part of Russia or Japan, it may be interesting to recall how war news was received in America in the days of the Crimean War. The story is related this week to us by a Halifax man, but it has been made public some years ago, if we remember rightly, by J. D. Reid, in his book, 'The Telegraph in America." D. H. Craig was another of the three men mentioned as transmitters. At the date mentioned, 1853 to 1856, no Atlantic cable existed, nor were there scores of ocean greyhounds to New York; the whole American continent had to depend upon the wire from Halifax for its news from Europe. The responsibility for the transmission of the news rested upon three men. One of these, afterwards well-known as James Hunter-Duvar, a Canadian poet, had his office in London, England, where he carefully boiled down the market and war news from the latest editions of the London papers. This bundle he soldered up in a tin can, from which projected a little staff with a flag on it. This he confided to the care of the purser of the Cunard Line steamer bound for Halifax. When the steamer entered the harbor, some three miles from the pier, the can was thrown overboard, where two men in boats awaited it, and taking it ashore a fast horse soon brought it to the door of the telegraph office, and in a few seconds the latest market and war news was being received in New York.

If all went properly, the news was well on its way before the steamer was docked. To save an hour's time, all this trouble and expense was taken, the object, of course, being to occupy and hold the single telegraph line to New York before passengers could land and send private reports emanating from the other side of the Atlantic. To get a hint to one of the great centres on this side affecting the market would have meant fortunes for the speculators if it could be got ahead of the "Press Report." Years afterwards, Ed. Stokes, Jr., actually bought a fast steamer and sent her to Halifax and kept her there for months with steam up constantly awaiting the end of the American Civil War. When the end came the steamer left for England and things were done on the London market which meant money enough to pay for many steamers. "Halifax in those days," says our correspondent, "was the front door of not only Canada but of the North American Continent, a position she owed solely to her geographical position. Is it any wonder that Haligonians, remembering these things, should be somewhat impatient at governments and western commercial influences which delay the giving of a fast ocean line, that would restore to a Canadian route at least the Canadian business which now passes through New York."

The well-known press superintendent of the Great North-Western Telegraph Company, Mr. Robert F. Easson, whose acquaintance with telegraphic matters in this country extends far back, favors the editor with the following memorandum on the subject in hand: "Re our conversation about Crimean war news, 'by bottle,' at Halifax harbor, the scheme you mention was similar to that in operation at Father Point in my day. At the instigation of D. H. Craig, the Montreal Telegraph Co. extended their wires to Father Point 250 miles below Quebec, in 1859, and in May of that year Father Point telegraph station was opened, the first ocean steamer with Old Country news arriving early in June.

"The news was prepared in the Old Country and was enclosed in a little tube-shaped tin box, loaded at one end in order to allow of its floating when thrown into the water. The same box was returned to the Old Country with the latest news of this side, by the next out-going steamer. The steamer left Quebec in the morning, and the news of anything occurring on this side after she left was sent to Father Point to catch her there on her way out. The despatches were all addressed to D. H. Craig, New York, and those sent home were signed by Craig, who, I have understood, paid the Montreal Telegraph Co. $100 for the news every time a steamer arrived. Craig was the great newsman on this side of the Atlantic at that time."

MUTUAL LIFE OF CANADA.

It is of much interest to examine the comparative table of assets, income, surplus, etc., published by the Mutual Life Insurance Company of Canada in their report for 1903. The small figures of the business of 1873 and 1878 make a marked contrast with those of 1893 and 1898, while the totals of last year greatly overtop them all. Between 1898 and 1903 there has been a growth in assets of $3,162,000; in total assurance of $13,883,000; and in income of $637,000, figures which bear strong testimony to the popularity of the company. Compared with 1902, the statistics of last year show marked gains. New assurance grew from $4,627,000 to $5,011,000; assets from $6,459,000 to $7,298,000; and surplus by the company's standard from $499,000 to $616,000. It must be gratifying to the friends of this long-established Canadian company to learn that the new business of 1903 was the largest in its history.

It used to be said in its earlier days that the company gave away to policyholders more than could wisely be afforded of the profits earned. May be this was not wise generosity, but it was popular generosity. And the surplus, though for ten years it grew slowly, has now reached such figures that there need be no apprehension. The death rate has again, we are told, been below the expectation; the death claims amounted to $253,586. The amount of surplus divided among policyholders was $77,300; paid for matured endowments, $122,587; paid to annuitants, $8,275; purchased policies, $31,972, making the handsome total of $493,721 paid to policyholders. The company's reserves are calculated upon the lowest standards, and the cash assets are of the most advantageous character. Its earning power is good, and the payments of interest remarkably well met.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

Among the steadily earning mortgage companies of this province is the Guelph and Ontario Investment Society. It took power about a year ago to do business in Manitoba and the North-West, and accordingly it has begun in that territory as well as in Ontario, the result contenting the management. The year's new loanings were unusually large —$642,000, though a considerable amount of its previous loans must have fallen in, for the total of mortgages and other securities is only increased from $1,780,000 to $1,841,000 in the year. Net profits were almost exactly the same as in 1902, but a trifle more is carried forward, after paying dividend of 8 per cent.. Mr. Petrie, in his presidential address dwelt upon the congested state of the loan market in Ontario reducing the interest rate on mortgages to a low point, and he deemed the Western departure to promise well for increased profits. Payments of interest and principal have been promptly met. Kind and sympathetic words were spoken at the meeting, of the deceased directors, Messrs. Innes and Phin.

HAMILTON PROVIDENT AND LOAN SOCIETY.

The net earnings of this company, which has now passed its thirty-second year, were larger for 1903 than for several previous years. They were sufficient, after providing for losses and shrinkage, to pay the usual dividend, to write $2,000 off the head office building, add $25,000 to reserve fund, and place $3,098 to contingent account. The net profits of $95,247 are at the rate of 8.66 per cent. on the paid capital of $1,100,000, a very satisfactory rate of earning. The amount of the reserve fund is now $390,000. An increase is recorded in assets, corresponding to which the borrowings on deposits and domestic debentures are both slightly higher, while the Old Country borrowings are the same in amount, though differing somewhat in form.

The Hamilton Provident has always manifested care in its investments, not showing a disposition to touch anything of a speculative or variable character. Indeed, the management has not thought it necessary to keep on hand bonds or debentures. Out of total investments of $3,454,612, the company has $3,369,693 invested on first mortgages on real estate, principally on improved farms in Ontario and Manitoba. Its other assets are its business premises and $152,000 in cash. The death of the vice-president, Mr. T. H. Macpherson, caused a vacancy on the board which has not been filled, the number of directors being reduced to six. Mr. George Rutherford has been chosen to the vice-presidency.

BRITISH COLUMBIA PERMANENT LOAN CO.

The career of this company, which is only six years old, illustrates what can be done in a new country by taking advantage of the natural demand and assisting those who are prosperous in a small way to acquire dwellings or homesteads for themselves. Five hundred loans were made during the year, the report tells us, and the total number of loans is 1,167, their average $835 each. And the amount loaned is only 47 per cent. of the value of the property loaned upon. The rates for money in British Columbia are favorable; seven and even eight per cent. interest can be obtained there on mortgage. The average rate of this company is about seven and a quarter, which is a considerably higher rate than Ontario mortgage loan companies get. The company's assets are stated at $1,066,248. Of these, $974,050 represents first mortgages on real estate; some $10,000 represents the company's investment in a fire insurance company, and $31,611 that in a site for a present office and a future head office building; the remainder consists of loans on company's stock, real estate, etc. Of the liabilities, $125,692 is to the public, viz., $20,299 in debentures and $105,393 to the bank. To shareholders, the liabilities are $1,047,000, in addition to $19,040 in reserve and contingent fund. Of capital stock there are five kinds, namely, permanent, $100,000; prepaid, $100,000; full paid, $199,300; deposit, $84,040, and instalment —but the greatest of these is instalment, for it amounts to $310,165. The Government Inspector certifies the balance sheet, and approves the dividend. This dividend, calculated upon the whole shares, appears to amount to 7.27 per cent., but is credited in the report at the rate of six, seven and eight on different classes of stock. Sales of its stock have been made, the president tells us, at from $130 to $135 per $100 share during the year, the premium being placed to reserve fund. The company has an office at Victoria, and also does business in the Atlantic provinces in the way of both lending and borrowing. We said a year ago that there appeared to be a good future before this company. We still think so.

NATIONAL LIFE ASSURANCE COMPANY OF CANADA.

The meeting last week of the National Life was of a very harmonious character. In addition to policyholders and shareholders from Hamilton, London and Toronto, there were present Mr. Hart, of Halifax, one of the directors; Dr. George L. Milne, of Victoria, and Dr. Hetherington, of St. John. The management was able to make a very encouraging exhibit. A million and a half of new business was written in 1903, and the total in force on the 31st December exceeded $4,000,000, with a premium income of over $150,000. This is very satisfactory. A further sum of nearly $70,000 has been added to the company's reserve for the protection of its policyholders. The investments are in Government and municipal bonds, which are among the safest and least variable of securities. The retiring directors of the company were re-elected, and Mr. Elias Rogers was again chosen president, Mr. A. S. Irving, of Toronto, and Mr. W. D. Long, of Hamilton, were re-elected vice-presidents.

CROWN LIFE INSURANCE COMPANY.

The annual meeting was held on Tuesday, 1st March. Considering the disabling of some of the best agents during the year because of illness, the amount of new business secured was very fair indeed. The receipts for premiums and annuities exceeded $70,000, and the outstanding and deferred premiums are $25,000 more. In the address of the president, Sir Charles Tupper, attention was drawn to the pleasing fact that several of the older policyholders increased the amount of their insurance with the company. In urging the claims of Canadian life companies to consideration before those of other countries, Sir Charles expressed the hope that "the Canadian manufacturers, who are very pronounced in their appeal to Canadian people to purchase their goods, will reciprocate at least to the extent of confining within this country their life insurance investments." Mr. Samuel Barker, M.P., drew attention to the fact that increases are shown in 1903 over 1902 in applications received and in new business issued by the Crown Life, and to the further fact of a reduced ratio of expense. Remarks upon the position and prospects of the company were also made by W. Barclay McMurrich, K.C., who presided in the absence, through detention on a snow-bound train, of Sir Chas. Tupper; and Mr. George H. Roberts, managing director, further elucidated the remarks of the president as to premium investment and the cost of business.

FEDERAL LIFE ASSURANCE COMPANY.

An increase in new business; an increase in total assurance in force, and a very decided increase in assets are features of the business of the Federal in 1903. The year's income was $574,196, and after expenses and claims had been paid, there was a balance of $197,799 remaining. The claims we remark, were slightly less than in 1902, amounting as they do to $130,234. Other payments to policyholders were in the shape of cash dividends, reductions of premiums, and annuities, amounting to $73,383. Thus the total paid to policyholders was $204,018. The total insurance carried has been raised to $14,945,249. Among the assets, which now amount to $1,893,960, there is $639,431 in mortgages—a decreased amount—and $549,742 in debentures and bonds—an increased amount. Besides $280,538 consisting of loans on policies, stocks and bonds, there is a sum of $424,000 of unspecified assets. After providing for reserve and all liabilities, there is a surplus on policyholders' account of $182,760, a satisfactory increase from the previous year. The investments, the report tells us, yielded a satisfactory rate of interest. To replace Mr. T. H. Macpherson, whose regretted death is mentioned, Rev. Dr. Potts was elected second vice-president.

—Snow in the streets costs Montreal a pretty penny. On last Friday the finance committee met and voted $25,000 for the removal of snow from the streets. Ald. Lariviere asked for $40,000, but it was not thought advisable to go beyond the sum mentioned. From snow on the streets to snow on the sidewalks is only a step, but the sidewalk cleaning by-law is neglected by the citizens. Ald. Carter was of the opinion that $15,000 should be voted towards opening gullies, and $10,000 to the removal of snow from the streets. Accordingly, this sum was voted.

BANKING AND FINANCIAL ITEMS.

The Halifax Chronicle understands that Mr. Michael Murphy and Dr. M. A. Curry have been elected directors of the People's Bank of Halifax.

At the annual meeting of the Bank of British North America, in London on Tuesday last, the report was adopted and a dividend of six per cent. declared.

We are advised by circular that the business of J. A. Halsted & Co., private bankers at Mount Forest, has been taken over by the Sovereign Bank of Canada. Mr. George Reid, who has been eighteen years in Halsted & Co.'s office, will be the manager of the Mount Forest branch of that bank.

A dainty piece of book-making is the report and share-list of the Royal Bank of Canada, just issued in pamphlet form. The illustrations of the bank's offices at various points from Sydney, C.B., to Havana, Cuba, are an attractive feature. It was an excellent idea, too, considering the wide distribution of the bank's shareholders in countries beyond the Dominion, to add a dozen or two of pages containing statistical and other information about Canada's area, population, trade, revenue, products and exports. Pages 49 to 54 are most illuminating; their compilation has cost some one careful and continued labor.

The stonework is begun on a new seven-story building, on St. James St., Montreal, for the Metropolitan Bank. It is being erected, says the Gazette, by M. Louis Beaudry, under arrangement with the Guardian Assurance Company. The site is next door east of the Temple Building. The front of the building is to have a base of Stanstead granite, the other stories will be of Indiana limestone. Classic three-quarter columns will be a feature of the first story. The decoration of the entrance hall, ten feet wide, is to be entirely of marble; the bank counters and dados also of marble.

It has been held again in the courts that interest at the rate of 120 per cent. may be legally charged and collected by legal process. The lot of the borrower, who does not have regard to what he signs, can be very hard in Montreal. —Montreal Gazette.

Comparison of the bank clearing house figures at Canadian cities for two months of this year and last show that the volume of transactions was on the whole less in 1904 than in 1903. The British Columbia clearing houses, Winnipeg, Hamilton and St. John show increases; all the rest show declines, especially Montreal and Toronto. There is less speculation in stocks now, probably, than there was early in 1903. Here are the figures:

	Two Months, 1904.	Two Months. 1903.
Montreal	148,093,568	162,184,678
Toronto	118,386,542	136,528,344
Winnipeg	40,550,726	32,353,939
Ottawa	15,057,032	15,580,173
Halifax	13,362,488	14,122,054
Quebec	10,106,621	10,393,336
Vancouver, B.C.	10,740,694	8,589,178
Hamilton	8,745,844	8,191,555
St. John, N.B.	7,162,748	6,965,300
Victoria, B.C.	5,336,195	4,695,684
London	6,413,267	6,620,153
Total	$383,955,725	$406,223,394

GODERICH BOARD OF TRADE.

The annual meeting of the Goderich Board of Trade was held on Monday evening February 22nd. Mr. Alexander Saunders, the president, being absent from town, Mr. C. A. Nairn, vice-president, took the chair at the adjourned annual meeting, and read the president's report.

It congratulated the members that by reason of the Board's persistent action, the Federal Government is committed to a breakwater across the mouth of the piers and the further deepening of the channel up to the large elevator, an appropriation having been granted for this purpose. Note is taken of the marked improvement of the wharves, and the prospect of an increased shipbuilding industry. There is likelihood, it seems, of the C.P.R. building a branch from Guelph to Goderich this year. The summer hotel is a great means of attracting people to the town in the pleasant months. Among the town's industries mentioned by the president are the furniture factory, the knitting company, the organ company, the engine company, the lumber company, the elevator company, the milling company, the Dyment lumber business, various builders and joiners, and a planing mill company. We should like to have room to give the facts and figures about these industries with which the Goderich Star supplements the president's address. Out of several apple buyers at Goderich last year, one of them, Mr. Robt. Elliott, shipped 13,000 barrels. Mr. Saunders considers the prospect to be that 1904 will be the best year in the town's history. The same officers as last year were returned by acclamation, viz.: President, Alex. Saunders; vice-president, Charles A. Nairn; secretary, James Mitchell; treasurer, W. A. McKim.

TORONTO BOARD OF TRADE.

Wednesday last produced a new record in the history of the Toronto Board of Trade. All its new officers for the ensuing year were elected by acclamation. They are as follows: President, John F. Ellis; vice-president, J. D. Allan; second vice-president, Peleg Howland; treasurer, George Edwards. Council—Messrs. John Pugsley, R. C. Steele, W. F. Cockshutt, E. A. Wills, J. D. Ivey, R. J. Christie, C. G. Marlatt, Noel Marshall, W. J. Gage, J. W. Woods, Robert Inglis, E. J. Dignum, Arch. Campbell, M.P.; Hugh Blain, Joseph Oliver. Board of Arbitration—James Carruthers, Thomas Flynn, D. Plewes, Jr.; F. C. Jarvis, D. O. Ellis, Hedley Shaw, W. D. Matthews, W. K. McNaught, D. O. Wood, J. C. McKeggie, M. C. Ellis, John I. Davidson. Representatives on Harbor Commission—J. H. G. Hagarty, J. T. Mathews. Industrial Exhibition—John Carrick, R. Y. Ellis, C. W. Band, Andrew Gunn, S. E. Briggs. It will be noted that the chief changes were in the election of Mr. Peleg Howland, to the office of second vice-president, in succession to Mr. E. R. Wood, and of Mr. George Edwards to be treasurer, in place of Mr. J. L. Spink, resigned. The annual meeting of the board will take place next Tuesday.

A BOARD OF TRADE FOR PRESTON.

On the 4th inst. an influential meeting was held in Preston, Ont., for the purpose of considering the formation of a board of trade for that town. The upshot was the unanimous passing of a resolution, moved by Mr. George A. Clare, M.P., and seconded by Mr. Jacob E. Klotz, to organize such a body at once. Mr. A. D. Pringle was appointed secretary. The suggestion was made that every board of trade in the County of Waterloo should take united action in furthering projects of advantage to every municipality within its bounds.

FOR GROCERS AND PROVISION DEALERS.

The total exports of apples to Europe from Canada and the United States during the season, up to end of February, were about 3,250,000 barrels, the largest quantity on record. It was considerably larger than during the entire season of 1896-97, which beat the record up to that time.

Advices from Britain say that the consumptive demand for Canadian cheese continues good, but the recent improvement in business had been nullified in many cases by the dealers under-selling one another, which naturally caused buyers to pause and wait events. At this time of the year, Old Country dealers generally make an attempt to keep prices from being too high, so as to be prepared for the new cheese season.

The Orr Bros.' oatmeal mill at Windsor, Ont., is reported to have been taken over by the Canadian Oatmeal Manufacturing Company. This makes the twenty-fifth mill owned by this combination in Ontario alone.

A good season is anticipated in England for Canadian butter, owing to the partial stoppage of supplies from Siberia. Hence people over there look for a large increase in the production of butter at the opening of the dairy season, and a diminution in that of cheese.

Mr. W. W. Moore, of the Chief Markets Division, Department of Agriculture, at Ottawa, has been procuring facts and statistics regarding the prospects in Great Britain for Canadian honey. In 1902, that country imported £27,126 worth, of which only £316 was from Canada. It appears that the greatest difficulty lies in getting Canadian exporters and British importers to agree. Canadian shippers wish to sell outright,, as they claim that the expenses charged by British commission firms eliminate all profits. The British importer objects to buying goods in Canada by sample, as it has been found that the bulk when shipped has not been up to sample. The most satisfactory method would be for Canadian shippers to have a representative in Britain, who could effect sales by samples; if goods did not prove equal to samples, the differences could be settled on the spot. The British trade finds great objection to the lack of uniformity in color, quality, etc., of Canadian honey.

TORONTO STOCK TRANSACTIONS.

Business on the local Stock Exchange has been exceedingly dull, partly in sympathy, no doubt, with conditions in the States and Europe, which are affected by the war, and partly because there has been so far no real recuperation from the collapse in the stock market a year ago. There is no really striking feature to note, and all stocks are very dull, though prices are maintained on a fairly equable basis. The principal transactions for the week were as follows: Ontario Bank, 10 at 125; Toronto, 1 at 227½; Commerce, 126 at 150-151; Imperial, 10 at 212⅛; Hamilton, 21 at 206; Traders, 6 at 155½; Dominion Steel, 50 at 8¼; bonds,, $3,000, at 52¼; Dominion Coal, 1,400 at 53¼-56¼; Nova Scotia Coal, 115 at 72½-73; bonds, $6,000, at 101½; Sao Paulo, 529 at 89⅞-90¼; C.P.R., 1,014 at 110-111½; Richelieu & Ontario Navigation, 95 at 79¼-80; Toronto Rail., 75 at 96½-98; and Twin City, 190 at 87⅛-88¼.

MORTGAGE COMPANIES' ASSOCIATION.

The annual meeting of the Land Mortgage Companies' Association of the province of Ontario was held in the board room of the Canada Permanent Mortgage Corporation, Toronto, on Thursday, the 10th inst., at 2 o'clock. The president, Mr. J. Herbert Mason, occupied the chair and the secretary-treasurer, Mr. George H. Smith, acted as secretary of the meeting. There were present representatives from London, Brantford, Hamilton, St. Catharines, and Port Hope, as well as of a number of Toronto companies. The annual report of the executive committee informs us that the association is composed of 28 Ontario loan companies, possessing assets on the 31st December, 1903, amounting to upwards of $90,000,000. The report also presented an outline of the legislation affecting loan companies introduced into the Legislature of Ontario and the Parliament of Canada during the past year, and the provisions of the bill regarding assessment now before the Provincial Legislature, as it will affect loan corporations. The report, together with the treasurer's statement of receipts and disbursements, was unanimously adopted. The officers and executive committee were re-elected as follows: President, J. Herbert Mason; 1st vice-president, William F. Bullen, London; 2nd vice-president, Hon. George A. Cox; secretary-treasurer, George H. Smith, and Messrs. James Mason, V. B. Wadsworth, W. Gillespie, R. S. Hudson, George M. Furby, (Port Hope), R. S. Schell (Brantford), C. W. Cartwright and C. Ferrie, (Hamilton), William Buckingham (Stratford).

DRY GOODS ITEMS.

The lamentable news of the death of Mr. E. T. Carter, the well-known wool and hide merchant, of Toronto, came as a shock to his many friends in Canada. But a very short while ago Mr. Carter went to Nassau, Bahama Islands, in the hope of recovering from the after effects of an attack of grippe, and it was at that place that the end came, quite unexpectedly. Mr. Carter was born at Beamsville, Ont., fifty-seven years ago. He was for some thirty years connected with the business of Mr. John Hallam, whose manager he became, and shortly after that gentleman's death in 1900 took over the business, which he has continued since. Mr. Carter was a most estimable man, with a creditable business career, and prospects of still further success. Many in this city will miss his kindly face and his warm manner. Many of his beneficiaries, too, will mourn his untimely death.

The demand for wool in the Boston, Mass., market continues moderate, but values are firm throughout all grades. The slow sale of woolens for next fall is disappointing to manufacturers, and as long as this continues they see no inducement to stock up on wool. The cold weather is very favorable for the sale of heavy clothing, however, and it looks as though supplies on hand would become well cleaned up. If this is the case, liberal supplies of woolens will have to be made up for next fall even if orders do come in late. There is no doubt but that the troubles in the far East and the coming presidential election have something to do with the conservatism shown by clothiers in ordering supplies for next fall. While general conditions have been of the best for their trade, the tendency has been to wait a time for future developments before spreading out too much ahead. Values for wool the world over are firm, and statistically the market is in a strong position.

—We are informed that certain "accountants" in the United Kingdom, more particularly in London, have for local reasons, (and, probably because of the unfortunate differences in parliamentary movements between the English Institute of Chartered Accountants and the other recognized bodies), organized another company under the limited liability companies' acts, to carry on the organization of public accounting, et al. The noticeable feature is that this new "company" has adopted the professional title of the legally-established institutes of qualified accountants in the United States. They have registered under the name of "The Institution of Certified Public Accountants," and desire to use the initials, C.P.A., with the letters F. or A. to denominate the members as of either the class of Fellow or Associate. Both the recognized bodies of British accountants, chartered and incorporated, appear to resent the action of the newly registered society, and vigorously comment on the adoption of the borrowed plumage of the American accountants. If "borrowed" is the right adjective, it must remain an open question!

—At the banquet of the Canadian Manufacturers' Association, at the Chateau Frontenac, in Quebec, on Saturday, some one hundred and fifty guests were present, including Hon. Mr. Fitzpatrick, Minister of Justice, and Hon. R. Prefontaine, Minister of Marine. The former gentleman, in responding to the toast of "Canada and the Empire," and giving some pleasing statistics to demonstrate the advancement of the country's trade since Confederation, for which the percentage was 107 of an increase, compared with 46 per cent. in the States and 26 in Great Britain, made further some very significant remarks. "Canadians," he said, "would never allow Canada to be sacrificed for the benefit of European manufactured goods, or allow this country to be the dumping ground for goods manufactured in the United States. He was not in favor of a Chinese wall being built around Canada, but if the country should ever be in danger of becoming a slaughter ground for American goods, he was perfectly willing to add the coping stone."

—A self-denying piece of municipal economy is reported from Rossland, British Columbia. The city council has reduced the Mayor's annual allowance from $1,000 to $600, Mayor Clute acquiescing, and wiped out the aldermanic salaries completely. This effects an economy of over $2,000 during the year.

—As a result of Sir William Mulock's recent visit to Mexico, negotiations are now under way for the establishment of a monthly steamship service between Canada and that country. At present the trade between the countries is small, but there is reason to think it could be developed largely. It is stated that the Mexican Government will pay half the subsidy for such a line.

—The British Columbia Mining Association at their convention in Victoria a few days ago, elected officers as follows: John Keen, president, (re-elected); J. B. Hobson, first vice-president; and Roland Machin, second vice-president. An interesting discussion took place on the proposal that mining machinery and supplies should be admitted into Canada free of duty, except where articles of equal quality could be procured of Canadian manufacture or production at a price not greater than that at which they are sold to the foreign home consumer.

—The fifth annual meeting of the Canadian Forestry Association opened yesterday morning in the Parliament Buildings, Toronto. Among the important papers on the programme are some on "Forest Management," by Mr. John Bertram; "Crown Timber Regulations of the Various Provinces," by Mr. Aubrey White; "Some Ontario Forest Problems," by Prof. H. L. Hutt; "Forestry Education," by President Loudon; "Forest Reproduction in Germany," by Dr. A. H. Unwin; "Forestry in Relation to Irrigation," by J. S. Dennis, commissioner for irrigation to the Canadian Pacific Railroad.

—The Land Commissioner of the Canadian Pacific Railway reports that the Department of Agriculture, at Regina, has filled in the official returns of the crop yield for 1903 for the North-West, exclusive of Manitoba, and they show the following figures:

	Bushels.	Acres.	Yield Per Acre.
Wheat	16,029,149	837,234	19.
Oats	14,179,705	440,662	33.78
Barley	1,842,824	68,974	24.85
Flax	292,852	19,390	11.27

—That post office registration is a great safeguard for correspondence is proven by the report of the P.O. Department for 1903. In the twelve months covered by the statements there had been placed in the various offices 5,470,000 registered letters and packets. Out of this great number only 114 letters did not reach their destination intact, that is, one in about fifty thousand. And there were only 17 cases in which, after enquiry, the department could not show what became of them. In some cases fire, in others burglary of the post offices accounted for the loss of letters. The showing is one which reflects great credit upon the Canadian Postal Department.

Meetings.

THE MUTUAL LIFE OF CANADA.

The following is the thirty-fourth annual report, which was presented to the annual meeting of the policyholders, Thursday, March 3rd, 1904.

REPORT.

Your directors respectfully submit for your consideration their report of the business for the year ended December 31st, 1903, with the financial statement duly audited.

We are pleased to inform you that, in all branches, the business was of a most gratifying character, and that the new business was largely in excess of that of any other year in the history of the company. The surplus earnings were such as enabled us to continue the same very liberal scale of distribution to the policyholders, as in the past. The death rate was slightly in advance of that of 1902, but still much below the expectation. The lapses and surrenders have been gradually decreasing for some time, and for the past year were comparatively moderate.

New and Old Business.—The applications received for new business were 3,518 for $5,173,112, of which 47 for $72,500 were declined. The policies issued were 3,333 for $5,011,390, and the amount of insurance now in force is $37,587,551.58, under 25,730 policies, being an increase in amount of $3,118,631.

Income.—The net premium income, less reinsurance, was $1,254,986.47; interest and rent, $306,007.48; profit and loss, $76.08; total income, $1,561,070.03.

Payments to Policyholders.—The payments to policyholders were: Death claims, $253,586.95; endowments, $122,587; purchased policies, $31,972.18; surplus, $77,300.28; annuities, $8,274.90; total, $493,721.31; expense account, $282,728.43; total disbursements, $776,449.74. Excess of income over expenditure, $784,620.29.

The cash assets amount to $6,882,953.83; the total assets are $7,298,552.12, an increase over 1902 of $838,772.04.

Liabilities.—The total liabilities are $6,676,224.19, including the requisite reserve of $6,617,714.89 for the security of policyholders, computed at 4 per cent., 3½ per cent., and 3 per cent.

Surplus.—The surplus of the company's standard of valuation is $616,633.46, and on Government standard $878,466.00. The increase in surplus is $117,483.22.

During the year the demand for money was active, and the funds were fully invested, at a somewhat better rate of interest, and in a class of securities entirely outside anything of a hazardous or speculative character. The payments on principal and interest were unusually well met there being only $5,998 overdue interest at the close of the year, most of which has since been paid.

The executive committee examined all the securities, and compared them with the records, all of which were found correct, and in accordance with the statement herewith submitted.

The manager, officers and staff continue to discharge their respective duties to the satisfaction of the board.

You will be called upon to elect four directors, in the place of the Hon. Mr. Justice Britton, Francis C. Bruce, M.P.; J. Kerr Fisken, and George A. Somerville, whose term of office has expired, but all of whom are eligible for re-election.

On behalf of the Board,

ROBT. MELVIN, President.

1903	1,561,070	493,721	7,298,552	616,633	37,587,551

The various reports having been adopted, the retiring directors were unanimously re-elected. After a number of able and thoughtful addresses had been made by members of the Board, prominent policyholders, the agents, and others, the meeting adjourned.

The directors met subsequently and re-elected Mr. Robert Melvin, president; Mr. Alfred Hoskin, K.C., first vice-president, and the Hon. Mr. Justice Britton, second vice-president of the company for the ensuing year.

[Booklets containing full report, comprising lists of death and endowment claims paid, of securities held, and other interesting and instructive particulars are being issued and will in due course be distributed among policyholders and intending insurants.]

W. H. RIDDELL, Secretary.

THE FEDERAL LIFE ASSURANCE COMPANY OF CANADA.

The twenty-second annual meeting of the shareholders of the Federal Life Assurance Company of Canada was held at the head office of the company in Hamilton on Tuesday, March 1, 1904. The president, Mr. David Dexter, in the chair. The following reports and financial statement were submitted:

DIRECTORS' REPORT.

Your directors have the honor to present the report and financial statement of the company for the year which closed on the 31st December, 1903, duly vouched for by the auditors.

The new business of the year consisted of one thousand nine hundred and fifty-seven applications for insurance, aggregating, $2,841,250, of which nineteen hundred and sixteen applications for $2,748,172.50 were accepted.

As in previous years, the income of the company shows a gratifying increase, and the assets of the company have been increased by $251,572.89, and have now reached $1,893,960.70, exclusive of guarantee capital.

The security for policyholders, including guarantee capital, amounted at the close of the year to $2,763,960.70, and the liabilities for reserves and all outstanding claims, $1,711,200, showing a surplus of $1,052,760.70. Exclusive of uncalled guarantee capital, the surplus to policyholders was $182,760.70.

Policies on seventy lives became claims through death, to the amount of $130,234.62, of which $2,000 was re-insured in other companies.

Including cash dividends and dividends applied to the reduction of premiums, $41,770.78, with annuities, the total payments to policyholders amounted to $204,018.49.

Careful attention has been given to the investment of the company's funds, in first-class bonds, mortgage securities and loans on the company's policies amply secured by reserves. Our investments have yielded a very satisfactory rate of interest.

Expenses have been confined to a reasonable limit, consistent with due efforts for new business.

The results of the year indicate a most gratifying progress. Compared with the preceding year, the figures submitted by the directors for your approval show an advance of fifteen per cent. in assets.

The assurances carried by the company now amount to $14,945,249.56, upon which the company holds reserves to the full amount required by law, and, in addition thereto, a considerable surplus.

The field officers and agents of the company are intelligent and loyal, and are entitled to much credit for their able representation of the company's interests. The members of the office staff have also proved faithful in the company's services.

Your directors regret to report the death of Mr. T. H. Macpherson, the second vice-president of the company, and a valued member of the executive committee. The vacancy thus caused was filled by the election of the Rev. Dr. Potts.

DAVID DEXTER,
President and Managing Director.

AUDITORS' REPORT.

To the President and Directors of the Federal Life Assurance Company:

Gentlemen,—We have carefully audited the books and records of your company for the year ending 31st December last, and have certified to their accuracy.

The cash and journal vouchers have been closely examined and agree with the entries recorded.

The debentures, bonds, etc., in the possession of the company have been inspected, whilst those deposited with the Government or banks have been verified by certificate, the total agreeing with the amount as shown in the statement of assets.

The accompanying statements, viz., revenue and assets and liabilities, show the result of the year's operations, and, also, the financial position of the company.

Respectfully submitted,

H. S. STEPHENS, CHAS. STIFF, } Auditors.

Hamilton, 1st March, 1904.

FINANCIAL STATEMENT FOR 1903.

The foregoing reports and statement were received and adopted on the motion of president David Dexter, seconded by vice-president Lieut.-Col. Kerns.

The retiring directors were re-elected, and at a subsequent meeting of the directors the following officers were re-elected: Mr. David Dexter, president and managing director; Lieut.-Col. Kerns and Rev. Dr. Potts, vice-presidents.

HAMILTON PROVIDENT AND LOAN SOCIETY.

The thirty-second annual meeting of the shareholders of the society was held at the society's head office, Hamilton, at eleven o'clock on 7th March. Among those present were the following: Alex. Turner, James Webster, H. W. Clarkson, D. F. Sutherland, John Kenrick, H. H. Anderson, John H. Coon, George Rutherford, James W. Simpson, J. T. Glassco, Alex. Main, Judge Snider, George Hope, John McCoy, George LeRiche, David Kidd, Rev. George Forneret, Hon. William Gibson, Col. A. H. Moore, P. D. Crerar, Richard Butler, T. H. Crerar, James D. Wilson, John Eastwood, D'Arcy Martin, W. J. Reid, A. McEachern, William Dixon, C. Ferrie, W. F. Findlay, Judge Robertson, D. M. Cameron, Charles Judd.

The president, Alexander Turner, in the chair.

C. Ferrie, treasurer, acted as secretary.

The secretary read the report and annual statement, as follows:

REPORT.

The directors have much pleasure in submitting the thirty-second annual report of the society's affairs, and accompanying financial statement, duly audited.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management and other charges, amount to $95,247.02, out of which two half-yearly dividends at the rate of 6 per cent. per annum were paid, together with taxes on capital and income, and the balance, $28,098.02, has been applied as follows:

Added to reserve fund	$25,000 00	
Credited to contingent fund	3,098 02	
		$28,098 02

After writing off all losses, providing for possible shrinkage in value of securities, also writing $2,000 off the society's buildings, there remains at the credit of the contingent fund, $4,178.46.

The reserve fund now amounts to $390,000.

The society now has $3,369,693 invested on first mortgages on real estate, out of total investments of $3,454,612.90, the balance being invested in municipal debentures and on call loans on high class securities.

The repayments by mortgagors have been very satisfactory.

The directors have to record, with deep regret, the death, during the year, of their late vice-president, Mr. T. H. Macpherson. The vacancy on the board created by his death has not been filled, and the shareholders will be asked to confirm a by-law reducing the number of directors to six, and otherwise amending the society's present By-law, No. 14.

At a meeting of the board, held 22nd June, Mr. George Rutherford was unanimously elected vice-president.

All of which is respectfully submitted,

ALEX. TURNER, President.

1st February, 1904.

C. FERRIE, Treasurer.

27th January, 1904.

We hereby certify that we have examined the books, accounts and vouchers of The Hamilton Provident and Loan Society, and have found the same correct. We have also examined the securities (excepting those relating to Manitoba loans), and find them in perfect order, and correct, as set forth in the above statement.

W. F. FINDLAY, F.C.A.,
MAITLAND YOUNG,
Auditors.

Hamilton, 30th January, 1904.

I hereby certify that I have examined the securities and vouchers and audited the books of The Hamilton Provident and Loan Society for the year ending 31st December, 1903, as kept in their Brandon office, and have found them correct.

H. L. ADOLPH, Auditor.

Brandon, Man., January 28th, 1904.

On motion of the president, seconded by the vice-president, the report was adopted.

The following gentlemen were re-elected directors: Alex. Turner, George Rutherford, Hon. William Gibson, John T. Glassco, Judge Snider, George Hope.

At a meeting of the directors, held after the annual meeting, Alexander Turner was re-elected president, and George Rutherford, vice-president.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

The directors of the Guelph and Ontario Investment and Savings Society present to the shareholders their report for the year ended December 31st, 1903.

REPORT.

After paying all cost of management, municipal and government taxes and license fee, interest on deposits and debentures, etc., etc., the net profits, including $4,282.54 brought forward from last year, amount to $43,732.43. This sum has been appropriated as follows:

Dividend No. 54, paid 2nd July, 1903	$17,760 00
Dividend No. 55, paid 2nd January, 1904	17,760 00
Amount carried forward	8,212 43

The reserve fund amounts to $181,000, balance carried forward $8,212.43, and the total assets of the society are $1,909,813.78.

During the year applications for loans amounting to $782,420 were received, and from these investments to the amount of $642,394.15 were selected and granted and $230,025.85 declined.

Carrying out the views expressed by the shareholders at last general meeting, and in pursuance of the authority then given by by-law, respecting loaning in Manitoba and the North-West Territories, we have done considerable business in those sections during the year; a thorough inspection has been made of all properties loaned upon, and we have pleasure in reporting that the business is of a very satisfactory character and that our operations have been conducted at a moderate cost.

Payments of interest and principal of mortgages have been promptly met during the year. This applies to loans in Manitoba and the North-West as well as to Ontario.

It is with deep regret that we record the death of two valued members of the board, Mr. John Phin and Mr. Jas. Innes, who had long been directors of the society, and who, from its inception, had always taken an active interest in everything pertaining to the society's welfare and advancement; and we feel that you will join with us in expressing our sincere sympathy with the bereaved families.

The officers of the society continue to discharge their duties to the satisfaction of the board.

As usual, the books and accounts have been carefully examined every month, and the auditors' report is presented herewith.

All of which is respectfully submitted.

A. B. PETRIE, President.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31st DECEMBER, 1903.

	$1,066,248 03

THOS. T. LANGLOIS, President. GEO. J. TELFER, Sec.-Treasurer.

The president then said:

Gentlemen,—Before moving the adoption of the reports, as read, I wish to say that the operations of the company for the past year have been most satisfactory to all concerned. The growth of the company was not only far in excess of any previous year, but was also far in excess of the growth of any similar company in the Dominion of Canada, the actual increase for the year being over one-third of a million dollars. This result has been made possible by strict adherence to the principles upon which the company was founded, that is, the complete fulfilment of every promise made by the company, and crediting of the necessary dividends to mature all stock within the time estimated. We have made it a rule to credit dividends first. This course makes it necessary to keep expenses within the limit of the amount left out of earnings after payment of dividends.

The demand for loans still continues in excess of the company's ability to supply funds, and notwithstanding the very large monthly income which the company now enjoys, we have found it advisable to draw largely on our bankers in order to make a greater number of loans, and consequently greater profits for our shareholders.

It gives me great satisfaction in being able to say that the company was never in a sounder or more satisfactory condition than it is at present.

One year ago I announced that it was the intention of the company to establish agencies in the far Eastern Province of Nova Scotia. This was done in the spring of 1903, and results have been so satisfactory that we have now decided to open up the Province of New Brunswick as soon as we can secure suitable men to take charge. The people of the East have grown tired of speculative investments, and are looking for just such securities as are offered by our 6 per cent. full paid stock and 5 per cent. debentures, where interest is guaranteed and paid regularly every half-year, and where the value never fluctuates, as the full amount invested can be withdrawn in cash at any time after two years from the date of the certificate.

The rapid development of Manitoba and the North-West Territories assures a continuation of the big demand for loans which we have enjoyed from this prosperous section of Canada during the past two or three years. Our agents, valuators, and solicitors throughout this section are men of ability and sound judgment, and men who take pride in showing our inspectors the properties on which they have secured loans for the company.

Actual results for the year 1903 were far in excess of the estimate which I made at the last annual meeting. I now estimate that the earnings for the present year will exceed one hundred thousand dollars, and that we will close the year with assets of over one million three hundred and fifty thousand dollars, notwithstanding the fact that the war is already causing a tightening of the money market.

I am pleased to be able to report once more that all loans put through during the year were passed by the unanimous vote of the directors.

I beg leave to move that the report of the directors for the year 1903 be received and adopted.

The vice-president, Dr. David H. Wilson, said:

Mr. Chairman and Stockholders,—In rising to second the motion to adopt the sixth annual report of the British Columbia Permanent Loan and Savings Company, I can assure you, that as a stockholder, I do so with satisfaction, and as a director with considerable pride in the uninterrupted success which has attended this company from its inception down to the present time. When we were incorporated, in 1898, the usual misgivings attendant on the establishment of nearly all financial corporations, were freely expressed. Six years, however, of successful effort, culminating in such a report as has just been laid before you, have entirely dissipated all such misgivings, and to-day I feel that I am justified in saying that no corporation is more implicitly trusted by those with whom it does business, and none is more thoroughly entrenched in the confidence of the people, who have watched closely its business methods, than is The B. C. Permanent.

This company has aimed, and am sure has succeeded, in securing a staff of reliable and intelligent agents and valuators who, I feel, have not recommended applications for

other than what they have deemed desirable loans. And our solicitors at the various points are men whose legal standing and probity have insured to this company, titles beyond question. These loans, so recommended and reported upon, are again sifted by the management, and finally coming before the board, are carefully considered, and those deemed of unquestionable security passed for amounts, and on terms of payment, which have appeared to your directors absolutely safe for the company. This system, taken with the fact that for every dollar of the stockholders' money invested, we hold over two dollars of approved security, and that the management of the company while enterprising has been careful and economical, is, I believe, full justification for the confidence which is being so universally extended to the company, not only in this city and province, but throughout Canada, from this Coast to the Atlantic.

I had occasion, last year, in speaking before the annual meeting of stockholders, to express the belief that a field of great opportunity was opening up in the rapidly increasing development of Canada's unrivalled resources. Events which have taken place in the interval, have justified and more than justified what I then stated, and to-day in British Columbia, with her vast timber, mineral, fishing, agricultural and horticultural resources; in Manitoba and the Territories with their illimitable agricultural and other possibilities, and in Eastern Canada with its rapidly growing manufacturing centres, I am convinced that we have a field for the growth and development of a financial corporation conducted on the principles on which this company is based, unsurpassed in any other country.

Thanking you, gentlemen, for the confidence you have extended to the board during the past years, please be assured that our best efforts have been exerted, with an eye single to the company's success, or, in other words, the common good of all stockholders.

Senator W. J. Macdonald, of Victoria, said:

I have great pleasure in saying that I am perfectly satisfied with the workings of the society. I have asked a good many questions, but it has only been done in the interests of business and in the interests of the society, and I have been anxious to ask those questions so that I may be thoroughly satisfied with the workings of the society.

The motion was carried unanimously.

election of **directors was** then held, and resulted in J. Telfer, David Spencer, W. H. Malkin, George Martin and George Ward.

At a subsequent meeting of the board, Mr. Thomas T. Langlois, Dr. David H. Wilson and Mr. George J. Telfer were respectively re-elected to the offices of president, vice-president and treasurer, and Mr. R. H. Duke was elected as secretary of the company.

The retiring trustees, Hon. Richard McBride, M.P.P.; Ralph Smith, M.P., and Aldermen Lawrence Goodacre, also retiring auditors, Messrs. W. T. Stein, C.A., and A. A. Boak were re-elected. All of the directors, trustees and auditors have been unanimously re-elected at each annual meeting since their first appointment, thus proving the entire confidence of the shareholders in the gentlemen who were first selected to control the affairs of the company.

GOVERNMENT INSPECTOR'S REPORT.

Vancouver, Canada, January 11th, 1904.

I hereby certify that I have examined the balance sheet and dividends of the British Columbia Permanent Loan and Savings Company, as given herewith, and find the same in accordance with the by-laws of the company and the laws of the Province. I have also examined the statements submitted to me, upon which are based the profits of the half-year, and upon which Dividend No. 11 is declared, and I approve of the principle upon which such dividend has been computed, and consequently, sanction the payment of the same in accordance with Sec. 52, Chap. 22, Vic. 60.

Yours truly,

C. GARDINER JOHNSON,
Inspector Investment and Loan Societies.

CLEARING HOUSE FIGURES.

The Crown Life Insurance COMPANY.

Annual Meeting of Shareholders.

The annual meeting of the shareholders of the Crown Life Insurance Company was held at the head office of the company, in the City of Toronto, on Tuesday, March 1st, 1904. One hundred and forty-seven shareholders were present or represented by proxy.

REPORT OF DIRECTORS FOR THE YEAR ENDING DECEMBER 31st, 1903.

Your directors respectfully submit for the consideration of the shareholders their report of the company's operations for the year ending December 31st, 1903. We are pleased to inform you that an excellent class of business has been secured and which in volume exceeds that of the previous year.

The new applications which had to be considered during the year amounted to $1,428,350, on which policies for $1,206,850 were issued and taken; the balance, $221,500, being the amount declined and not taken. The total insurance in force at the end of the year is represented by 1,319 policies for $2,126,850.

Our cash income for the year from premiums, including a small annuity, amounted to $70,251.19. In addition to this amount regard must be had to the net outstanding and the deferred portion of the premiums, which together make up a sum of $25,353.06.

We have been fortunate in sustaining a very small death loss for the year, the claims amounting to but $5,500 under six policies.

As shown by the financial statement, our liability to policyholders is represented by a net insurance reserve fund (Hm. 3½ per cent.) of $85,767 and annuity of $297. The total security to policyholders from every source as against this liability amounts to $494,097.12, as fully set forth in the enclosed financial statement, which has been duly audited in accordance with the by-laws of the company.

The directors have viewed with regret the serious and protracted illness which some of our chief agents have undergone during the latter portion of the year. They also desire to express their appreciation of the faithful work performed by the head office staff, and of the excellent service rendered by many of the company's managers and agents in securing for it the high class of business that we have been able to place on our books this year.

CHAS. TUPPER, President. ARTHUR J. HUGHES, Secretary.

ELECTION OF DIRECTORS.

The following directors were elected for the ensuing year: The Hon. Sir Charles Tupper, Bart., G.C.M.G., C.B.; John Charlton, M.P.; Herbert M. Mowat, K.C.; John Foy, R. L. Borden, K.C., M.P.; Samuel Barker, M.P.; George H. Hees, Arthur R. Boswell, K.C.; Rodolphe Forget, Benjamin Heartz, Frank E. Hodgins, K.C.; Colonel the Hon. David Tisdale, P.C., M.P.; Randolph Macdonald, W. B. McMurrich, K.C.; the Hon. Sir Charles Hibbert Tupper, K.C.M.G., P.C., M.P.; C. S. Wilcox, J. Douglas Hazen, K.C., M.P.P.; George H. Roberts, Henry T. Machell, M.D., L.R.C.P.

ELECTION OF OFFICERS.

At a subsequent meeting of the new board of directors, the Hon. Sir Charles Tupper, Bart., G.C.M.G., C.B., was re-elected president, Mr. John Charlton, M.P., vice-president, and Mr. George H. Roberts, managing director.

UNITED STATES FINANCES.

Henry Clews & Co., in their weekly circular dated March 5th, say: Inertia seems to have settled down on the stock market, both dealings and fluctuations having been confined within exceedingly narrow limits. Investors, market leaders, professionals, and in fact all classes of operators, are in a very conservative mood, determined apparently to await the outcome of pending events before engaging in commitments for the future. Indirectly, the war between Russia and Japan is exerting a very potent influence on the local market. On the Continent, and especially in France, an important contingent have been taken by surprise. Evidently they believed war would be averted, and, being somewhat unprepared, the necessarily rapid adjustment to new conditions is decidedly inconvenient. Local influences have also discouraged activity. An important uncertainty is the Northern Securities decision. While a verdict adverse to the company would cause no surprise, still it might necessitate important changes in the plans of those who contemplated the merger, and of course no one can predict the effect of such changes upon values. Another development which induces caution is the decline in railroad earnings, both gross and net. It is true these losses can generally be traced to the severity of the winter, which has heavily taxed even the best equipped roads; yet two or three important systems have shown losses which are not explained by this cause, but seem to be due to a decline in traffic resulting from lessened activity of business. Nothing but time can determine whether these losses will continue or not. The extent to which the big transportation companies are pressing their demands upon the money market, either through new issues or by temporary loans, is another depressing factor, inasmuch as it increases the supply of better grade investments to the detriment of lower grades. Still another hindrance to improvement is the position of the industrials, the majority of which are showing decided declines in earnings. Of course, there are some very welcome exceptions to this tendency; but experience is already proving that this class of investments bear no comparison whatever with railroads in the stability of earning power. No very serious reaction in business has been experienced save in the iron trade; in fact, the reaction has been strictly moderate, yet the profits of some of these concerns have been almost cut in half during the past year. Of course, we are returning to more normal and more stable conditions, but such fluctuations in profits do not strengthen confidence in the industrials.

VANCOUVER BOARD OF TRADE.

The annual meeting of the Vancouver Board of Trade was held on Tuesday, 1st March. We have commented elsewhere on the comprehensive address of the president. The election of officers was proceeded with, resulting as follows:—President, H. McDowell, (acclamation); vice-president, A. B. Erskine, (acclamation); secretary, Wm. Skene, (re-elected). Council, Messrs. F. Carter-Cotton, C. E. Tisdall, F. Buscombe, William Godfrey, R. H. Alexander, W. H. Malkin, C. F. Jackson, R. P. McLennan, H. T. Lockyer, W. H. Ker, C. Sweeny, W. F. Salsbury, R. Kelly, W. G. McKenzie and W. J. McMillan. The first twelve form the Board of Arbitration.

KAMLOOPS BOARD OF TRADE.

The Board of Trade of Kamloops, B.C., in its last annual report makes reference to the strides made in the agricultural development of that part of British Columbia, which lies around the Shuswap and Kamloops lakes and along the Okonagan. There has been, in the last twelve months, a very encouraging advance made in the increased acreage under cultivation, as well as in the volume of produce. The very favorable climate of this Kamloops region for both grazing and grain-growing is not sufficiently known. The farmers who are already there are doing well, but there is room for more, because the country immediately around them offers a good market, and they can sell their products both East and West. It is stated that private holdings throughout the district have increased over 35 per cent. There, and elsewhere, irrigation is proving a boon. Over 14,000 acres of waste land have been settled by bona fide settlers, and 18,000 additional acres have been put under cultivation. Thousands of tons of wheat and oats, vegetable and fruit crops were marketed by the carload. Mixed farming has made encouraging progress, and stockraising continues a highly profitable industry, 323 carloads of cattle and fifteen carloads of horses being shipped last year to Eastern Canada. The better known activities of the Kamloops district are mining and lumbering, but agriculture is not the least important of the three, for that feeds the others and tends to their economical working.

TO BE ADVISED

as to the most economic methods in operating your Steam Plant, is an advantage which is appreciated by the Steam Users of Canada. This advice is given by

The Canadian Casualty & Boiler Insurance Co.

to all those who insure their Boilers in this Company. Why don't you enjoy this opportunity of having Consulting Engineers' advice free. Write for information to-day of other "Special Advantages" given by this Company.

—"Dad," said little Reginald, "what is a bucket shop?"

"A bucket shop, my son," said the father, feelingly, "a bucket shop is a modern cooperage establishment to which a man takes a barrel and brings back the bung-hole."—Town Topics.

MONTREAL MARKETS.

Montreal, March 9th, 1904.

Ashes.—The market has not undergone any recent change. Offerings are exceedingly light, and dealers are ready buyers at $6.05 to $6.10 for good tares of first pots, $5.75 for seconds, while pearls are quoted nominally at $7 to $7.25 per cental.

Cheese and Butter.—Shipments of cheese last week were light, only 7,670 boxes, indicating how dull the English demand has been of late, but it is figured the total stock here of present is not much more than 40,000 to 50,000 boxes all told. The market is steadier, and some business is reported at 10¼c. for fine goods. Butter shipments last week were only 624 packages. From 20 to 21c. appears to be about the range for

creamery makes. Dairy butter is said to be rather scarce, and good tub butter is quoted at 15½ to 16c., and rolls 16 to 17c. per pound.

Dry Goods.—Payments by retail merchants on the 4th of March were fairly met, all things considered. There was a general expectation that a considerable proportion of paper would require renewal, and such was the case, more particularly by country customers, but city retailers are said to have paid up quite well. Several leading houses report the proportion of their paper taken up at from 55 to 60 per cent. Letters from both country customers and commercial travellers still complain of poor trade conditions, and the delay in getting deliveries of spring goods. In the city the weather has been unfavorable to any activity in the sale of spring stuffs. Quite a few travelling salesmen are home getting samples revised, and some larger buyers from Winnipeg, Dawson City, and other distant points, have been noticed in the Montreal warehouses this week.

Furs.—Receipts of raw furs are still comparatively light, and business is not active. Quite a fair number of Montreal buyers have left the city to attend the great March sales which open in London next week, and which are loked upon as fixing prices more closely than either the January or October sales. We repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The outside sugar markets have continued to develop strength, and on Monday the local refiners established a further 5c. advance, making present factory prices for standard granulated $4.10; Phoenix, $4.10; bright coffee, $3.90, with other grades of yellow ranging down to $3.50. Paris lumps are now quoted at $4.60, and powdered at $4.25. Quotations for new Barbadoes molasses, to arrive, continue easy, and it is said some cable offers have been made at 18½c., c.i.f.; local jobbing quotations are easier at 33 to 34c. Tea importers report good general demand from jobbers, and prices all tend to firmness. Dried fruits are dull. Local manufacturers of macaroni and vermicelli have advanced prices ½c. per lb., and there has also been some advance in quotations of brooms, woodenware, etc. For canned tomatoes the packers' combination is now asking $1.12½, and for corn $1.15, with supplies in very narrow compass.

Hides.—Nothing is reported in the way of change since last report. Calfskins are now coming in quite briskly, but quotations are unaltered at 11c. per pound for No. 1, and 9c. for No. 2. For No. 1 beef hides dealers still pay 8c. per pound. New lambskins are quoted at 10c., and sheepskins at 75c each.

Leather.—The leather market has not shown any features of special change in the past fortnight. Boot and shoe manufacturers are actively shipping out spring goods, but are still fairly busy in the making up of stock, and are moderate buyers of leather. Prices are w maintained, indeed quotations of bla leather tend to increased firmness. Some local manufacturers of dongolas are said to have received excellent orders lately from Britain.

Metals and Hardware.—Needed supplies from American iron centres are now beginning to come to hand, showing that the railways are making some progress in getting traffic into normal conditions once again, but a good deal

Managers and Underwriters.

has to be accomplished yet. As regards prices there is little new. Middlesboro No. 3 pig-iron has been offered for spring delivery ex-ship at $16, and Scotch foundry iron at $18, brand not mentioned. Hamilton No. 2 has been sold, delivered here, at $18.50. Bars are easy, with the general quotation now at $1.75. Iron pipe $4.35 for inch. Plates and sheets show no change. Antimony keeps stiffening owing to the war, and has advanced about £4 the ton since January; the local quotation is now 7¾c. Lead is firm at $3.25; copper, 13½c.; tin, 32c. for Straits.

Oils, Paints, and Glass.—Aside from the fluctuations in turpentine there is little of interest in the situation. Business is hardly as brisk as usual at the season. Turpentine, 90½c., single bbls.; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon; straw seal, 45 to 50 to 55c. per gallon; tinged and brown ditto, down to 35c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

TORONTO MARKETS.

Toronto, March 10th, 1904.

Chemicals, Drugs, etc.—The strongest goods on the market just now are camphor and quinine, both of which it may be said have been affected by the war in the East. Camphor is used not only in medicine, but as an ingredient in smokeless powder. For quinine the improvement in demand is very marked. Menthol has become much easier, and its position is somewhat unsatisfactory. Firmer advices come from London as to opium, but the market is unsettled. Reports from Manchester say that the state of the chemical trade is by no means satisfactory, but the wonder is it is not worse. No improvement is discernable in the demand from the textile trades. Sulphate of copper is very strong with a good export enquiry.

Flour and Grain.—Wheat this week has experienced a drop of from 3 to 4c. and the market is quite dull at the decline. Rye and buckwheat have gone up a cent or two. Peas and barley remain unchanged. Dull business prevails. The flour market too is on the easy side. Ninety per cent. patents are quoted at $3.75 in buyer's bags, middle or east freights. Bran and short keep steady. In oatmeal no further change has taken place.

Fruits and Vegetables.—While prices both for apples and for the tropical fruits remain about steady, it cannot be said that the amount of trade being carried on is very large. The state of the roads militates against a heavy volume of business.

Hardware.—Conditions in the hardware trade are about normal. Values keep pretty steady and promise to remain so. The volume of trade perhaps is hardly equal to that of the first two or three months of last year, but this probably is due to nothing but extraneous circumstances, such as the severe season. Travellers report prospects for a good spring trade as very bright. In metals nothing new has developed. Pig iron continues on a basis which may be described as normal, with a movement which is perhaps hardly better than dull. Other metals fluctuate from day to day, but the net changes during the past week or so have not been appreciable. Latest advices to hand from England speak of a brighter outlook for pig-iron. Consumers who for some time were given to holding off have lately been coming forward. Values are higher by 1s. per ton for Scotch, and 5d. per ton for Cleveland.

Merchants Fire INSURANCE CO.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

Hides, Skins, and Leather.—The market for hides has made no change since the decline last week, but it continues rather dull. Sheepskins are steady at 90c. to $1. Calfskins are firm. Tallow is quiet. In leather no great volume of trade has been transacted of late, owing to the bad state of roads. Prices keep firm, however, and prospects are very fair.

Paints and Oils.—Turpentine continues to fluctuate rapidly within narrow limits. Stocks in the south are reported light, so there is hardly likely to be any marked decline. White lead is very firm, and some think there will be an advance. General trade continues fair.

Provisions.—Moderately large quantities of butter are coming forward now, and good grades are in demand. The market for cheese is steady. Receipts of eggs have become considerably large, and the market has slumped. Trading in this line, however, is not over large, the conditions at this present season of the year being subject to such violent fluctuations as to make conservatism a virtue. Not much poultry is coming in now but demand is moderately brisk. Prices for well-finished chickens are steady at 15 to 16c. Not much Canada hops are being sold just now. The season for hog packers is about over, and offerings are light. Prices are firm.

Seeds.—The local demand for seeds is more active on the approach of spring and considerable business has been done. Nothing is now being done on an export basis. Prices remain practically unaltered.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

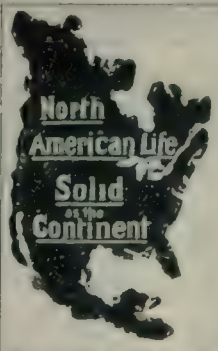
You will make no Mistake if you Take out a Policy in THE NORTHERN LIFE.

HEAD OFFICE, LONDON, ONT.
JOHN MILNE, MANAGING-DIRECTOR

The Northern Life has some Good Districts Open for Live, Energetic Agents.



Strength and Stability
Are the important elements required in effecting insurance,—guaranteeing, as they do—the absolute fulfillment of the contract.

The financial position of the

NORTH AMERICAN
is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life Assurance Co.,
Home Office, TORONTO, Ont.

The market value of securities deposited with the Dominion Government for the protection of Policy holders amounts to over .. $202,500.00

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

The Molsons Bank.

97th DIVIDEND.

The Shareholders of The Molsons Bank are hereby notified that a dividend of FOUR AND ONE-HALF PER CENT. upon the Capital Stock has been declared for the current half-year, and that the same will be payable at the Office of the Bank, in Montreal, and at the Branches, on and after the

Second Day of April next.

The Transfer Books will be closed from the 17th to the 31st March, both days inclusive.

By order of the Board,

JAMES ELLIOT,
Montreal, 26th Feb., 1904. General Manager.

The Bank of British North America.

INCORPORATED BY ROYAL CHARTER.

The Court of Directors hereby give notice that a Dividend free of Income Tax of thirty shillings per share, will be paid on the 7th of April next, to the proprietors of shares registered in the Colonies, being at the rate of Six per Cent. per annum.

The dividend will be paid at the Rate of Exchange current on the 7th day of April, 1904, to be fixed by the Managers.

No transfers can be made between the 24th March and 7th April, as the books must be closed during that period.

By Order of the Court.

(Sgd). A. G. WALLIS, Secretary.

No. 5 Gracechurch Street, E. C.,
London, 8th March, 1904.

The Dominion Bank.

Notice is hereby given that a dividend of Two and One-half per Cent. upon the Capital Stock of this Institution has been declared for the current quarter—being at the rate of Ten per Cent. per Annum, and that the same will be payable at the Banking House in this city on and after

Saturday, the Second Day of April Next.

The Transfer Books will be closed from the 21st to the 31st March next, both days inclusive.

By order of the Board,

T. C. BROUGH,
Toronto, 23rd February, 1904. General Manager.

DIVIDEND No. 43

NOTICE IS HEREBY GIVEN that a Dividend of Three and One-half per cent. has been declared upon the Paid-up Capital Stock of the Bank, being at the rate of Seven per cent. per annum, and that the same will be due and payable on and after **Friday, 1st Day of April, 1904**, at the Offices of the Bank.

The Transfer Books will be closed from the 15th to the 31st of March.

NOTICE is also given that the 22nd Annual Meeting of the Shareholders of the Bank will be held on **Wednesday, the 13th Day of April** next, at the Head Office of the Bank, Oshawa, Ont., at the hour of two o'clock p.m., for the election of Directors and such other business as may legally come before the Board.

By order of the Board,
Oshawa, February 27th, 1904. T. H. McMILLAN, Cashier.

R. G DUN & CO.,
Toronto and Principal Cities of Dominion

Mercantile Summary

C. Karsh, of Aylmer, has started a spring mattress factory in Dundas, Ont.

Hon. Sydney Fisher has accepted the office of honorary president of the Montreal Industrial Exhibition Association.

The Eastern Steamship Company proposes to run a direct boat between Digby, N.S., and Boston, Mass., and citizens of the former place are making their best endeavors to bring this about. New England each year sends swarms of tourists to this interesting part of our Maritime Provinces and these would be largely increased with better means of communication.

The shipments of ore from Rossland, B.C., for the week ending 12th inst., were as follows: Le Roi, 5,146 tons; Centre Star, 1,710 tons; War Eagle, 1,530 tons; Kootenay, 120 tons; Jumbo, 250 tons; Le Roi No. 2, 670 tons; White Bear, 80 tons; total for week, 9,486 tons; for the year up to date, 92,176 tons. There was a marked increase of activity in the camp, and the number of men employed is rapidly advancing.

The Canada Paper Company held their annual meeting in Montreal last week. The report was deemed satisfactory. The following were re-elected as directors: H. Montagu Allan, H. G. Holt, John Macfarlane, C. R. Hosmer, H. Markland Molson, Hugh A. Allan, the Hon. Robert MacKay. At a subsequent meeting of the directors, Mr. H. Montagu Allan was elected president; Mr. H. G. Holt, vice-president; Mr. F. J. Campbell was reappointed general manager, and Mr. W. H. Parsons, secretary-treasurer.

A movement is under way to establish a direct steamship service between Montreal and the West Indies. The West Indian trade, while not yet so important as it should be, is capable of considerable extension, and speaking not only from a pecuniary point of view but from that of the development of the Empire, strong efforts should be made to improve it. No great difficulty ought to be met with in finding good cargoes of flour, provisions, manufactured goods, while for the inward journey there would be sugar, molasses, fruits, and, eventually, perhaps, a good quantity of cotton.

The dry kiln, malt house and elevator of Eaton Bros.' brewery, at Owen Sound, Ont., were on the 11th inst. destroyed by fire at an estimated loss of $20,000. The large quantity of malt destroyed was covered by insurance, but the buildings, we are told in the newspaper reports, were not insured. Firemen, it is said, were hampered through lack of water. Another fire took place on the the same date in St. John, N.B., where the Maritime Nail Works, comprising three buildings and a valuable plant, were destroyed. One of these had only been completed the preceding day. The loss is estimated at $80,000, with insurance of $20,000.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are:—
"General Principles for Investors."
"Stock Markets and How to Profit by Them."
"The Theory of Option Dealing."
"How to Invest in Mines."
"Insurance as an Investment."
"Colonial Land: Its Coming Importance."
An entirely new feature is a collated list of "Average Values," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning The Monetary Times.

WANTED.

The Great West Life Assurance Company require the services of a first class Life Insurance Underwriter for City of Toronto — or, better still— TWO BRIGHT YOUNG MEN could form a partnership and develop one of the best paying businesses in Toronto. An excellent opening for the display of energy and ability. First class references required.

Apply, Ontario Branch Office,
18 Toronto Street, Toronto, Ont.

P. S.—Read our Annual Report for 1903.

MM. FERNAN & Lefebre, agents for Belgian capitalists, are in the Kootenay district of British Columbia with a view, it is said, of erecting a zinc ore concentrator on Slocan Lake and a furnace at Fernie.

Mercantile Summary.

MANUFACTURERS of celluloid goods are increasing the prices of their goods 5 per cent. owing to the heavy advance in camphor.

SHERBROOKE, Que., ratepayers shortly will vote upon the question of municipal ownership of electric and gas-lighting plants. A by-law will be presented for the issue of debentures to the amount of $200,000. The city is asked to pay $233,000 for the two plants.

A COMPANY is being organized, in Winnipeg, for the purpose of building a railroad from Edmonton, northerly to Fort McMurray, thence northwesterly to Fort Vermilion, and thence northerly to Slave Lake or Slave River, thus crossing the proposed route of the Grand Trunk Pacific.

THE Lead Miners' Association met together in Nelson, B.C., last week and discussed the question of exporting ores. A resolution was passed endorsing the proposal of the new grade lead miners, whereby the Government is to be requested to extend the benefits of the Bounty Act to limit the amount of ore to be exported and smelted abroad, provided that such extension shall not prejudice the payment of the full bounty on ores smelted in Canada, and provided, further, that on lead ores sold and smelted in Canada during the period of such extension of bounty, the maximum freight and treatment shall not exceed $15 per ton as a scale now in force; that the marketing charge shall not exceed $20 per 2,000 pounds of lead, as at present, and that the limit of zinc shall not decrease from ten per cent., and the penalty on the excess shall not exceed 50 cents per unit.

LATE failures in Nova Scotia are noted as follows: The Elmsdale Co., Limited, of Elmsdale, promoted just about a year ago to operate gypsum and selenite quarries at the place named, has apparently not proved a success, and a winding-up order has been applied for as a sequence to recent suits and attachments.—L. H. Betts & Co., general merchants, of Wallace, reported in January last as compromising liabilities of $10,500 at 50 cents on the dollar, have now assigned.——Fowler Bros., dealing in furniture, at Truro, are offering 30 cents on the dollar on liabilities of $6,200, $2,700 of which is said to be accommodation paper.——The embarrassment is reported of McFetridge & McPhee, of Milford, who in the fall of 1902 bought out the general store business of D. Annand. There appears to be some friction between the partners arising out of the recent sale of the business to A. J. Reid, and the latter makes a proposition that the creditors should accept 75 cents on the dollar from him in settlement of the firm's liabilities amounting to $5,500. —J. D. Cameron, general store, Mabou, recently reported as proposing a composition of 60 cents, has amended his offer to 50 cents.

THE assignment is reported of J. R. McConnell, quite an extensive lumberer, of Marysville, N.B., who has also been lately operating limits at St. Alexandre de Kamouraska, Que., and St. Henri de Temiscouata, Que. Frequent suits appeared against him during 1903, and recent judgments for $74,000 and $46,000 have been recorded against him lately in favor of the Bank of Montreal and the Royal Bank, respectively.

THE Eastern Townships Mining and Smelting Company has applied to the City of Sherbrooke for a bonus of $10,000 and exemption from taxation for ten years to assist in establishing a copper smelter at that place. They would agree to erect and operate within fifteen months a plant costing not less than $25,000. The capital of the company would be $40,000. The hot blast system of smelting will be installed, townships ores being especially adapted for this. The city council is said to view the proposition favorably.

Mercantile Summary.

MR. J. F. ROSS, Toronto, owing to the rapid increase in his tin business, and consequent want of space, has disposed of his cardboard, tube and box business to the Dominion Paper Box Co., Limited, who have splendid facilities for handling this class of work.

A DEMAND of assignment has been made upon Z. Forget, general dealer of North Temiscamingue, Que. The firm of Samson & Forget began business in May, 1902, and dissolved last spring, Forget continuing, and then arranging for an extension on the liabilities of the late firm, amounting to about $7,000.—— Owing, it is said, to indiscriminate crediting, E. E. Carrier & Co., of Garthby, Que., who only began business about a year ago, have already assigned.——W. Hebert, general storekeeper, at Stratford Centre, Que., has assigned. He is a blacksmith by trade, at which he worked, the store being mainly run by the family. He is also of Hebert & Frere, who carry on a sawmill and cheese-making business. Liabilities are placed at $5,360.

ACCORDING to the terms of the steel combine in Scotland, any maker who sells below the rates determined upon by the association renders himself liable to the forfeiture of $5,000 (in each case deposited), and to a fine of $5 a ton for every ton of stuff sold contrary to the rules. This money (forfeited) is to be divided between the loyal members. The conditions as to sale, however, apply only to business done in Scotland and in Belfast, Ireland, which is regarded as in the Scotch sphere. In England, Scotch makers are to enjoy, as heretofore, a free hand to sell at whatever prices they can command. Already some of them are disposing of plates to the Midlands, and in order to get in against their English competitors they are actually sacrificing the carriage charges from Lanarkshire. We wonder how the Englishman views this species of dumping..

MR. W. H. HIGGINS, of Vancouver, has purchased the right to 150,000,000 feet of standing timber on Humphrey Channel, 90 miles north of Vancouver, and is making preparations for opening up a number of camps on the claims. To bring his logs out of the woods to tidewater, Mr. Higgins will make use of a system of haulage, which, while extensively employed in the State of Washington, has not been tried on a large scale in British Columbia. He will place stationary engines equipped with large winding drums at some point close to the beach where he wishes to boom his logs, and will haul from the woods by cable. Running a skidroad into the woods for a distance of a mile and a half, an inch and a quarter cable will run the entire length of the road, hauling to the beach such logs as may be attached to it. Small donkey engines are to be used to yard the logs from the place of felling to the main skidroad tapping the district being logged.

The Barber & Ellis Co.,

Limited Toronto

Mercantile Summary.

CANADIAN stove makers are petitioning the Government for higher protection. They claim that under present conditions they cannot meet the competition of the manufacturers in the United States, who have the advantage of an enormous production, and of lower freight rates to the North-West.

MR. E. A. LANGMUIR, secretary-treasurer of the Julian Sale Leather Goods Co., Limited, Toronto, returned last Friday from a two-months visit to many centres of interest on the Continent and in the Old Country. He was not altogether on pleasure bent, but devoted some attention to the company's connections over there, as a result of which admirers of all kinds of leather novelties will profit during the coming season.

WE have received a copy of the special fitting-out number of the Marine Review, of Cleveland, O., published last week. It has an unusually brilliant list of contributors, comprising Hon. George B. Cortelyou, secretary of the Department of Commerce and Labor; Senator Wm. P. Frye, etc. The future of shipbuilding on the Great Lakes is discussed by Mr. W. L. Brown, president of the American Shipbuilding Company. There is also an article on shipbuilding in the Dominon, besides many others on various subjects relating to this important industry. The number is beautifully printed and illustrated.

THE Canada Cycle and Motor Co. has just moved into new and much more commodious quarters at the corner of Temperance and Bay streets, Toronto. They will occupy the entire building, and in connection with the new premises a new garage will be operated. This is now being erected and will extend from Temperance to rear of the Medical Building on Richmond St. It will be in every respect modern, thoroughly in keeping with the demands of the up-to-date chauffeur. The average automobile owner is often confronted with the difficulty of finding satisfactory storage and competent are for his machine. This new station will solve that problem for many such.

AN item in a British Columbia paper tells of a unique strike which was settled the other day in Fernie. Five prisoners at the jail thought that they were too hard-worked, and, at the instigation of an Italian, decided to take advantage of the inalienable privilege of the laboring class, to strike. But the chain-gang forgot they were compulsory guests of King Edward, and they were brought up before the representative of His Majesty's law in the person of Magistrate Forbes. He gave the ringleader an opportunity to ruminate on British institutions in a dark cell for two days, on half rations. The others he ordered to be locked up in their cells until they were able to submit to prison rules and look upon work as the salvation of man. In half an hour, adds our contemporary, they were out shovelling snow.

TENDERS FOR

$65,000 DEBENTURES.

Sealed tenders will be received up to noon on Monday 4th April, 1904, at the Town Treasurer's Office, Whitby for the purchase of $65,000 debentures with 6 months, accrued interest, being $50,000, Water Works and $15,000, Electric Light debentures of the Town of Whitby, bearing interest at 4½ per annum, repayable in 30 annual payments of $3758.05 each, principal and interest.

Said debentures are dated 2nd Nov., 1903, and to be delivered on 2nd May, 1904.

All said debentures are made payable at the Town Treasurer's Office, Whitby.

The highest or any tender not necessarily accepted.

Mercantile Summary.

PLANS are reported to be in course of preparation for an addition of eight furnaces to the Granby smelter, at Grand Forks, B.C., thus increasing its capacity from 2,100 tons to 4,800 tons per day.

MONTREAL citizens are congratulating themselves upon what they believe to be a genuine offer to give them 80c. gas. It is believed that even if the offer be not accepted, the Light, Heat and Power Company will be obliged to reduce their present price considerably.

LAST week a fire, originating in W. Normandin's fur store at St. John's, Que., did damage to the extent of $75,000 in all. The chief sufferers, besides the above-named, were W. McNulty's wholesale and retail boot and shoe store; F. Payette, ready-made clothing and haberdashery; Arbeck & Raincourt, general stores. The buildings were owned mainly by J. E. Molleur. Insurance only partial.

THE British-American Mining Company, of Philadelphia, will next season have two big dredges in operation at its claims in the Atlin district. Mr. J. M. Ruffner, of Cincinnati, is engineering a deal by which the Pine Creek Power Co., of Stevendyke, and the Deek leases, at Pine Creek, will be amalgamated, the sum involved being about $500,000. The Consolidated Spruce Creek placer mines, with a large capital, and the Spruce Creek Power Company, with a capital of $150,000, have been combined, and the plants of both will be extended. Three companies on McKee Creek, the Atlin Mining Co., the Consolidated Mining Co., and the Hawkins-Christopher Co., are also planning consolidation. The above news-items show that quite an era of amalgamation has set in at the Atlin. The indications are that there will be six or seven large hydraulic and dredging companies all striving to reduce the cost of mining to the lowest possible limit.

ON Wednesday of last week, a strong deputation from Orillia and the vicinity waited upon the Ontario Government to urge assistance to the James' Bay Railway from Toronto to Sudbury. In the above district such a line would open up large areas of fertile and thickly-wooded land, now inaccessible owing to lack of transportation. The road has already been surveyed through thirty-three townships, twenty of which are at present without railway facilities. The deputation maintained that the construction of roads throughout Northern Ontario, not having connection with Toronto, or with the cities and towns in the older settled portion of the province, led to the carrying of traffic to the province of Quebec. In this way Toronto, Orillia, and other towns, which were naturally entitled to the benefits of the trade of Northern Ontario, were not getting the share of this trade to which they were justly entitled. The Government promised due consideration of the matter.

PLANET WHIST TRAYS

If you play whist use our trays that are enclosed in neat boxes at the following prices:

THE failure is announced of N. Gourdeau & Co., tanners, Quebec. The record of this concern is of a rather checkered character. Originally the business was carried on under the style of Gourdeau & Frere, who failed in 1894, then compromising at 50 cents on the dollar. In December, 1896, an extension was required, and in 1900 they were again in trouble a capias having been taken out by their bankers against one of the partners, who absented himself from the city for a time. Since then the business has been carried on by N. Gourdeau, under cover of his wife's name.

J. E. VOYER, manufacturer of boots and shoes at Ancienne Lorette, near Quebec, whose embarrassment we noted last week, has made an assignment to Geo. Darveau, Quebec. His liabilities are listed at $21,500, $12,000 being to two banks, and assets are shown of $6,100. A third failure is reported in the Quebec boot and shoe trade, as the result of complications with Voyer, the assignment being reported of Elzear Tessier, a manufacturer in a moderate way, the liabilities in this latter case being $18,800, with assets figured at $6,840. Only a year ago Tessier effected a compromise at 50 cents.

HERALD BLOCK, CALGARY, N. W. T. | CORRESPONDENCE SOLICITED.

The Canadian Pacific Railway Company

Dividends for the half-year ended 31st December, 1903, have been declared as follows :—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

Warrants for the Common Stock dividend will be mailed on or about 2nd April, to shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Saturday, 2nd April, to shareholders of record at the closing of the books at the Company's London Office, No. 1 Queen Victoria Street, London, E. C.

The Common Stock Transfer Books will close n Montreal, New York and London at 3 p.m. on Tuesday, 1st March. The Preference Stock Books will also close at 3 p.m. on Tuesday, 1st March. All book will be re-opened on Tuesday, 5th April.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 8th February, 1904.

ONE of the latest to enter the real estate field of Toronto is Frederick B. Robins, a former resident of this city, but who for twelve years past has been engaged in the real estate business in Buffalo. Mr. Robins has opened offices at the corner of Adelaide and Victoria streets, where he will conduct an up-to-date real estate investment business.

MONTREAL is to have another steamship line, the service commencing next month. It will be known as the Transport Canadien, and will run between Montreal, Bordeaux and Antwerp. Four steamers have been secured and a fortnightly freight service will be operated at first. A passenger service may follow. The steamers already secured are the "Ebro," "Minho," and the "Lady Strathcona," the latter being a new boat. They will run in connection with the Canada Ocean and Inland Line, and Mr. Thomas Harling will be the Montreal agent.

FOR INSURANCE AGENTS.

The soliciting of life insurance is not an easy business by any means. Many people are induced to enter it because they think it requires neither capital nor energy. These are the kind of men who expect to make a living without exertion. To talk a little when one is in the humor, to wag the tongue occasionally, and pose as a financial sage, is considered by some men the way to represent a company. An exchange has a few remarks to make upon agents of this calibre. In any other line of business such men know they must work steadily, conscientiously, or they will not earn their salt or retain their positions, but when they make a contract to sell life insurance some of them expect an hour's half-hearted presentation of a policy, or an assault on some other company's plans and practices, to win them a week's wage. There are thousands of so-called life insurance agents in this country whose only real hard work consists in trying to flim-flam companies or managers into paying advances for commissions they do not expect to earn, or for services they do not intend to render. Life insurance soliciting is hard work. The lazy man can't succeed at it. It tests the brain, the nerves, as few lines of endeavor can. The life agent is the king of solicitors, not only because of the issues involved in the sale, but owing to the princely qualities of mind he must possess to succeed at it. No man has ever reached commanding pre-eminence in the business unless added to and interpenetrating all his powers of heart and mind the spirit of resistless persevering energy has been regnant.

Salary and other Inducements

will be given to the right man for the position of Toronto Manager of a highly successful Life Insurance Company.

The Manager will require to be a personal producer of business, and also able to organize an Agency Staff.

Communications will be considered strictly confidential.

Address Efil, Box 256,
MONETARY TIMES,
Toronto, Ont.

THE COST OF LIVING.

Not for twenty years or more has the general cost of living been so high as it is to-day. Dun's Index Number of the prices of commodities as they affect average yearly consumption stood at $103,615 on March 1st, against $102,028 on March 1st, 1903. Considering the sensational events in the commodity market which have occurred in the meantime, this is not a very marked increase, but it must be remembered that last spring prices were already abnormally high. In the month of February there was a net rise of 15 per cent., but there were many wide fluctuations. The principal change occurred in breadstuffs, where the war influence, aided by vigorous manipulation, produced an advance of 11.9 per cent. for the month, to the highest point for many years, with the single exception of July 1st, 1902, when the cost of breadstuffs was $20,534, against $20,116 on March 1st, 1904. Meats also rose moderately, and there was a slight advance in the class embracing metals, but more or less decline occurred in every other department, with notable losses in cotton, coffee and eggs.

FOR GROCERS AND PROVISION DEALERS.

Last week there was a decided falling off in the marketing of hogs in Cincinnati and the West. Total for the week, 330,000, compared with 565,000 the preceding week, and 515,000 two weeks ago. For corresponding time last year the number was 340,000 and two years ago 395,000. The quality runs from fair to good. Prices are higher, prominent markets indicating at the close an average of about $5.50 per 100 pounds, compared with $5.30 a week ago, $5.35 two weeks ago, $7.40 a year ago, $6.25 two years ago, $5.60 three years ago, and $4.85 four years ago. The speculative provision market was an unsettled affair, and at the close prices were lower than the previous week. The action of prices during the week indicated that the speculative element is still under the influence of the war news, and the action of the grain markets, but with the latter showing such heavy declines as they have in the past few days the provision market has been less active and easier in tone.

Advices from Greece indicate about an average normal demand for currants from practically all consuming countries, and recent cables seem to indicate a somewhat higher market. This, however, may possibly be caused by a slight fall in exchange. Letters to hand from England note a somewhat more active business in that quarter, which, should it continue, would undoubtedly eventually make its effect felt upon the Greek market.

New Orleans reports a firmer and somewhat higher market for low grade molasses. Grocery grades of molasses continue in fair demand.

Since the opening of the month there has been a better demand in Britain for Canadian cheese, but at present prices remain unaltered. The patience of holders of cheese, however, has been at last exhausted, and they have decided that there shall be an advance in values. It behooves buyers, therefore, to take care they are not caught asleep. The demand for colonial butter has fallen off somewhat.

The grain dealers' section of the Toronto Board of Trade have elected officers as follows: Chairman, Hedley Shaw; vice-chairman, D. Plewes, Jr.; executive committee, F. W. Hay, W. D. Matthews, C. B. Watts, John Carrick, C. W. Band, John Fisher, and A. V. Pearce; complaint committee, C. Good, D. O. Ellis, J. C. McKeggie, H. Shaw, C. W. Band; membership committee, D. O. Ellis, J. L. Fisher, W. Ross, M.P.; D. Plewes, Thomas Martin, F. W. Hay; collector, John Fisher.

TORONTO STOCK TRANSACTIONS

There has been a somewhat better tone to the stock market this week, but the volume of trading continues light. Transactions in detail are as follows:—Bank of Montreal, 4 at 247¾; Toronto, 36 at 226-8½; Commerce, 14 at 150¼-151; Dominion, 198 at 223; Hamilton, 21 at 207; Traders, 21 at 137; Consumers' Gas, 23 at 209; C.P.R., 2,500 at 110-111⅜; Can. Gen. Elect., 5 at 138 (xd.); Com. Cable, 2 at 189½; Rich. & Ont. Nav., 50 at 80¼-80⅜; Tor. Rail., 42 at 97-98 (xd.); Twin City, 85 at 89¾-90; Sao Paulo, 453 at 89⅞-90½; Dom. Coal, 1,500 at 40-56½; N. S. Steel, 256 at 72⅝-75; bonds, $3,000 at 103-106½; Dom. Steel bonds, $5,000 at 53-57.

—The tobacco trade section of the London Chamber of Commerce, and other bodies interested in the tobacco trade in Great Britain, are agitating for a considerable reduction in the present rate of duty of 3s. per pound. It is pointed out that under the present regulations it is impossible for the manufacturers and retailers to obtain a living profit, and to sell at 3d. per ounce, which is the price at which two-thirds of the tobacco produced is sold in the United Kingdom; also that to charge a higher price would be an injustice to the working classes who are enormous consumers. They suggest a return to the duty of 2s. 8d. per pound, which prevailed until the year 1900, and which, it is alleged, worked highly satisfactorily for the revenue, the consumer, and the trade generally.

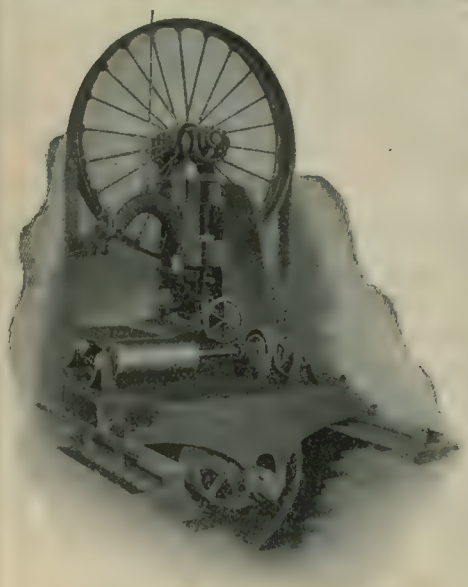
SUN FIRE BUILDING,
13-15 Wellington St. E., TORONTO.



Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

TORONTO BOARD OF TRADE.

The annual meeting of the Board of Trade for Toronto, held on Tuesday last, was devoid of one of its most interesting features this year owing to the officers having been already elected by acclamation, as previously reported. The address of the president, Mr. J. F. Ellis was, however, listened to with great interest, and was an able resumé of business conditions as they appear to the citizen of the Dominion in 1904. His announcement that a satisfactory arrangement had been made of the financial problems which had for long confronted members of the board was a pleasing one, and naturally aroused the enthusiasm of members.

He then referred to the proposal to submit a by-law to the citizens to raise by debentures $1,000,000, to be expended upon the improvement of the water-works system, and urged all the members of the board to use their best endeavors to insure the passing of the proposed by-law. Another proposition worthy of consideration was the suggestion made by Hon. Geo. A. Cox, that special water mains be placed in the business section to be used for fire purposes only.

It is an old story now, the history of Canada's increasingly large ratio of progress, but it is none the less pleasing on that account. Mr. Ellis summarized this progress in an interesting manner. For the fiscal year 1903, the total imports of the Dominion were valued at $241,214,961, and the exports at $225,849,724, or a total trade of $467,064,685, an increase of $28,944,803 over the year 1902. This total, too, is more than double the trade done a dozen years ago, for in 1891 the imports and exports of the country were valued at about $215,470,940. A glance back to 1868 shows that our trade then was $131,000,000, while in 1898 it had grown to $239,000,000. Of manufactured goods our exports in 1868 were $2,000,000; in 1896 they were $9,000,000, and last year they had increased to $20,000,000. Comparing Canada's progress with that of our neighbors, it will be found that the increase in Great Britain in seven years was 26 per cent., in the United States 47 per cent., and in Canada 107 per cent. In manufactures in this country there is now said to be invested $481,000,000.

As to the position of the board's president with regard to the Grand Trunk Pacific Railroad, he did not mince matters. While he thought there might naturally be some difference of opinion as to the details of the proposed plan, yet he and most other members of the board were distinctly in favor of some such scheme for opening up our great northern and western territory, in its broad aspects. "I believe," said Mr. Ellis, "it will prove of inestimable value in developing and settling the fertile wheat lands of New Ontario and the West—lands that are now practically valueless because of the want of railway facilities. Ontario, and particularly Toronto, will be a great gainer. The line will afford another outlet to the west for our manufactured articles, and should divert to this city a large proportion of the wholesale trade that now goes to the cities of the east. The proposed extension of the Ontario Government railway—the Temiskaming and Northern—northward to tap the Grand Trunk Pacific is, too, I believe, sound policy, and will tend greatly to the advantage of the Province." The suggested railroad to James Bay was also approved, as it would give settlers in the Sudbury and Parry Sound districts connection with the Toronto markets.

A certain degree of disappointment was felt by some that Mr. Ellis did not give his views on the subject of tariff revision. But the question was only discussed in an incidental manner with reference to the German surtax. While there has been a good deal of discussion as to who suffers by its incidence, Mr. Ellis contented himself with pointing out that the German Government has made a move towards asking for its removal.

Short addresses were made by Messrs. J. D. Allan, R. C. Steele, J. H. Woods and others, after which the board adjourned.

THE HARDWARE SITUATION.

To a certain extent the freight blockade has lifted, and the hardware trade is not the least of those who have thereby profited. During the week the railroads have begun again to accept freight for most parts, and the wholesalers have been fairly active as a consequence. There is little doubt, however, but that the first three months of the present year will show a falling off in the volume of business compared with a similar period of last year, though no uneasiness is felt upon this score, nor disposition to attribute it to any intrinsic depression of trade. The worst feature is the fact that a certain amount of the trade which it has been impossible to carry through owing to the severe weather will be almost irretrievably lost. Against this, however, must be placed the belief that for the remainder of the season

trade is likely to be especially brisk. Last year farmers had a very good season and this will continue to call for building supplies in large quantities. Building operations in the cities, too, seem likely to be fully up to the average.

As to prices, they remain steady and with little change to speak of. Barbed wire has made a slight drop, but this is probably only a reaction from the very high prices of last season. The prices of axes are now out for next season. Single bits will be $6.50 to $9, and double bits $9.50 to $10.50. Nails, screws, wire bolts and nuts present no feature worth dwelling upon. A good many orders for building paper are coming in, but deliveries have been hampered owing to the heavy snow in country districts. The recent advance in cordage is easily maintained. The demand for cement has improved. Firebricks are dull. A very good and satisfactory market prevails for plumbers' supplies. A good volume of orders is coming forward. Prices keep firm.

The heavy metals have been almost worse affected by the above untoward conditions than other branches of the hardware trade. Some manufacturers have feared a scarcity in their supplies of raw material, but so far as we have learned no very serious results have accrued. The market for pig iron keeps pretty firm, though bar is a little easier, and some cases are recorded of a slight recession in prices. The demand for block sheets has been latterly more than usually active. Canada plates are steady. An improved demand has set in for copper, both in ingot and sheet. Lead is fairly firm. United States reports speak of an improved market for pig iron this last week or so, accompanied by somewhat higher prices. The number of furnaces in blast has greatly increased also. The future of iron ore prices seems to be involved, however, in a good deal of doubt, and in spite of the efforts of the producers they have failed to reach an agreement. In the market for finished products the movement likewise tends upward, and reductions appear improbable for some time to come. Steel rails, however, are dull.

RAISE INSURANCE RATES.

The fire insurance companies have learnt some valuable though bitter lessons during the last two or three months. The lessons, too, have been drawn in such terribly vivid colors that there should be no great difficulty in teaching them to the general public also. The conflagration at Baltimore, followed so rapidly by the only comparatively smaller one in Rochester, brings home the absolute necessity for the raising of rates, more especially in the thickly built centres of great cities, where a fire covering even a small area can do enormous damage within a short space of time. The records show that, in spite of the general lifts in rates in 1894 and 1902, they are still too low to guard against catastrophes of unusual magnitude. It is not sufficient that they should merely cover the ordinary losses of a year, with a small amount over to pay interest on the investment. Enough should be realizable from the rates chargeable not only to do this with ease, but to form a reserve fund from which the payment of such losses as those involved in a disaster like that at Baltimore would form no especial hardship.

That the companies, as a whole, have been so ready to meet the emergency is a source as much for congratulation on the part of the public as on that of the companies themselves. How would the stricken people of Baltimore, for instance, have looked if the companies had been no better prepared to cope with the consequence of their misfortune, if not, to put it in one light, of their carelessness, than they would have been, for example, ten years ago? Since then fire insurance rates have been raised, and not only have the companies, as a result, been stronger and better prepared to face their duties, but property owners have been better protected. Notwithstanding this we say—and the wisdom of practically all the insurance experts is on our side—that rates will have to go yet higher, at any rate for certain frequent classes of risks, and the sooner the inevitable step is taken the better will it be for all concerned. The present is the best possible time for such a move—for the companies, because they are to-day in a peculiar position to realize the great hazard of their business; and for the public, because they have so close at hand an object lesson of what might happen unless they pay for enough protection to really protect them.

Another fact which looms up clear in the experience of the last three months is the necessity for greater care in making theatres thoroughly safe—safe not only by a lucky freak of fortune, but almost from necessity. The disaster in Chicago has taught our cousins across the line the awful consequences of leaving too much for the beneficent workings of the former; and they are, not only in the neighborhood of the fated Iroquois, but in practically every city of the Union making strenuous efforts to guard against a repetition. In Canada, too, our city fathers are working their minds in a similar direction, and it is to be hoped that before the coming around of another season their efforts will have borne good fruit. The danger is lest the first effects of such a holocaust should gradually wear away, with the ever-acting tendency of the crowd to forget what is not present, or only immediately past. The insurance companies should redouble their watchfulness with regard to places of amusement, and the public should insist, and keep on insisting, that all possible care shall be taken in providing fire-extinguishing appliances which shall be always at the point of full efficiency, as well as ample exits. Danger exists in thinking that because a fire has not broken out in a certain building it will never come. Present immunity from trouble so often spells future carelessness, whereas eternal vigilance is the only safeguard against its happening this very day.

CANADIAN FORESTRY.

The meeting in Toronto last week of the Canadian Forestry Association draws attention strongly to the fact that a new profession is in course of formation for the young men of this country. In the United States forestry has already begun to assume large proportions as a theoretical and practical business, and would-be students have now many opportunities presented them for studying it in the best manner. It is within our personal knowledge, however, that as recently as a year or two ago the Washington Government scoured the world for the object of finding men suitable for certain important work in their possessions in the Far East, and, though the remuneration offered was almost princely, the attempt failed. This want, however, is being rapidly filled in that country by the system recently inaugurated by the forestry branch of the United States Department of Agriculture.

In the Dominion, increasing interest has been taken in the subject during the last two or three years, and as a result both our Governments and our universities are helping to place the profession on a prac-

tical basis. In the past, people have had an idea that the duties of a forester were something akin to those of a fire ranger, whereas, as Principal Loudon has aptly remarked, a fire ranger is no more a forester than a navvy is an engineer. A forester's business is not merely to prevent a forest from being damaged by fire, nor to prevent the cutting down of trees, but rather to see that they are cut to the best possible advantage. There are more ways than one of cutting lumber. By one, the timber wealth of a country is more or less rapidly destroyed, with direful consequences to its climate, watersheds, picturesqueness and agricultural possibilities. By the other, which we in Canada will have to adopt, trees are cut down according to a scientific system, which, while being the source of a perennial income, yet leaves the forest of greater value than it was in the beginning. This is the manner in which things are managed in Germany, where many districts bring in a larger income from their trees than the same area devoted to ordinary crops.

In Canada, too, some such plan is needed to conserve the wealth which nature has given us, and which even already has, in many sections, been deeply trenched upon. In Ontario there are many districts which have been denuded of trees with bad results. The office of the trained forester would be wisely used in the teaching of farmers how to care for their wood lots for their own profit and the advantage of the province. Some farmers might easily spare themselves the trouble of planting year after year crops of grain which on their soil yield but meagre profits, and by a little work and care for a few years, have a perennial harvest of infinitely greater value. Lumbermen as a class have mostly by this time recognized that foresters are far from being their enemies; it remains for agriculturists to learn that foresters are very far from being mere faddists when they try to teach them how to beautify their homes.

CANADA'S MINERAL PRODUCTION.

We have received from the Geological Survey of Canada the annual report for 1902 of the Section of Mines, prepared by Mr. E. D. Ingall, M.E., and his assistant, Mr. J. McLeish, B.A. A very large quantity of information, both statistical and of a general nature, is given concerning the mineral industries of the Dominion, but the gist of it was given in our columns some months ago, as taken from the preliminary summary of the department, so we need not refer to it in greater detail.

There is also to hand, from the same source, a summary of Canadian mineral production for the year 1903, subject to revision, but no doubt correct for all practical purposes. The following table will serve to show the quantities produced in detail and their value.

METALLIC.

Product.	Quantity.	Value.
Copper, pounds	43,281,158	$ 5,728,261
Gold, Yukon, $12,250,000 Gold, all other, $6,584,490		18,834,490
Iron ore (exports), tons	368,233	922,571
Pig iron from Canadian ore	42,052	707,838
Lead (c), pounds	18,000,000	762,660
Nickel (d), pounds	12,505,510	5,002,204
Silver (e), ounces	3,182,000	1,700,779
Zinc (i), pounds	900,000	48,600
Total metallic		33,707,403

NON-METALLIC.

Actinolite, tons	550	3,108
Arsenic, tons	257	15,420
Asbestos, tons	31,780	891,033
Asbestic, tons	10,548	13,819
Chromite, tons	3,383	33,830
Coal, tons	7,996,634	15,957,946
Coke (f), tons	544,132	1,663,725
Corundum, tons	No returns.	
Felspar, tons	13,228	18,066
Fire clay, tons	2,317	2,505
Graphite, tons	738	23,745
Grindstones, tons	5,538	48,302
Gypsum, tons	307,489	384,259
Limestone for flux, tons	277,452	259,244
Manganese ore (exports), tons	135	1,889
Mica, tons		159,473
Mineral pigments—		
Baryta, tons	1,163	3,931
Ochres, tons	6,226	32,440
Mineral water		100,000
Moulding sand, tons	3,568	7,256
Natural gas (g)		168,900
Peat, tons	1,100	3,300
Petroleum (h), barrels	461,336	922,672
Phosphate, tons	1,329	8,214
Pyrites, tons	33,530	126,133
Salt, tons	53,537	334,088
Talc, tons	688	2,064
Tripolite, tons	835	16,700
Structural Materials and Clay Products.		
Cement, natural rock, 92,252 barrels		75,655
Cement, Portland, 627,741 barrels		1,090,842
Granite		150,000
Pottery		200,000
Sands and gravels (exports), 355,792 tons		124,006
Sewer pipe		317,970
Slate		22,040
Terra-cotta, pressed brick, etc		386,532
Building material, including bricks, building stone, lime, tiles, etc		5,650,000
Total structural materials and clay products		8,017,045
Total all other non-metallic		21,202,062
Total non-metallic		29,219,107
Total metallic		33,707,403
Estimated value of mineral products not returned		300,000
Total, 1903		63,226,510

This grand total of $63,226,510 is to compare with $63,885,999 for the year 1902, or a decrease of a little over 1 per cent., mainly owing to a shrinkage in the production of placer gold in the Yukon. Pig iron, silver, lead and nickel also show a decline, but to offset this there were increases in copper, zinc and iron ore. Confining attention to metallic minerals, there was a deficiency of over $2,000,000, or 6 per cent. In coal and coke, however, there was an advance of over $1,600,000, while mica, limestone, salt and cement also show an increased production. Against these should be placed decreased value in asbestos, natural gas, petroleum, etc., so that, all told, the gain in the non-metallic class was about $1,500,000, or a little over 5 per cent. In the above summary it will be noted that decreases, both in quantities and values, have been the chief characteristics of the leading metallic industries, with the notable exception of copper and nickel. In the latter case, however, the considerable increase in the output has been more than offset by the lower valuation which has been given to the metal following the drop in the average market price for the year. The increase in the copper output was, on the other hand, considerably enhanced by the higher average market price of the metal. It is

interesting to note also that with regard to pig iron, lead and silver, higher market prices modified the heavy falling away in these items.

LAWYERS AND PROFESSIONAL ACCOUNTANTS.

From the last issue of "The Incorporated Accountants' Journal" we note that good relationships between these two professions continue to grow. Speaking at the annual dinner of the Manchester (Eng.) District Society of Incorporated Accountants, the president of the Manchester Law Society when giving the toast of "The Society" traced the growth of friendly feeling between professional accountants and the law in the last half of the nineteenth century. Thirty or forty years ago when public accountants in Great Britain began to organize themselves as a distinct profession there was a certain amount of jealousy amongst members of the legal profession because of the business accountants were doing. But the fears had subsided; the two professions had gone on advancing, each in its own groove. In very few cases was there any infringement by either on what ought to be the work of the other. Mr. Crosse said he would re-echo what was said by the president of the Law Society at Liverpool about solicitors, who had large sums of other people's money passing through their hands, having their accounts audited by professional auditors at stated periods. . . . I regard the auditor, continued Mr. Crosse, not as an unwelcome visitor personally, but as a dose of medicine that is essential for the well-being of the interior anatomy of my business. Upon the same evening the mayor of Manchester (Mr. T. T. Shann) paid a tribute to qualified accountants, whom, he said, had played a great part in making Manchester the city she was. Accountants were indispensable in highly-organized trade and commerce, and their audits were essential to keep things up to the mark . . . . It would be an excellent piece of legislation if there were passed an Act of Parliament which should compel all limited liability companies and all (legal) trusts to have their accounts properly audited. . . . . Steps should be taken which would tend to give the profession of accountancy a recognized standing; and it would give the public greater confidence if a parliamentary register were established, and if it were provided that nobody should be allowed to describe himself a public accountant unless he were qualified to be placed on this statutory register.

Responding to the Incorporated Society's toast to "The Faculty of Commerce of Manchester University," Professor S. J. Chapman thanked the Society of Incorporated Accountants for what its members had done in furthering the development of the University's work. At this public dinner the first toast to the new "Faculty of Commerce" had been given. . . . The purpose of the Manchester University was to deal in an enlightened way with engineering and chemistry, and the scientific solution of problems of commerce. They had dug at ancient records long enough.

THE NORTHERN SECURITIES CASE.

The judgment of the Supreme Court of the United States regarding the Northern Securities case, which has been looked forward to with keen interest by all parties on this continent, has now been handed down, and is adverse to the corporation. The suit was instituted in the first instance for the purpose of dissolving the merger of the Northern Pacific and Great Northern Railway Companies, which, according to the Government's contention, came in violation with the Sherman anti-trust law. It was claimed on behalf of the Government that this consolidation was in effect a pool created to promote the interests, not of one system at the expense of the other, but of both at the expense of the public. The railways claimed that the transfer of the stock of the two companies to the Securities Company was in the nature of a sale, and perfectly legitimate. In the decision now given the contentions of the Securities Company were reviewed, and the judge quoted the various opinions involving the trust question, saying that from them it is to be gathered that all contracts in restraint of trade, reasonable or unreasonable, are prohibited by the Sherman law, and that Congress has the power to establish such regulations as there laid down in that law. The merger without a doubt came within the province of this law, and, therefore, the judgment already given against it in the Circuit Court has been re-affirmed by the Supreme Court. The nominal capitalization of the corporation is $400,000,000. It was expected that such a result of the legal fight might involve some serious depreciation on the stock markets. This, however, has not so far been the case. What will become of the merger in its present form it is hard to say. The securities of which it is composed still exist, of course, and intrinsically their worth is not affected. Some talk has been uttered about the removal of its headquarters to Canada, but all of this is of a rather wild nature, and need not be considered at the present time.

NOTES ON LUMBER.

Ontario lumbermen report business pretty good, though the blockaded railroads and roads have impeded deliveries seriously. Prices remain the same as a month ago; in fact, changes have not been markedly great for some months now. The cut in many sections of the Province has been very light, though reports from others, notably in the Rainy Lake district, speak of an extra heavy production. Business in hardwoods has been very small lately, and dealers complain it has been impossible to get their stuff moved in time. The trade, both in pine and hardwood, is anticipated by most dealers to be good this season.

The above remarks apply approximately also to Quebec. In New Brunswick the season has been a good one so far as work in the woods is concerned. Wages and supplies have both been expensive, however. The cut along the St. John river is estimated to have been about 140,000,000 feet, which is slightly larger than last year, from which season about 40,000,000 feet in addition were held over. In some parts operations were greatly impeded by the enormous quantities of snow. In other sections along the river lumbermen fear a repetition of last year's troubles on a larger scale, in the shape of a difficulty in catching the logs owing to the thin ice being liable to give way too suddenly.

It is announced in British Columbia that the lumbermen, represented by the British Columbia Lumber and Shingle Manufacturers' Association, have at length reached an agreement with the Canadian Pacific Railway regarding freight charges on shipments from Vancouver to the North-West. The local millmen, whose trade interests in the North-West are large, have agreed to reduce the price of lumber $1 per thousand feet all along the line, the cut to become effective forthwith. They also agree to permit the Canadian Pacific Railway to post conspicuously in all its station buildings throughout the North-West price lists on all classes of lumber for the protection of settlers desiring to purchase lumber. The lists will prove a check upon middlemen who might be inclined to take advantage of the buyer's lack of knowledge of prices to turn over a profit over and above that legitimately allowed. The C.P.R. will make a partial rearrangement of rates, so that a considerable increase in the demand for British Columbia lumber in the North-West is looked for. The mills are now reported to have on hand a fairly large stock of all grades and classes of lumber, and are in a position to satisfy all probable demands. It is expected, therefore, that the lumbering and logging industry in that Province will be on a considerably better footing than has prevailed for some time past.

The following is an abstract of a circular from Farnworth

& Jardine, Liverpool, which will give readers an idea of conditions in Great Britain:

The arrivals from British North America during the past month have been 5,395 tons register, against 3,875 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1902, 1903, and 1904 has been 41,177, 34,713, and 44,291 tons respectively. Business has been dull, and buyers are slow in entering into engagements for next season's supplies. The arrivals generally have been larger than during the corresponding month of the past two years, and whilst the deliveries have been fair, the business has not been of a satisfactory nature, and values of some of the leading articles are difficult to maintain; stocks on the whole are ample.

Referring more particularly to Canadian woods, of waney the import consists of about 24,000 cubic feet by steamer, via St. John, N.B., etc.; the deliveries have been disappointing, but values rule steady; stocks are sufficient. The demand for square pine continues very quiet; stocks are large, but there is no change in price. Red pine—There is little enquiry, and present small stock appears sufficient. For oak the demand is very dull; the deliveries small, and stocks are ample, but there is little change in value to report. For prime rock elm there has been more enquiry, and the stock is now reduced to a very moderate compass; values have improved. There is little demand for ash. The arrivals of pine deals amount to about 650 standards; deliveries have been fairly satisfactory, and values are firm; stocks are adequate. There is only a limited enquiry for red pine deals, and the stock is sufficient.

New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals during the past month, chiefly by the winter liners, have again been large, and in excess of the corresponding period last year, viz., 2,710 standards, against 2,400 standards in 1903; the deliveries have been fair, but stocks, although slightly less than the same month last season, are still large, and recent consignments have been forced off at lower prices; contracting for next season is very quiet. The demand is slow for pine deals. Of birch logs the arrivals have been on a moderate scale; the deliveries have been fairly satisfactory, and stocks are not large; values are firm. The import of planks has been small; there is more enquiry, and stocks are light; values are firmer. The demand for British Columbian and Oregon pine is quiet, and the stock of both logs and lumber is too heavy; values are steady.

AN ARBITRATION BILL.

The St. John, N.B., Board of Trade have been engaged lately on a very interesting piece of work. It is no less than the forming of a synopsis of the New Zealand Arbitration Act, with modifications adapted to local conditions.

The Act contemplates the creation of two sets of industrial unions, one of employers and the other of workmen. Any society of not less than two employers may be registered as a union of employers, and one of not less than seven workers may register as an industrial union of workers. The registrar is a Government officer. Unions so registered are subject to the jurisdiction of the Act, and become corporate bodies. Members may be sued for fees, dues and fines; the union may own property, sue or be sued in its corporate name. Industrial agreements may be made between industrial and employers' unions, or between the former and individual employers. They shall not be for a longer time than three years, and shall be binding on the original parties, and on every member of the union which is a party. There shall be one court of arbitration for the whole Province for the settlement of industrial disputes, having three members. These are to be appointed by the Government. The president must be a judge of the Supreme Court; one of the others is to be recommended by unions of employers, the other by unions of workers. This court has jurisdiction to hear and determine industrial disputes, where application is made, the parties being industrial unions or associations, employers' or employees' unions. Employers or their union may appear in person or by agent; the industrial union of workmen by its chairman or secretary or agent. When a case has been referred to the court, neither of the parties concerned shall resort to a strike or lockout, or discontinuance of employment or work on account of the dispute. Penalty for default in this case shall not exceed $250.

Even in their home, New Zealand, the laws affecting employer and employed are looked upon in very different ways as to their efficiency, though the consensus of opinion seems to preponderate in their favor. Whether such legislation would meet with success in Canada is still more doubtful, but there is no doubt that some remedy is needed—and badly needed—for the present state of affairs, and it is to be hoped that this attempt will not be fruitless.

OUR ST. JOHN LETTER.

The Bertram Iron Works, Toronto, has cause for complaint at its treatment by the city council of St. John, in connection with the call for tenders for a new ferry boat. The city had a naval architect named McLean, of New York, to prepare plans of the new boat, and then a call for tenders was made. Mr. Bertram heard of the matter when in St. John with the Transportation Commission, and his firm put in a tender. It was in the vicinity of $92,000, and was the lowest submitted, but was considerably in excess of the $75,000 Mr. McLean had estimated as the cost of the boat. The city decided to notify the Bertram people that their tender was the lowest, and at the same time to have a conference with the naval architect over the increase in cost. Mr. McLean was telegraphed for, came to St. John, talked with the committee and with a couple of local iron concerns, who then submitted tenders for the work, and that of Messrs. James Fleming & Sons, of $80,000 was accepted. These people had not tendered at the start, and no second call was asked. When the Fleming tender was accepted the city clerk was instructed to return to the Bertram people their deposit of $2,000. The Messrs. Fleming will have the hull built in the United States, and will construct the machinery here. A few days ago a letter was received from the Bertram Iron Works asking further particulars of the turn-down of their tender, and it may be that the city will find it unprofitable to do business in this way.

Messrs. Emerson & Fisher, the largest house in the city in the iron and stove and kitchen ware trade, have just completed the purchase from Senator Dever, of a property on Germain street, and will have the buildings on it torn down to make way for a five-story, 60 x 100 foot building that they will erect for their steadily growing trade. The tearing down of good buildings to make room for better is a new thing in St. John, and it is only within the last year that such has been done.

The school trustees have decided to accede to the request of the lady school teachers, and to grant them the increases demanded. The change will mean an addition of about $3,000 to the annual assessment for school purposes.

The Provincial Legislature is now in session, but as the estimates have not yet been presented, it is impossible to say what the Government has in store for the people. It is likely, however, that they this year will undertake extensive improvements and changes in the Provincial Lunatic Asylum at St. John. They have promised to pass at this session a factory act, but it has not yet been introduced, and so the provisions are unknown, but it is believed to be moulded on the New Zealand Act. The Government also intends passing an act giving a secret ballot. Heretofore the ballot in provincial elections has been practically an open one, and there has been much intimidation at the polls in consequence. The change is a most desirable one.

The Maritime Nail Works, destroyed by fire a few days ago, may be removed to North Sydney. That town is making a great bid for them, and has offered a free site, exemption from taxation, free water, and a bonus. The company had decided to rebuild on the old site when this offer came, and now it will likely be used as a lever to exact some concessions from the city of St. John. The fact that the owners are all local people, and that the works are run under practically the same management as the Portland Rolling Mills, is a reason for remaining here, but this may

not weigh against the liberal inducement North Sydney has tendered unasked.

Lumber operators along the St. John river and its tributaries are somewhat anxious over the outlook for this season's trade. The English market is unusually flat, and very few contracts are being made. The prices are far below those of this time last year, too low it is claimed to make it profitable to sell. As the English market is not overstocked, there is a hope that a change may come any day.

The failure is announced of Sterling B. Lordly, furniture manufacturer of St. John. His business was a small one and his liabilities light. J. R. McConnell, lumberman, of Marysville, is also in financial difficulties, and has made an assignment in Quebec, where he operated. His indebtedness will be heavy. Mr. McConnell is a son-in-law of Alexander Gibson, the aged lumber king of New Brunswick, who is now lying in bed at his home suffering from a broken collar bone, the result of a fall down stairs. Mr. Gibson is 82 years of age, but is vigorous, and it is thought will get around again. * * *

St. John, N.B., March 15th, 1904.

ONTARIO ACCIDENT INSURANCE COMPANY.

An interesting as well as lengthy address was delivered by the vice-president at the meeting in February of the Ontario Accident Insurance Company. A considerable portion of it was devoted to a survey of the general field of accident and liability assurance. While we are told that an organization designed to rectify rates of premium has been formed, it does not appear to have become operative in the direction in which it was most needed, for we still hear of foolish rate-cutting. It is a singular thing, indeed, that while almost every one you speak to on the subject deplores the irregularities that have crept into the business, somebody is always getting risks at just a little under the agreed-upon rate. There is much need, as Mr. Eastmure points out, that the insuring of employers' liability should be put upon a more stable footing in this country. And it is not easy to understand why half a dozen companies, more or less, should continue to vie with each other as we understand they are doing, in competition for a business, the premiums accepted for which every one acknowledges to be inadequate.

The Ontario Accident Company in its eighth annual report makes a very good showing, for after paying expenses, claims, and an increased dividend, it has put aside $17,500 to reserve fund and $10,000 to contingent fund, a prudent use of surplus earnings. The growth of premium income has been remarkable. Taken at intervals of two years, it was, in round figures, $31,000 in 1897, $71,000 in 1899, $108,000 in 1901, and $178,000 in 1903. The year just past is described as the most satisfactory in the company's history, and it may be remarked that the claims paid during the twelve months were from 1,751 persons, and aggregated $72,973, which was lessened by $2,698 received from re-insurance. A marked increase in volume over the previous year is shown by the business of 1903. The company has now 2,051 shares of capital subscribed, on which $43,695 is paid; $45,500 at the credit of reserve fund, and $10,000 at contingent account. Mr. Geo. W. Monk and Mr. J. F. Smith, K.C., have been chosen directors in room of Col. Jarvis and Mr. R. S. Wood, deceased.

MATTERS IN WINNIPEG.

Although we in Manitoba are still in the grasp of winter (in which, from all accounts, we do not differ from the rest of Canada), and, therefore, less busy than we have been, there is a good deal in a commercial way to attract attention and expectation towards the spring. Our business men are looking forward to an active business; the population of the Province has grown; settlement has grown; there has been already an increase in the demand for a great variety of merchandise. As a consequence spring orders may this year be expected to be large. There is hardly any room to doubt that we shall soon witness an increase in the factories of Winnipeg, and probably of other parts of the North-West. People here are getting less and less disposed to depend upon the distant factories of Ontario and Quebec, especially with so expensive a railway haul for their purchases, aggravated in the winter by delays that must happen in the very nature of things. We must have more factories within our own borders. Joining in this movement are some of the big land men residing in the States to the south. These are contributing liberally, which is not difficult to understand, for they, of course, own big blocks of land, and are deeply interested in promoting settlement. The public spirit, enterprise and skill displayed in this movement deserves success. In the West we recognize no such word as fail.

Travellers who have been down through Southern Manitoba report business quiet. The short crops and poor sample of wheat last year are accountable for this condition of things. The banks are extra careful, too, just now, and money is tight. The abundance of snow that has fallen this year promises moisture sufficient for the husbandman. Should the spring rains fail him, as they did last year, he won't be so badly off. So, you see, there are always compensations, and the outlook is full of encouragement in the West.

One of the most remarkable movements in recent times in our western country is that which is being organized just now in the city of Winnipeg to promote immigration from south of the line to our fertile plains in the North-West. The Western Canada Immigration Association, of which Mr. D. W. Bole is chairman, will by means of advertising in magazines principally, bring forcibly before our neighbors to the south what excellent opportunities this country offers to the "home seeker." With this object in view the association proposes a fund of not less than $50,000, and has set about raising this large amount by a very vigorous canvass, every business man being called upon, and his contribution thereto solicited. The response has been hearty and encouraging.

Winnipeg, 7th March, 1904.

NOVA SCOTIA STEEL AND COAL CO.

The annual meeting of the Nova Scotia Steel and Coal Company, Limited, took place in Montreal on the 12th inst. According to the manager's report, the company's business for the past year was the largest and most profitable in its history. The output showed a very satisfactory increase, and the company is now the second largest producer of coal in Nova Scotia. The regular quarterly dividend of 2 per cent. on the preferred stock and a half-yearly dividend of 3 per cent., making, with the dividend paid in October last, a total of 6 per cent. for the year on the common stock of the company, were declared payable April 15th. The profits for the year 1903 were $859,397.19, as compared with $609,935.25 for the previous year, being over $200,000 larger than in any previous year of the company's history. After providing for the dividends on the preferred and common stock, and the payment of all other fixed charges, and making the usual large allowance for depreciation, the balance carried forward to the credit of profit and loss account on the first day of January, 1904, was $685,642.62, as compared with $453,149.43 on the first day of January, 1903.

THE MANUFACTURING GROCERS.

The annual meeting of the Manufacturing Grocers' section of the Canadian Manufacturers' Association took place in Montreal on the 4th inst., a large attendance of members being present. There was a very interesting discussion on food adulteration, and a consensus of opinion that stringent measures should be enacted with adequate penalties to put a stop to the importation and selling of impure foods. A committee was appointed to lay the matter before the Government. One feature which developed during the discussion was the fact that the Act as it is constituted at present makes itself felt in the wrong direction, the exceedingly heavy penalty of $500 for selling adulterated goods falling upon the retailer instead of upon the manufacturer. The retailer is often the innocent victim in the sale, and the imposition of such a heavy penalty

means his ruin. A reduction of this fine was desirable. In case of action by the Government against a vendor of adulterated goods, the retailer would move heaven and earth to work the member of his constituency and other powerful political friends to save himself; but if the fine were made one which he could pay without crippling himself, the chances are he would pay it. He would, however, be on his guard in future, and insist upon getting pure goods.

Another subject which provoked a good deal of interesting discussion was the responsibility of the carrying companies, and the remedy for the apparent indifference on the part of railways to the shipper and consignee. On this question a very able paper was read by Mr. W. D. H. Miller. He went largely into the matter of claims and payments of freights, and members were evidently glad to have such an able exponent of these matters address them. The election of officers resulted as follows: Chairman, S. W. Ewing, Montreal; vice-chairman, Wm. Gorman, London; secretary, E. H. Cooper, Montreal. Executive Committee—R. A. Donald, Toronto; W. A. Mitchell, Toronto; J. J. MacLaren, Hamilton; T. J. Ward, Halifax; R. Ewing, Montreal; W. H. Johnston, Montreal; W. L. Hamm, St. John, N.B.

CARELESSNESS AS TO FIRE AND ITS RESULTS.

A striking instance of the result of recklessness as to the use of fire is given in the Philadelphia Record of one day last week. A little boy at play caused an enormous loss by very simple means. At the noon hour this youngster was playing with a hot iron pipe in one of the buildings of the National Tube Company, at McKeesport, Penn. He dropped it through a hole in the floor and returned to work. It was later discovered that the pipe had set fire to some refuse under the floor. After two hours' work the flames were extinguished at this place, but they had worked their way under the floor to the butt-weld mill, where there was an accumulation of grease, the saturation of years, and here more than $150,000 worth of machinery was practically destroyed, besides the entire woodwork in the building. The fire ate as far as the threading floors, where the most valuable machinery was used. The total destruction arising from this thoughtless act of a youngster at his pastime will, it is said, exceed two hundred thousand dollars.

DEATH OF MR. GEORGE SIMPSON.

Many will hear with regret of the death, since our last issue, from cerebral hemorrhage, of Mr. George Simpson, Canadian manager of the Royal and the Queen Insurance Companies, which took place in Montreal. He had been ill for two days, but his case was not considered critical until some hours before his death. Mr. Simpson commenced his business career in the Caledonian Insurance Company in Dundee, Scotland, of which he latterly became branch manager for Dundee and Aberdeen. He was selected assistant manager of the Royal in Canada in 1892 by the late Mr. John H. McLaren, and acted in that capacity with Mr. William Tatley until 1896, when, on Mr. Tatley's retirement, he assumed the management in Canada. Mr. Simpson was forty-two years of age, and was widely known in business circles, in which he was held in high esteem.

TRADE OPPORTUNITIES.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office in London during the week ending 26th February. Further particulars obtainable at Monetary Times office by sending stamped envelope: A London produce broker desires to take up sale of Canadian wheat on commission; also other grain, canned fruit and fish. A London firm of general merchants and commission agents want consignments of Canadian fruit. Enquiry is made respecting shipments of concentrated apple juice from Canada. A London timber merchant wishes to be placed in touch with Canadian manufacturers of blind laths. A firm of sauce, ketchup, essence and vinegar manufacturers are anxious to appoint representatives in one or two of the largest trade centres in Canada. A commission agent in the north of Ireland desires agencies for Canadian canned fruits, meats, condensed milk, cheese and canned fish. A London firm with South African connections wishes to be placed in touch with reliable shippers of Canadian flour. A North of England firm has requested to be put in communication with a few of the largest exporters of eggs from Canada.

The following enquiries were received by the Canadian section of the Imperial Institute, London, S.W., during the week ending 26th February: A firm working the grocery, confectionery and druggist trades invites correspondence from Canadian manufacturers in these lines. The manufacturers of glass bottles of various kinds ask to be placed in communication with Canadian importers. A firm manufacturing needles and fish hooks is open to appoint suitable resident agents for Canada not in the Maritime Provinces or British Columbia. A firm in Aberdeen wishes to hear from Canadian shippers of cheese, butter and other produce.

BANKING AND FINANCIAL ITEMS.

The Bank of Hamilton has opened a branch at Melfort, N.W.T.

It is the intention of the Montreal City and District Savings bank to open a new branch at the corner of Ontario and Maisonneuve Streets in Montreal on or about the 15th of May next.

The West India Electric Company, controlled mainly by Canadian capital, and operating in Jamaica, report gross earnings for 1903 of $138,723, an increase over the preceding year of $8,913, while operating expenses were $63,701, a decrease of $1,673. Net earnings were $75,022, an increase of $10,586, while the percentage of net income to capital was 4.94, compared with 3.66 in 1902. The number of passengers carried, however, shows a falling off, the figures being 3,692,109 and 3,505,306 in the two years. During the year the company completed the enlargement of its power plant by one-third and increased the capacity of its transmission line.

The second annual report of the United States Steel Corporation has been issued, and the following figures compared with 1902:

	1903.	1902.
Net earnings	$109,171,152	$133,308,763
Net balance	83,675,786	108,534,374
Dépreciation, etc.	5,378,837	.....
Preferred dividend	30,404,173	35,720,177
Undivided prof.	12,304,916	34,263,656
Common dividend	12,707,562	20,332,690
Balance, surplus	66,096,618	.....

Expenditure for maintenance, renewals, and extraordinary replacements amounted to $34,785,191. In the report comment is made on the remarkable falling off in business and in profits, resulting in the passing of the last dividend.

The bizarre case of Whitaker Wright, and the comparative ease with which he continued to delude the public by means of cooked accounts and the mere appearance of profits has led the British Government to introduce an amendment to the Act which, though consisting of only two clauses, is so stringent that it is likely to make considerably harder the road of the bubble promoter. In future any person, being a director, manager, secretary, or other officer of any company, or being the auditor of a company, whether an officer or not, who wilfully circulates, publishes, or makes, or prepares for circulation or publication, or concurs in so circulating, publishing, making, or preparing any written statement or account relating to the financial affairs or property of the company which he knows to be false in any material particular, shall be guilty of a misdemeanor, and shall be liable on conviction or indictment to imprisonment for a term not exceeding two years, or, in the discretion of the court, to a fine not exceeding £500. Great Britain, all things considered, has been singularly free from embezzlements on a huge scale, but the new law, which in that country, is apt to be carried out to the letter, will probably make such rarer still.

The Bank of British North America has opened a branch at Gananoque, Ont., with Mr. Watt as manager.

The Canadian Permanent Mortgage Corporation have taken over all the mortgages and agreements of the Atlas Loan Company, not included in the sale advertisement. The face value of the securities in question was about $28,000, and the price for which the transfer was made, was, we understand, $26,750. There were thirteen properties in the deal.

The weight of paper money is very deceptive. An employee of the Treasury at Washington describes some amusing cases of guessing at the weight of some bundles of notes. He has often asked the question, How many one-dollar United States bills will it take to weigh as much as a $5 gold piece. The answers ranged all the way from 50 to 500; and even persons who had been accustomed for years to handling money guessed that it would take from 20 to 100. Now, he says, the fact of the matter is that with a five-dollar gold piece on one scale you would only have to put six and one-half dollar bills on the other scale to balance it. As a matter of experiment with an ordinary kitchen scale, it takes only five or six Canadian $2 bills to equal in weight one twenty-five cent (King Edward) Canadian piece of 1902.

The eleventh general annual meeting of the People's Building and Loan Association of London, Ont., was held on the 2nd inst. The profits earned during the year (including $268 brought forward from the preceding) amounted to $44,594, the largest in the association's history. Two half-yearly dividends were paid at the rate of 6 per cent. on the permanent stock, 8 per cent. (loan fund) on instalment shares "A," "B" and 'E," 5 per cent. on instalment shares "C," and 6 per cent. on instalment shares "A" and "B," issued since September 10, 1903, making a total of $29,356 paid in dividends. Of the surplus, $2,000 was transferred to rest fund and $1,166 carried forward. The assets of the association now amount to $677,145, though during the year $104,779 has been paid out in the shape of matured and withdrawn stock. The amount loaned out on first mortgage on real estate security is $507,738, in 647 loans.

Many people conceive the idea that any average business man or men can engage in the farm loan business, and conduct a successful and safe business. Such companies and brokers have brought disrepute to the business, and losses to the investors. For such people as the above, the words of Geo. R. Fultz, the American financier, may prove a helpful reminder. He says that to conduct a safe and reliable farm mortgage investment company or brokerage, the soundest judgment of values is required, always tending to the most conservative idea of the present and future, possessing great energy and will power, always studying the conditions of the country and mortgagors and keeping in touch with them and their movements. Never permit your local agents to rush you in closing a loan, or allow their judgment, of that or anyone else, to change your ideas of the value of a tract of land you are examining. You should be able to say no. The successful loan broker or company must have a thorough and practical knowledge of farming. It is necessary that they should have. They should keep in mind at all times the whole interest of their investing clients and the duty they owe to them, protecting their interests in every detail as if it were their own.

ROYAL AUTOMATIC SMOKE CONSUMING CO.

The report of Mr. Geo. C. Robb, of the Boiler Inspection and Insurance Company, Toronto, upon the working of the Royal Automatic Smoke Consuming Company's device makes a remarkable showing. The test, which was carried out, we understand, at the suggestion of the Canadian Manufacturers' Association, lasted sixteen hours, during eight of which the consumer was in use, and in the other eight when it was off. The coal consumed in the former case was 1,327 lbs., while in the latter it was 1,600 lbs. The amount of water evaporated from, and at 212° F., per pound of coal was 10.27 lbs., with the consumer on, and only 7.63 lbs. when it was off. In brief, its use meant the extraordinary saving of 34.6 per cent. Mr. Robb's letter on the subject will be found in another place. The remarkable saving of expense is not the only virtue which this new device possesses, however. Another feature apt to commend it greatly to engineers is its wonderful simplicity, it being an easy matter to fix it in front of a boiler without disturbing things in the least.

INSURANCE ITEMS.

We learn that, according to the latest estimates, the amount of insurance involved in the recent Rochester fire was $2,729,575, while the total actual loss to the companies will be $2,293,675.

The St. Louis World's Fair management have invited several insurance managers and officials to pay a visit soon to inspect the buildings, and the facilities for fire protection.

Mr. J. W. H. Pye has been appointed auditor by the Travelers' Insurance Company, with headquarters at its offices at Hartford, Conn.

Mr. O. L. Van Laningham, chief agent for Canada of the State Life Insurance Co., of Indiana, has just returned to this city after an absence of two weeks in the interests of the company. He regards the outlook in Canada as very bright indeed, and reports that the welcome accorded to the new company's representatives and their proposition has been most cordial. He hopes soon to open an office here, but in the meantime is making his headquarters at the King Edward.

It is of interest to note that the preliminary report of the Insurance Commissioner for Massachusetts shows that the average loss ratio of all companies on Massachusetts business is 41 per cent. The State mutual companies show 21.3 per cent., State stock companies 51.9 per cent., other State companies 42.3 per cent., and foreign companies 51.3 per cent. Of the premium receipts State mutuals had $3,003,857, State stock companies $918,987, other State companies $8,418,726, and foreign companies $3,713,336.

The Wisconsin state capitol at Madison, was destroyed by fire a week or so ago, with a loss estimated at $800,000. The fire involves the building of a new capitol, a special session of the legislature and the probable renewal of the agitation in favor of the removal of the capitol from Madison to Milwaukee. Governor Schofield during his term had the prudence to maintain insurance on the building totalling $600,000, but the last legislature with a brave show of "economy" instituted an insurance fund, and directed the state's officers to allow the insurance policies to lapse. There is in the insurance fund at the present time only a fund of about $6,000 to meet the loss, which conservative estimates place at $800,000.

DRY GOODS ITEMS.

French & Smith's shoe store in Montreal was a few days ago damaged by fire to the amount of $8,500; covered by insurance. There was also a loss of $3,500 on the building; insured.

The dry goods stock, furniture and fixtures of A. R. Kerr & Co., in Hamilton, valued at $40,882, has been purchased by the T. H. Pratt Co., of the same city, for 40 cents on the dollar.

Quite a haul of smuggled goods was made in Brockville last Sunday night. Three customs officers were "in it." The information was supplied by a man mixed up in the transaction, and as a result they descended on a boat house, where they found and confiscated eleven bales of upholsterers' silk, each weighing one hundred pounds, and valued at from $1,000 to $1,500. There was nothing on the goods by which they can be identified.

A Nottingham, England, letter says that cotton millinery laces are selling more freely and that manufacturers are busy with orders from the home, Continental, colonial and American markets. The many descriptions of torchons and Valenciennes are most to the front in all qualities. Insertions and galons in ivory, butter, and Paris écru are still in favor, requiring also 18-inch allover nets for millinery purposes. Common goods and some specialities are required in white and natural. For common loop edgings, Bretonne laces, and stiff Valenciennes there is a moderate shipping demand.

The Dry Goods Economist states that "lustre" is the demand of the hour in all silk materials for women's adornment. Highly lustrous ribbons can only be manufactured by the use of a fine quality of silk, and lots of it, as the filling threads have to be beaten up together in order to give body, and it is the quantity of silk and the quality that produces the lustre which is just now the distinguishing feature of silks generally. In bringing out of ribbons of this sort manufacturers have taken their cue from messaline silks, which are now in favor with the New York and Paris retailers, and are likely to be for some time to come.

With regret we learn of the death of Mr. Henry S. Boehmer, of Berlin, Ont., who had been a subscriber to the Monetary Times for over sixty years. In early life he was a successful farmer, but some thirty-six years ago retired from this occupation to carry on a dry goods store, which afterwards became the largest emporium in the county. But it will be largely as a builder up of his place of abode that Mr. Boehmer will be remembered. Berlin owes between fifty and sixty of its most desirable residences to his energy and business capacity. Besides being president of the A. O. Boehmer Co., Limited, he was also president of the Dominion Table Company, director of the Berlin Piano Co., and the J. Y. Shantz & Sons Company.

In New York, worsted yarns are much easier to sell at the old price, but as most spinners having cleared a quantity of stock have advanced their prices, buyers hesitate, and the amount of business being transacted is less than it was for the previous two weeks. The firmness of the wool market, which has compelled spinners to pay higher prices for their raw material, has not been reflected in the price of yarns. At the prices now asked the cost of production is barely covered, and, as the market is now cleared of needy sellers of yarn, the test of the future is now come. Users have covered their wants at the low prices for some time to come, and spinners are reducing production to meet the reduced demand. Coarse counts continue in largest demand, and are almost the only yarns taken by the men's wear trade.

—We are informed that the newly appointed Railway Commission will shortly visit Toronto with a view to taking evidence and considering grievances from shippers. These grievances should be put into writing, in as succinct a form as possible, it being quite impossible for the Commission to act upon general statements.

—In our notice—Monetary Times, 26th February, 1904—of the Merchants Bank of Prince Edward Island some inaccuracies are to be found in the statement there given of its deposits and its current loans. We think it well, therefore, to re-state the figures accurately, thus: Net profits for year, $55,595; transferred to rest, $30,363, making that fund $266,000; paid-up capital, $341,781; circulation, $304,756; deposits, $1,127,315; current loans, $1,769,550; total assets, $2,073,695.

—In commenting last week upon the 1903 statement of the Mutual Life of Canada, speaking of its earning power being good, the cash assets being of most advantageous character, the curious statement was made that the company's reserves "are calculated upon the lowest standards," which was the exact opposite of what was intended to be conveyed. The meaning was, of course, that the lowest rates of interest were used in calculating them; still, this would not imply a low standard for reserves, but a high one.

—During the coming month of May, when it is the custom of the good people of Victoria, B.C., to make a grand celebration in honor of the memory of the late Queen Victoria, and when thousands of visitors come in from the mainland and inland towns, it is the intention to hold in addition a great "Made-in-Canada" Fair. The idea has gained considerable headway in our great western Province, and nowhere is patriotism, both for the Dominion and for the Empire, more marked than it is there.

Mr. B. Jarvis, the Toronto architect, who recently returned from a visit of inspection to Baltimore, says he has been convinced by what he saw that the best safeguard against fires consists in the use of concrete and brick walls. The building material of the future, he said, will be monolithic concrete, poured and made of crushed bricks and Portland cement, or bricks laid in cement. Brick walls laid in lime water will not stand the fire. The best of evidence of that is the result—150 acres of brick piles. The natural stone had simply disintegrated and lost all resemblance to its original form. The following is the order in which various materials seem to have stood the conflagration:—(1) Concrete and bricks, (2) cast iron, (3) steel, (4) granite, (5) sand stone, (6) lime mortar.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, March 17th, 1904, compared with those of the previous week:

THE
Royal Automatic Smoke
Consuming Company.
TORONTO, ONTARIO.

REPORT OF THE BOILER INSPECTION AND INSURANCE COMPANY.

Toronto, March 15th, 1904.

J. A. WHALEY, ESQ.,
Manager the Royal Smoke Consuming Co.,
Room Z, Confederation Life Building, Toronto.

Dear Sir,—The following are the results of tests made at the Canada Life Building, Toronto, on March 11th and 14th. On the 11th inst., your smoke consuming device was in operation, and on the 14th inst., it was not in use.

	Consumer in use.	Consumer off.
Duration of test	8 hours.	8 hours.
Total coal consumed	1,327 lbs.	1,600 lbs.
Ashes produced	131 lbs.	191½ lbs.
Water pumped to boiler and apparently evaporated	11,270 lbs.	10,110 lbs.
Temperature of water degrees F.	38.1	40
Average pressure on Steam Gauge	58.8 lbs.	59 lbs.
Water apparently evaporated from and at 212° F. per pound of coal	10.27 lbs.	7.63 lbs.
Saving in fuel by the use of the Consumer	34.6 per cent.	

With the device in use there was practically no smoke visible at the top of the chimney, but without it at each fresh charge of coal the smoke was quite black for a time. The boiler tubes were found to be much cleaner when it was in operation and the coal was burned at a seemingly higher temperature.

Yours very truly,
(Signed) GEO. C. ROBB,
Chief Engineer.

(Copy of a letter from the Boiler Inspection and Insurance Company).

The Ontario Accident Insurance Co.

EIGHTH ANNUAL REPORT

The directors beg to submit to the shareholders the eighth annual report of the company's affairs, together with the statement of the accounts for the year ending December 31st, 1903, and have pleasure in again drawing attention to the substantial increase in its transactions; and also to the very satisfactory results indicated by the abstracts.

The net income from premiums, after deducting $9,320.95 for re-insurance, was $169,060.08.

The income received from investments amounted to $1,891.13.

During the year the company paid under its policies 1,751 claims; the total, after deducting $2,698.21 received from re-insuring companies, amounted to $70,275.54.

The Revenue Account, submitted herewith, after debiting all charges and expenses, shows a balance of $30,950.28. This has been applied as follows:—$17,500 to reserve; $10,000 to contingency account; $2,621 in payment of Dividend No. 6; $828.58 unappropriated.

The reserve fund stands now at $45,500 and the contingency fund at $10,000.

The company's paid-up capital is at this date $43,695. The securities deposited with the Receiver-General at Ottawa are $35,231.80.

The premium income shows an increase of $52,436.56 over that of 1902.

During the year the directors had occasion to regret the loss by death of two of their fellow-members, Lieut.-Col. R. E. C. Jarvis and Mr. R. Shaw Wood, both of whom had been connected with the company since its foundation. The vacancies thus created will be filled at to-day's meeting.

All of which is respectfully submitted.

LARRATT W. SMITH, President.

CLARKSON & CROSS, Auditors.

Toronto, January 28th, 1904.

The eighth annual meeting of the shareholders was held at the company's offices, No. 3 Toronto Street, Toronto, on Monday, the 22nd of February, 1904, at 2 o'clock p.m.

The following shareholders were present:—J. N. Shenstone, J. P. Steedman (Hamilton), A. W. Thomas, A. L. Eastmure, G. H. Muntz, G. W. Monk, E. T. Lightbourn, J. F. Smith, F. J. Lightbourn, G. L. Smith, and fifty-two shareholders, represented by proxy.

The chair was occupied by the vice-president and managing director, Mr. A. L. Eastmure, and Mr. F. J. Lightbourn, the secretary, acted as secretary of the meeting.

The notice calling the meeting having been read by the secretary, the vice-president submitted the report, together with the financial statements (the latter being read by the secretary) and said:—

"Gentlemen,—At our last annual meeting the president remarked, as a matter of mutual interest, that the results of the business for 1902 were, perhaps, the most satisfactory in the company's history. That distinction may now fairly be claimed on behalf of the year just ended, as our growth in income and resources during 1903 exceeds greatly that of any previous year.

"Last year reference was made to the steady growth of our annual income, and it may be of interest to repeat these figures. The increase has been as follows:—

Premiums, 1896..	$ 24,784 60	Premiums, 1900..	$ 88,493 83
Premiums, 1897...	31,440 56	Premiums, 1901..	108,624 77
Premiums, 1898...	46,125 88	Premiums, 1902..	126,349 47
Premiums, 1899...	71,857 36	Premiums, 1903..	178,786 03

"The income from premiums on new and renewal risks since the company commenced business now amounts, in the aggregate, to $676,464.50.

"The beneficiaries under the company's policies, as at December 31st last, numbered, in all, 6,733; and the payments made to them amounted to $289,983.50, showing an average loss percentage on all transactions, covering the eight years during which the company has been in operation, of 42.08 per cent.

"Claims were received during 1903 from 1,751 persons, for sums aggregating $72,973.75, all of which were adjusted and paid with the customary promptness.

The report was unanimously adopted.

On motion Messrs. Clarkson & Cross were reappointed auditors for the ensuing year.

Mr. A. W. Thomas and Mr. E. T. Lightbourn, having been appointed scrutineers, reported the following gentlemen elected as directors: Larratt W. Smith, A. L. Eastmure, W. H. Pearson, J. Herbert Mason, J. N. Shenstone, F. J. Lightbourn, Thomas Fyshe (Montreal), J. F. Smith, K.C., and G. W. Monk.

At a meeting of the directors, held immediately after the annual meeting, Dr. Larratt W. Smith was re-elected president, and Mr. A. L. Eastmure vice-president of the company. Executive Committee—Messrs. Larratt W. Smith, A. L. Eastmure and W. H. Pearson.

PROSPERITY IN BRITISH COLUMBIA.

According to one of the British Columbia papers, the day of dividends is returning for the mines in that rich section of the Dominion. Besides the payment of profits by the Granby and Le Roi No. 2, recently announced the "Sunset," in the Slocan, has now distributed a total for the year of $60,000. With this payment of profits by the Sunset, the province sees its three principal camps—Rossland, the Boundary and the Slocan—back to dividend-paying days. In a short time, if things continue to go well on Vancouver Island, there will be dividend payers over there, for Mount Sicker is hard to beat. The payment of dividends is a great advertisement for the province, says the Miner.

The same paper speaks of a new era in mining at Rossland. During the period of depression the big companies kept going ahead, steadily developing, and now there is an enormous tonnage of pay ore in sight which will shortly be cheaply treated by plants which it has taken much experimenting to perfect. Those who control the destinies of the big properties on Red Mountain are much to be commended for the present satisfactory state of affairs at Rossland.

Not only is the Le Roi No. 2 an established fact as a dividend payer, but there are at least two other properties, both probably richer and bigger than the Le Roi No. 2, that will soon be distributing profits regularly. In the course of the next twelve or eighteen months, several more will also be added to the list. And so the march of progress will continue until there is a long and imposing list of Rossland dividend payers.

UNITED STATES FINANCES

Henry Clews & Co., New York, in their weekly circular, dated March 12th, 1904, say: The stock market seems to have fallen into a state of coma. Now that liquidation is complete a period of exhaustion has apparently set in, the most natural remedy for which will be the rest cure. Commission houses are practically bare of stocks; traders fear to take the short side of the market and find no particular inducements on the long side; while the big leaders who are carrying the stocks are evidently waiting for more favorable conditions before undertaking any new activities. Under such circumstances dullness is inevitable. The war is, of course, an indirect factor in the market, because of its influence abroad. The foreign markets are almost as dull as our own, and the decline in foreign government securities indicates an apprehensive state of mind. The drop in British consols may be attributed to this, or it may be due to a desire to have funds in hand in case of a Russian or Japanese loan later on. Both combatants are chiefly occupied with preliminary operations, and it seems unlikely that any serious engagements will occur until the opening of spring facilities campaigning. American sympathy is adverse to Russia, chiefly because of her exclusive policy.

A favorable feature in the financial situation is the continued ease in money. Funds are abundant and the surplus reserve, which is larger than for several years at this time, now stands at $32,000,000, compared with only $600,000 a year ago. National bank circulation is expanding with usual rapidity, the increase for February being $3,466,000 and the increase for the last twelve months $47,500,000. With call money at present low rates and good bonds sometimes selling on a 5 per cent. basis, while not a few good stocks are selling on almost a 6 per cent. level, there is not much chance for further depression. The chief trouble with the market now is lack of buying power, due to exhaustion. Other hindrances are the Presidential campaign; the cutting of rates by the Eastern trunk lines, and the prospects of further issues by the latter for contemplated improvements. A drop of more than $11,500,000 in February exports (or $12,900,000 in cotton and breadstuffs alone) was also a significant feature. The general business situation, however, is sound, and time should bring about a natural recovery. Improvement in the iron trade is a satisfactory feature, and the declines in railroad earnings seem chiefly due to the severe winter. It must be admitted that some reaction has been experienced in business; but as spring approaches and transportation facilities improve there should be a revival of activities. Meanwhile, values may sag temporarily; but the movement in the long run is more likely to be upwards than downwards, when so many securities can be bought below intrinsic values.

THE GREATEST

responsibility resting upon our manufacturers and power users in Canada is that in connection with their Steam Plants. The Boiler Room is the place where precaution is taken.

The largest Steam Users regard the assistance of a responsible Company a necessity in order to provide protection and to insure a safe and economical maintenance of their Steam Plants

A. G. C. DINNICK, Managing Director

THE council of Edmonton, in the North-West Territories, has awarded the franchise for a street railway for thirty years to a Montreal concern. The company's equipment, buildings and lines will be exempted from taxation for ten years, after which (counting from January 1st, 1905), it shall pay the city 5 per cent. of its gross earnings.

MONTREAL MARKETS.

Montreal, March 16th, 1904.

Ashes.—Prices continue steady at the late high level, dealers continuing to quote from $6.05 to $6.10 for first grade of pots, and $5.70 for seconds. There has not been a reported transaction in pearls this year. As indicating the peculiar position of the market, it may be stated that the total stock in the inspector's stores at present is one and a half barrels. It is expected, however, that some moderate amount of stock will come forward next month.

Dairy Products.—The shipments of these were 23,700 boxes last week, making a total since the close of navigation of 336,624 boxes. Exports of butter were 1,849 packages. The cheese market has assumed a little firmer tone, and sellers are holding at 10¾ to 10¾c. for fine goods. A fair, steady business is doing in butter at from 20 to 21½c. per lb. for creamery, and from 14½ to 16c. for dairy.

Dry Goods.—Business is not as active as this time a year ago. Travellers in the West are again hampered in their movements by storms, and orders are not coming in very freely. City retailers are also disposed to complain, the weather being yet too chilly to occasion any brisk demand for spring stuffs. Remittances are not over-free, and ap-

plications for renewal favors are much more numerous than a year ago.

Furs.—Partial cable advices from London regarding the fur sales now in progress show declines in the various lines offered, due largely, it is presumed, to a falling off in the Russian buying, owing to the war. Red fox has sold 17½ per cent. lower than last March; otter, 15 to 20 per cent. lower; marten, 22½ per cent. lower; fisher, from 25 to 35 per cent. lower; lynx, 50 per cent. lower; silver fox, 40 per cent. lower; cross fox, 27½ per cent. lower. Locally, there is little doing in raw furs, as is usual at sale time, and receipts are very light. We repeat quotations for prime pelts as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Sugars keep moving upwards, and on Monday the local refiners established a further all-round advance of 5c. a cental, making the present factory price for standard granulated $4.15 in barrels, with yellows ranging from $3.55 upwards, and it is intimated that further advance is not improbable. The demand is good. The molasses market is weak, first cost at the island being cabled at 9c., equal to laid down cost of about 25 cents, and local jobbing figures are easier at from 30 to 32½c., as to size of package. Dried fruits are moving out slowly in odd boxes. Values in teas all show firmness, with a very fair demand reported. The general movement is reported as rather better than it has been of late, but collections are rather poor.

Hides. — The Association of Hide Dealers has adopted a new schedule of prices, and they now quote 9c. for No. 1 city beef hides, and from 8 to 8½c. for country hides. For city calfskins they quote 13c. for No. 1, and 11c. for No. 2, and for country calfskins 11 and 9c. for Nos. 1 and 2, respectively. Lambskins remain at 10c. and sheepskins at 75c. each.

Metals and Hardware.—Goods are now moving more freely, and the volume of business shows some increase. In values no very marked changes are noted. Pig iron quotations remain as given last week, and for bars the general quotation is now $1.75, even for small lots. Canada plates are easy, and it is expected they will sell at $2.15 to $2.20 on opening of navigation; present quotation is $2.30. Black sheets, 26 gauge, are said to have been offered at under $2. The assortment of large tinned sheets is badly broken up and there is said to be quite a brisk demand for these goods, which is hard to meet; 6¾d. for 24 gauge is the base price, but an advance may be asked, owing to the scarcity. Ingot copper is rather firmer at 13½ to 13¾c.; lead is stronger at $3.25 to $3.40 as to lot; spelter, $5.75 to $6; tin, 32 to 32½c.; antimony, 7½ to 7¾c.

Oils, Paints and Glass.—Preparations are in order for the general shipping of spring orders, when the summer freight rates come into effect on April 1st, but some houses are already making some fair shipments. Travellers have not made up the lost time caused by the irregular railway service of the winter, and it is not calculated the volume of business this spring will be up to last year's figures. In prices there is nothing specially new. Turpentine continues to fluctuate, and though the quotation was recently 92c., it is again down to 90½c. by the single barrel. Linseed oil has not shown the recovery expected by some, and the market is still an easy one. Fish oils continue very dull. We quote: single barrels, raw linseed oil, 46 to 47c.; boiled, 49 to 50c., net 30 days, or 2 per cent. for four months' terms. Turpentine, 90½c., single barrels;

TORONTO MARKETS.

Toronto, March 17th, 1904.

Chemicals, Drugs, Etc.—The strength in camphor still continues and prices are still tending upwards. Quinine also is dearer, both results being due to the state of affairs in Japan. Opium is dull. There is an easy market for menthol.

Forging Ahead . . .

In Tendering to its Policyholders and Well Wishers

THE SEASON'S HEARTY GREETINGS

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

is pleased to announce that it has written during the past year

Over Five Millions

of good Canadian Business; and that in all other respects the Company has had a most successful year.

prices for May and June hover a little above 16c. The wholesalers' report a busy week, especially as some considerable progress has been made in clearing up the railroads and allowing the delivery of goods. Travellers report very good prospects for the spring season, and goods already ordered show up well on an average.

Flour and Grain.—For ninety per cent. patents now the ruling quotation is $3.65, in buyers' bags, middle freights. Manitoba flour keeps steady. Not much change has taken place in millfeed, nor in oatmeal. In wheat, there have been no changes since last week, nor in other grains. Little or no business is being done.

Fruits and Vegetables.—Prices for oranges are firmer, and shipments in refrigerator cars are being commenced. Other lines remain about as before with a fair business passing. A despatch recently from Liverpool says that the market for apples was active at rather lower prices, thus: Baldwins, 16s. 6d. to 19s.; spies, 20s. to 23s. 6d.; russets, 18s. to 22s. 6d.; Denmarks, 18s. to 20s. 6d.; seconds, 7s. less. Receipts for Halifax for week ended 5th inst. were 18,625 barrels, St. John, 3,007 barrels. Total receipts from all sources since season began, 3,230,848 barrels, against 2,276,383 barrels for 1902-03. Pineapples are beginning to make their appearance in the local market, and they are expected to be plentiful very shortly: Apples, $1 to $2.50 per barrel, according to grade; cocoanuts, $4 per sack; oranges, California navels, $2 to $3.25; Mexican, $2 to $2.50; Valencias, ordinary large, 714's, $5; marmalade oranges, $2.50 per box; lemons, Messina, 360's, $2.50 to $2.75; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; cranberries, $7 to $9 per barrel; $1 to $1.25 per basket; Spanish onions, $3.50 to $3.75 per large case, and $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel; case tomatoes, $4.50 to $5; dates, Sair, 3½c. per lb.; Halloween, 4c.; figs, 8c. to 12c.; tap figs, 3½c.; pineapples, $4 to $5 per case.

Groceries.—Another advance has been made of 5c. per cental on all grades of sugar, in sympathy with the strength of the market in New York, and the movement at firm figures is very fair. General trade has improved throughout the country and may be described as very good. In prunes there is a good business being done, but prices in our Prices Current are shaded down a little compared with heretofore. Teas are still quite firm. Canned goods are experiencing a normal movement, and prices keep quite steady.

Hides and Skins.—An advance in hides is to take place in the Chicago market, but it is not likely to be followed here owing to the poor quality of the supplies coming forward. The volume of trading going on just now is on the light side. Sheep and lambskins have gone up to $1 and $1.10. No great activity can be noted in the leather market, which has been greatly hampered by the bad state of the roads in country districts.

Live Stock.—In sympathy with the advance in export cattle in Chicago, buyers on the local market this week showed increased willingness, and as a result, prices were firmer. Extra choice fetched 5c. in some instances. For butchers' cattle, too, there was a pretty good demand, especially for animals of good quality. The demand for stockers and feeders is fair, and most of those offered this week realized 10 to 25c. per cwt. more. Few milch cows were offered, and trade was slow. All calves sold readily. There were not many sheep or lambs, but they sold very rapidly.

Provisions.—Butter, both dairy and creamery, is coming forward in liberal quantities, but the trade finds it not difficult to dispose of it. The demand is moderately good. The cheese market is steady. Eggs are coming forward more liberally, and they are in good request. The poultry market is steady at good prices, with no great supplies coming forward. Hops are dull, but prices keep steady at 26 to 32c. for Canadian. Prices for hog products are steady, and a fair business is being done, but it would no doubt improve with better transportation facilities.

Seeds.—A decline has taken place in the United States market for seeds, and the feeling here, as a consequence, is weaker, though so far no price changes have been made. Prices are quoted as follows: $5.25 to $5.75 for red clover, and $6 to $6.50 for extra choice; $3 to $4.25 for ordinary alsike, and $5 to $5.25 for choice lots; $1.15 to $1.50 for machine threshed timothy, and $1.75 to $2 for flail-threshed.

Wool.—Practically no trade at all is passing in fleece wool, and pulled is for the moment not much better. The London wool sales show continued upward tendency in values.

Agents Wanted in All Unrepresented Districts.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe

Mercantile Summary

Some men are so given to controversy that they will spend fifty cents worth of time in getting the better of a five-cent argument.

S. B. Lordly, a manufacturer of furniture in a moderate way at St. John, N.B., has assigned. He began business for himself about four years ago. His assignment is now reported.

It has now been determined not only to light the whole stretch of the Welland Canal by electricity instead of gas, but to operate the gates, valves, bridges, and sluiceways of the canal by the same power. The order for the cedar poles and steel poles for carrying the wire has been given. The electric power will be furnished by the Cataract Power Company.

An extension of time is being asked by a Syrian named R. Kowrey, formerly doing a peddling business throughout the Cape Breton district, but for several years past carrying on a general store and peddlars' supply business at Inverness, N.S. He claims to have a surplus of $4,500.

A winding-up order has issued in the matter of the Greig Manufacturing Co., Montreal, makers of essences and grocers' sundries. The company was incorporated four or five years ago under a Quebec charter, authorizing a capital stock of $12,500.—The Montreal Cigar Co., with an authorized capital of $15,000, has also been put into liquidation. The formation of this company was an incident in the long-continued cigarmakers' strike, in which the cigarmakers' union came out second best.

The Berlin Felt Boot Co., whose factory was burned on February 16th, has completed plans for rebuilding the main building, which was totally destroyed. The new factory will be of brick, three storeys in height, and will be equipped with the most modern new machinery. They intend to use electric power, obtainable from the town, and in addition they will build an electric plant of their own. The firm is now occupying temporary premises in the new factory of the Merchants' Rubber Co., but expect to be able to fill all orders.

It is expected that the Canadian Correspondence College, now in the Canada Life Building, will soon move into new and more commodious offices in the Medical Building, at the corner of Bay and Richmond Streets, Toronto. They propose to occupy the corner of basement, with windows facing on both Richmond and Bay Streets. This move has been made necessary, we are told, by the continued growth of work. It is gradually securing a hold on the young people of the land. For one who is eager for knowledge, and cannot find the time nor the money for courses in our regular institutions of learning, the Correspondence fills a want. Many can testify to the great value of instruction by mail. It is a pleasure to note the growth of this distinctly Canadian school.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"General Principles for Investors."
"Stock Markets and How to Profit by Them."
"The Theory of Option Dealing."
"How to Invest in Mines."
"Insurance as an Investment."
"Colonial Land: Its Coming Importance."
An entirely new feature is a collated list of "Average Values," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages), Post Free on mentioning The Monetary Times.

WANTED.

The Great West Life Assurance Company require the services of a first class Life Insurance Underwriter for City of Toronto — or, better still— TWO BRIGHT YOUNG MEN could form a partnership and develop one of the best paying businesses in Toronto. An excellent opening for the display of energy and ability. First class references required.

Apply, Ontario Branch Office,
18 Toronto Street, Toronto, Ont.

P. S.—Read our Annual Report for 1903.

Mercantile Summary.

APPLICATION has been made for a receivership for the Quebec and Southern Railway.

MR. J. G. KING is establishing a chopped feed factory at Port Arthur, Ont.

THE new long-distance telephone service between Halifax and Sydney, N.S., 293 miles in length, was inaugurated a few days ago.

THE Preston-Bell Furniture and Lumber Company are building a sawmill at Fort Frances, Ont., equipped with all modern machinery and a capacity of 60,000 feet per day.

THE Fredericton, N.B., Board of Trade is urging the Provincial Government to assist the York and Stanley Railroad Company to extend their line a few miles beyond Stanley so as to tap the fine hardwood country in that section.

THE Canadian Light and Power Company is applying to the Quebec Legislature for power to acquire, hold or dispose of water powers and real estate necessary for the development and sale of light, heat and power, and for the manufacture and supply of gas or other illuminant.

THE Dodge Manufacturing Company, Limited, has opened up a commodious warehouse in Montreal for the display of wood split pulleys and other products. These have been largely used in that city and Quebec Province, having been sold by local dealers for years past, but now the company will carry its own stock.

THE Nepigon Railway Company wants power from the Ontario Government to extend its railway from a point on the projected line near Albany river northerly by the most feasible route crossing the Albany, Severn and Nelson rivers, to some point on the Hudson Bay at or near Fort Churchill, and to enter into agreements with the Grand Trunk Pacific Railway.

THE Canadian Rubber Company held their annual meeting in Montreal last week and elected a board of directors as follows: Messrs. H. Montagu Allan, J. B. Learmont, C. F. Smith, H. Markland Molson, Lieut.-Col. F. C. Henshaw, Alfred Piddington, A. A. Allan, Hugh A. Allan and Lieut.-Col. Prevost. At a subsequent meeting Mr. H. Montagu Allan was elected president; Mr. J. B. Learmont, vice-president; Mr. D. Lorne McGibbon, general manager, and Mr. E. A. Wright, secretary-treaurer.

A UNITED STATES Senator suggests that in view of the growing tendency of industrial concerns to impair the natural beauty of Niagara Falls, united action by the Governments of Great Britain and the United States would be in order. He concludes a resolution in the Senate Judiciary Committee by declaring that the State of New York should, so far as necessary, withhold legislation likely to render such action nugatory, and to unite in any enactment likely to give it full effect

Mail Building, - - TORONTO

THE American Power Company are making preparation for beginning work immediately on the mill sites and power dam at Fort Frances. The plans show a fine structure, with two power houses and a complete system of head gates, with log chute and openings.

THE spring trade number of Hardware and Metal, issued by the Maclean Publishing Company in Toronto, Montreal and Winnipeg, is a remarkably fine one this year, both in subject-matter and letterpress. It contains no fewer than 208 pages, many of them illustrated, and covers the whole range of trades represented by its title.

J. P. QUINN & Co., in the retail dry goods line at Moncton, N.B., are offering their creditors 60 cents on the dollar, viz., 30 cents cash, balance in four and six months. Liabilities are stated at $16,000. Quinn is reported as having been unsuccessful some years ago in St. John, N.B., and then he travelled for a time for wholesale firms in that city and Quebec before commencing his present retail business in 1901.

FROM St. John's, Que., we hear of the failure of Samuel J. Roy, who ran a butter factory there on quite a large scale, with separator and collecting stations at various points in that district. Mr. Roy is an enterprising and active man, but of somewhat speculative tendencies, and his business ventures have not always proved successful. Formerly he resided at Sabrevois, where he did business as a sash and door manufacturer, and as a general contractor, failing there some years ago. Subsequently he went into the creamery business, his output being well spoken of as to quality, and in 1902 he located his headquarters in St. John's under a $4,000 bonus arrangement. His total indebtedness is said to reach $44,700.

Mercantile Summary.

THE Guelph and Goderich Railway Company is asking for power to build a line from Guelph Junction to Goderich, with branches to Listowel, St. Mary's and Clinton, with authority also to take over the rights, franchises, rights of way, etc., granted to the Guelph Junction Railway Company, and to enter into an arrangement with the Canadian Pacific Railway.

SOUTHAM, Limited, is the name of a new joint stock company which has received a charter from the Dominion Government for the purpose of publishing newspapers, books, etc., in Hamilton, Ottawa and other cities, and to take over the business now carried on in Montreal under the name of Southam & Carey, that of the Ottawa Citizen Co., the Mail Job Printing Company, and of the Hamilton Spectator. The total capital stock is placed at $1,000,000, and the chief offices will be in Hamilton.

THE Canadian Northern Railway Company, having made certain separate issues of bonds, secured respectively by mortgages on certain of their lines and properties, now ask power of the Dominion Government to make a consolidated issue of securities within their present authorized limits in substitution for certain of the bonds referred to, with the right to make further issues from time to time. It also desires authority to enter into agreements with the Northern Extension Railway Company for purchase or amalgamation.

THREE companies are stated to be in a position to take advantage of the $50,000 subsidy offered by the Dominion Government for the establishment of a steamship service between Canada and Mexico, two of which are Canadian. The Mexican Government is prepared to take full advantage of the opportunities which will be presented for trade with Canada, and has decided to place consuls in all parts of this country. The new line will probably run from Montreal to Vera Cruz by way of Havana and Progresso. The service is to be for passengers as well as freight, and the trip will occupy eight to nine days.

THE Dominion Steel Company has now decided to put in a steel rail mill at Sydney, C.B. Some time ago a quantity of steel billets were sent to England to be turned into steel rails. The report of the Government inspector upon these has now been received by the Department of Railways and Canals. It says that the rails made from the Sydney billets are first-class and of the very best quality. The average yearly market for rails in Canada in the last ten years has been 110,000 tons. For the year ending June last the consumption was 180,000 tons. The building of the Grand Trunk Pacific and other railroad development would be likely to maintain the market for many years. Importations from foreign countries will be effectually shut out, it is expected, by the duty of $7 per ton, which is going into force as soon as rails are manufactured in this country.

THE Prudential Securities Company, Limited, Toronto, with a capital of $500,000, has received an Ontario charter. Among the directors are J. T. Franks and A. J. Mitchell, Toronto.

CECIL RHODES' dream is approaching fruition. Early next month will run the first train from Cape Town to Victoria Falls, 1,700 miles north, on the Cape to Cairo Railroad.

AN odd story is told of a grocer in a town in Norfolk County, who, when eggs went up to 40 cents the dozen in February, refused to advance his price beyond 25 cents. He declared that "Them two fellows down the street, Blink and Blank, have got runnin' one another, and put up the price to the farmers; but I ain't a goin' to be no party to setch doins. It's robbin' the public, that's what it is. Who ever heerd of such a price as 40 cents for aigs?" It is proper to explain that this grocer keeps some 200 hens, so he always had a few dozen per day for his customers. This state of trade went on for a week or two, when light broke in upon the loyal grocer's mind, and he said to a man in the street: "Say, did you hear that aigs was up all over the country on account of the snow blockades and sich?" The man answered that he understood they were 40 cents in Hamilton and 45 in Toronto. And the grocer who didn't read the papers determined then and there that he would thereafter get the same price for his eggs as the other dealers were getting.

Limited Toronto

Mercantile Summary.

TO OUR PATRONS.

We take pleasure in announcing that the agent for the Monetary Times throughout the Province of Ontario is Mr. Alex. Wales, of Toronto, who is fully authorized to receive subscriptions, collect accounts, etc., for this company.

BAIRD Bros.' furniture factory and sawmill at Plattsville, Ont., have been destroyed by fire at a loss of $20,000; insurance unknown.

THE Rock City Tobacco Company, Quebec, has been authorized to increase its total capital stock to $100,000, and to establish branches for the disposal of its product in any place in Canada.

MR. W. T. ALEXANDER, president and managing director of the Great West Permanent Loan and Savings Co., of Winnipeg, is at present in the city. He reports a year of remarkable success for the Great West Co., and speaks most enthusiastically of the possibilities of the West generally.

AT Ingersoll, Ont., on the 20th inst., a fire destroyed Thurtell's drug store, J. N. Andrews' barber shop, F. Dutton's grocery store, and the amateur athletic rooms. The loss is estimated at $20,000, and the insurance about $12,000. On the same day, at Napanee, a fire destroyed Richardson's photograph gallery, A. E. Lazier's wool warehouse, J. Paisley's grocery, J. J. Maines' boot and shoe store. Total loss $12,000, mostly insured.

A WORKING shoemaker originally, F. Galipeau some little time ago put a small stock of readymade shoes into a shop at Weedon, Que., subsequently branching out into general lines of merchandise. Now he has been asked to assign.—A somewhat similar case is that of G. E. Champagne, a house painter, at Pierreville, Que. A few years ago he started a grocery, which he apparently did not make a success of, and he abandoned that line in 1902, turning his attention to millinery, being tasty and fond of variety.

IT is announced at Ottawa that in future, in order to render the work of the Hydrographical Department simpler and more systematic, that part of the service as well as the hydrographic work of the departments of the Public Works and Railways and Canals will be transferred to the Department of Marine and Fisheries. After July 1st next, therefore, the direction and control of the navigation on the St. Lawrence, as also the work of dredging and cleaning and vessels and equipment used for such purposes will be transferred to this department, so as to place the control of the improvements to be made to navigation on the St. Lawrence altogether in its hands. The powers and duties of the Department of Marine and Fisheries will in future, therefore, be very considerably increased.

TENDERS FOR
$65,000 DEBENTURES.

Sealed tenders will be received up to noon on Monday 4th April, 1904, at the Town Treasurer's Office, Whitby for the purchase of $65,000 debentures with 6 months, accrued interest, being $50,000, Water Works and $15,000, Electric Light debentures of the Town of Whitby, bearing interest at 4% per annum, repayable in 30 annual payments of $3758.95 each, principal and interest.

Said debentures are dated 2nd Nov., 1903, and to be delivered on 2nd May, 1904.

All said debentures are made payable at the Town Treasurer's Office, Whitby.

The highest or any tender not necessarily accepted.

JOSEPH WHITE
TREASURER.

Whitby, 11th Mar., 1904.

Mercantile Summary.

THE large new linseed oil mills in Owen Sound, Ont., have now started operations.

KINGSTON, Ont., ratepayers have passed by a large majority a by-law to purchase the local electric lighting plant.

MR. J. B. JACKSON, the Canadian commercial agent in Leeds, is endeavoring to interest Hull (Yorkshire) merchants in the establishment of a steamship line and, as a consequence, direct trade, between that place and Canada.

THE Canadian Pacific, in pursuance of its plan of spanning the continent with the best grade of heavy track, is preparing to lay 10,000 tons of 80-pound steel rails. Work in the West will be begun between Portage la Prairie and Brandon.

THE Grand Trunk Railway will build a new bridge at Kingston, Ont., to replace the present one, which is about fourteen years old. The work is already being put in hand by the Dominion Bridge Co., Lachine, Que., who have the contract.

LA COMPAGNIE de Granit d' Argenteuil, Montreal, capital stock $300,000, has been incorporated under Dominion charter. It will acquire and work stone, marble and granite quarries. Among the charter members are Jos. Brunet, of Notre Dame des Neiges, Que., and L. Beaudry, of Montreal.

A PROSPECTOR named Robert Herd is reported to have made a strike of high-grade copper ore just north of Ladysmith on Vancouver Island, giving $80 per ton in copper, $3 in gold and $1.50 in silver. Capitalists are said to be looking over the ground with a view to purchase of the claims.

SYSTEM AND ORGANIZATION.

AN INSTRUCTIVE LECTURE.

We have been struck by the sensible, practical character of some advice given the other day to some 1,500 work people of the Canadian Rubber Company, in Montreal, by the general manager of that important company, Mr. D. L. McGibbon. This gentleman chose for his title, "System and Organization," and he showed in a very effective way how the

one depended upon the other. Looking into the details of the great establishment under his control, Mr. McGibbon stated with becoming modesty but decided skill some conclusions he had reached in the course of his study of the business and the works. His list of a dozen items among the processes of manufacture is well calculated to catch the attention of what may be called "rule-of-thumb" mechanics. If some thousands of operatives in our factories could be provided with such lectures as this, the result would likely be to increase the effectiveness of factory employees in various trades, and to extend the value and reputation of Canadian merchandise. His words as to the worth of a well informed and systematic employee, both to the man (or woman) as a superior wage-earner and to the factory he or she works for are of immediate value. Not only may better wages be earned by an efficient person, but the whole output of a factory may be increased and improved by the intelligent promptness of the individual workman. Said Mr. McGibbon:—

In seeking detailed information I was struck with the fact that whilst employees in general could tell me what was necessary to do under certain circumstances, or how certain things had been done under other circumstances, very few could tell me the reason "why." It, therefore, seemed to me that it was important to educate employees, and more especially the younger element, in the practical rudiments of the rubber industry, and the best way to do this was by a course of short lectures.

Mr. Thornton has given a lecture on crude rubber, and Mr. MacLaren has given one on chemistry, both of which have been extremely interesting, as well as highly educative, to me as I am sure they were to you. It occurred to me, however, that before going further with the lectures on crude rubber, chemistry, or mechanical engineering, that a few words along the line of system and organization might be beneficial, and that is what I am going to take up a few moments of your time with to-night.

I think you will all agree with me that the greatest successes in life have been occasioned by "concentration of purpose, energy and action," and I think it goes without saying that starting with a correct principle it can be better effected by proper system and organization than without it.

What is system? System is a word used to define the mode and process of procedure in conducting an organization.

What is organization? Organization is a word used to define an amalgamation of interests concentrated in obtaining the same results. To make any system effective and successful, those guiding and operating it must be fully conversant with—

1. The necessity of a system.

2. A thorough knowledge of the system proposed.

3. Absolute confidence that the system will do what is expected of it.

And above all, those operating it should see that no deviations are permitted.

To make any organization effective and successful depends principally on loyalty to superior officers, as well as the employer and his business. Loyalty means a lot, and the employer knowing his employee's loyalty is assured of great assistance in perfecting his organization and obtaining results originally calculated on by means of his system.

Let me illustrate what a good system and organization can do and what a good system and bad organization can do. A piece of delicate machinery requires oiling twice a day, and the superintendent decides on a system of having it oiled at 7 a.m. and at 1 p.m., naming the quantity of oil to be used each time. He calculates by this that the machine will require so many gallons of oil in a month, and that the cost of oiling the machine for a month is a certain sum. He uses these figures in estimating the cost of operating his plant, and which naturally form the basis of costs of his finished product. In turn, the selling price is made from his basis, and the employer, having the cost and the selling prices before him, sees a prospective profit. Now, should the organization (in this case the man that oils the machinery) carry out the system, namely, of oiling the machine at 7 a.m. and 1 p.m., and use only the quantity named by the superintendent, the number of gallons used in a month and the cost of same will correspond with the estimate of the superintendent, and, therefore, the cost of the finished product (as far as the oil is concerned), as well as the selling price, is the same as the original estimate, and the profit the employer originally figured on is earned. But should the organization not be loyal or accurate, and oil the machine at different times than instructed and use more oil than intended, the estimate of the superintendent, sales department, and employer are not realized, and the prospective profit is turned into an actual loss. This same principle applies to every one in the employ of the company, whether in the factory or office, from the most insignificant positions to those holding the highest executive positions.

Salary and other Inducements

will be given to the right man for the position of Toronto Manager of a highly successful Life Insurance Company.

The Manager will require to be a personal producer of business, and also able to organize an Agency Staff.

Communications will be considered strictly confidential.

SOME ILLUSTRATIONS.

Perhaps a few more illustrations in various departments may be of some help in determining how each of you should perform your particular duty, and with your permission I will give them to you:

1. Firemen using too much coal.
2. Compounders careless in weighing.
3. Mill and calendar men, by loafing, losing use of machinery.
4. Cutters of raw material not sufficiently careful to minimize waste.
5. Makers of finished articles not sufficiently careful to avoid making imperfect goods.
6. Press heater and vulcanizing employees being too slow to empty and fill their receptacles, thus wasting steam and heat, and taking chances of over or undercuring expensive goods.
7. Weighers, measurers, and packers, through carelessness, causing complaints from customers for short weight, short measurement, or imperfect packing, or, worse still, of causing an irreparable loss to employer by giving overweight or overmeasurement.
8. Cost clerk by inaccuracy causing quotations to be made based on wrong costs, thus either losing money by prices being too low, or losing trade by prices being too high.
9. Invoice clerks, by wrong extensions or additions, and incorrect copying of prices, losing customers for the company, as well as money.
10. Travellers, in their eagerness to show volumes of sales, making promises or concessions of some kind that they know their employer cannot afford.
11. Superintendents and managers of departments, by shielding disloyal, incompetent, untrustworthy employees, are assisting to unsystematize and disorganize the efforts of their employer.
12. The general manager or director who conserves his private interest to the detriment of the company, is no better than the humblest employee in this respect.

I could go on indefinitely with illustrations of this nature, but I think I have shown you sufficient to make you realize what is your duty.

LOCATING DEFECTS.

A large manufacturing industry might be properly systematized, but without a proper organization the system will not be effective, but a good system will enable the employer to locate the defective parts of his organization.

Let me, therefore, entreat each and all of you to carry out to the letter the system adopted, and report to your direct superior officer, be he a foreman, superintendent, or manager, any improvement that you think could be made; for it is by inventive suggestions that many an employee has gained rapid promotion.

Each and all of you form a component part of the organization of the Canadian Rubber Company, and if you are interested in your individual success and advancement, you will be interested in the success of the company, and assist to promote its interests, for, let me tell you plainly, that if the company is successful, your chances for more remuneration are much better. If, therefore, this is your desire, remember what I say to-night:

Understand and absolutely master your work.

Do not steal from the company time that you are paid for.

Do not be afraid to ask questions relative to your work.

Do not be disheartened by failure, the old adage, If you don't at first succeed, try, try again, is an admirable precept to adopt.

Suggest improvements to your superior officers.

Above all, however, be loyal to yourselves, your superior officers, and the company, and if you do this your success is assured.

The world is full of procrastinators and boasters. Do not be one of them. Make up your minds to-night to commence a new era, if it is necessary for you to do so. "You can tell."

Bend your energies and direct your thoughts to your work and produce results that will entitle you to recognition for superiority and advancement.

THE POSITION OF COTTON.

The event of the week in the cotton trade has been the sudden collapse of Daniel J. Sully, of New York, who has been, during the last year or more, one of America's most picturesque market-cornerers. Excepting in a general sense, wherein it is not difficult to forecast a similar ending to most of such brilliant manipulations, it may be said that the crash came quite unexpectedly, and we are told that when it became known there was a scene on the New York and New Orleans cotton exchanges of almost unprecedentedly wild excitement, followed by a slump in prices. The failure of the Sully firm is attributed to the fact that for several days previously values had been declining heavily, due probably to the bear compaign in New Orleans, against which the bulls, represented by the Sully group, could not hold out under the stress of slow payments from Europe. Mr. Sully himself is sanguine of being able at an early date to meet his obligations and resume business.

In the meanwhile, it is easy for cotton manufacturers, or rather for the merchants, to exaggerate the importance of the failure. In the first place, while it is true that there was a violent drop in the price of raw cotton when the news first became known, yet it is a fact that a large proportion of the lost value was regained on the same day, and since then the rise has been fairly steady. We hear of one Canadian cotton mill which telegraphed to New York at the time the slump was actually in progress, and they could not buy a single bale at the prices mentioned. Quotations were changed, but that was all. In one way of looking at the matter the crash shows clearly how really strong the cotton market is. Some people have held off from buying cotton goods on the plea that the extraordinary high prices asked for raw material were a fictitious value and based mainly on speculative influences. The events of the past few days show in a fairly conclusive way that while the speculative element has for practically all purposes been eliminated, yet the values remain almost as before, and even were the prices of raw cotton to go down pronouncedly now, it could hardly make much difference to the prices of staple goods for months to come. Such of these as are being put upon the market, or are likely to be put upon the market in the near future were manufactured from raw material bought at a high price; or even before it attained its maximium; and even then, prices of finished goods were not on an equivalently high level to pay a satisfactory profit. It will be seen therefore that no change likely to come is in a position to cause a serious drop in the values of cotton goods for a long time ahead.

THE PRICE OF WHEAT.

Our forecast of a few weeks back that wheat was unlikely to reach the price of one dollar per bushel net to the farmer seems in the way of fulfilment, though it is too early as yet to make the announcement very positively. During the last two weeks or so there has been a material reduction in values, though even yet the price is considerably above the normal. The cause for the non-realization of many farmers' and speculators' hopes appears to lie at the door of Russia, for that country, far from suspending its exportation of wheat, as was expected would be done owing to the opening of hostilities in the East, has actually increased them. For the past month they have averaged over two million and a half bushels per week. Against this may be placed the somewhat extraordinary state of things existing in the United States, so far as the wheat trade is concerned. Exportation from the Atlantic ports of that country has practically ceased. During the month of February the only shipments from that territory amounted to a paltry 12,904 bushels, while the total export, chiefly from Gulf of Mexico ports, was only 1,424,522 bushels, against 5,552,609 bushels in the same month of 1903. This showing gives scope for a good deal of reflection. For one thing, of course, it indicates that speculation has carried the price of wheat altogether too far above a parity of values in Europe. But another consideration—and this affects the future of Canadian grain-growing materially—it seems to suggest that our American cousins have already reached their limit as a food-supplying people. The growth of an enormous population for home consumption, together with the constant increase in manufacturing requirements, would appear to foreshadow the time when Europe will have to depend much more than she does now for grain upon countries other than the United States.

Of course, these facts probaby mean that an era of comparatively high prices may reign, though for how long is a difficult question to answer. Events may

yet take place, through the war to cause Russia to keep her supplies at home. Canada's production of wheat this year is quite likely to show a great increase. Argentina, too, is becoming more and more a formidable competitor. On the whole, we should say wheat trading is likely to be an unsafe business for some time to come; unsafe, that is to say, in the sense of its being open to violent speculative changes.

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for February, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie, and Dominion notes, etc.:

Canadian Bank Statement.

	Feb. 1904	Jan. 1904.
LIABILITIES.		
Capital authorized	$97,046,666	$97,046,666

Loans to directors or their firms	10,917,108	10,909,406

The extraordinary wave of prosperity which the country has been enjoying for some years, and which we have before commented upon, has had another illustration, and a striking one, in the Public Accounts just presented to Parliament. These accounts are for the year ending June, 1903. Reading the summary of them, it would seem as if Canada were passing through a period analogous to the years of Gladstone's early administration of the finances of England, when its prosperity was advancing, as he once said, by "leaps and bounds." This prosperity, it is evident, was partly due to the extraordinary development that was going on in those days in many parts of the world which were supplied with goods from the United Kingdom, and whose demands gave such a prodigious impetus to British manufacturing industry. This state of things was not permanent in England; nor, indeed, has it ever been in any country. But it is most noticeable that Gladstone was never carried away by the influences of the times he was passing through, but kept his head cool and his eye continually fixed upon economy in expenditure, with a view to reductions of the burdens of the people. To maintain an attitude like this in such times requires a very steady and well-balanced judgment. It is, however, much to be feared that the unusually prosperous condition of the public finances has affected the sober judgment of our administration—and led them to entertain projects of vast expenditure, which, in ordinary circumstances, they would hardly have committed themselves to. It is impossible to imagine that any administration whose revenue was only equal to its expenditure; or still less, which was facing yearly deficits, could possibly have entertained such an idea as a virtual duplication of the Intercolonial Railway. And it is to be feared that before the transcontinental railway is completed a different condition of things may confront the Finance Minister who at some future day may have charge of the fiscal affairs of the country. It is a gratifying circumstance that in the year just commented upon there has been a substantial reduction in the Government debt. But it is in such times as these that steady and persistent efforts should be made at *large* reductions in the public indebtedness. This indebtedness is still large for the population and resources of the country, though the real pressure of the burden is sometimes disguised under the form of a statement of what is called a *net* indebtedness of $261,000,000. But the real indebtedness is nearly $100,000,000 more; that is, $361,000,000; for it is upon this amount that the country has to pay interest. This $100,000,000 of assets of various kinds, which is generally deducted from the total debt produces nothing to alleviate the weight of the burthen, and cannot be taken into account in any practical estimate of the financial condition of the country. It is a matter of real satisfaction, however, that the average rate of interest paid has fallen to as low a figure as 3.02; a striking contrast, indeed, to the figure which tormented finance ministers in bygone days. But it is much to be desired that Gladstone's passion for economical expenditure in the midst of abounding prosperity could be imitated by the Government of Canada. The proverb of "making hay while the sun shines" is always applicable, and at the present time it means make all possible reduction of debt while prosperity lasts.

The failure of the great cotton scheming firm, whose gambling operations have produced such loss and misery during the last year, will be hailed as a blessing by tens of thousands of operatives, who have been thrown out of work in consequence of it. These cotton-cornering operations have been far more mischievous than huge "Chicago corners" in grain or pork: for the latter, bad as they were, were limited in their effect to raising the price of some staple article of food for, say, twenty or thirty per cent. for a limited time. But these cotton operations have deprived thousands of workingmen of their whole income, not to speak of the loss and damage to proprietors and stockholders in mills. It is a pity the law cannot reach the per-

petrators of these nefarious schemes. If the head of this firm had stolen a month's wages from any one workingman he could have been indicted as a criminal. But he deprives thousands of men of their wages, and goes scot free. It is the story of Alexander the Great and the robber over again.

The figures of the banking returns show that the present year is likely to be just as prosperous as the last. But we will shortly have to be considering the appearances and prospects of the coming harvest. For it is upon the result of that will depend whether the wave of prosperity is to flow on for another year or not.

Money is a drug in the New York market. Lenders cannot get more than two per cent. on call. Yet here in Canada the rate has been steadily maintained at five or even more, and on the same class of business for a long time back. This state of things seems to contravene what is considered a fundamental law of finance, viz., that capital will flow steadily to the quarter where it is most in demand. But it is evident that other factors govern its movement; and in this case the determining factors are the differences of security, and also the certainty of borrowers responding freely to a call. Any one who is acquainted with the different circumstances of the two markets will understand how powerfully both these conditions operate.

Our usual summary of figures is appended.

ABSTRACT OF BANK RETURNS.

Description.	Feb. 28th, 1903.	Feb. 29th, 1904.	In Month 1904.
Capital paid up	$73,591,000	$78,701,000	Inc. $ 76,000
Circulation	55,746,000	57,736,000	" 763,000
Deposits	414,513,000	448,870,000	" 4,337,000
Loans, Discounts and Investments	432,495,000	476,683,000	" 5,931,000
Cash, Foreign Balances, Net & Call Loans	161,073,000	161,702,000	Dec. 537,000
Specie	12,481,000	15,934,000	Inc. 113,000
Legals	25,169,000	31,259,000	Dec. 18,000
Call Loans	93,307,000	78,504,000	Inc. 3,922,000
Investments	63,584,000	63,322,000	" 285,000

Government Savings Banks	$ 61,471,000	
Montreal City and District Savings Bank	15,773,000	
La Caisse d'Economie, Quebec	7,133,000	
Loan Companies	20,000,000	
		104,377,000
Bank Deposits		448,870,000
		$ 553,247,000

GOVERNMENT CIRCULATION.

Large	$ 28,635,000
Small	$ 12,067,000

Gold held, $28,304,000. or 70 per cent.

THE FUR SALES.

At the time of going to press the March fur sales in London are still proceeding, and the reports to hand are too meagre to admit of very definite conclusions being drawn therefrom. They seem to show, however, that further considerable declines have taken place in the prices of several kinds of furs, though, until the precise qualities of the various offerings become known to us, it would be an idle endeavor to learn exactly what these declines amount to. In this business a great deal depends upon relative qualities, though this is a point often left out of sight. Probably a large measure of the fall in values is to be attributed to the lack of speculative buying on Russian account. But in any case it should not be imagined that there is in progress anything which can rightly be called a slump in furs. The present state of things only serves to bring into relief what has been acted upon by the more conservative members of the trade; and what we have tried to call attention to before in these columns, namely, that the high values reached during the past year were above those warranted by the real facts of the case. Prices now probably represent about normal intrinsic values, so that what has happened may be described as a return from a state of inflation to more healthy conditions. One thing which we note has been dwelt upon unduly by some commentators on the cablegrams which have come to hand is in reference to the reported higher prices for beaver and for Russian sable. Neither of these skins, however, is of any importance so far as this market is concerned.

It is not unlikely that at the present time there is a fairly large quantity of furs in small parcels in this country still awaiting sale. They were held over in the expectation of reaching high-water mark prices, with the probable result that they will have to be sold at lower rates than would have been actually obtainable a few weeks ago. We suspect that some rather heavy losses are likely to ensue from this unwisely "bullish" policy.

THE SASKATCHEWAN COUNTRY.

In thinking or writing about North-Western Canada it is desirable to consult a map occasionally. We shall then be less liable to lay stress upon what is popularly conceived to be the narrowness of the fertile belt west of Manitoba compared with its length. Since the Canadian Northern Railway has pushed itself into Saskatchewan Territory west of Lake Winnipegosis towards Prince Albert; and since its main line from Grand View through Saskatoon is being constructed via Battleford to Edmonton, settlers are pouring into North Assiniboia and South Saskatchewan steadily, and indeed of late more rapidly. Word comes this week of Mr. Mackenzie's success in getting funds in England to prosecute the work on a large and immediate scale. It is expected that the whistle of Canadian Northern engines will be heard at Prince Albert before the snow comes next winter. That will be the branch northward and westward from Dauphin. Again, in 1905 at farthest, there is a prospect that the Manitoba and North-Western road will be built into Prince Albert. It is likely, also, we are told, that the Grand Trunk Pacific will in a very few years have a branch to Prince Albert, though the main line is to pass 100 or 150 miles away.

The district westward from Fort Pelly, and in which are Saskatoon, Prince Albert and Battleford, is from 200 to 400 miles north of the main line of the Canadian Pacific, and presents alluring prospects for grain-growing and cattle-raising. We have lately seen a statement about the nature of this great expanse given by Hon. Thos. McGuire, formerly chief-justice of the North-West Territories. He has chosen Prince Albert, Saskatchewan, for his future residence, and is eloquent about the capacities of the country there about. He states what is not generally known, that the waterway of the Saskatchewan country is easy of development. There are now being built four steamers of light draught which when completed will carry freight along the river, keeping the farmers in touch with the different railway systems that strike Prince Albert. Steamship navigation is possible, the Judge says, westward to Edmonton, 400 miles on the one side, and eastward down to Lake Manitoba on the other. Some work has already been done in the way of removing obstructions.

It is several years since we have heard the opinion expressed that Fort Churchill, on Hudson's Bay, will by 1910 be an important shipping port for traffic to the Atlantic ocean. And again this winter we have had the same prediction from a widely different source. Now comes Judge McGuire, with an opinion formed after long residence and observation. Reminding us that the centre of grain-growing and cattle-raising in our West was considered to be Winnipeg, yet things are to-day changed. And, he tells the Montreal Gazette, the great cattle-raising and wheat-growing district is farther north and west. Consequently a direct line from Alberta to the Bay will pass through Prince Albert, which is now considered the starting point. The Canadian Northern Railway has already completed a preliminary survey from Prince Albert to Canada's inland sea, a distance of 600 miles. Although no official report has yet been given out, it is an open secret that the Mackenzie and Mann engineers have found a comparatively easy route, few if really any engineering difficulties presenting themselves. The height of land is reached a little over a hundred and fifty miles north of Prince Albert, and beyond that point the work has been discovered to possess few difficulties.

The difficulties of navigating the Bay, he thinks, have been much exaggerated. Both these and the preconceived hindrances to railway connection with the Bay are giving way to later examination. The district we have been describing is rich and fertile beyond question, and only its remoteness from railway communication and the unwarranted notion that it lay "too far north" has kept settlers from it in former years. Now, however, that several railways are about to pierce it, settlers are attracted and development goes on. A land company, which has its headquarters in St. Paul, Minnesota, named the Saskatchewan Valley Land Company, is already bringing in settlers, mainly American, by the thousand. And there are some Old Country French immigrants thereabout, as well as Germans and other continental Europeans, doing well.

FIRE AND WATER.

It is very satisfactory to learn that the by-law to provide $1,000,000 for water-works extension in Toronto was carried by vote of the ratepayers of the city on Wednesday last by a considerable majority. Doubtless the great fires in American cities, and the lesser but still considerable fires in Canada this year, had stirred up the public mind to the need of an adequate water supply, both for sanitation and for fire pressure.

Various suggestions have been made of measures calculated for better means of fire-fighting. One made by Hon. Geo. A. Cox, that special mains should be laid in particular districts, to be used for fire purposes only. Another by Mr. C. S. Gzowski, that a fire-boat should be fitted up, as has been done in various American cities, for the protection of property on the lake front of Toronto. Both these have merit.

But the citizens need to be inspired with carefulness as to fire conditions generally. There is needed a constant watchfulness to *prevent* fire. Every merchant, every manufacturer, every householder, ought to see that things and surroundings about his premises which invite fire are done away with. For a hundred years, probably, there have been regulations in towns and cities compelling the sweeping of chimneys. And there is a requirement of the Ontario statutory conditions as to the structure of chimneys. There are other matters quite as important. Why should there not equally be regulations forbidding the accumulation of rubbish such as wooden boxes, paper, straw, oiled rags, shavings, in out-houses and other houses. And why should people not be compelled to keep pails of water handy?

A record kept in New York city for a period of seven consecutive years showed that 64 fires in every 100 had been put out by pails of water kept on the premises. It would be a proper municipal by-law to have inspectors appointed to investigate premises at regular intervals to see that coal oil is not kept in quantity exposed, to see that combustible rubbish is removed, and to see that pails of water are ready at any hour of day or night to be thrown upon a chance blaze.

It may be said that these are common, even trivial, things. But nothing is trivial that will save us from the dread scourge of fire. Perpetual vigilance is the price of immunity from it. And all the efforts of municipal officers, all the labors of fire brigades will not do so much to lessen the fire risk as the keeping by every individual householder of his own premises clean and in order.

TRUE AND FALSE LIFE CANVASSING.

An interesting letter comes to us from Ottawa, scoring the kind of canvassers for life companies who offer to rebate premiums, promise excessive rates of profit on policies, and otherwise resort to unworthy tactics for the sake of securing a temporary advantage over an opponent in the field. Our correspondent makes his point very neatly. But he must not imagine that no one but himself longs for the old-fashioned virtues of economy and truth to be more generally shown in the life assurance business in Canada. Both actuaries and managers long for this, and are quietly working towards it. More backbone in managers and agents and a firmer sticking together are needed before it can be brought about. There must besides be a higher standard of confidence in each other among the companies. Underhand methods and petty evasions by which, while nominally observing the letter of rules and agreements, the spirit of them is violated, require to be visited with the punishments which should always follow bad faith.

Rate-cutting may be accomplished in a variety of ways. Rebating premiums is an accursed custom, which has probably given the great American companies more trouble than any other form of extravagance; yet so long as life assurance managers permit it the ruinous custom will be indulged in by agents, big and little. Let no one pretend that it does not exist in Canada. The "slick" agent, clever with tongue and pen, or both, can persuade nine applicants out of ten (untruly) that a policy of certain tenor is "just as good," and will yield quite as satisfactory results as a different policy offered by another company. But he may be caught by the tenth applicant, who is, we will say, a business man, and can analyze the terms of both. In which case Mr. Slick Agent is liable to have a bad quarter of an hour with his inspector or his general manager. In this respect life agents differ as widely as commercial salesmen in methods of selling goods.

And the valuable man to a life company, the valuable man to a factory or a warehouse, is the man who will get the full price for his goods or his indemnity

without resorting to misrepresentation or abuse of his rival. Granted that there are men who will lie, and "twist," and use false figures to obtain their ends, presuming upon the ignorance or confidingness of customers. These are the small men of business, and they do not succeed *in the long run*. The big, broad, healthy salesmen of life assurance as of merchandise are those who scorn to lie or even prevaricate. By clever argument, by patient tact, by an intelligent exposition of the commodities they have to sell they secure the lasting confidence of those to whom they sell. And they earn a good name for themselves and for those whom they represent.

ONTARIO LUMBERMENS' ASSOCIATION.

The annual meeting of the Lumbermen's Association of Ontario was held in Toronto on Friday last. The president, Mr. W. D. Lummis, in his address, called attention to the fact that prices would probably be 10 per cent. higher than last year, the Ottawa men having practically secured that advance, and that in any case prices would undoubtedly rule the same; that owing to severe weather conditions the cost in the woods would be increased and the cut considerably curtailed. One very serious matter pointed out was the delayed shipments of lumber owing to the great depth of snow and the hindrance to railway traffic on all lines, the practical effect of which will be the moving of twelve months' supply of lumber in practically ten months from rail points. It is gratifying to learn that the lumbermen are taking to heart the lessons taught by forestry, as evidenced in the fact that a resolution was passed appointing a committee to take up in the most practical way the best means for preserving young pine and small growing timber, and to find out what could be done towards replanting limits and territories with suitable timber.

The secretary read a statistical report which showed that the output of logs for 1904 would be considerably less than for the previous year, and that stocks held at the mills are largely sold. He estimated the probable output of logs for 1904 at 420,000,000 feet. The total production of white pine lumber by the mills in northwestern Ontario, which embraces all mills on the Georgian Bay, Northern division of the Grand Trunk Railway to Callander and Canadian Pacific Railway, North Bay to Rat Portage, for 1903, was 475,000,000 feet. The comparison with former years is as follows: 1899, 351,000,000; 1900, 476,000,000; 1901, 466,000,000; 1902, 510,000,000; 1903, 486,000,000, a decrease between 1903 and 1902 of 25,000,000 feet. There is in pile at the mills probably about 150,000,000 feet, of which 100,000,000 feet is sold waiting spring delivery and the balance is unsold. There seems to be a great scarcity of the low grade lumber, practically none in first hands. Last year at this period there was about 150,000,000 feet. It is worthy of note that in the three northern States of Michigan, Wisconsin, and Minnesota, the decrease in production last year, compared with 1902, was no less than 502,543,000 feet, and that this was on top of noteworthy decreases in previous years. In 1899 the output was 6,056,508,000 feet, and in 1890 it was 8,597,000,000 feet, while the small production of last year approaches to that of 1879.

The Board of Management and officers of last year were re-elected, the officers of the association being: W. D. Lummis, president; R. Laidlaw, first vice-president; George Cook, second vice-president; W. B. Tindall, secretary-treasurer.

WEST INDIA TRADE.

Mr. E. H. Cooper, secretary of the Montreal branch of the Canadian Manufacturers' Association, who recently returned from a trip to the West Indies and British Guiana, has presented to the executive a highly interesting report upon the trade conditions prevailing in those colonies. He prefaces his remarks by the statement of a firm belief that, Canada supplying as she does both necessary foodstuffs and manufactures, should be able, with energy and the desire to meet expressed requirements, to supply a large part of the valuable West Indian market. She would have the advantage of a growing warm feeling in her favor of the inhabitants of those islands. It is a pity that as yet we cannot hope to take the whole output of those islands' sugar, which for so long has been their primary production; but it is worthy of note that other so-called minor products, such as fruits, cocoa, etc., are yearly becoming of greater relative importance. Successful experiments are more numerous, too, in cotton. It should not be forgotten that in the mutual interchange of products between Canada and the British colonies in the tropics, a great Imperial problem is in course of solution. Federation of the islands with the Dominion is by no means a dead issue. At present, in spite of the evident advantage which would accrue from a vast extension of trade between such climatically opposite countries as Canada and the West Indies, they only send us 5½ per cent. of their exports and take in return only 5 per cent. of their imports. The chief obstacle to the growth of direct trade is the inadequate transportation service. Mr. Cooper saw, while in Demerara, over 30,000 bags of sugar lying on the wharf awaiting shipment to Canada; yet not one bag came to a Canadian port. All was shipped to New York in an American vessel, which no doubt carried in return chiefly United States flour and manufactured goods.

It is very satisfactory to note from Mr. Cooper's report that the long-standing complaint of West Indian merchants that Canadian flour would not stand the hot weather, which was, perhaps, due to the wrong grade being sent, or to faulty packing, is not heard now. The chief trouble in this direction now appears to be lack of sufficient quantities. Almost all foodstuffs, such as grains, beef and pork, cheese, butter, canned goods, etc., are in good demand. And so is fish, but this is an item which as a rule is received in sufficient supply. Canadian manufactured goods, too, are making headway in the islands, especially boots and shoes, woolens, neckwear, umbrellas, paints and varnishes, lumber, soap, metal goods, rubber goods, cordage, furniture, etc. Mr. Cooper adds one suggestion, and that is to warn manufacturers against shipping goods with the delivery conditional upon acceptance of draft. Except in the case of a few firms mentioned in a previous report, this condition should be on payment of draft.

OUR HALIFAX LETTER.

Although the civic elections are now only a few weeks distant, very little interest has been aroused. From present indications, only one aldermanic contest appears likely, the present aldermen in the other wards being permitted to go back by acclamation. So far no opposition has developed to the re-election of Mayor Crosby. This gentleman is just now passing through a trying experience having been indicted by instructions of a judge of the Supreme Court for interfering with the administration of justice. Some months ago a man was arrested on an assault charge and placed in the city prison from which he was released by order of the Mayor. The aggrieved party then issued a warrant for the man's arrest, but he had left the city. It seems that it has been customary for the Mayor to release prisoners charged with trivial offences, the practice having originated very many years ago when the Mayor held court and before the law was changed transferring this duty to a stipendary magistrate. As the practice is clearly in violation of present laws, the Grand Jury was compelled to find a true bill in the indictment aginst the Mayor with a recommendation that no further action be taken. Now that the matter has come before the courts, it is safe to say that the practice will be discontinued.

The sealing steamer "Elliot," which cleared here on the 10th inst. for the Gulf, has met with disaster. She was caught in the drift ice for many days and began to leak so badly that the crew were compelled to abandon her and make their way to land. There is a vast quantity of drift ice off the

coast this spring, especially to the eastward, and all steamers have been more or less inconvenienced thereby. The straits between Pictou and Charlottetown have been fairly free, and the Government steamers for the last two weeks have made regular trips carrying large quantities of freight. The reduction in the grain rates by this route between the Island and Halifax has had the effect of causing heavy shipments of grain by the winter steamers that would otherwise have been held over until spring and shipped by schooners

The immigration officers at this port have been very busy during the past week. Several steamers arrived with a large number of immigrants, and for a few days the facilities here were taxed to the utmost. There has also been a great deal of freight shipped by outgoing steamers and the workmen at the deep water terminus have had a busy time. The mail steamer "Pretorian" last week took from here 5,000 barrels of apples which is the largest shipment of apples to Liverpool this season, as most of the Nova Scotia fruit is shipped to the London market.

Mass meetings of railway men have lately been held at all divisional points on the I.C.R. to consider the proposed pension scheme. In all cases resolutions have been adopted recommending the scheme to the consideration of the Railway Department. A synopsis of the scheme would make this letter too lengthy. Suffice it to say the object is the creation of a pension fund through the retention of a percentage of the salary of each employee and the apportionment by the Government of a sum not exceeding $100,000 annually, superannuation to be granted between the ages of 55 and 69, inclusive.

The next boom town in Cape Breton will be Big Glace Bay, which is three miles from Glace Bay, and where the Dominion Coal Company is about to open extensive collieries. Already the real estate agents are busy cutting farms up into $50 building lots, which are being bought up by the speculators in the hope of selling at twenty times that amount when the rush begins.

In a number of Nova Scotia towns there is a great scarcity of rentable houses. The development of the industries necessitates the hiring of a number of additional employees, but no adequate provision is made for housing them. At New Glasgow, many well-to-do mechanics are living in crowded apartments, as houses are not obtainable, and the same thing exists in Amherst and in several towns in Cape Breton. At all these points capital could be profitably employed in building a cheap class of cottages, the rental of which would be within the means of the average mechanic.

Halifax, N.S., March 21st, 1904.

THE METRIC SYSTEM.

The Decimal Association have informed our London correspondent that a "bill to render compulsory the use of the System of Weights and Measures, commonly known as the Metric System," (4 Edward VII.), has been dated 1st Feb., 1904, and lodged by Lord Belhaven. A canvass of members of Parliament has resulted (this was written in February), in a count of 328 M.P.'s who are ready to vote for the bill.

Among the public petitions signed in support of the change is one of the operatives' body, embracing the 25,000 adult members of the "Lancashire Federation of Trades and Labor Councils." In forwarding the petition through the Decimal Association, the secretary, Mr. George D. Kelley, writes: "I have been somewhat surprised to observe that our friends in the United States of America, although living under the advantages of decimal coinage, have not as yet simplified their weights and measures, but perhaps it would be of some advantage to us in dealing with those countries where the Metric System prevails, if we were to place ourselves in harmony with them as to weights and measures, leaving the U.S.A. to continue their antiquated system." It would seem that the John Bull workingman, or "operative," as we prefer to describe him, is getting tired of being chipped about the superior methods and work of the American operative, and, in applying the term "antiquated" to an American system, Mr. Kelley shows a desire to turn the tables upon the critics of British workers, which we are sufficiently humorous to enjoy.

The offices of the Decimal Association are located at Oxford Court, Cannon St., London, England, and the secretary will welcome any support, assistance, and advice that our numerous readers, interested in the metric system and decimal coinage movements, can give. It will be remembered that at the last conference of Colonial Premiers the British Parliament was requested to make the first move to legally render compulsory the decimal systems finally adopted.

HALIFAX BOARD OF TRADE.

An attempt is being made to reorganize the Halifax Board of Trade, and to enlarge the sphere of its usefulness. It is proposed to increase its membership until it shall include every person interested in the progress of the city and makes a living from activities exerted therein. Three thousand dollars are wanted for next year's work, and it is proposed to engage a competent secretary at a salary of $1,200 per annum. The right man for this position is not in sight and the committee would be glad to receive suggestions from any person who knows where a suitable man for the work can be found. A special meeting of the council of the Board was held Friday 18th to consider the best means to be taken to establish seal and whale oil reduction plants within the province. A number of Halifax people have engaged in the sealing business in the Gulf and off the shores of Newfoundland for many years, taking the seals to the vats at St. John's for sale. It is now proposed that vats for the reduction of oil—which is the chief, one might almost say the only, article of value derived from these Atlantic seals—shall be erected at a suitable point in Cape Breton. It is also proposed that a whaling plant be established in connection with the seal vats. The sealing vats alone will cost $100,000. At the meeting of the Board, also, a resolution was adopted asking the Dominion Government to grant a bonus to aid in the establishment of these industries within the Dominion. Both industries are successfully prosecuted in Newfoundland and as a very large portion of the people of Nova Scotia make their living upon the waters, there is no reason why they could not be just as successfully carried on there.

YORKTON BOARD OF TRADE.

At a meeting on the 10th inst. of representative business men in Yorkton, Assa., Mr. J. A. Magee was unanimously elected president of the Board of Trade for 1904-05, and Mr. S. S. Bare, vice-president. Mr. Wm. Simpson was elected secretary-treasurer, and Mr. W. Porter, auditor. The following will act as council: James L. Magrath, Dr. Cash, H. Bradbrook, W. D. Dunlop, Dr. Patrick, H. Christopherson, J. B. Gibson and Ed. B. MacKay. An address upon matters relating to the town and district was delivered by Mr. Magee.

PRINCE ALBERT.

The town of Prince Albert is situated in the Territory of Saskatchewan, about 175 miles due north of Moose Jaw, and about the same distance west from the boundary of Manitoba. It is well placed upon the Saskatchewan river, and connects by a network of river and stream with Manitoba or Assiniboia, on the one hand, and Alberta on the other. It will presently be well served in the matter of railway connection, for the northwest branch of Mackenzie & Mann's will reach it this fall, and the Manitoba and North-Western probably next year, to say nothing of the prospect of the Grand Trunk Pacific later.

There are at present some 2,000 inhabitants in Prince Albert, but at the rate settlers are coming into the adjacent country it must grow rapidly. There are already three bank agencies, namely those of the Imperial Bank, the Bank of Ottawa, and the Canadian Bank of Commerce, and it is stated

the Bank of Hochelaga will establish a branch in the near future to accommodate more particularly the very considerable French and French-Canadian population of the adjoining country. Three sawmills have been erected in the town, and as the adjacent country affords plenty of logs, the Prince Albert lumber is being supplied as far west as Regina, and as far east as Portage La Prairie, on the main line of the Canadian Pacific Railway, supplies from the lumber mills of British Columbia on one hand, and Rat Portage on the other making business beyond these points impossible. The character of the land around Prince Albert is admirably suited for either ranching or mixed farming, and the town is bound to become an important one.

UNION BANK OF HALIFAX.

Halifax is an important banking centre in Eastern Canada. Banks having aggregate assets of more than sixty-eight millions of dollars have their head offices in that city. Among these is the Union Bank of Halifax, established nearly fifty years. Its statement was noticed in our Halifax letter of 23rd February, but we give them now more fully, from the printed statement. The bank has a paid capital of $1.326,000 and a rest of $925,000, composed of accumulated profits and the sale of stock at a premium. Its business continues to grow, for the total assets were at the close of January last $10,373,650, a very handsome sum. Nearly three millions of these are in readily available shape, and the current loans amount to $7.315,000. Among the liabilities, circulation amounts to $1.134.902; deposits to $5,792,000, rather more than eighty per cent. of them payable after notice.

The earnings are at a rate not to be despised, namely, 11.37 per cent. on the capital. This is not as great as in the previous year, but should content any shareholder who is not a mere money-grubber. We may expect to hear a demand for a larger distribution of profit in the way of dividend, seeing that the bank can earn eleven or twelve per cent. but divides only seven. Yet it would not be good policy to divide all or nearly all that is earned. Not so much is added to Rest out of earnings this year as the previous one, because $25,000 was used to write down consols and bonds to present market value. However, to have added $100,000 to Rest in the twelve-month, part out of earnings and part out of premium on new stock, is to have done well enough. The Rest is now almost seventy per cent. of the capital.

GREAT WEST PERMANENT LOAN AND SAVINGS COMPANY.

It is natural that as large communities arise in the newer parts of the Dominion, their residents seek to found for themselves institutions of a kind resembling those to which they were accustomed elsewhere, just as they aim to provide manufactories of their own. Winnipeg was not long a city before she founded the Great West Life Company, which has built up a large business, and now we see begun in the same city the Great West Permanent Loan and Savings Company. There are some influential men connected with this company, which was only begun in 1903, but many shares have already been subscribed for, so that the Western folk appear resolved to support it. Its first annual meeting was held this month. From the report we learn that this is one of the societies which issue different kinds and grades of stock, some permanent, some withdrawable, accumulating, and so on.

The profit and loss account shows earnings of some $33,000, although the mortgage loans total only $156,200. This remarkable rate of earning we should have imagined to proceed, perhaps, from the successful purchase and sale of land, but that we find it explained that there were, besides interest earnings on loans, "premiums, transfer fees, and sundry earnings," to form this $33,000. We do not know what these sundry earnings may be, nor are we aware just exactly how so large a sum could be earned in the shape of premiums. It is stated by the manager that considerable sales of stock have been made at a premium of 25 per cent. But the language of the report shows that these methods are considered all right, and the address of the president indicates that lots of people in the West are content to borrow upon the company's plans, for applications for stock are coming in, he says, by every mail. The last speaker at the meeting, Mr. Gordon, M.P.P., expresses frankly the dislike of Western men "to drain the great western country of its surplus capital," when they can find home institutions to put their money into. This confidence in their country is one of the striking and delightful features of the West

ITEMS ABOUT MINING.

It is stated that anthracite coal has been discovered in the vicinity of Cumberland, British Columbia, and that the mine is being developed. Samples containing 83 per cent, carbon and 5.75 per cent. ash are reported, we do not know with what truth. The coal is compact and lustrous in appearance.

Distinct denial has been made by Mr. S. H. C. Miner, president of the Granby Consolidated M. & S. Company, to an article which appeared in a western paper, stating that the company was about to make a very extensive addition to their smelting plant at Grand Forks, B.C. He declares that the management is not considering making any enlargement to either the mining or the smelting plants. These have both been brought to practically completed units by the policy of gradual increase which the company has pursued steadily during a number of years past. The present plan of the directors is to give their close attention to the operation of these plants steadily and economically, with a view to realizing returns upon the large investments that have been made.

CANADA AT ST. LOUIS.

Mr. W. Hutchison, Canadian Commissioner to the St. Louis Exposition, says that the Dominion's display of exhibits will be far ahead of anything it has attempted before. A car of fruit, has, we understand, been placed in cold storage, and several other carloads of exhibits have already arrived. These include the pick of Canada's agricultural, forest and mineral wealth, but the general policy will be to give prominence to the resources which are peculiar, or almost so, to Canada. For example, in minerals, Canada's almost exclusive resources of nickel, corundum, chrome iron, peat, and asbestos, are to be featured. The displays will not be confined to show cases, but unique and striking displays will also be made. Separate pyramids of asbestos, mica and nickel are to be built and placed in prominent positions in the Canadian quarters. These pyramids will illustrate the processes the ores undergo in the transition from the crude state to the finished product. The nickel pyramid is to be 20 feet in height. The ore, as turned out of the mine, will form the base, above it will be a section containing the nickel product after the roasting process. Above it again will be a section containing the copper and nickel matte, and the apex of the pyramid will be finished in the refined nickel. Surmounting the pyramid is to be a statue made of the refined nickel and truly Canadian in design. In the line of precious metals Canada will not be found wanting. It is the intention to place in a commanding position a trophy bright with gold and silver.

There will be a very large exhibit of woods from British Columbia, as well as from other parts of the Dominion, while the fruits are expected to make our southern neighbors realize that "Our Lady of the Snows" can also produce plenty of sunshine when required.

FINANCIAL MATTERS.

The Bank of British North America has opened a branch at Bobcaygeon, Ont., not at Gananoque, as stated in last issue. It will be temporarily under the management of Mr. G. D. Watt.

The Home Savings and Loan Company will, on Saturday next, open its first branch office, "Branch A," at 522 Queen St. West, corner of Hackney St. It will be in charge of Mr. J. W. McCabe, who has been for some years in the employ of this well known company, which will presently be the Home Bank of Canada.

The annual meeting of the Ontario Building and Savings Society, Kingston, took place on the 17th inst. It was reported that, after paying costs of management, taxes and interest on deposits, two half-yearly dividends had been paid at the rate of 4 per cent. per annum for the year, and placed $3,135.16 to the credit of the contingent fund, now amounting to $24,654.59.

The Northern Securities Company, in view of the recent legal decision against them, are proposing a new plan of action. In substance, it provides for a stock dividend of 99 per cent., to be effected by a reduction of that amount in the capital stock of the Securities Company. For every share of Northern Securities stock surrendered, the company will deliver $39.27 stock of the Northern Pacific Railway Company, and $30.17 of the Great Northern Railway Company. The shares of the Northern Pacific Company were taken over by the Northern Securities at 115, and those of Great Northern at 180. A special meeting of shareholders is to be held at Hoboken, N.J., on April 21st, to ratify the stock distribution, in accordance with New Jersey laws, and it has already been accepted by the directors.

The scheme proposed by A. E. Ames & Co., of Toronto, to protect themselves against an ordinary assignment by means of the formation of a holding company, is not meeting with unanimous welcome from the firm's creditors by any means. Already, some of them have taken out actions in order to obtain possession of amounts due. It cannot be denied that the idea exists in the minds of a good many people that, whatever may be the exact letter of the law which forbids preferential treatment of creditors, the attempt to dispose of the firm's obligations in the way suggested, comes perilously near to a violation of its spirit.

TRADE OPENINGS.

The following were among the enquiries relating to Canadian trade received at the Canadian Government Office in London during the week ending 11th March, 1904. Further particulars may be obtained from the Monetary Times by sending stamped envelope:

A firm of elastic web and smallware manufacturers wish to appoint Canadian agents. A London agent seeks the names of several large grain export firms. A commission agent and general merchant in Newcastle is prepared to represent a good Canadian house in almost any line of business. A North of England firm asks to be placed in touch with likely Canadian exporters of pit-props. A Scotch firm of produce importers are looking for supplies of refined Canadian lard, of the quality known on the British market as pure lard. A London firm of merchants are desirous of establishing relations with Canadian business houses buying British and French goods. An Irish produce firm ask to be placed in touch with curers or shippers of pigs heads in Canada. Enquiry is made respecting producers of rotten stone in Canada. A Glasgow firm desire to get into touch with importers in Canada of bricks, fireclay pipes, retorts, and other fireclay goods. A gentleman leaving England early in April to take up his residence in Canada, is seeking a few agencies of British firms requiring a representative in the Dominion. Enquiry is made for names of Canadian furniture manufacturers who can ship office furniture, telescope tables, bedroom suites, etc. A travelling agent in the North of England is seeking the representation of Canadian manufacturers. A New Zealand firm wishes to be supplied with names and addresses of Canadian shippers of furniture, hardware, boots and shoes. A Trinidad firm of shipping and commission agents desire to get into touch with Canadian business houses. A North of England firm of cheese factors wish to correspond with some Canadian shippers of cheese from the Belleville and Brockville districts. Would also act as buying agents for a new brand of pea-fed bacon. A firm of petrol and steam motor manufacturers have asked to be furnished with information useful in developing a demand in Canada for their productions.

The following enquiries were made to the Canadian section of the Imperial Institute, London, S.W., during the week ending 11th March: A manufacturer of fishing rods and tackle is prepared to appoint a suitable Canadian resident agent. A firm manufacturing all varieties of iron and wire fencing, hurdles, gates, etc., wish to develop trade in Canada. The makers of a new patent boiler-leaning material seek the services of an active Canadian agent.

ANSWERS TO ENQUIRERS.

Virtus, Ottawa.—Glad of your letter. You have put your finger upon a soft spot in the life business. We devote some attention to it elsewhere. What you mention are among the blots that the Life Managers' Association are trying to remove from the page.

C. J. H., Niagara Falls.—According to the January return of the Canadian banks, their total capital paid up was at the end of that month $78,625,000, and their reserved funds (which also belong to their shareholders), were $50,653,000, the aggregate of these is $129,278,000 But they use a vastly greater sum than this in the banking business of the country. They have borrowed from the public in the shape of deposits $437,278,000, so that they have of their own and the public's money no less than $566,756,000 to lend.

THE WINNIPEG FAIR.

Authorization has been obtained from the Ottawa Government by the Winnipeg Exhibition Association to hold a Dominion Exhibition at Winnipeg from July 25th to August 6th this year, and what is more, the Government has made a grant of $50.000 for this purpose. It is being urged, and with force, that this will afford an opportunity to the manufacturers of Canada to introduce their products into Manitoba, which they ought to take advantage of, especially as the United States manufacturers are alive to the importance of the trade. The Winnipeg Fair management has done wonders already in furnishing accommodation for exhibitors, but they are erecting two handsome additional buildings, each 400 by 80 ft., for the display of manufactured products.

It is worthy of especial note that the freight charges both ways on exhibits returned from Winnipeg without change of ownership, are to be paid by the Association from the Government grant. And besides this, special arrangements have been made for manufacturers to send their exhibits from Winnipeg to exhibitions at Toronto, London or Ottawa. These shipments, we are informed, will be forwarded free of charge from Winnipeg to any of the points named. From there to other points at one-half regular freight rate. Those who desire to take advantage of this very tempting arrangement should apply before May to the Canadian Manufacturers' Association, Exhibition Department. We learn further with interest that special facilities and free power will be provided for process exhibits. These are specially invited, and will receive particular attention from the management. Every one will wish the Winnipeg Dominion Fair success. We feel sure the management will deserve it.

INSURANCE ITEMS.

The Lafayette Fire Insurance Company, of New York, as a result of the practical wiping out of its entire surplus by the Baltimore fire, together with a depreciation in the market value of investments, is giving up business. It has reinsured all its risks in the National Fire Insurance Company, of Hartford, Conn. All claims will be paid promptly, on presentation, and after settlement of its liabilities the stock will have a book value of considerably more than par.

English fire departments are becoming convinced of the advantages of self-propelling fire engines, and a London firm has already supplied motor steamers to Liverpool, Brighton, Plymouth, Portsmouth, Tottenham and other towns. The Liverpool corporation, after eight months actual working experience with one of these engines, has just ordered a second, to deliver 500 gallons per minute and run twenty to thirty miles per hour. This new machine will also carry a chemical cylinder for dealing promptly with small fires.

The Dominion Post Office Department has decided to institute a system of insurance of inland registered letters. The maximum amount to be insured will not exceed $25. The insurance fee for $10 will be three cents, for $15 four cents, for $20 five cents, and for $25 six cents. In addition, of course, the full postage and registered charges must be paid. Coins, articles of gold and silver, precious stones, jewellery and other articles of value must be either put in strong boxes in accordance with directions furnished by postmasters, or in envelopes, with directions furnished by postmasters. It should be noted that envelopes wth black or colored borders may not be used for registered or insured letters.

As a result of the opinion expressed by experts that the damage done by the conflagration at Baltimore was aggravated by the number of electrical wires strung on poles, the authorities of that city have strictly prohibited the continuance of the practice within the burnt district. All remaining poles have been removed. Another lesson drawn from the fire at Baltimore is the enormous superiority of conduits for electric transmission purposes, compared with overhead wires, even from the point of view of the companies owning them. With the latter the investment is too easily and quickly wiped out, and then there is the loss arising from an immediate cessation of revenue, besides the loss of facilities to the public.

DRY GOODS ITEMS.

Cables to hand from London, referring to the wool sales this week, say there was a good attendance of buyers. Crossbreds were in active demand and sold at top prices. The general sales closed firm, with Australian merinos, fine, showing par to 5 per cent. below the January sales, and the decline in heavy faulty was occasionally more marked. Coarse greasy crossbreds showed 10 per cent., medium, 7½ per cent.; scoured, 5 per cent. higher than January. American buyers operated more freely than for some time past.

A possible revolution in weaving is announced in the shape of a rotary loom, which is said to turn out five times as much cloth as the looms heretofore used, by means of a principle eliminating the waste incurred in the reciprocating motion, and similar to such as has been made use of in the modern knitting machine. It is claimed for the new invention that not only will it require the services of fewer hands, but that it will admit of the production of a greater variety of patterns and weaves.

The branch of the Canada Woolen Mills, at Hespeler, Ont., was recently closed down, the one at Carleton Place having been in the same condition for several months past. The Rosamond Woolen Mills, at Almonte, Ont., have also shut, owing to lack of orders. It is not to be disputed that certain branches of woolen manufacturing in this country are in a very depressed state, owing, mainly, it is claimed, to the working of the preferential tariff, on British goods, and it is altogether likely that the industry can only regain prosperity through a revision of that part of the tariff.

It is said that a curious development of Irish industry is taking place in New York. American ladies of wealth and influence are asked to co-operate in reviving the Irish lace industry, and transfer it to America, whither many of the girls skilled in the art have emigrated. To this end, Miss Marion Daly, one of the founders of the revival of lace-making in Ireland, is now in New York to enter upon the work. Many of the expert lace-makers, girls who worked for Miss Daly, in Ireland, are now in America, and she hopes to secure their services in reorganizing there this most exquisite of industries. It may be recalled that the plan to revive the ancient industries of Ireland was not only supported by its best people, but that Queen Victoria and the Royal Family encouraged the movement, particularly the making of Irish point lace.

On the 15th inst. there was an outbreak of fire in the mule spinning department of the Canada Cotton Mill, at Cornwall, Ont. We are told, however, that the excellent fire brigade belonging to the mill was quickly at work, and with the assistance of the hook and ladder company of the town brigade they succeeded in extinguishing the flames. The quantity of water poured on to the fire, which was on the upper story of the mill, flooded through the floors to the ground floor and caused $20,000 damage to machinery and stock, covered by insurance.

The steady decline in European silks and the improved demand for woven fabrics have caused domestic manufacturers to take the former with somewhat increased freedom for both immediate and future delivery, says the New York Dry Goods Economist. They are interested in forward deliveries, however, only when considerable concessions from current prices are quoted. There has been a moderate spot demand for Asiatic silks, but the slightly increased firmness of the Shanghai and Yokohama markets has discouraged purchasers of silk "to arrive." European markets are receiving even less support from Continental manufacturers than when the decline in cocoons and raw silks commenced. There have been extensive cancellations of contracts for piece goods by Russian merchants and buyers in many other European countries have curtailed purchases by reason of an indefinable fear that complications of a political or financial nature may follow in the wake of the Russo-Japanese war.

The condition of the linen market in Belfast is improving, says the correspondent of the Drapers' Record. The trend of values is still upwards, but there is less reluctance on the part of buyers to concede advances. Yarns have not sold to the same extent as in some previous weeks, but spinners are well contracted for, and, with flax still rising in price, they are averse to engaging themselves far ahead at current rates. Their prices, however, are still under those charged by continental spinners. There has been more trade in the brown cloth market. Buyers have been holding off as long as possible, to see if there was any likelihood of prices going down; but as there is no immediate prospect of this, but the reverse, they are now coming into the market with their orders. Manufacturers, however, are not yet able to secure increases commensurate with the enhanced values of flax and yarns. Export trade also is better. Business with the United States shows signs of increase. Cuban trade keeps steady. There is an improved demand from the United States markets. Canada is doing a fairly satisfactory trade, and the same may be said of Australasia. Demand from the Continent is slow.

At the annual meeting of the Belfast Linen Merchants' Association a useful survey of the linen trade was made for the past year. The facts and figures quoted were of a decidedly reassuring character. While in some respects trade in 1903 did not come fully up to expectations, on the whole, there is every reason to be satisfied with the results. The first half of the year, indeed, may be said to have turned out well, and but for the very unfavorable weather which prevailed during the greater part of the summer, there is no doubt the second six months would have made a better showing than they did. Turning to the statistics for 1903, we find there has been a decrease in quantity of linen piece goods exported from the United Kingdom, but a slight increase in value, as compared with 1902—viz., 1902, 163,128,600 yards, value for £4,050,027; 1903, 154,877,800 yards, value for £4,078,564 showing a decrease in quantity of 5 per cent. and an increase in value of 0.7 per cent. With the exception of 1895, the total exports for 1903 were the largest for fifteen years. Since 1898 the total exports have gradually increased, and 1903, as compared with that year, shows an improvement of nearly 27 per cent.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending February 29 1904.

J. M. COURTNEY,
Deputy Minister of Finance.

FOR GROCERS AND PROVISION DEALERS.

The expected advance in cheese values in Great Britain has begun. According to a report received this week, prices were already one shilling per cwt. higher, while the possibilities were in favor of still further advances, buyers beginning to recognize that stocks on both sides of the Atlantic were less than had been generally estimated.

According to the British Board of Trade returns, the quantity of butter imported from Canada during the month of February last was 2,205 cwts., compared with 1,735 cwts. in 1903, and 1,298 cwts. in 1902. From all colonies the total was 117,162 cwts. last February, against 60,188 in 1903, and 62,787 in 1902, while from all sources, foreign and colonial, the totals were 359,862 cwts., 299,667 cwts., and 308,600 cwts., respectively.

The Crystal Palace (London), Exhibition authorities have presented a special commemorative medal to the Nova Scotia Government for the splendid exhibit of dessert, cooking and cider apples shown by the Nova Scotia Fruit Growers' Association during the past three months. This position for the fruit of that province has been won by a process of systematic selection directed towards securing flavor, combined with the long keeping qualities and by limiting production to a comparatively small number of varieties possessing those characteristics.

From a Thames dockyard the other day was launched the first steamship ever built in which the whole of the internal space, except what is required for the engines and bunkers, is to be devoted to the transporation of fruit. It is to carry a deadweight cargo of 5,000 tons. Cool air is kept systematically circulating throughout every part of the fruit space. The steamship will carry bananas, the annual importation of which into England has increased in three years from 1,500,000 to 5,000,000 bunches.

It is stated by the Amherstburg Echo that work has been begun upon the foundation of the canning factory at Leamington. A large amount of material is on hand and the work will be pushed on as rapidly as the weather will permit. More stock is being subscribed in Windsor and elsewhere. A professor has been engaged, a Mr. Chapman, who has had experience in the United States. Essex County raises fruits and vegetables galore, and only good management is wanted to make this factory a success.

TORONTO STOCK TRANSACTIONS.

The settlement of the Northern Securities case in the United States, though adverse to the company, was followed after a day or two by a stronger feeling and greater activity in the New York Stock Exchange, and the improvement has been followed here. In some stocks the briskness has been quite noteworthy, that is, compared with what has prevailed during the last several months. In C.P.R., for example, the transfer was 7,578 shares during the week, and the tone of the market was good. The coal and steel companies, too, showed a distinctly advancing tendency. Transactions in detail were as follows: Bank of Toronto, 86 at 225¼-225¾; Commerce, 23 at 150½-152; Imperial, 5 at 214; Dominion, 137 at 223-225; Hamilton, 44 at 206¾-207; Traders, 15 at 137; West. Assurance, 50 at 80; C.P.R., 7,578 at 112-115¼; Toronto Electric Light, 64 at 130; Can. Gen. Electric, 91 at 142-143; Com. Cable (reg. bonds), $2,000 at 90; Bell Telephone, 40 at 135-136; Rich. & Ont. Nav., 535 at 82-83¾; Tor. Rail., 823 at 98¼-99¼; Twin City, 638 at 91¾-92½; Can. Per. Loan, 404 at 121-123; Brit. Can. Invest., 54 at 80; Sao Paulo, 606 at 90-91⅜; Dom. Steel, 145 at 8½-8¾; preferred, 110 at 24-25; Dominion Coal, 1,424 at 56¾-61¼; N.S. Steel, 490 at 78½-81⅛; bonds, $1,000 at 106¼; Soo Com., 165 at 63-64; preferred, 10 at 122; and N.W. Land, preferred, 195 at 98¾.

—The February record of corporation charters in the United States indicates, says the New York Journal of Commerce, that the initiation of new enterprises is at low ebb. The aggregate capitalization of companies organized in Eastern States with a capital of $1,000,000 or more during the month fell below $54,000,000, which is the smallest total for more than four years. The amount was $175,975,000 against $294,850,000 a year ago. It looks as if the overcrowding of the securities market during the four or five years ending with 1902, has now reached its inevitable result. The public is either loaded with securities purchased at much higher prices, or is smarting under loss sustained by the liquidation of such issues, and at the moment turns a deaf ear to new promotions. Contributing factors to the decreased activity in corporate organization, no doubt, are the Eastern war, the political campaign and the less favorable returns of bank clearings and railroad earnings, together with the rather frequent reductions in dividends of industrial companies. The total dividend payments of leading industrial companies for the month of March are only about $21,000,000, as compared with $31,000,000 in the same month of 1903.

—Representatives of all the railroads in the Western Pennsylvania and Eastern Ohio Railway Traffic Association are arranging bituminous coal rates to lake ports. Coal operators of the Pittsburg district have demanded that a reduction of ten cents per ton be made in the rate, claiming that competition of the operators of the Illinois and Indiana fields is ruinous. It is said, however, that the railroads may refuse to make any concessions.

Meetings.

FIRST ANNUAL MEETING

Great West Permanent Loan & Savings Co.

The first annual meeting of the shareholders was held at the head office of the company, 274 Portage Ave., Winnipeg, Man., on Wednesday, the ninth day of March, 1904, at 3 p.m.

Among those present were: Nicholas Bawlf, president Northern Elevator Co.; J. T. Gordon, Esq., M.P.P., Gordon, Ironsides & Fares; E. D. Martin, Esq., Martin, Bole & Wynne, wholesale druggists; Dr. James Patterson, James Stuart, Esq., president Stuart Machinery Co.; Dr. E. S. Popham, Major Stewart Mulvey, sec.-treas. Winnipeg School Board; Capt. James R. Wynne, Martin, Bole & Wynne, druggists; Robert Magness, Esq., inspector of Weights and Measures; Dr. A. V. Carscallen, E. L. Taylor, Esq., barrister-at-law; Thomas Waddell, Esq., organizer I.O.F.; W. T. Alexander, Esq., president Great West Permanent Loan and Savings Co.; Harry Sandison, Esq., merchant tailor; Dr. William Webster, Charles O. Steele, Esq., manager H. B. Co. Mills; Archie McLaren, Esq., George Frankfurter, Esq.; Edward Counsell, Esq.; J. H. Alexander, Esq.; Daniel McRae, Esq.; William Brown, Esq.; P. Donnelly, Esq.; A. J. Jacobs, Esq.; E. W. Johnson, Esq.; Robt. Cunningham, Esq.; F. H. Alexander, Esq., and others.

The president, Mr. W. T. Alexander, having taken the chair, the secretary, Mr. F. H. Alexander, was appointed secretary of the meeting. At the request of the chairman, the secretary read the report of directors and general statement for 1903, which are as follows:

REPORT.

Your directors have much pleasure in submitting the first annual report of the Great West Permanent Loan and Savings Co., accompanied by the Profit and Loss Account and other financial statements for the year ending 31st Dec., 1903, as duly certified by the auditors of the company.

The company has enjoyed in the past year a large share of the country's prosperity, and the directors congratulate all interested upon the position it has attained.

The total subscribed capital is $611,600.

The assets amount to $160,574.29.

In fact, the company has established a record for loan companies of a similar nature organized in Canada, having a larger amount of assets than fifteen of the principal companies organized in Canada, had at the end of the first year's oper-

ations. During the year, agencies have been opened up in the principal cities and towns in the West. The company has already gained the confidence of the public, and is recognized as one of the leading financial institutions of the West. Our company, having its head office and directors in the West, is enabled to negotiate loans on the shortest possible notice, which has proven a great convenience to the borrowing public.

Our loaning system offers many advantages to borrowers; and, in fact, it has become so popular that it has been utterly impossible for the company to accept more than a small portion of the applications received. As a result, only the very best loans have been accepted; and these bear a very remunerative rate of interest.

The payment of principal and interest has been prompt and satisfactory, which is evidenced by the report submitted.

By referring to the report you will notice that the company has loaned on first mortgages $156,200. These mortgages are upon improved city and town property in small average amounts, and upon ample margin of value; and under a system whereby a portion of the principal is repayable monthly. Each month, consequently, sees the borrower's debt less, and the company's security greater. The company does not lend any money for speculative purposes. There is no known security better than first mortgages, under these circumstances judiciously selected. Each loan is covered by ample insurance, to guard the company against possible loss through fire.

You will observe by referring to the report, that after paying and providing for two half-yearly dividends at the rate of seven per cent. per annum on the fully-paid permanent stock, and crediting the different classes of stock with the required amounts to mature them, there remained to the credit of profit and loss account a balance of $27,767.21, which was transferred to the reserve fund.

Possibly the most interesting item to the shareholders which appears in the report, is the reserve fund, which stands at $27,767.21. Your directors feel entitled to congratulate the shareholders and all who are interested in the company, that they have been able to transfer such a handsome amount to the reserve fund, and wish to express their appreciation of the assistance which they have received from the shareholders in establishing the company's business during the past year, and the directors feel confident that the shareholders will, in the future, co-operate with them, to make the company a pronounced success.

The board wish to express their entire satisfaction with the manner in which the officials have performed their duties.

W. T. Alexander, President.

STATEMENT OF ASSETS AND LIABILITIES LOAN FUND AS AT DECEMBER 31st, 1903.

ASSETS.

Real estate loans—First mortgage	$156,200 00
Interest due and accrued on loans	405 22
Sundry accounts due company (secured)	186 90
Charter and license account	197 50
Office furniture and fixtures	1,810 97
Cash on hand	1,773 70
	$160,574 29

LIABILITIES.

Permanent Stock, "A" and "B" with accumulations.	$107,265 69
Withdrawable Stock, "C" and "D" with accumulations	3,030 23
January 1st, 1904—Dividends "A"	2,268 58
January 1st, 1904—Dividends "B"	101 48
January 1st, 1904—Dividends "C"	11 65
Loan repayments	7,274 42
Amount due on uncompleted loans	9,250 00
Amount due company's bankers	3,208 18
Accounts payable	184 85
Contingent account	212 00
Reserve fund	27,767 21
	$160,574 29

W. T. Alexander, President. E. S. Popham, Vice-President.

Profit and Loss Account.

Interest on mortgage loans, premiums, transfer fees, and sundry earnings	$32,041 56
Transferred from expense account	1,571 60
	$33,613 16

AUDITORS' STATEMENT.

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of the Great West Permanent Loan and Savings Co. to the 31st December, 1903, and find the same to be correct and properly set forth in the above statement.

A detailed audit of the cash receipts and disbursements with vouchers has been made and found correct. The securities for loans, as above shown in the hands of the company, have been carefully scrutinized, and compared with the detailed list of mortgages, and found correct.

E. M. Counsell,
Stewart Mulvey,
Auditors.

The president, in moving the adoption of the report, said:

It is with unqualified pleasure that I move the adoption of the report, when we remember that for this company 1903 has been the organization year, during which time it could not be expected we could do very much more than put our company in order. The report, I think, is unprecedented in the history of such institutions in Canada.

Having made this start, I venture to say that we shall go forward with much greater progress during the year upon which we have just entered. Indeed, it is right to inform you that our company has now subscribed capital of $611,500, and we have applications coming in for stock by nearly every mail. I may say that the company has established a record for Canadian loan companies of a similar nature, having a larger amount of paid-up capital than fifteen of the principal loan companies organized in Canada had at the end of their first year's operations.

I may say that our faith has never faltered the slightest in the success of our company. Our plans are so easily comprehended and just, that it is not very wonderful that the public generally has endorsed the position we have taken in this regard. In fact, the Great West has already made friends all over the North-West; friends who are constant, enthusiastic and determined to join together so far as they can to make the company the greatest possible success.

The result of the past year's business will, I feel assured, be regarded with satisfaction by the shareholders of the company. The report of the directors now placed before you for approval, shows the net profits were $33,613.10, out of which dividends have been paid and accumulations credited and $27,767.21 carried to the reserve fund.

I feel that it is my duty to inform the shareholders that the company issued no bonus stock. The directors paid the same for their stock as the general public.

The directors have made the very best possible use of the sharenolders' money, having kept it loaned out, and never, at any time, have had any large amount in the bank. In fact, in many instances, we have had an overdraft from our bankers.

I consider the company's success is largely due to the fact that our company is purely a Western organization, and that the board of directors are all Western men of sound judgment, well acquainted with the requirements of this Western country, and also to the efficient service rendered by the staff. Repayments on real estate loans amounted to $7,274.42, a very satisfactory return, when it is considered that all the loans were made in 1903.

By referring to the report, you will notice that the company has loaned on first mortgages $156,200. The company's charter does not authorize speculating in any kind of securities, and this law is always strictly adhered to. Such business at times may yield large profits, though at times it may result in large losses. First mortgages on approved real estate are recognized to be the best security that can be had.

The rapid development going on in Manitoba and the North-West Territories has opened up a wide and inviting field for lending on first mortgages at very remunerative rates of interest. The organization possessed by this company for doing this business, the safety and accurate knowledge is very thorough; and so great is the rush of settlers into this country, that for many years money will be required to assist in the erection of buildings, and in making many permanent and useful improvements. The number of new settlers during the last two or three years has been very great, and a great many of them will require assistance in building homes.

Winnipeg, our own city, steadily increases in population and wealth. The new City Directory for 1904 shows an increase in population of 13,744, which indicates a population of about 63,000. I cannot but think that this is an over-esti-

mate, but beyond any doubt there is a continuous growth, and a great many new homes will be built by the new settlers.

The company has furthermore extended its business over a wide area, and done so with the fullest care, and now possesses an agency, organization and system of advisory boards of proved usefulness and responsibility, by means of which it is well equipped to take advantage of the improved business conditions of the country.

We appreciate the way the stockholders have paid up on the stock during the year, and I would also ask the hearty co-operation of the shareholders in the promotion and extension of the company's business. I am glad to be able to state that we have already had this co-operation to a very large and satisfactory extent, as the growth of the company during the present year indicates.

We aim, however, at a still larger growth in the future, and to see the company occupying a place, not only amongst the largest, but amongst the most progressive in Canada. I need not make any further observations, and with these remarks beg to move the adoption of the report.

The vice-president, Dr. Popham, in seconding the adoption of the report, spoke as follows:

I take great pleasure in seconding the report of the directors. We, as a board of directors, feel exceedingly proud of the report we have to present, and as shareholders, feel highly gratified indeed.

With regard to the report, the question would naturally come up, I suppose, why it is that we have made such a splendid record for the first year.

One reason is, that we started our company at a very opportune time when there was plenty of money in the country seeking investment, and as a result there has been a great demand for the company's stock. In fact, $400,000 of the company's stock has been subscribed for by the most prominent financial men of Winnipeg, and when such men take an interest in the company, it is a guarantee of the company's success.

Then, we are a home company. I think that the people of the West are beginning to recognize that "the West is for the West."

Companies from the East have been investing capital and making money here, and our people are beginning to see that if men from the East can organize companies and carry on business with profit in the West, then it certainly should be done with greater profit by people living in the West, and who are thoroughly conversant with the requirements of the Western country.

In addition to all these things, I think one of the greatest reasons of the success of the company is the capable management. I do not refer to the board of directors particularly, but rather to the efficient staff; and certainly, the president of the company, from his intimate knowledge of such business from his teens, until the present time, is well equipped for this, as is evidenced by the report which we have submitted to the shareholders.

In conclusion, I would say that it affords me extreme pleasure in seconding the adoption of the report.

On motion, the report was unanimously adopted.

Mr. J. T. Gordon, M.P.P., the newly-elected director, being called upon, said:

Mr. President and Gentlemen,—I have listened with a great deal of interest to-day to the remarks made by our president, also to the directors' report.

While I have had not so much experience in the loan company business as in other lines, it is quite evident to me that great credit is due the directors and officials of the company, as the handsome reserve that has been established is an evidence of careful and efficient management.

I was also agreeably surprised to hear the president express himself in such sanguine terms as to the future of the company. I always like to leave such matters until the next meeting, and then give the shareholders a surprise; and I shall be pleased, indeed, if at the end of the coming year we have a reserve of $100,000.

While I have not had the experience that our president has had in the loan company business, I shall, however, do my utmost to further the interests of the company, and with my co-directors, a careful body of men, I feel confident that the interests of the stockholders are in good hands. I am satisfied that this company, with its head office and directors in the West, will prove a valuable acquisition to our city and country.

There is no reason why Eastern companies should drain this great Western country of its surplus capital, when we have plenty of patriotic Western capitalists who are not only able to finance such an institution as this, but who are eagerly looking for opportunities to invest their money in strong, home institutions, which will help build up the West, and bring it into prominence in the financial world.

Brief addresses, expressing satisfaction at the progress made by the company during the past year, were made by Mr. Nicholas Bawlf, Dr. Patterson, Major Mulvey, Capt. Jas. R. Wynne, Mr. Robert Magness, Mr. Harry Sandison, Mr. James Stuart, and others.

The following gentlemen were elected directors for the ensuing year: W. T. Alexander, manager Great West Permanent Loan and Savings Co.; E. S. Popham, Esq.; M.D.; J. T. Gordon, Esq., M.P.P., Gordon, Ironsides & Fares; E. D. Martin, Esq., president Martin, Bole & Wynne Drug Co.; James Stuart, Esq., president Stuart Machinery Co.; E. L. Taylor, Esq., barrister-at-law; F. H. Alexander, Esq., secretary Great West Permanent Loan and Savings Co.

At a subsequent meeting of the board of directors, W. T. Alexander, Esq., was elected president, and Dr. E. S. Popham, vice-president.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, March 24th, 1904, compared with those of the previous week:

Cities	Mar. 24th 1904.	Mar. 17th, 1904.
Montreal	18,706,208	15,967,514
Toronto	13,627,996	12,590,676
Winnipeg	4,436,754	4,058,135
Halifax	1,340,525	1,484,555
Hamilton	1,112,296	999,157
St. John	796,546	743,570
Vancouver	1,301,023	1,173,841
Victoria	526,890	543,649
Quebec	1,211,600	1,196,187
Ottawa	1,859,483	1,829,665

	$45,670,276	$41,340,284

THE Royal Automatic Smoke Consuming Company

TORONTO, ONT.

REPORT OF THE BOILER INSPECTION AND INSURANCE COMPANY.

Toronto, March 15th, 1904.

J. A. WHALEY, ESQ.,
Manager the Royal Smoke Consuming Co.,
Room Z, Confederation Life Bldg., Toronto.

Dear Sir,—The following are the results of tests made at the Canada Life Building, Toronto, on March 11th and 14th. On the 11th inst., your smoke consuming device was in operation, and on the 14th inst., it was not in use.

	Consumer in use.	Consumer off.
Duration of test	8 hours.	8 hours.
Total coal consumed	1,327 lbs.	1,600 lbs.
Ashes produced	131 lbs.	191½ lbs.
Water pumped to boiler and apparently evaporated	11,270 lbs.	10,110 lbs.
Temperature of water deg. F.,	38.1	40
Average pressure on Steam Gauge	58.8 lbs.	59 lbs.
Water apparently evaporated from and at 212 deg. F. per pound of coal	10.27 lbs.	7.63 lbs.
Saving in fuel by the use of the Consumer	34.6 per cent.	

With the device in use there was practically no smoke visible at the top of the chimney, but without it at each fresh charge of coal the smoke was quite black for a time. The boiler tubes were found to be much cleaner when it was in operation and the coal was burned at a seemingly higher temperature.

Yours very truly,
(Signed) GEO. C. ROBB,
Chief Engineer.

UNITED STATES FINANCES

Henry Clews & Co., in their weekly circular dated March 19th, 1904, say the Northern Securities decision, as expected, proved adverse to the merger, and the stock market rallied sharply in consequence, partly as a result of the removal of suspense and partly because of extensive short covering. The decision is one of the most important issued by the Supreme Court of the United States in many years, and its effects will be very far reaching. Whether the Court will hereafter take the same attitude towards an industrial combination not a monopoly as it has done in the case of a railroad which is a quasi-public monopoly remains to be seen. It is quite certain that the decision opens the way for further litigation, but which for the present is not likely to follow.

The improvement in stocks which followed the merger decision was further stimulated by better accounts of the iron trade and continued ease in money. Prices of iron and steel have been quietly hardening the last few weeks, and now that the conviction has been reached that prices are at bottom level orders held back for months are being placed, and the outlook for all kinds of steel products is better than at any time since the reaction began. There is only one hindrance to recovery in the iron and in other industries, and that is the uncertain attitude of labor. New enterprises are already seriously held in check, not only by the unreliable policy followed by some unions, but also by the high cost of labor, which, in many instances, has reached an extreme level. Much of the recent business reaction is due to this influence, and any further demands on the part of unreasonable labor leaders would be simply disastrous. There are indications, however, that sanity is resuming its sway. The bituminous coal miners have decided not to strike, thus averting a disastrous struggle, and in some trades labor has submitted to moderate reductions, which permitted a revival of business; and should this spring escape an upheaval, labor will probably benefit more than capital.

TO HIGH-TONED CRITICS.

It is easy to sit in your carriage
And counsel the man on foot;
But get down and walk and you'll change your talk
As you feel the peg in your boot.

It is easy to tell the toiler
How best he can carry his pack;
But no one can rate a burden's weight
Until it has been on his back.
—Laporte Press.

—"It is the man that counts," said Mr. Rockefeller, Jr., to his class last Sunday. But some men are able to count a good deal more than others—because they have got it to count.—The New York Evening Mail.

—New York advices say that owing to the increase in the cost of crude rubber the rubber manufacturers in the United States have again increased their prices by 7½ per cent., taking effect on 21st March.

—The New York Sun tells good stories occasionally. Here is one: The present scarcity of rubber has made the demand for it so great that a good price is paid for old rubber which formerly would have been thrown away. A shrewd young woman was boasting the other afternoon that she had that day received $1.25 for the accumulation of disabled rubber boots in her house that had hitherto been thrown away.

THE GREATEST

responsibility resting upon our manufacturers and power users in Canada is that in connection with their Steam Plants. The Boiler Room is the place where precaution is taken.
The largest Steam Users regard the assistance of a responsible Company a necessity in order to provide protection and to insure a safe and economical maintenance of their Steam Plants.

MONTREAL MARKETS.

Montreal, March 23rd, 1904.

Ashes.—There is still an absence of new supplies, and the stock in store is practically nil. Makers can realize $6.05 to $6.10 for first quality of pots; from $5.65 to $5.70 for seconds, and probably $7 to $7.25 for pearls, though there has not been a transaction in last named lots for several months.

Dairy Products.—There were quite liberal shipments of cheese abroad last week, exports via St. John and Portland aggregating 43,863 boxes. The market just now is quiet but fairly steady, holders being pretty firm in their ideas with regard to prices for what comparatively little stock there is left here, quotations being about 10¼c. for fine white, and 10½c. for fine colored. Receipts of butter are just moderate. Fresh milk goods are realizing about 20½c. in the country, and held creameries range from 19½ to 20½c.; dairy makes, 14½ to 16c.

Dry Goods. — The bright warm weather of to-day has had a noticeably

beneficial effect in city retail trade, and payments from this source are good on the whole, but country collections are more or less complained of, and general orders are hardly up to what has been looked for. Nothing new whatever is reported with regard to prices.

Groceries.—Trade cannot be called active for the season. The movement is somewhat better than it has been, but the general break-up of the winter roads must affect trade in the country, as well as collections, which are not as free as they might be. The week has developed little new as regards values. Quotations for refined sugars are firm at the last advance, with good demand from jobbers reported. For standard granulated the factory figure is $4.15; yellows from $3.55 up. Late cables would tend to show a firmer market for molasses, with good demand reported at the island, though so far only one small cargo is reported sold for this market. The figured laid down cost is now about 26½ to 27c. The present jobbing quotation for Barbadoes molasses from stock is 30c. by the puncheon. In tapioca some advance is reported. In teas there is nothing specially interesting beyond a continued good demand for Ceylon greens. The packers' combination are now quoting $1.15 for corn, and $1.10 for tomatoes, having very little stock on hand, but local jobbers are selling under these figures.

Hides.—Prices of beef hides and calfskins remain as amended last week. Receipts of calfskins are liberal, but lambskins are not coming in very freely as yet. We quote dealers as paying 9c. for No. 1 city beef hides ,and from 8 to 8½c. for No. 1 country hides. Calfskins, 13c. for No. 1. city ,and 11c. for No. 1 country skins. Lambskins, 10c. each, and sheepskins 75c. each.

Leather.—No large transactions are reported, but there is a fair aggregate of moderate orders being booked. Values in black leathers are firmer, and some western tanners have established an advance of 1c. in splits, and ½c. in pebble. Jobbing sole is still scarce; No. 2 mfrs. steady at 23½ to 24c. Local manufacturers of dongolas are said to be placing goods to advantage in Britain, and some very fair exports orders in this line are lately reported.

Metals and Hardware.—For the week no gain is reported in the volume of trade, and on the whole business is not of a very active character. Good brands of Scotch pig-iron are quoted for spring delivery at $19 to $20; Middlesboro, $16, and domestic at $18.50 to $19. The general jobbing quotation for bars is $1.75, but it is claimed fair lots have been bought at $1.65. Russia iron is very scarce on spot, also tinned sheets of large size, suitable for cheese vats, maple sugar evaporators, etc. Canada plates tend to easiness. General metals remain as quoted last week.

Oils, Paints, and Glass.—Business in these lines has been somewhat quiet this spring, but there is an impression in some quarters that the shortage will be made up to some extent later. Turpentine shows further easing off and is now quoted at 89c. Linseed oil does not seem to acquire any strength. Steam refined seal oil is very scarce, and 65c. has been asked for small lots; whale oil seems to be coming into use as a substitute, and is quoted at 50 to 55c., while straw seal can be bought at 42½ to 45c. Leads are still easy at quotations. We quote single barrels, raw linseed oil, 46 to 47c.; boiled, 49 to 50c., net 30 days, or 3 per cent. for four months' terms. Turpentine 89c. single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon; steam refined seal, 62½ to 65c.; straw seal, 42½ to 45 to 55c. per gallon; tinged and brown ditto, down to 35c.; sweet pale whale oil, 50 to 55c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and firstclass brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty

TORONTO MARKETS.

Toronto, March 24th, 1904.

Chemicals, Drugs, etc.—An advance, which had been expected for some weeks, has at length materialized in quinine. So far the rise is equal to about 1c. per ounce, but it may be carried still farther. Opium continues very dull, but indications in primary markets are brighter for a good trade.

Central Life Insurance Company.
Authorized Capital, $1,000,000
Capital Subscribed, 500,000
Head Office, TORONTO.
Our rates are most favorable to the insuring public. Our Policies are unconditional from date of issue. Our Reserves are based on the highest Govt. Standard. First-class positions for men of character and ability. Write to the Head Office of the Company for particulars.
THOMAS CRAWFORD, M.P.P., President. J. M. SPENCE, Man. Dir.

The Continental Life Insurance Co.
Head Office, TORONTO
AUTHORIZED CAPITAL, $1,000,000
The policies of the Continental are as liberal and free as absolute safety allows, and the premiums are as low as the security of policyholders permits. For district and agencies apply to Head Office.
HON. JOHN DRYDEN, President.
GEO. B. WOODS, Manager.
CHAS. H. FULLER, Secretary.

1903

SURPLUS SURPLUS

The ability of a Company to give its policyholders insurance at the LOWEST COST compatible with safety depends on its PROFIT EARNINGS, which in

Head Office, WATERLOO, ONT.

The Mutual Life OF CANADA

amounted in 1903 to $194,783
Out of this sum it paid to policyholders in 1903..... $ 77,300

And it continues to distribute dividends to policyholders on the SAME LIBERAL SCALE as for the past year.

ONLY POLICYHOLDERS SHARE IN ITS PROFITS.

Ginger is easier. English advices report little change in the situation.

Dry Goods.—It cannot be said that very great activity prevails in the general dry goods trade, which is scarcely to be wondered at in the present state of the roads. It is true that transportation facilities have improved greatly since a week or two ago, and trains are now beginning to resume a normal service; but the country roads are still in a terrible state, and to move goods in or out is well nigh an impossibility. Values continue very firm in all lines.

Flour and Grain.—The market for flour is rather quiet. Cars of ninety per cent. patents are quoted at $3.65 in buyers' bags, middle or east freights. Bran and oats are steady. Oatmeal continues without change. Wheat has made a drop during the week of 2 to 3c., and the market is dull at the decline. Rye and buckwheat remain about the same. Oats are 1 to 2c. lower. Peas and barley keep steady. Little business is being done.

Fruits and Vegetables.—More active conditions prevail in the local fruit markets. Strawberries and pineapples are beginning to make their appearance in larger quantities; also asparagus. Oranges keep steady. Quotations are about as follows: Apples, 75 to $2.50 per barrel, according to quality; cocoanuts, $4 per sack; oranges, California navels, $2 to $3.50; Mexican, $2 to $2.50; Valencias, ordinary, $4; large, 714's $5; marmalade oranges, $2.50 per box; lemons, Messina, 360's, $2.50 to $2.75; 300's $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; cranberries, $7 to $9 per barrel, $1 to $1.25 per basket; Spanish onions, $3.50 to $3.75 per large case, and $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel; case tomatoes, $4.50 to $5; dates, Sair, 3½c. per pound; Hollowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; pineapples, $4 to $5 per case.

Groceries.—Sugars continue firm at the recent advance. There is a fair movement in general groceries, now that the chance of travellers to get around their routes has improved. Teas are steady, without any large business being done. Canned goods keep at about a normal rate of demand. Not much is being done in dried fruits.

Live Stock.—Trade has a duller appearance at the cattle market this week. The offerings were on the light side, and the demand was but dull. This applies particularly to export animals. For butchers, the need for first-class specimens was fairly well manifested, but such were a scarce commodity. For stockers and feeders, the demand was not active, but prices kept steady. Calves were plentiful, but prices improved somewhat. Sheep and lambs were quite firm, the offerings hardly being enough to go round. Milch cows were easy.

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE

TORONTO.

Agents Wanted in All Unrepresented Districts.

Provisions.—Butter is weaker, owing to much heavier offerings. There is a fair demand for cheese, and the market is steady. Eggs are steady, and are coming in in constantly larger quantities. Canadian hops are firmly held at 27 to 31c. Not much poultry is coming forward now, and the demand is steady. Hog products are steady in price, and in good demand considering the time of year.

Hides, Skins, and Leather.—The market here is steady and firm, though it has not advanced with the Chicago prices. Tallow is a little weaker. Prices for leather are strong, though not much actual business is passing at the moment.

Seeds.—There is no export demand now, and the market is dull. Prices remain as quoted last week.

Wool.—Things are very quiet under this heading. No export demand for fleece is coming in, and pulled wools are very dull just now.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policyholders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

IN THE PAST 20 YEARS

The Canada Life's Assets have Grown as Follows:

TOTAL ASSETS:

In 1883 - - - $5,664,000 In 1893 - - $14,313,000
In 1888 - - - $8,954,000 In 1898 - - $20,038,000

In 1903 = = = $27,180,000.

N. B.—The fact that in 1903 the Applications Received ($13,881,960) were greater than those of 1902 by over $3,000,000, is one of the many evidences of how

The Canada Life has Grown.

Mercantile Summary

WATSON & FOSTER of Montreal, are said to be shipping substantial lots of wallpaper through New York to Australian and New Zealand ports.

THE steamship "Crown of Arragon" has been chartered to carry 30,000 bags of sugar from Demerara to Montreal for the Canada Sugar Refinery; and the Lord Line steamer, "Lord Lansdowne," has been chartered to carry a cargo of 35,000 bags of sugar from the Port of Spain to Montreal, the Gazette says, at 9s. 6d. per ton.

COUNTRY failures in the Province of Quebec are chronicled for the week as follows: T. E. Flynn, for the past twenty years in the general store and fish trade, in a small way at Perce, on the Gaspe Coast, has been asked to assign, and a meeting of his creditors is fixed for the 15th prox. The account has always been described as a slow one.——Joseph Blais, of Berthierville, a young beginner in the baking trade, having been in business, since 1901, has assigned.——A farmer of St. Barnabe, named Cyprien Garceau, who has also been handling general merchandise in a small way for several years past, has followed the general rule which prevails in such cases and turned his estate over to the assignee.——A. Vipond & Co., general merchants, at Hudson, near Vaudreuil, are asking an extension of time. Mr. Vipond at one time operated in quite an extensive way, carrying on branch stores at Wendover and Vars, on the other side of the Ottawa river, as well as a wood and coal business in Montreal. In 1893, he failed and effected a compromise, but eventually had to assign two or three years later. Latterly the business, which is at present a limited one, has been carried on in the name of a son.——Joseph Dupaul, dealing in carriages, implements, etc., at Valcourt, and lately reported insolvent, is trying to compromise liabilities of $16,000 at 60 cents on the dollar.——J. Parent & Co., dealers at Rimouski, are reported in difficulties, and offering 60 cents. Mr. Parent has had a long but checkered business record. Originally he was a Quebec merchant in quite a fair way of trade, but failed there a good many years ago. He then established himself at Notre Dame de Rimouski, where he also proved unsuccessful. He subsequently removed to the present location, and again failed in June, 1901, since which date he has done business in quite a limited way, under cover of his daughter's name. Present liabilities are about $1,800.——Harrison Bros., blacksmiths, of Lennoxville, have assigned. They make a proposition to pay 50 cents on liabilities of about $3,000.——Virginie and Annie Dufour, daughters of the late J. Dufour, of Chicoutimi, have been carrying on a little store business, in succession to their father, for the past several years. They have, now been obliged to assign. Liabilities are small, about $1,000.——Hector Papin, long a baker at Princeville, has assigned, and is reported to owe $1,600, or more.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning THE MONETARY TIMES.

GEO. GAUTHIER, a Montreal baker, is insolvent, and offers creditors 15 per cent. on $1,600 that he owes. An assignment has been made by McGregor Bros., of the same city, manufacturers of lasts in a small way. They owe $2,250.

MR. WM. MACKENZIE, president of the Canadian Northern Railroad, on his recent visit to England, was successful in placing over $9,000,000 of railway debentures, which will admit of the extension of the line from Grandview to Edmonton, a distance of 620 miles, and the completion of the line from Prince Albert east, comprising about 100 miles.

Mercantile Summary.

THE Grand Trunk Railway is understood to be seeking a subsidy from the Ontario Government for a branch line, which the company proposes building to connect from the main line of the Grand Trunk Pacific to Port Arthur.

THE tanning firm of N. Gourdeau & Co., Quebec, whose failure we lately noted, are offering 10 per cent., cash, on liabilities listed at about $25,000.—— James Campbell, shoemaker, of the same city, is offering 50 cents in the dollar on liabilities of $6,000.

MR. C. F. GILDERSLEEVE, Montreal, has resigned the managership of the Richelieu and Ontario Navigation Company, in order to assume for a time at any rate, the active managership of the Bay of Quinte Steamship Company, in which he is a large stockholder. He is to be succeeded by Mr. C. J. Smith, late traffic manager of the Canada Atlantic Railway.

A YOUNG man named W. H. S. Zwicker, of Mahone Bay, N.S., who began storekeeping a year or so ago, is already reported embarrassed, and has apparently been able to roll up quite a respectable liability, though he began business with extremely small capital and little experience. He proposes a compromise of 80 cents on the dollar on liabilities of about $12,000.

THE Cunard Steamship Company has decided to adopt turbine engines in the new fast steamers which are to be built by it in accordance with the recent agreement with Imperial Government. This decision was arrived at after a series of exhaustive tests ashore and afloat, at the hands of experts. Many models are being prepared, and the result of the selection is looked for with considerable interest by marine engineers and others interested.

THE following is a record of the patents recently granted to Canadians in Canada and the United States: Canadian—L. R. Myres, fence construction; T. M. Ramsay, milk cooler and aerator; T. J. Skinner and J. McLennan, hames; J. W. Provan, feed and litter carriers; A. C. Scarr, combined seeder, cultivator and harrow; T. A. Ayotte and A. A. Charbonneau, apparatus for loading and unloading bricks; W. Rodgers, shoe rack; W. S. Scudder, line casting machines; J. T. Griffith, carding machine attachments; P. Dierlamm, building blocks; R. A. Smith, parlor games; R. E. Reardon, vending machine; R. A. Oakley, file binders; J F. Ferguson, safeguards for checks; J. N. McKim, casting machine; J. L. Kieffer, stitch forming mechanism for shoe sewing machines. American.—W. Hargrove, clothes horse; J. D. Landers, train signal; E. A. LeSueur, extraction of copper from comminuted mineral mixtures; J. B. MacLaughlin, grain door for cars; W. Northrop, automatic weighing apparatus; C. F. Pym, lasting jack; D. W. Robb, steam boiler; B. B. Weaver, vehicle wheel; P. Largie, molding apparatus.

AT Smith's Falls, Ont., on Sunday last, a fire which broke out in Shield's Block did damage to the extent of $15,000 or thereabouts to the stores occupied by O. C. Abbott, druggist; W. H. Kerfoot, stationer, and also to the Bank of Ottawa. The loss is partly covered by insurance.

THE annual meeting of the Midland Railway Company, of Nova Scotia, took place in Montreal on the 22nd March. The report showed an increase in gross earnings, compared with the previous year, of 50 per cent., and was considered very satisfactory for such a young road. The directors will apply to the Dominion and Provincial Governments for subsidies to assist in extending the line westward to the Central Railway between Middleton and New Germany. Preparations are being made for the extension northward to Northumberland Strait. The old board of directors was re-elected.

IT is stated that a syndicate of Buffalo and other United States capitalists has a plan for laying out an industrial city on the Canadian side of Niagara Falls, similar to the one under way on the American side. The corporation is a Buffalo one, working under Maine laws, and is capitalized at five millions, so the report runs. It has acquired 2,500 acres of level land immediately surrounding the three great power plants in Victoria Park. It extends in all directions from the park, and its frontage is within 500 feet of the electrical transformer houses of the three great power plants under construction there. It has a frontage of about 25,000 feet on Chippewa river and the Niagara river.

Mercantile Summary.

AN English syndicate is negotiating with Stratford, Ont., council for the location in that city of a metal working plant, to cost $100,000, and employ about 200 men.

IT seems to be the fact that Queen's University has dropped its opposition, and that the Ontario Government has decided to establish a School of Forestry in connection with Toronto University.

THE Ontario Government has granted a charter to the Inter-Ocean Company, Limited, Toronto. Its authorized capital is $100,000 and it will carry on a land business. Among the directors are Dr. J. H. C. Willoughby, of Saskatoon and A. F. Webster, of Toronto.

IT is significant that the American Locomotive Company has discharged about one-half of its employees in the Scranton shops, including several draughtsmen. The movement is by reason of the policy of retrenchment in all the small plants of the company.

THE St. Raymond Paper Company Limited, Montreal, has been incorporated under a Dominion charter, with a capital of $500.000, for the purpose of manufacturing and dealing in wood, wood pulp and paper, or articles made thereupon, and to acquire the assets of the St. Raymond Company in Montreal.

THE Singer Manufacturing Co., of Elizabethport, N.J., is to build another extensive plant outside the United States, a site having been secured at St. John, N.B., so says the New York Commercial Bulletin. The Singer people have large plants operating at Kilbowie, Scotland; near Trieste, Austria, and in the vicinity of Moscow, Russia.

A COMPANY is being organized in Montreal to build and operate a railway either by steam or electricity, from the Quebec & Lake St. John Railway near Chicoutimi, to some point on the Gulf of St. Lawrence or the Atlantic coast, with power to construct branch lines, also saw and pulp mills, reduction work, blasting furnaces, etc.

AT Truro, a press association for the province has been organized under the name of the Nova Scotia Press Association. The following have been elected officers: President, John B. McDonald, New Glasgow; 1st vice-president, James Lawson, Yarmouth; 2nd vice-president, A. C. Bertram, North Sydney; secretary-treasurer, W. R. McCurdy, Halifax.

A NEW line is to be established this season by the North American Transportation Company, of Quebec, which intends running a service between Montreal, Quebec, Charlottetown, P.E.I., St. John's, Nfld., and Sydney with the steamer "Restigouche," of 1,200 tons, making the round trip in a fortnight. The Restigouche was formerly the "Rathlin" of the Clyde Shipping Company.

THE second annual banquet of the hardware section of the Retail Merchants' Association has been held in Toronto. Among the chief speakers were Arch. Campbell, M.P., A. E. Kemp, M.P., Peleg Howland, E. C. Boeckh, T. B. Lee, W. B. Rogers, J. Halloran, E. M. Trowern and D. O. McKinnon. A virtual understanding has been arrived at to extend the association to cover all sections of Canada.

The Barber & Ellis Co.
Limited Toronto

Mercantile Summary.

S. W. FAWCETT writes from Sault Ste. Marie on Tuesday last: Business at the Canadian Soo is recovering. Dwelling houses are being rapidly filled up. The great pulp mill, sawmill, and veneer mill have been running all winter and turning out vast quantities of pulp, lumber and veneer, all of which has a ready market. With the opening of the great steel rail mill, blast furnaces and other large industries, and the completion of the Algoma Central Railway, the building of one of the greatest docks in the northern district, the building of our new post office and the extension of the canal, we are encouraged to expect one of the best seasons that we have ever enjoyed.

THE American Tobacco Co., of Canada, with its customary enterprise, opened on Tuesday of this week at 167 Yonge St. a headquarters for the receipt of all tags taken from their various brands of tobacco. Here also is to be seen a large assortment of articles of utility, to be given as premiums. These comprise household furniture, sporting goods and a large variety of other things. This new premium department will take care of the Ontario field only. That the event attracted great attention is evidenced by the fact that on the opening day about 12,000 people paid the place a visit.

TO OUR READERS.

Having to go to press twenty-four hours earlier this week, because of the Good Friday holiday, we are to-day without our usual letters from correspondents in St. John and Halifax, and have besides necessarily missed the week's bank clearings at eleven cities, as well as some quotations of shares, etc., and some expected contributions.

SPRING FLOODS.

In various parts of southwest Ontario the melting of the great snowfall of the past winter has caused floods which did considerable damage. In London, the turbulent rising of the river Thames drove many people from their dwellings and caused the death of one young man who was about to rescue people from a partly submerged house. Chatham, Thamesville and vicinity were on Tuesday making a gallant fight against the rising waters of the Thames; several township bridges have been carried away. Chatham was without gas or electric light or power. Wingham was flooded on Tuesday. Towns on the Grand river suffered, too, Galt in particular, and stirring tales of adventure "by flood and field" are related.

Michigan has at the same time been put to great discomfort and loss by floods. Grand Rapids, Saginaw, Battle Creek, Flint, are among the places to suffer most. In the first-named there were some 2,000 houses surrounded by water on Monday last from three to

TENDERS FOR

$65,000 DEBENTURES.

Sealed tenders will be received up to noon on Monday 4th April, 1904, at the Town Treasurer's Office, Whitby for the purchase of $65,000 debentures with 6 months, accrued interest, being $50,000, Water Works and $15,000. Electric Light debentures of the Town of Whitby, bearing interest at 4% per annum, repayable in 30 annual payments of $3758.95 each, principal and interest.

Said debentures are dated 2nd Nov., 1903, and to be delivered on 2nd May, 1904.

All said debentures are made payable at the Town Treasurer's Office, Whitby.

The highest or any tender not necessarily accepted.

JOSEPH WHITE
TREASURER.

twelve feet deep. Many persons were absolutely homeless and were carried about the town in small boats to schoolhouses and churches, which were made into relief stations. The Saginaw flood is described as the worst ever known there, street cars were mostly stopped, and the gas light cut off from many parts of the city. Hundreds of thousands of dollars' loss to property is reported from Battle Creek, and most of Grand Haven is swimming in six feet of water. At Lansing, the Evening News says the Kalamazoo street bridge broke from its moorings and floated away down the stream, where it lodged against the Michigan Ave. bridge, which was threatened to be also carried away.

INSTITUTE OF ACTUARIES OF GREAT BRITAIN.

The annual examinations of the Institute of Actuaries of Great Britain will be held in Toronto on the 15th and 16th of April this year. These examinations are yearly becoming more popular with Canadian students of life insurance, as is evidenced by the increasing number who present themselves from time to time. This year some 25 candidates will write. The examination papers are prepared by the examination committee of the Institute, in London, and the answers of the candidates are returned there for examination.

THREE BOARDS OF TRADE IN THE NORTHWEST.

The Regina Board of Trade, at its annual meeting last week, elected officers as follows: President, Mr. Mytton; vice-president, W. G. Pettingell; secretary, J. Kelso Hunter. The annual report, which was heard with satisfaction, referred to the growing importance of Regina, that place having become, it was stated, after Winnipeg, the chief objective point for immigration in the West. Local distributing freight rates had been granted, several headquarters for great agricultural houses were established there, and better rates for such goods were obtained from the C.P.R. to points west of Medicine Hat, through the Crow's Nest Pass and along the line of the Calgary and Edmonton Railway.

The Indian Head Board of Trade passed a resolution which reads a little queerly, thus: "That it is in the interest of the town of Indian Head that no member of the council of the town of Indian Head shall be eligible for election as an officer of the Board of Trade." Referring to what had been accomplished by the board in the past, it was stated that a joint meeting of the town council and the board had been arranged, with a view to inducing the Canada Northern Railway to construct a spur line from the main line to the town. Officers were elected for the ensuing year, as follows: President, J. A. MacCaul; vice-president, George Thompson; secretary, D. G. Mackay; treasurer, James Conn; council, Messrs. A. Walker, A. J. Jarvis, R. M.

HERALD BLOCK, CALGARY, N. W. T. | CORRESPONDENCE SOLICITED.

Napier, A. W. Sherwood, W. M. P. Starr and J. Sproat.

The Edmonton Board of Trade held its annual meeting recently and elected officers as follows: President, J. H. Morris; vice-president, A. B. Campbell; secretary-treasurer, (re-elected) F. F. Tims; council, John A. McDougall, F. F. Fisher, G. R. F. Kirkpatrick, J. H. Picard, E. C. Pardee, Charles May, T. W. Lines, J. B. Mercer, J. H. Gariepy, Thomas Bellamy, and A. C. Fraser. The president, in his annual address, referred to the rapid increase in the number of homestead entries in the Edmonton district. In 1899 it was 886, and in 1903, it had grown to 3,163. The Dominion Government was strongly urged to establish an experimental farm in the district at once. During the year the total amount of merchandise shipped from Edmonton was 1,474 cars, and the total received and shipped during the year was 26,371 tons. There is a great future before that Edmonton country. We cannot approve of the excessive prices that town real estate was forced to by speculative operations last fall; they were premature. But the great areas of arable and pasture lands around it ensure activity and future prosperity to the town.

TORONTO BOARD OF TRADE DINNER.

The dinner given at the National Club on Tuesday evening last by Mr. John F. Ellis, president of the Toronto Board of Trade, to some sixty members of the board and other guests, was a very enjoyable function, the menu simple, the proceedings pleasantly varied, and the sitting not prolonged. Considering that the president sprang surprises upon his guests by sending round the room about nine o'clock slips of paper notifying Mr. So-and-so to propose or respond to certain toasts, his requests were good-naturedly, and, as a rule, briefly obeyed. From the opening toast, "Imperial Unity," proposed by Mr. Hedley, responded to by Hon. G. E. Foster and Col. Denison, to the closing one, "The Mercantile and Manufacturing Interests," proposed by Mr. M. C. Ellis, responded to by Messrs. Birge, Blain, McNaught and Allan, a series of pithy and interesting five-minute speeches were made; and although no warning bells were rung, the good sense of the speakers seemed to prevent their being prolix. A fervid and admirable address was that of Professor McLennan, on the claims of the University. This was in response to the toast of "Our Educational Institutions," proposed by Mr. W. H. Beatty in the drollest speech of the evening.

INSURANCE INSTITUTE OF TORONTO.

The next meeting of the Insurance Institute of Toronto is to be held on the 8th of April, when a paper on "Under Average Lives" will be presented, which has been prepared by Mr. J. Burn, F.I.A., of the Prudential Insurance Company, London, England. Mr. Burn has recently read a paper before the Institute of Actuaries of Great Britain, on the subject of "Valuation of Patriotic War Funds;" he also contributed a paper at the recent Congress of Actuaries on the subject of "Rates of Interest." Mr. Burn is one of the rising young actuaries of the Old Land, and the subject which he has chosen for the paper to be delivered before the Insurance Institute of Toronto, will be of special interest to those who have to pass upon life risks, where extra hazard is involved.

The first examination of the Institute, under the new syllabus, will be held in the rooms of the Canadian Fire Underwriters' Association, commencing on the 25th of April. We learn that no less than 49 candidates have signified their intention to present themselves. Some 35 candidates are about to write on the first examination, which examination is the same for those engaged in fire and life insurance; 10 will write on the second fire insurance examination, and four on the second life insurance examination. Practically all the representative offices will be represented by students—the Royal Fire, Crown Life, Canada Life, Western, Imperial Life, Norwich Union Fire, British America Fire, etc. The large number of young men taking an interest in these examinations is a commendable feature in connection with insurance education.

THE FUR SALES.

The following gives the prices realized at the London fur sales between March 14th and 24th. We need add but little to what was said in our article in last issue, except to repeat the reminder that in comparing values, relative quality is an item which necessarily counts largely, and of this it is as yet too early to judge. The darker kinds of mink, for instance, may, perhaps, have declined still more heavily than indicated by the average named: Skunk, 12½ per cent. lower than last March; muskrat, spring, 10 per cent. lower than last January; muskrat, winter, 10 per cent. lower than last January; muskrat, fall and north-western, 25 per cent. lower than last January; muskrat, black, same as last January; opossum same as last March; mink, 15 per cent. lower than last March; raccoon, 25 per cent. lower than last March; fox, red, 5 per cent. lower than last March; fox grey, 25 per cent. lower than last March; fox white, 10 per cent. lower than last March; fox, cross, 27½ per cent. lower than last March; fox, blue, 40 per cent. lower than last March; fox, silver, 40 per cent. lower than last March; marten, 20 per cent. lower than last March; lynx, 50 per cent. lower than last March; otter, 15 per lower than last March; fisher, 35 per cent. lower than last March; wolverine, 35 per cent. lower than last March; sea otter, 40 per cent. lower than last March; bear, black, 40 per cent. lower than last March; bear, brown, 40 per cent. lower than last March; bear, grizzly, 40 per cent. lower than last March; badger, 25 per cent. lower than last March; cat, wild, same as last March; cat, house, same as last March; cat, civet, 10 per cent. higher than last March; beaver, 10 per cent. higher than January; wolf, 15 per cent. higher than last March; ermine, 30 per cent. higher than last March.

DOMINION MARINE ASSOCIATION.

The annual meeting of the Dominion Marine Association was held in Ottawa on Tuesday last, Mr. C. F. Gildersleeve in the chair, and in the presence of a large attendance of people interested. This association is now established on a permanent basis, and its membership represents over 100,000 net registered tons of shipping. Reference was made in the proceedings to what the Government have done in the interest of inland marine at the instance of the association since its formation a year ago. Canal tolls have been removed for two years, tonnage dues and inspection fees abolished, and the Government, instead of the transportation interests, now meet the expenditure incurred in the shape of payments for overtime for customs officers. Satisfactory arrangements have been made for bringing into operation "rules of the road" on inland waters west of Montreal, that would harmonize with rules in United States waters. The meeting adopted the report and expressed the opinion that Canadian canal tolls should be permanently abolished. The enlargement of the Welland Canal to a depth of 20 feet was approved by the meeting. A list of aids to navigation in the shape of lights and buoys in the St. Lawrence and the Lakes was endorsed and ordered to be forwarded to the Department of Marine. Officers were elected as follows: President, C. F.

AGAINST THE METRIC SYSTEM.

While we must confess to a failure on our own part to perceive any great strength in the arguments still used by responsible people against the adoption of the Metric System of Weights and Measures it is well to be acquainted with the fact that a body of persistent opposition thereto still exists. Some parties continue to think and say that we Britishers have the simplest system of weights and measures in the world, though it is a little difficult to trace wherein the "system" consists. It seems to us that the oppositionists are on safer ground when they confine themselves to the humorous side of the question of a change. Thus, a correspondent of the Iron Age pokes fun at the inconvenience which would accrue from the substitution of an array of French decimals for the neat terms now in use. The confusion of mind which fails to see the difference between a substitution of figures and a substitution of names is one which, on account of the joke, must not be deplored, we suppose. Here is his effusion, however, to speak for itself: "What Christian," he asks, "will care to refer to 'God's acre' as God's 40.147 ares, and what farmer will recognize his quarter section as 6.75 hectares? No one can contemplate so radical a change without a scruple (2.096 milligrams), though scientists may have a bushel (2.84 hectoliters) of fun in watching the peck (0.881 hectoliter) of trouble experienced by practical manufacturers. How are we to sing the song, 'From Weedletum to Waddletum is 18 Miles,' when the 18 miles become 2.89674 myriameters? The man who tries it will come within 2.84 centimeters (an inch) of his life. Upon the whole, it seems rather hard to be called upon to part with the hundreds of useful old phrases, saws and proverbs that employ the present system. The fact that 2.835 dekograms (one ounce) of prevention is worth 0.4536 kilogram of cure should give us pause before entering into further entanglements on to French roots."

—A few days ago a contract was awarded to Rhodes, Curry & Company, of Amherst, N.S., for the building of 100 box cars and 270 flat cars of thirty tons' capacity. The box cars are of the American standard. Dimensions, thirty-six feet long; eight feet six inches wide; eight feet in the "clear" inside. These cars are to be delivered by the 30th of June next.

ITALIAN VIEWPOINT.

"Why, see here, you've raised the price of your bananas again!"

"Yes, yes. Me raisa price. Too mucha war."

"What's the war got to do with it?"

"War raisa price. Raise price of bread. Raisa price of meat. Raisa price of banan'."

"Nonsense. Why should war raise the price of bananas?"

"War raisa price. Russia, man, Japa man, buy aplenty banan'. Eata banan', throw skin down so! Long come greata general step on banan' skin, whoof! He fall and breaka his head. All ze generals fall. Take much banan'. War raisa price."
—Cleveland Plain Dealer.

FOR VARIOUS ANTI-LEAGUES.

How many cigars do you smoke a day? enquired the meddler.

Three, patiently replied the youth.

How much do you pay for them?

Ten cents each.

Don't you know, sir, continued the sage, that if you save that money, by the time you are as old as I am you might own that big building on the corner?

Do you own it? asked the smoker.

No, I don't, replied the old man.

Well I do, said the young man.

—According to a Nova Scotia paper, New Glasgow was never so crowded as now. It is absolutely impossible to get a house. Sometimes families well circumstanced are compelled to live together in crowded apartments; the boarding, or lodging, houses are full, and numbers are turned away.

—A St. Paul woman once sent her German servant girl to the drug store to get a box of talcum powder. "I vant a box mit dalcum bowder," said she to the clerk. "Will you have Mennen's?" he asked. "Nein, I vant vimmens," she replied. "Do you want it sealed?" "Nein, I think I take it with me!"—St. Paul News.

A NEEDED WORK IN FIRE UNDERWRITING.

Reviewing the fire insurance business of last year in the United States, as exhibited in the official report of the Connecticut Insurance Department, the Monitor says: "Virtually all the increased resources [of 124 companies] during the last three years have been absorbed in this one conflagration at Baltimore, and the companies are back where they were in 1900." That is to say, that while there was a gain in assets and surplus of between ten and eleven millions of dollars as the result of the business of last year, the twenty-eight millions of loss at Baltimore absorbs the gain in surplus three times over. It is high time, therefore, for the underwriters to look about them for a cure of rate demoralization and for such modification of conditions as will allow reserves to be built up adequate to cover conflagration hazard.

That they have begun to do so in earnest is plain from the formation by the National Board of the United States of a committee of twenty of their most experienced and capable men to study fire dangers in the congested districts of American cities. Doubtless, too, the subject formed part of the deliberations of the Canadian Fire Underwriters' Association at their meeting in Toronto this week. A sub-committee of seven has been appointed by this committee of the National Board, composed as follows: Chairman, Henry Evans. of the Continental; C. F. Shallcross, of the Royal; R. M. Bissell, of the Hartford; E. G. Richards, of the North British and Mercantile; Edward Milligan, of the Phœnix of Hartford; George B. Edwards, of the Germania Insurance Company; and E. C. Irvin, of the Fire Association. And their work has been allotted as follows [we condense]: To define the boundaries of congested districts in the cities, and to determine the relative danger of conflagration in such cities by reason of defective fire department, water supply, or building construction. They shall prepare a schedule for such districts, making uniform charges for area, height of buildings, vertical openings through floors and roof, open stairways, wood sheathing, electrical equipment, as well as making liberal and uniform allowance for automatic sprinklers and other fire-extinguishing facilities. The sub-committee is authorized to employ such assistants as may be needed for the prompt discharge of these duties, and they are to report progress from time to time.

Mr. Evans, the chairman, submits a list of some forty conflagrations in the United States and Canada in the last seventy years, the total loss by which foots up to $519,000,000, and the 1877 fire at Saint John, which consumed $15,000,000 worth of property, has not been included. Contending that the labors of this committee of underwriters is distinctly in the interest of the public, Mr. Evans says:

> When the proposed schedule is applied in the various cities, it will be found that the well built structure will be given a low rate, while the poor one from a fire standpoint will be penalized to an extent that will force improvement and so lessen the sweeping fire danger. In short, the schedule will act as a well conceived and enforced building law would.
>
> . . . . . .
>
> We fire underwriters often wonder that men in public life seem to overlook the fact that the fire waste in the United States would in time impoverish a less prosperous country. The destruction of actual values amounts to over $160,000,000 a year, and occasionally we have a great conflagration, like the one in Baltimore, that paralyzes some city and strikes a blow at our immediate progress as a nation that is hardly realized. The papers announce that the property is fully insured, and the public feel that they are "getting square" with the insurance companies, not realizing that those companies are merely tax collecting organizations, which take from the many prosperous and pay to the few unfortunates, and that property burned means so much national wealth wiped out.
>
> If the fire losses were necessary, it would be one thing; but they are not, and a big percentage of the fire loss could be prevented by the enactment of proper building laws, not merely applying to the cities, but State laws calling for safe construction even in country districts.

He goes further, and urges fire marshal laws in the different States interdicting the payment of any loss by an insurance company until the origin of the fire had been passed upon by State authorities. Also, that it be a part of the duty of the new Department of Commerce and Labor to work with the underwriters to analyze the causes of fires, and if not to eradicate existing hazards, to prevent, at any rate, their being repeated in other places. It is important to observe that this is not primarily a rate-raising or a rate-making committee, nor has it any features of a combine. Its aim is to lessen fire waste by improving physical conditions, to encourage the business man or the householder who will take precautions against fire, and to penalize the manufacturer or the merchant who permits his premises to become or to remain a menace to his neighbors. Incidentally, this important body will investigate the real status of sky-scraping tall buildings,

"fire-proof," so called, with a view to determining whether they hinder or help a conflagration. There is some evidence in the disaster at Baltimore, indeed, that, to use the words of a prominent Hartford underwriter: "It had been believed that these fire-proof buildings would be 'fire-stops' in the event of a conflagration, but we have learned that they feed a fire instead of stopping it."

CANADIAN BANKING PROFITS.

In the year just past the directors of the Canadian banks have had to dispose of the large sum of $16,190,400 in profits, brought forward and earned, and in premiums on issues of new capital. From the statement which follows it can be seen exactly what disposition has been made of these profits. The $5,099,376 premium on new stock, has been considered, rightly enough, as a sort of windfall, and has been transferred bodily, along with some $2,500,000 of the ordinary profits, to reserve fund. The earnings of $9,503,037 are at the rate of 12.32 per cent. on the $77,095,000 paid capital of these twenty-eight banks mentioned in the table. Apart altogether from the question whether the banks can earn and pay their present dividends on their increased stock, it is a matter for congratulation to bank depositors and to the general public that a considerable part of the increase in bank loans has been made possible through the contributions of bank shareholders, either by purchases of new stock or through the action of the directors in re-investing a portion of the current earnings; by crediting the reserve fund instead of paying dividends. The average dividend of Canadian banks for the year has been about 7.1-3 per cent.

A bank makes its loans by using the funds which it gets partly from its proprietors and partly from its creditors. It is manifest that the larger the proportion contributed by its proprietors the stronger is the bank's position in relation to its borrowers. We can readily conceive that if a bank does a very large business on depositors' money that it might be forced to reduce its loans materially if deposits should fall off; while, on the other hand, if it trades on its own capital this eventuality is not nearly so likely. Therefore, the numerous additions to bank capital are to be welcomed as strengthening the general financial situation, and as affording greater security to bank depositors and to bank note holders. The question of dividends will depend largely on the country's trade conditions; if remunerative employment can be found by bankers for their funds, and if mercantile failures are few, no doubt profits will continue to be large; if the reverse is the case, profits will decline.

The statement on this page comprises all the banks in Canada except four, whose figures are not available. As they are small and relatively unimportant their figures would not affect the general result. The table does not, of course, give a true representation of the business of the calendar year 1903, as the banking years of different institutions end on different dates scattered throughout the year.

The practice of the banks in the matter of writing down premiums, etc., is not uniform; some make their appropriations before profits are declared, others afterwards. For instance, the Bank of Montreal shows no sign of the expenditure on the head office building (premises account remains unchanged at $600,000), though this was very considerable, and must have been met either from a fund accumulated for the purpose or from current earnings, or from both.

CANADIAN BANKS—DISPOSITION OF PROFITS, 1903.

Banks.	Profit and Loss Balance brought in.	Earnings 1903.	Premiums on New stock.	Total,	Paid in Dividends.	Added to Reserve Fund.	Written off Business, Depreciation etc.	Contributions, Pensions, etc.	Profit and Loss Balance carried out.	Total.

Figures for Bank of British North America subject to correction as they are taken from cabled report.

It would have been interesting to know, also, what amounts were appropriated to meet the fall in securities. The Bank of British North America, according to the cabled report, appropriated £9,000 for that purpose; the Union Bank of Halifax announces an appropriation of $25,000. The others must, we assume, have met this charge before profits were declared.

The contributions to pension fund, etc., aggregated quite a respectable amount. No doubt the actual figures would be greater than the $115,577 shown, on account of some banks not making known their contributions to these most desirable funds.

Quite a substantial addition is made to the Profit and Loss balance carried forward; bringing in $1,587,987, the banks carried out over two millions. This balance is, of course, a reserve. It is much more accessible than the Reserve Fund. Unexpected losses can be met from the Profit and Loss balance without advertisement. For the expected or the half-expected losses there would be, in all well-managed banks, the Contingent Fund, accumulated out of past earnings. About this there is no information in prosperous times.

THE GOOD ROADS MOVEMENT.

The efforts made by various public-spirited persons to educate the people of Canada as to the value of improved country roads still continue, though it must be confessed that great success seems slow in coming. Considering all the circumstances of the case, however, the conservatism, to put it mildly, of rural communities, and so forth, this is, perhaps, not to be wondered at. The Good Roads Association for Eastern Ontario held its third annual session at Ottawa on the 18th ult. Mr. R. Cummings, the president, was in the chair. He congratulated the society on the fact that more townships in eastern counties had commuted statute labor than ever before, and the commutation system was, he said, giving general satisfaction. A second evidence of progress was found in the increased use of concrete culverts. Lanark county ratepayers had voted $100,000 for a leading system of country roads. Mr. A. W. Campbell, C.E., Deputy Minister of Public Works for Ontario, gave some good advice at the meeting, the gist of which was that those having direction of the work of road-building should concentrate forces, systematize labor, so that every dollar spent on bridges, culverts and roads would return its full value. Ratepayers should not waste too much effort in getting others to pay for work which they ought to provide for themselves. Half the money spent on roads and bridges was wasted, he declared, on patchwork and repairs.

Last week, namely on the 24th ult., similar educative work was being carried on at the eastern end of the Dominion through the meeting of the Nova Scotia Good Roads Association in Truro. Great interest was taken in the convention. A motion recommending the abolition of statute labor and the adoption of direct taxation met with prolonged discussion, but finally passed in the shape of a decision to appoint a representative before the municipal councils at their first session to urge those views. The election of officers resulted as follows: President, Alex. McNeil (re-elected); vice-president, J. Livingstone, with other vice-presidents for the various counties; secretary-treasurer, Mr. Allen.

LIVE STOCK MARKET.

Trading at the Toronto cattle market has been distinctly slow of late. For one thing, it has been affected, of course, by the extraordinary difficulties in shipping this winter, but it does not appear to have become much brisker even with the improved conditions in that respect. The weakness of the market affects exporters chiefly, for though offerings have been on the scanty side, sales were made by no means rapidly. With butchers' cattle, the demand about keeps pace with receipts. Stockers and feeders continue to be asked for in fair quantities, and prices are about steady. Good milch cows, as usual, meet with a ready response. Calves are firmer. The prospects for a good turn-over in sheep and lambs are bright. The market has a good tone. Small ewes for export are wanted, and the tendency of prices is higher. The following represents the approximate range of prices:

Export cattle, ex.-choice	$4 60	to	$4 75
do. choice	4 40	to	4 60
do. others	4 00	to	4 25
do. cows	3 50	to	4 00
Butchers' picked lots	4 60	to	4 80
do. good	4 25	to	4 60
do. fair to good	3 50	to	3 75
do. rough to common	1 50	to	3 00
Good cows	2 75	to	3 00
do. rough	1 75	to	2 25
Bulls, export, heavy	3 50	to	3 80
do. medium	3 00	to	3 40
do. light	2 75	to	3 00
Stockers	3 30	to	3 50
do. light	3 00	to	3 25
do. common	2 40	to	2 75
Light bulls	1 75	to	2 50
Short-keeps	4 00	to	4 50
Feeders, good	3 75	to	4 00
do. medium	3 40	to	3 65
do. bulls	2 50	to	3 00
do. common and rough	2 00	to	2 50
Milch cows, each	30 00	to	65 00
Export ewes, per cwt.	3 75	to	4 25
do. light	4 25	to	4 75
do. bucks, per cwt.	3 50	to	4 00
Culls	3 50	to	4 00
Lambs (grain-fed), cwt.	5 50	to	6 05
do. barnyard	4 50	to	5 50
do. spring, each	2 50	to	7 00
Calves, per lb.	4½	to	6
do. each	2 00	to	12 00
Hogs, selects, per cwt.	4 75	to	0 00
do. fat, per cwt.	4 50	to	0 00
do. light, per cwt.	4 50	to	0 00

In Montreal prices appear to be better and the market somewhat brisker. Easter cattle are selling at 5¼ to 5⅜c. per pound, and some of the best at 5½c. Common stock, however, has been selling as low as 2¾ to 3½c. Sheep sell at 3¼ to 4¼c. per pound, spring lambs at 5¼ to 5½c.

According to latest reports from the Old Country, Canadian cattle in London showed a declining tendency, while for sheep and lambs the market was strong. In Liverpool, on the other hand, cattle were stronger and prices had advanced ¼ to ½c. per pound. In Chicago the business of exporting live stock seems to have retained its activity much better than in this country. Exports were last week very heavy, although the significant admission is made that shippers were losing money on all that were sent.

The executive of the Canadian Manufacturers' Association have decided to pay salaries to their corresponding agents in important foreign markets.

VANCOUVER ACTIVE.

Recent letters from Vancouver contain information about the activity and growth of that city. Much is being done in the way of improving the streets. A by-law is about to be passed for the laying of cement side-walks on a dozen or more streets at a cost of $41,000, a frontage tax to be levied for the same. Grading of several streets is in progress. Block paving is about being put down, too, notably on Pender street, where 70-pound grooved rails for the street railway have been insisted upon by the Board of Works. A committee of the Board of Trade has been appointed to join with the City Council in discussing the improvement of False Creek. Drains and water mains are also receiving attention in various parts of the city.

Construction of buildings, especially of dwellings, is active. Up to the middle of March the building permits issued totalled $270,000, namely, in January, $85,000; in February, $137,000; first half March, $48,000. The building inspector is of opinion that the present year will see two millions of dollars expended in buildings in Vancouver, the bulk of it on residences, which are in most active demand, the amount so spent in 1903 having been $1,500,000. There are water-front improvements to be gone on with, too, which will mean the expenditure of a very considerable sum. We learn, by the way, that the finance committee has refused, probably wisely, to recommend the council to submit to the citizens a by-law to give $100,000 in bonds towards the construction of a dry dock, which a firm is promoting.

A very decided new sensation was felt by residents of Victoria on March 16th in an earthquake shock. It was not, of course, the first earth-tremor that Victoria has felt, but it was a severely startling one, sufficient not only to stop clocks but to shake down crockery from shelves and bricks from chimneys. Even chairs were felt to move by their occupants in hotels.

MONTREAL LETTER.

I might give you a Board of Trade budget this week that would prove interesting, for we have had some very satisfactory reminders of the visit to Canada of the British Chambers of Commerce in August last. The Chambers of the United Kingdom have sent thanks to the council of our board for lantern slides of Canadian scenery forwarded; these slides being used in lectures in England to let the people understand the beauties and wonders of Canada as the delegates saw them. Lectures on Canada have begun in London itself. A week or two ago Mr. Griffiths, secretary of the Canadian Government office there, delivered an address on Western Canada's development, under the auspices of the Chamber of Commerce. And following him, J. G. Colmer, C.M.G., was to lecture last week on "To-day's Canadian Problems," before the Royal Colonial Institute.

Our Board of Trade delegates have had a flattering reception on the other side of the Atlantic. They were lunched at Liverpool by Sir Alfred Jones, who, in toasting the visitors, advocated "reciprocal commercial arrangements." The visitors replied, Mr. Hodgson stating that the underwriters of England had been invited to come out and see for themselves what had been done to make the St. Lawrence River and Gulf perfectly safe for navigation by night and day. It is the underwriters' turn now to come out. We have had deputations of nearly every other kind of folk.

A still greater honor was in store, however, for Messrs. Drummond, Hodgson and Ames, in the banquet of next day, March 24th, when the London Chamber banquetted these three delegates from the Montreal Board. About 220 persons were present, Lord Brassey in the chair. The terms in which the chairman acknowledged the pleasures of their visit to Canada, and the kindness they had everywhere received, could not have been warmer. He said that their trip over the continent to see Canadian resources proved that every man has a chance in Canada, that farming pays out here, and the country had boomed as no other in the world. "Canadian sheaves were destined to play a great part in the bonds of the Empire."

The delegates to Canada had subscribed for services of plate and addresses to various Montreal people and Canadian institutions. A magnificent silver inkstand was given to the Montreal Board of Trade by the London Chamber, and an illuminated address by the Edinburgh Chamber. A silver barometer and illuminated address to the French Chamber of Commerce; silver bowls to Messrs. Hodgson and Ames, as souvenirs of courteous services at the congress; addresses to the Canadian Pacific Railway and Grand Trunk Railway for their hospitality of special trains, and a clock to Mr. George Hadrill in his dual capacity as secretary of the Board of Trade and the Canadian committee. These were presented by the chairman amid the enthusiastic cheers of the assembled company. It is a pity that Mr. Hadrill could not be present, for he did excellent service here. The one curious thing in connection with the gathering, at which Baron Alverstone, Sir Rivers Wilson, Lord Strathcona, Admiral Hopkins, General Laurie, Sir William Holland, and dozens of other swells attended, is that not one of the London papers printed a line of the guests' speeches.

The Montreal men spoke very creditably, Mr. George E. Drummond, president of our Board of Trade, made a feeling address. He referred to the fiscal question, to the increasing business done in Canada by United States and German manufacturers, much of which Britain might do, and hoped that the Mother Country would in some way, by a royal commission or other means, settle the Empire question before it was too late. He presented the London Chamber, as a souvenir from the Montreal Board, with a beautiful frame holding the gold, silver and bronze medals commemorative of the visit to the Montreal Congress. Alderman Ames in his speech declared that Canadians were true Britons. They objected to their country being Americanized. To-day, he said, all eyes in Canada are turned eastward, instead of to the south. They felt they were able to feed the Empire. Mr. Hodgson made a strong point in the assertion of his belief that there is a likelihood of the Imperial tie between the Mother Country and colonies being more effected by meetings of commercial bodies than by political parties. Canadians did not dictate to England what to do, he said, and whether the Motherland gave a preference or not, would not affect our loyalty. It was a memorable and inspiring gathering.

Montreal, 28th March, 1904. BRITON.

COMMERCIAL TRAVELLING ON A LARGE SCALE.

Some attention deserves to be paid the project, to be carried out in May and succeeding months, of an expansive advertising scheme by British manufacturers and merchants, particulars of which are this week to hand. The steamship "Lake Megantic," formerly of the Beaver Line, is being fitted up as a huge commercial traveller's sample trunk, intended to display to the world the products and manufactures of the United Kingdom. It is stated that not fewer than 150 trades and industries will be represented by samples in this immense floating show case. Between decks the "Lake Megantic" will be cleared of all cabins and store-rooms, and here will be the main exhibits, stretching practically the whole length of the vessel. The after-saloon of the main deck and part of the lower deck will also be utilized, the latter for the heavier exhibits, such as machinery, etc. There are to be more than two hundred trade representatives on board the vessel, and each exhibitor is to have a fixed amount of space. This unusual business venture is intended to promote, first, inter-imperial commerce; second, the personal introduction of the seller to the buyer; third, to provide a means by which British manufacturers can investigate the peculiar conditions and requirements of individual markets; fourth, the advertisement of British industries by bringing to foreign and colonial ports a representative exhibition of British manufactured articles. The projectors of this trip intend not only to show their own goods, but to look at Canadian manufactures, to hear our opinion of their goods and to study the requirements of the Canadian and other markets.

This large-scaled tour will include all the countries where British interests are large. After her first exhibition in Lon-

don, the steamer will on April 27th say farewell and begin her voyage. The first place to call is to be Halifax, from whence she is routed for St. John's, Nfld., and then visit Quebec and Montreal, and probably some other Canadian ports.

From Canada she will sail through the West Indian Islands on to South Africa. From Durban she will proceed to Bombay, via Mauritius, and thence to Colombo, Madras, Calcutta, and Rangoon. Passing Penang, the huge commercial traveller will steam through the Straits of Malacca, touching at Singapore; on to Hong Kong, Shanghai, Nagasaki, and Yokohama. From Japan the "Lake Megantic" is intended to make a long run south through the Pacific, reaching in succession Brisbane, Sidney, Melbourne, Hobart and Wellington. Then she will strike across to South America, and, rounding Cape Horn, call at Buenos Ayres and Montevideo, Rio Janeiro. Crossing to West Africa, Sierra Leone will be visited, after which she will return to her starting point.

So thorough-going an enterprise as this makes it manifest that, however satisfied the *laissez-faire* statesmen of the free trade school of England may be that British trade is in no danger of losing its preponderance in world markets, the business men of the British Islands are not content to believe that their interests are in no jeopardy from foreign competition, but are resolved to see for themselves. And an eminently sensible part of the programme above-stated is that which mentions the resolve of these 200 agents to learn the opinion of Canadian and other markets as to British-made goods and to ascertain on the spot the character of merchandise "made in Canada." The usual complacent attitude of the British salesman, which has been to say: "These are the goods we have been making for sixty years, they are just what what you need," will in this instance give place to the more modest and sensible attitude of: "Messieurs Canadians, Australians, South Americans, Africans, we are here to take orders for *goods such as you want*. If these patterns or styles do not suit you, we will adapt them to your wishes, just as the Americans and the Germans have been doing for years."

BOBCAYGEON.

In the wonderful lake district of Victoria county, on Sturgeon Lake, is the pleasant village of Fenelon Falls. It is on or near the too-little-known Trent Canal and derives some reflected celebrity, perhaps, from being quite close to Coboconk, the alleged seat of a rural university, which by repute claims such distinguished alumni as Jimuel Briggs, Ph.D., and the only Bro. Smiff, of the Bobcaygeon Independent. Fenelon Falls also is close at hand, being about as far to the westward as Coboconk is to the north. They are very real falls, those of the Fenelon river, and afford good water power, which has been taken advantage of by sawmills, flouring mills, and various factories. Bobcaygeon has for years been near a railway, but yet far enough away to just miss being connected by rail. This, however, it is expected will be cured by mid-summer. It is a pretty spot, or at least has pretty surroundings, and ought to become quite a summer resort when the railway touches it. For boating and fishing it has great attractions.

A recent letter from Bobcaygeon contains a story which seems to us good enough to print. It concerns and is told at the expense of two commercial travellers from Toronto. "After doing their business these two worthies decided to return about 6.30 p.m. to Fenelon Falls, but found that their driver had not had supper, whereat they abused him roundly for causing them delay. Thompson, the hotel keeper of the Rockland House, is a wag of the first water, and, seeing a chance of some fun, informed the travellers that the driver (Smith by name) was one of the real bad men in the township, who would think little of holding anyone up and doing him bodily harm. The travellers were quite alarmed, and started on a hunt around for revolvers and clubs for purposes of defence; and to their further dismay the hardware store did not handle such dangerous weapons, and they could get nothing but a heavy oak club. They started away about 7.30, one of the travellers driving and the other watching Smith in the back seat, ready with his club to brain the poor innocent man should he make a move. Have not heard of them since, nor have I seen the story in any paper. But if "mine host" Thompson did not give it away to Fenelon Falls folk it would be queer."

GRIEVOUSLY INSOLVENT.

Any merchant who has made a bad debt knows how it feels. There is sometimes in his mind a sense of self-reproach for having sold the insolvent at all; sometimes a strong feeling of resentment against the commercial traveller or the mercantile agency who recommended him; and in other cases there is sympathy with the man, who seemed such a decent fellow, and must have had hard luck. If his estate pays fifty or seventy-five per cent. of what it owes, there is no great bitterness felt, but if it comes down to twenty-five or fifteen per cent. language is prone to be used by creditors which is not becoming.

The other day, a friend sent us the assignee's statement of an estate which pays two and three-quarter cents in the dollar, no more and no less. He is a good-natured man, this friend, and does not stain his letter-paper with any profanity, but merely calls to our notice the salient and provoking fact that the estate's receipts were $257.16, while the inspectors, assignee, lawyers, etc., took $210 out of that amount, leaving the magnificent sum of $47 to go to the creditors. There were in this case twenty-one creditors, for $1,715 in all, the largest claim being for $450. All that the assets realized was $257, namely, $134 from sale of the stock at 25 cents in the dollar, and $123 from book accounts and bills receivable. Out of this small sum $50 went to two inspectors; $50 to the assignee; $54.80 to cover legal expenses; the remainder to pay taxes, insurance, horse-keep, stock-taking, etc., etc. There remained the petty sum of $47.17 to pay dividend with. The $450 creditor gets something over $12 of this, and a $25 creditor receives 70 cents.

This estate was that of A. Kerr & Son, of Arnprior, implement agents and dealers in hardware and harness. Let us hope to hear, if the firm resumes business, that same five years hence they have paid their creditors of 1903 the 97¼ cents in the dollar, which their estate is at present unable to pay. But we ought to have remarked earlier that this is described by the assignee as "the first dividend." No statement is made, however, of further assets, so that one is left to infer that the present will be the first and final dividend unless prosperity overtakes the insolvents and the spirit moves them to pay their just debts.

BANK OF BRITISH NORTH AMERICA.

It is to be remarked, with respect to the figures and proceedings of the British Bank last month, that while the meeting of 8th March was an annual meeting, the balance sheet and profit and loss statement then submitted were for the December half-year only. Mr. Cater was in the chair at the meeting, and made a minute analysis of the directors' report in which we need hardly follow him. We remark, however, that the reserve has been increased to £400,000; that the holding of consols ($225,000) has been written down to 86, which step takes £9,000 out of the profits; and that additions to the officers' pension fund and their widows' and orphans' fund have not been forgotten. A paragraph is devoted to the bank's agencies and premises in Canada. Some of the buildings had become inadequate for the business of the present day, and were modernized, the Toronto office notably, as our readers have learned. In Winnipeg and in Ottawa new buildings are provided. And it is satisfactory to learn that an independent valuation of all the bank's properties resulted in the actual value considerably exceeding the amount at which they stand in its books.

The net profit for the December half-year was smaller by some seventeen thousand pounds than in 1902, due mainly to the lower rates of interest on loans prevailing in New York. But the additions which have been made, after divi-

dend, to reserve and to the bank's various funds mentioned above, manifest an earning power that ought to be regarded as fairly satisfactory, especially as Old Country shareholders, which the bank's list mainly consists of, are less greedy for dividend than Canadian shareholders are. The totals of the bank's balance sheet, £8,287,907—practically $41,400,000—and its figures of $11,500,000 in cash at call and short notice, with current accounts and loans to the extent of $26,000,000 sufficiently attest the extent of its business in Canada, the United States and London. In the course of his remarks on the trade of Canada in 1903, the chairman quoted a variety of interesting statistics of agriculture, lumbering, fishing and mining. Nor did he omit to emphasize the winter of 1903-04 as the worst in sixty years, with snowfall unprecedented in the memory of "the oldest inhabitant" of southern Ontario at least. We shall lay no further stress upon this, lest our winter climate suffer still further in the estimation of the good folk of the United Kingdom.

BANKING AND FINANCIAL ITEMS.

It was stated by the chairman at the annual meeting of the Bank of British North America, in London, last month, that the number of that bank's staff in Canada is 224 and in London office 24, making a total of 248. The number of its branch and sub-branches is now 34.

There are nearly a thousand trust companies in the United States. The Bankers' Magazine gives a list made in August last year, which shows 912 at that time. There are five in Michigan, 19 in Vermont, 35 in Massachusetts, 37 in Illinois, 56 in New Jersey, 78 in New York, and the extraordinary number of 210 in Pennsylvania.

The derangement of business which has ensued during some March and February weeks this exceptionally cold winter by reason of the blockading of the railways by snow is illustrated by what a banker told on Tuesday last. He had occasion to send a letter of instruction from Toronto to a branch of his bank at Kincardine. The letter was written on 27th February, but never reached Kincardine till 18th March.

We hear from Montreal of the following changes among the staff of the Eastern Townships Bank: Mr. F. W. White, of the head office, has been made manager at the branch of the bank at Magog. Mr. W. E. Stone, of the Granby branch, goes to Sutton as manager, and Mr. R. P. Buzzell, manager at the latter place, is transferred to Bedford. Mr. J. H. Doak, accountant in the Coaticook branch, has been appointed manager of the branch at Farnham, and Mr. Boright, of the Cowansville branch, takes the late Mr. Forest's place at West Shefford, as acting manager.

Readers of Kipling's wonderful story of "Kim" will remember the Indian horse trader, Mahbub Ali, who on one occasion, when sending the little Kimball O'Hara on an errand to certain of his retainers at Umballa, sealed the authority of a verbal message which Kim was to deliver by giving him a curious sign-manual, thus: "Mahbub felt in his bosom, wetted his thumb on a cake of Chinese ink, and dabbed the impression on a piece of soft native paper. From Balkh to Bombay men know that rough-ridged print, with the old scar running diagonally across it." The New York Press, describing the feebleness of the well known American economist, Edward Atkinson, now aged 70, says that he can no longer write with a pen, but uses a rubber stamp in signing his name. This is done even on checks of small or large amount. As such a signature is not legal, Mr. Atkinson renders it so by attesting it according to the Bertillon system. He inks the ball of his thumb on a pad and leaves the imprint on the check, as much as to say: "Edward Atkinson, his thumb." Bank cashiers in Boston and elsewhere have become familiar with the hair lines of the Atkinsonian thumb, and a piece of paper bearing it is as good as legal tender. Why, asks the Press, should not all banks and trust companies adopt this system? If every one who draws a check were to attest his signature by means of the thumb mark, forgeries would be few and far between.

Mr. Henry W. Cannon, for many years president of the Chase National Bank, has resigned that position, and has been succeeded by A. B. Hepburn, formerly vice-president. Albert H. Wiggin, vice-president of the National Park Bank, succeeds Mr. Hepburn, as vice-president of the Chase National. Mr. Cannon desired to be relieved of the active management of the bank, owing to length of service and impaired health. He will hereafter be chairman of the board of directors.

A subscriber on the American frontier calls attention to the fact that last week's bank clearings at seven out of nine United States principal cities show declines, as compared with 1903, and only two show increases—these being Boston and St. Louis. The decline at New York is stated at 9.7 per cent.; at Chicago, 1.6 per cent.; at Philadelphia, 3.9 per cent.; at Pittsburg, 36.9 per cent. (owing, doubtless, to the shutting down of iron and steel works), and San Francisco, 4½ per cent. He asks how Canadian bank-clearing houses are showing, thus far this month. We reply that the aggregate of eleven clearing houses in the Dominion was as under, showing a decline of 9.7 per cent. in the last twelve weeks:

Week Ended	1904.	1903.
January 7th	$52,413,870	$64,071,380
January 14th	51,483,880	52,451,844
January 21st	48,499,780	48,896,934
January 28th	41,238,203	45,766,864
February 4th	43,382,076	47,567,635
February 11th	43,701,057	45,679,499
February 18th	40,089,028	46,135,583
February 25th	42,617,612	40,714,265
March 3rd	44,365,693	47,472,938
March 10th	44,879,446	54,349,814
March 17th	41,340,284	53,420,612
March 24th	45,670,276	50,859,271
Total	$539,681,205	$597,686,639

Mr. Wood, the president of the bank, in a paper on the folly of stock speculation, and the influence that a banker can sometimes exert, relates that it is a rule in the Bowery Savings Bank, whenever any of its depositors are supposed to be drawing money to invest in stocks to ask them respectfully if they would be willing to go back in the office and see the president. With but a single exception, such an invitation has been cheerfully accepted, and in a great majority of the cases the depositor has been made to see the very great risk he or she was taking, especially those who are contemplating buying on a margin, and they have abandoned their intention and left their savings in the bank, leaving with thanks for the kind and unexpected interest taken in their personal affairs.

NOTES FROM THE KOOTENAY AND CROW'S NEST.

The Hunter V. mine continues to send 45 tons of ore per day to the Hall Mines smelter, at Nelson. The auxiliary tramway is completed and a hoist, drill and boiler installed and before long the shipments from the mine will be increased.

The coal miners of Fernie, Michel and Morrissey for some time past have been considering the establishment of a co-operative store. Some time since a committee was appointed by the miners, and have reported a feasible plan. The main store will be located at Fernie, with a branch at Morrissey.

Speaking of the strike of copper ore made on Vancouver Island, a Victoria despatch of 17th says it is at Oyster Harbor, just north of the town of Ladysmith, quite close to the Tyee Copper Co.'s smelter. Robert Herd, a prospector, discovered it. The news of the strike has caused much excitement in Vancouver Island mining circles. Samples treated at Victoria are said to yield $80 a ton in copper, $3 in gold, and $1.50 in silver. James Dunsmuir, owner of the E. & N. Railway, and Clermont Livingston, general manager of the Tyee Copper Co., have gone up to examine the property with a view to purchase.

The Union Bank has let a contract for a new $15,000 building fifty feet square. The bank will consist of three stories and a basement and will be in every way a modern building. The first flat will be equipped with the best of office fittings, vaults and fixtures. The second and third flats will be arranged for a manager's residence. The building will be heated with steam and lighted with electricity.

A special from Camborne, B.C., to the Nelson News of March 19th says that the Oyster-Criterion mill sent to the refinery at Helena, Montana, in February, $5,200 worth of gold ore, representing $5.20 per ton. It is said that Camborne needs a chartered bank, for "at present the two mining companies operating here pay out about $8,000 per month in wages, besides store bills, etc., by check. To this must be added other enterprises centred in this vicinity."

We hear that the C.P.R. has supplied the Payne Mining Company with three cars for the first shipment of zinc concentrates to Antwerp, Belgium, and the zinc is now being loaded on the cars. The ore will go over the Crow line to the east and on down to St. John, N.B., where it will be placed on shipboard for England, as the first of a series of shipments which will supply Antwerp with 3,000 tons. A Colorado firm has also been making enquiry about this Slocan zinc ore.

A good deal that is of interest has been happening at Rossland lately. In the first place, the serious illness of Mr. Parrish, manager of the Le Roi mine, called forth general sympathy, for people in that district recognize they owe a large part of its present prosperity to him. It was he, we understand, who abandoned the old exploration work and directed all energies towards the working of the foot wall side of the vein, with the result that more and better grade ore was brought into sight than had ever been the case previously. Last week, for the first time, the skips were dropped to the 1,350-foot level of the workings, and one is now being hoisted from that depth. This is worth noting, because this hoist is said to be the largest in Canada. We note that the "Josie" mine promises rich prospects, the 600-foot level now yielding remarkably rich ore, considering the low-grade nature of that which usually prevails at this camp. A third lens was recently opened up.

In Nelson, attention is still absorbed in the doings of the Lead Miners' Association. Marketing of the zinc, which only became a practical object recently, seems to have been satisfactorily arranged by the decision of Belgium capitalists to erect a concentrating plant on Slocan Lake and a smelting plant at Fernie. And now the Association has passed a resolution, though in spite of considerable opposition, to ask the Dominion Government to appropriate a portion of the bounty of $500,000 per annum to export lead ores, provided such exportation does not lead to a limitation of the requirements for British Columbia smelters. It is said that if this course of bonusing exports be adopted, the St. Eugene mine, which has ceased operations ever since the American Smelting and Refining Company stopped purchasing ores from Canada will start up again and produce 30,000 tons per year, giving half to the British Columbia smelters and exporting the other. On the other hand, the opposition to such a plan, which it is claimed would unduly benefit a single firm, continues very strong.

FIRE INSURANCE ITEMS.

The insurance companies are preparing to resist the losses at Springfield, Ohio, caused by the recent riots growing out of the negro troubles and lynching. The losses amount to $11,500.

About the middle of April, the office of Messrs. Wood & Kirkpatrick, agents for the Aetna Fire Office, of Hartford, will be removed from Scott street to the new building of the Sun Fire Office, 15 Wellington St. East, Toronto.

The Canadian Fire Underwriters' Association held a session in the rooms of the Toronto Insurance Institute on Tuesday and Wednesday of this week. Following this the Toronto Board of Fire Underwriters held its meeting.

The sudden death of Eugene Cary, western manager of the German-American Insurance Company, of New York, has caused grief to many in Chicago, where he had lived for thirty years, and in other cities, where he was known and loved. He was a man of wide experience and great ability, successful as an underwriter, admired as a wise business man, and respected for his high-mindedness and public spirit.

The Baltimore fire has one distinction among the great conflagrations of the world—in no other instance has the conflagration hazard been studied by so many able men. The Baltimore burnt district has been overrun with architects, civil engineers, college professors, college students, fire chiefs and many kinds of public officials, as well as by an innumerable throng of insurance engineers. Public interest in fire prevention and the progress of the new science of insurance engineering could not be emphasized more impressively.—Insurance Press.

One of the results of the war in the Far East is the interest it has created in the work of ice-breaking steamers. For example, there is the Russian vessel "Ermak," built at Newcastle, Eng., for the purpose of keeping open the Russian ports of Reval and Cronstadt. On her trial trip, the "Ermak" is said to have forced a channel through ice eight feet thick, a distance of 200 miles at the rate of five miles per hour. Some people interested in navigation on Lake Superior are pointing to the above as an illustration of what should be done on North American lakes, where the ice is seldom thicker than three feet. A small shipping tax might be levied, it is suggested, to pay the expenses of such a breaker, which would prolong the season of navigation by some weeks, and this tax would come to much less than the storage dues and insurance premiums which under present conditions have to be paid on grain held over. The idea, of course, is by no means a new one in Canada, though the vessels heretofore used for ice-breaking and train carriage have not been on so large a scale as the above-named Russian example.

LIFE AND ACCIDENT INSURANCE ITEMS.

Men are told again and again not to miss opportunities. One is that of taking accident insurance. It's "up to" each man before he goes down. The wonder is that so many escape injury in the streets, not that so many become victims.—T. I. P.

As an industrial insurance item, we learn from Detroit that the triennial meeting of the representatives of the Metropolitan Life in that city was held last month. The meeting was a profitable one, and was pleasurably supplemented by a banquet at the Hotel Cadillac.

The Confederation Life Association has sent us—and we receive it with pleasure—a neat little book giving the thirty-second report of the company. This report was referred to in these columns at the time of the annual meeting, but a brief recapitulation of some of the prominent features of last year's business may prove of interest. Thus the following figures serve to show the increases made in 1903, compared with the year previous: Assets, $674,867; premium income, $57,757; interest income, $20,196; total income, $77,953; paid to policyholders, $51,213; cash surplus over all liabilities (according to company's standard), $49,523, or (according to Government standard), $85,260; in applications received, $758,489; policies issued, $737,478; insurance in force, $2,077,552.

Here is a list of very substantial names as petitioners for incorporation to do an accident, credit, and guarantee insurance business, under the name of the Canadian Credit, Indemnity, and Guarantee Company: Messrs. James Joseph Kenny, general manager of the Western Assurance Company; J. W. Langmuir, managing director Toronto General Trusts Corporation; J. F. Ellis, president Barber & Ellis Company; W. Stone, president Toronto Lithographing Company; A. A. Allan, wholesale merchant; P. H. Burton, president Mechanics' Dyeing and Finishing Company; Peleg Howland, president H. Howland, Sons & Co.; W. K. McNaught, president American Watch Case Company; R. B. Osborne, of Toronto; J. R. Barber, of Georgetown; and C. Berkeley Powell, of Ottawa.

The manager of the American branch of the Canada Life has appointed George A. Miller general agent of the company at Harrisburg. Mr. Miller was formerly at Buffalo. A. W. McCalmont, son of the manager, who was for some time cashier of the Cleveland office of the company, has taken the position of superintendent of agencies, with headquarters at Buffalo.

Application is being made to the Dominion Government by The Monarch Life Assurance Company for a charter. It proposes, we are told, to carry on a general life insurance business with power to issue a series of endowment policies running to thirty years with coupons attached. Attention should be paid to the personnel of a concern which proposes such new-fangled attachments. Besides, have we not life companies enough for the present?

The officers of the Crocker-Wheeler Company, manufacturers of electric generators and motors, at Ampere, New Jersey, which has branch offices from Boston to San Francisco, are working up a plan of life insurance for the men in their employ. The company will assume, we are told, the entire expense of the insurance and make the families of the insured the sole beneficiaries. As the Crocker-Wheeler Company employs in its works at Ampere from 500 to 700 machinists alone, the item of insurance will involve a very considerable annual outlay, the return from which will be the good-will of the employees.

—In Sherbrooke, Que., the by-law to raise $200,000 for the purchase of the electric light plant and running it as a municipal concern was defeated. A majority of both actual votes and valuation was required in order to pass it, and while there was an individual favoring excess of fifteen votes yet the valuation majority went the other way. Those in favor of municipal ownership now propose to bring forward a by-law on the question of developing a water-power at Westbury, twenty miles away from the city, which has already been purchased by the council.

Meetings.

Report of the Directors of

The Bank of British North America

Presented to the Proprietors at their Sixty-Eighth Yearly General Meeting.

BALANCE SHEET FOR HALF YEAR ENDING 31ST DECEMBER, 1903.

Dr:

Note.—The latest monthly return received from Dawson City is that of the 30th November, 1903, and the figures of that return are introduced into this account. The balance of the transactions for December with that branch has been carried to a suspense account pending the receipt of the December accounts.

£8,287,907 6 4

We have examined the above balance sheet with the books in London, and the certified returns from the branches, and find it to present a true statement of the bank's affairs.

EDWIN WATERHOUSE, }
GEORGE SNEATH, } Auditors.
Of the firm of Price, Waterhouse & Co., Chartered Accountants.

London, 22nd February, 1904.

REPRINTED FROM THE MONEY MARKET REVIEW, MARCH 12, 1904.

The yearly general meeting of proprietors was held on Tuesday last at the London office, 5 Gracechurch Street, E.C., Mr. J. J. Cater presiding.

The secretary (Mr. A. G. Wallis) read the notice convening the meeting.

The chairman said: The report and balance sheet having been in your hands for several days, I suppose you will take them as read? (Hear, hear.) That being so, ladies and gentlemen, it becomes my duty to move that the report and balance sheet be received and adopted, but before doing so I purpose, with your permission, to offer a few remarks on some items therein, and to compare some of the figures with those of December, 1902, omitting shillings and pence. The capital remains the same, but the reserve has been increased to £400,000 by the transfer of £10,000 out of the profits of the

year 1903, and it will be the policy of the court to add to the reserve as we are enabled out of the annual profits until it reaches at least £500,000, or 50 per cent. of the capital. Deposits and current accounts have increased £265,852. Notes in circulation show a decrease of £27,825. Bills payable and other liabilities are £160,171 less, which arises chiefly from a reduction in this bank's acceptances. They fluctuate from time to time, and call for no special remark. Liabilities on endorsements, £328,694, represent bills discounted by this bank, and not matured by December 31st, 1903. Most of them have run off since the end of the year, and from the quality of the bills themselves the risk is so small that it is not taken into account. The profit and loss items I will deal with later.

Transfers to Pension Funds.

Your sanction is asked to the transfers of £513 14s. and £102 2s. 6d. special to the officers' widows' and orphans' fund, and £502 1s. to the officers' pension fund. Turning to the credit side of the balance sheet, you will find the cash and specie at bankers and in hand show an increase of £165,814, whilst the cash at call and short notice is £337,222 less, the net decrease being £171,408. The percentage of these sums of cash, £2,322,851, is 34 per cent. of the liabilities to the public, £6,828,638 per contra, the percentage in 1902 having been 36.94 per cent. In either case the provision of cash appears ample for our requirements and for safety. Consols have been written down to 86 at a cost of £9,000 out of the profits. The value on December 31st having been 88, there was then a margin of 2 per cent., and although consols since have been below 86, it appears not unlikely that the value will not fall permanently much below 85 unless the war in the Far East should become extended and involve other European powers. The other items of war loan and exchequer bonds remain as before. The investment of £140,000 in Canada bonds was referred to by Mr. Whatman and Mr. Hoare at the March meeting, 1903, and was fully explained in the report to June 30th, 1903, sent to the shareholders in September last as being necessary owing to the continued expansion of the note circulation of this bank, the bonds being held for deposit with the Dominion Government as provided by Section 51 of the Bank Act, 1901. The premium of over £4,000 was written off out of the profits of the half-year, June 30th, 1903.

Other Securities.

Other securities, £147,688, are £51,401 less. Their book cost on December 31st was less than the market value of that date. Bills receivable, loans on security, etc., £5,224,912, show an increase of £132,915. In bank premises, £159,351, there is an increase of £27,539. This increase is due to new buildings at Winnipeg and Ottawa and alterations at Toronto and several branches elsewhere. Many of the old branch buildings are defective in plan, and were both inconvenient and inadequate for the public and the staff, and it has been necessary to modernize them, to enlarge or to rebuild them, and in Ottawa we have removed the bank to a more central business locality. The changes generally have given unqualified satisfaction, and resulted in a considerable accession of business to the bank. An independent valuation of all the bank's properties has been made, and the result is that the actual value considerably exceeds the amount at which they stand in our books. You will notice in the report that we have opened three new branches and one sub-branch, making, in all, since December 31st, 1902, to the present time nine branches (Fenelon Falls, Rosthern, Battleford, St. Catherine Street, Montreal, Yorkton, Estevan, Toronto Junction, Reston, Calgary, and four sub-branches (Weston, Longueuil, Duck Lake—now a full branch—and Levis). The last item on the credit side is £30,056, which is a deposit of 5 per cent. on the average circulation of this bank with the Dominion Government, required by Act of Parliament for the security of the general bank note circulation.

Profit and Loss.

I will now ask you to turn to the profit and loss figures, showing that we brought forward from June 30th, 1903, a balance of £35,405 (which was £694 less than in 1902); deduct dividend paid October, 1903, £30,000; leaving £5,405. Add the net profit for the half-year to December 31st, after deducting all charges and providing for bad and doubtful debts, £42,468; making £47,873. Deduct transfers to: Reserve fund, £10,000; officers' widows' and pension funds, £1,117, making £11,117; leaving net to deal with, £36,756. Deduct April dividend, £30,000; leaving a balance to carry forward, £6,756. Whilst this result is no doubt satisfactory to you, I must point out that the net profit, £42,468, was £17,793 less than in 1902, and that this less favorable result was due to the difference in the rate of interest on loans prevailing in New York, where we employ a portion of our reserves, the rates for the year 1903 having been considerably lower than in 1902, when an exceptional demand for money prevailed. Our esteemed colleague, Mr. E. A. Hoare, visited Canada and the United States last autumn, and was good enough both to inspect some of our branches, and to arrange with our general manager where other branches and sub-branches should be opened. He was also able to judge of the progress of branches opened and changes made in the officers on his previous visits. The Court of Directors feel greatly indebted to him for the care and trouble he devoted to this matter, and for his constant endeavor to extend the business and influence of this bank.

The chairman also spoke of commerce and banking, and dwelt at length on the great agricultural prosperity of Canada.

The resolution, "That the report and balance sheet presented be received and adopted," was carried unanimously.

The retiring directors and auditors were also reappointed, and a vote of thanks to the chairman, directors and staff closed the proceedings.

—The settlement of the Newfoundland question between Great Britain and France seems to be giving great satisfaction in both countries. Briefly stated, its main features are these: France formally renounces all territorial rights to the French shore and police rights in Newfoundland waters, and receives in exchange, as compensation for the French subjects who are residents of the shore, about £20,000. All French fishermen are to have the same rights as British. Among other points settled by the convention, France receives a strip of territory on the Sokato frontier, Southwest Africa. hen follow the Moroccan and Egyptian questions. No attempt is made to settle these, but only to eliminate from them such elements as might imperil the existing good understanding between the two countries.

THE

Royal Automatic Smoke Consuming Company

TORONTO, ONT.

REPORT OF THE BOILER INSPECTION AND INSURANCE COMPANY.

Toronto, March 15th, 1904.

J. A. WHALEY, ESQ.,
Manager the Royal Smoke Consuming Co.,
Room Z, Confederation Life Bldg., Toronto.

Dear Sir,—The following are the results of tests made at the Canada Life Building, Toronto, on March 11th and 14th. On the 11th inst., your smoke consuming device was in operation, and on the 14th inst., it was not in use.

	Consumer in use.	Consumer off.
Duration of test	8 hours.	8 hours.
Total coal consumed	1,327 lbs.	1,600 lbs.
Ashes produced	131 lbs.	191½ lbs.
Water pumped to boiler and apparently evaporated	11,270 lbs.	10,110 lbs.
Temperature of water deg. F.	38.1	40
Average pressure on Steam Gauge	58.8 lbs.	59 lbs.
Water apparently evaporated from and at 212 deg. F. per pound of coal	10.27 lbs.	7.63 lbs.
Saving in fuel by the use of the Consumer	34.6 per cent.	

With the device in use there was practically no smoke visible at the top of the chimney, but without it at each fresh charge of coal the smoke was quite black for a time. The boiler tubes were found to be much cleaner when it was in operation and the coal was burned at a seemingly higher temperature.

Yours very truly,

(Signed) Geo. C. Robb,
Chief Engineer.

FINANCIAL CONDITIONS.

Æmilius Jarvis & Co., Toronto, in their circular of March 25th, say: The action of the stock markets, notwithstanding the decision in the famous Northern Securities case, which was recently given adversely to the holding company, demonstrates the great improvement in underlying conditions. The effect on the market was of course discounted, and, as is commonly the case, more than discounted. The directors of the Northern Securities Company appear to have decided to comply not only with the letter of the decision, but with the spirit of it, and have already agreed upon a plan of distribution of the securities held by their company. The publication of this plan of distribution caused a very sharp advance in the shares of several of the companies interested, notably Union Pacific, which jumped nine points on the day of the announcement, the market all round showing appreciable improvement. In our last letter, we strongly advocated investment in many of the standard stocks on our own market, and, although there has been a marked advance in most of these since the time of writing, we consider that, from the standpoint of the investor, what we said then is true of the present time. There are several investment stocks on our market now which cannot be considered as being anything else than considerably below their true investment price, and much of the money locked up in savings banks could be made to return at least double the interest it is paying now, with perfect safety to the owner. Stocks may possibly be cheaper later on, but they are plenty cheap enough now for any reasonable investor.

AN EFFECTIVE ADVERTISEMENT.

"A station like the herald Mercury,
New lighted on a Heaven-kissing hill."
—Shakespeare.

The striking advertisement of the Canada Paint Company, Limited, on another page, depicts Mercury, the swift, ready messenger of the gods. In the mythology, Mercury is the god of merchandise and trade. The figure given of him here is in the character of a herald, as Hamlet called him. He bears the wand of commerce, has winged-feet, and carries an arc light, typical of the illuminating and brightness produced wherever the Canada Paint Company's colors and varnishes are used.

The advertisements of this company, it may be observed, never "harp upon one string." Indeed, it may be said that variety is the predominating note. They swing from grave to gay, from prose to poetry, are always readable, generally enjoyable and frequently ful of valuable information. Their announcements do not savor of the big brass drum or the wide-mouthed horn. We are told that professional "Ad" writers, as our Yankee friends call them, are not employed by the Canada Paint Company. Their advertisements are suggested and written by the regular members of the staff in Montreal and Toronto.

The Canada Paint Company, Limited, have extensive works in Toronto and Montreal, and are amongst the most progressive of our large manufacturers.

—"If you was a millionaire," said Plodding Pete, "would you found a library?" "I am surprised at yer ungrammaticalness," replied Meandering Mike. "I would not found a library. I would find a brewery."—Washington Star.

MONTREAL MARKETS.

Montreal, March 29th, 1904.

Ashes.—There is a scarcity of offerings, and higher values prevail, $6.25 being paid yesterday for a small lot of No. 1 pots. Probably from $6.15 to $6.25 would now be a fair quotation for first quality of pots, and about $5.80 for seconds. In pearls there is still an entire absence of business.

THE GREATEST

responsibility resting upon our manufacturers and power users in Canada is that in connection with their Steam Plants. The Boiler Room is the place where precaution is taken.
The largest Steam Users regard the assistance of a responsible Company a necessity in order to provide protection and to insure a safe and economical maintenance of their Steam Plants.

The Canadian Casualty & Boiler Insurance Co.

22 Adelaide Street E., TORONTO

are specialists in Boiler Inspection, Consulting Engineers. We can save you money. Write us.

A. G. C. DINNICK, Managing Director

Cements and Firebricks.—The air is is still too chill, and the ground too heavily covered with snow to permit of much improvement in the demand for cements, but there is quite a good business doing in firebricks at from $19 to $22. Winter prices for cements still prevail, and it is expected opening spring prices will be about the same as last year.

Dry Goods.—City retailers seem to be fairly satisfied with Easter trade this week, but a return of chilly winds has prevented the large turnout of shoppers there might have been. Wholesalers speak of sorting trade as being, on the whole, rather on the quiet side, and March collections cannot be reported on as wholly satisfactory. As regards values there is really nothing new.

Furs.—Offerings of raw furs continue quite light, and are showing a noticeable falling off in quality, so that dealers are quite chary of buying, especially in view of the lower values prevailing. Full reports of the late London sales now to hand show a percentage of decline in prices, as compared with sales of March, 1903, as follows: Coon, 25 per cent. lower; skunk, 12½ per cent.; mink, 7½ per cent.; marten, 20 per cent.; silver fox, 40 per cent.; cross, ditto, 27½ per cent.; blue fox, 40 per cent.; red ditto, 5 per cent.; otter, 15 per cent.; lynx, 50 per

cent.; fisher, 35 per cent.; black, brown and grizzly bear, 40 per cent.; wolverine, 35 per cent. Winter and spring rats are 10 per cent. lower than January sales, and fall and Nor-West rats 25 per cent. lower. The only two advances in Canadian furs are in beaver and wolf, which sold 10 to 15 per cent. higher, respectively, than a year ago. Quotations for prime pelts are as follows: Beaver, $5 to $6.50 for large; medium ditto, $4 to $4.75; No 1. choice bear, $15 for large, $10 for medium, and $6 for small; badger, 30 to 50c.; fisher, No. 1, dark, $5 to $6; ditto, brown, $4 to $5; pale ditto, $3 to $4; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $4 to $8 for No. 1; marten, $2 to $3 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1, dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The volume of distribution shows some little increase, but the movement is not as brisk as it should be for the season. Collections are still subject matter for complaint, and one wholesaler makes the remark that in his experience they have been poorer the past few weeks than at any time during the past two years. Still failures are really remarkably few, and for this the trade are truly thankful. With regard to values, the market shows general steadiness, and there is not a noteworthy change since last report. Cable advices from Barbados would indicate a firmer market for molasses, owing, it is said, to some fair American buying.

Hides.—Receipts of hides this week have been larger than usual, owing to the killing for the Easter market, but prices are steady at 9c. for No. 1 city hides, and 8 to 8½c. for No. 1 country hides. In calfskins and sheepskins there is nothing new.

Metals and Hardware.—There appears to be considerable competition in the booking of orders for pig iron to arrive, and quotations are made for No. 1 Summerlee at $19.25, and No. 2, ditto, at $18.75; Middlesboro iron, about $16.50. Some fair lots of new Londonderry iron have been sold at $19, and the quality is said to be showing up favorably. Bars are easy at $1.65 to $1.75. Boiler plate is lower at $2, and tank plate at $1.90. Canada and black sheets easy at $2.25. A steamer is timed to leave Welsh ports on the 2nd prox., which will bring large new supplies in these lines, which will likely sell at lower prices, ex-wharf. Copper is rather firmer at 13½ to 13¾c.; lead also at $3.35; tin, 32 to 33c.; antimony, 7¾c.; spelter strong at $6.

Oils, Paints and Glass.—Travellers are said to be doing rather better, and in all the warehouses there is much activity in getting goods ready for shipment beginning April 1st at summer freight rates. Linseed oil is a little firmer, and some profess to be getting 48c. in single barrels. In other lines there is nothing new. The quotations are as follows: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine 89c. single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon; steam refined seal, 62½ to 65c.; straw seal, 42½ to 45 to 55c. per gallon; tinged and brown ditto, down to 35c.; sweet pale whale oil, 50 to 55c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and firstclass brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break ,and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, March 30, 1904.

Chemicals, Drugs, etc.—Quinine continues firm at the recent advance. Opium is not experiencing a very active demand, and business is quite dull. Cocaine is a little more firmly held. The demand for codliver oil is affected by its high price, though in New York we note that sales are being made below nominal quotations. In the British chemical markets there is little of a new nature to report. Sulphite of copper has maintained its advance. Arsenic is firmer. Business, generally speaking, is quiet, though the undertone is pretty good.

Dry Goods.—The volume of trade is fairly good, but there is no new feature worth reporting. The prices for cotton and other staple goods continue to be very firm, especially for the former, and no hope is expressed for any decline. Travellers now out on their routes say the indications for a good spring business are very good.

1903

SURPLUS SURPLUS

The ability of a Company to give its policyholders insurance at the LOWEST COST compatible with safety depends on its PROFIT EARNINGS, which in

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

amounted in 1903 to $194,783
Out of this sum it paid to policyholders in 1903..... $ 77,300

And it continues to distribute dividends to policyholders on the SAME LIBERAL SCALE as for the past year.

ONLY POLICYHOLDERS SHARE IN ITS PROFITS.

Flour and Grain.—For flour, local exporters quote $3.60 for ninety per cent. patents, buyers' bags, middle or east freights. Millfeed keeps quite steady. Oatmeal remains without change. In grains, no change in price whatever has been made since our last Prices Current, and business is very slack.

Fruits and Vegetables.—Trade is moderately active at prices which, roughly speaking, remain about as stated last week, as follows: Apples, 75c. to $2.50 per barrel, according to quality; cocoanuts, $3.75 per sack; oranges, California navels, $2 to $3.50; Mexican, $2 to $2.50; Valencias, ordinary, $4; large, 714's $5; marmalade oranges, $2.50 per box; lemons, Messina, 360's, $2.50 to $2.75; 300's $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; cranberries, $7 to $9 per barrel, $1 to $1.25 per basket; Spanish onions, $3.50 to $3.75 per large case, and $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel; case tomatoes, $4 to $5; dates, Sair, 3½c. per pound; Hollowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; pineapples, $4 to $5 per case.

Groceries.—General groceries are now going out in larger quantities, and business is fairly good. Sugars are moving pretty well at unchanged prices. In New York the market is on the strong side. Some brands of canned fish, as sardines and lobsters, are firmer in price. Dried fruits are nominal, and not a great amount of business is being done. Other lines remain very much as before.

Hardware.—Improved conditions have begun owing, no doubt, to the better state of communication facilities throughout the rural districts. Orders for the ordinary seasonable goods are coming in in very fair quantities and amounts. There have been no further price changes, and practically every line remains firm. Metals are not moving very briskly, but otherwise the above remarks apply to them also.

Provisions.—The quantities of butter coming forward at present are more than sufficient to meet the demand, especially as it includes a good deal of old stock. Cheese is steady and unchanged. Eggs are more plentiful, but prices keep up. Receipts of poultry are light, and quotations remain unchanged. The market for hog products continues about as before, with a moderate demand.

Seeds.—The market is unchanged at $5.25 to $5.75 for red clover, $3.25 to $4.25 for alsike, or $5 for choice grades, and $1.20 to $1.70 for best timothy.

Wool.—Practically no business is passing. No export demand exists for fleece, while for pulled, present demand is very slack.

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION
MONTREAL —— TORONTO
GRIFFIN & WOODLAND,
MANAGERS. 2

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America. greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policyholders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

IN THE PAST 20 YEARS

The Canada Life's Assets have Grown as Follows:

TOTAL ASSETS:

In 1883 - - - $5,664,000 In 1893 - - $14,313,000
In 1888 - - - $8,954,000 In 1898 - - $20,038,000
In 1903 = = = $27,180,000.

N. B.—The fact that in 1903 the Applications Received ($13,881,960) were greater than those of 1902 by over $3,000,000, is one of the many evidences of how

The Canada Life has Grown.

R. G. DUN & CO.

Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe

Mercantile Summary

For ten years, or thereabout, R. C. Forsyth, of Gaspereaux, N.S., has carried on a moderate grocery trade. He is now endeavoring to settle at 50 cents on the dollar.

Mrs. C. H. Schleacow, whose husband, recently deceased, carried on a grocery business in Ottawa, has made a proposition to pay creditors 60 cents on his trade liabilities of about $1,700. The offer does not seem to meet with general favor.

A proposal is made by J. Z. Gagnier, general merchant, at Howick, Que., to pay 55 per cent. on liabilities figured at about $8,000.—Dufour & Co., of Chicoutimi, Que., are offering 50 cents on the dollar.——E. E. Carrier & Co., general store, Garthby, Que., who started business last May, and lately assigned, are seeking signatures to a composition deed at 50 cents on the dollar, liabilities being $6,600.

It is stated that arrangements have been made by an English syndicate for floating the bonds of the Southwestern Traction Company, which proposes to build a radial railway in the London, Ont., district. The proposed route is from Hamilton west to Strathroy and Glencoe, by way of Brantford, Woodstock, Ingersoll, London, Delaware and Melbourne, and south from London to St. Thomas and Port Stanley, and east from St. Thomas to Aylmer.

The assignment is noted of W. Langlois & Son, general dealers at Gaspe Basin, Que. The senior first began business at Barachois, after a long clerking experience with the prominent firm of Robin & Co., well known along the Gaspe Coast, but failed in 1894. He resumed in his wife's name, afterwards removing to Douglastown, and eventually located at his present address in 1902. ——C. L. Bedard, doing a small grocery and confectionery business at Plessisville, Que., has assigned; his liabilities are under $1,000.——George Morin, general dealer at Windsor Mills, Que., is reported insolvent. Formerly he was in business at St. Francois Xavier de Brompton, where he failed in 1889, compromising at 25 cents. He then went into the pulpwood business, but eventually drifted into storekeeping again at Windsor Mills, two years ago.——Thos. Gelinas, of St. Barnabe, Que., has followed his trade of shoemaking for some thirty years in a small way, also working a farm, but now has had to assign. His trade liabilities are small.——For the past twelve years, Joseph Ruel has carried on a small store at St. Francois Xavier de Brompton, Que., and previously he was a farmer. He suspended in 1901, then arranging to pay 40 cents on the dollar, and he is now reported as having assigned.——Elie Lemire, a maker of carriages at Pont de Maskinonge, Que., has abandoned his estate to the assignee. Some years ago he was a storekeeper at St. Didace, but did not make a fortune thereat, and he has followed his present line since 1896.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"General Principles for Investors."
"Stock Markets and How to Profit by Them."
"The Theory of Option Dealing."
"How to Invest in Mines."
"Insurance as an Investment."
"Colonial Land: Its Coming Importance."
An entirely new feature is a collated list of "Average Values," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages), Post Free on mentioning The Monetary Times.

THE Real Estate Association of Montreal met on Monday, when the amendment of the city charter was the chief topic of discussion. The following officers were elected for the ensuing year: President, Hon. J. K. Ward; first vice-president, ex-Ald. A. Gagnon; second vice-president, Mr. N. Delisle; secretary, Mr. V. Morin; and treasurer, Mr. M. Levesque. Messrs. A. L. Rodier, G. Deserres, E. J. Chapleau, Z. Leroux, G. Lamothe, J. Lamoureux, J. G. Boissonnault, G. W. Stevens, E. Leduc, and J. Lamontagne were elected directors.

Mercantile Summary.

THE county bridge, at Threshers' Corners, Ont., was a few days ago carried away by ice. Its building cost over $20,000.

A SYNDICATE of Nelson, B.C., men has bought the Crown King and Golden West mining claims from the original locators for the sum of $35,000, and expects to develop them.

THE Peterboro, Ont., Radial Railway Co. have, it is said, succeeded in carrying through negotiations by means of which the street line in that city will be placed in operation again during the coming summer.

IN London, Eng., last week, there was a meeting of the Marconi Wireless Telegraph Company, at which it was stated that satisfactory arrangements had been made with the British Post Office authorities. Nothing definite, however, was said concerning the transatlantic service.

DURING the month of March, the Canadian Pacific Railway Land Department registered the sale of 14,827 acres, realizing the sum of $67,405, or an average of $4.55 per acre. This was a smaller quantity than might have been expected, but the weather during the month was particularly bad.

RIDEAU Hall, the vice-regal residence in Ottawa, narrowly escaped destruction by fire on Sunday morning last. As it was, the damage was inflicted to the amount of something like $45,000, chiefly by the effects of water and smoke, on the new wing. Most of the personal effects of Lord and Lady Minto were saved. The latter, who was lying on a sick-bed, the result of a fall on the ice-rink, had to be removed.

THE Chicago, Soo and North Atlantic Railway and Steamship Company is asking for incorporation, with power to construct and operate a line of railway northeasterly towards James' Bay, thence to the east shore of Hudson's Bay, and also through northern Quebec and Ungava to Hamilton Inlet on the Labrador coast; to construct and operate a telegraph and telephone service; to manufacture and dispose of electrical energy; to own and operate steamships, ferries and shipping, and to build and erect wharves and elevators.

WORD comes from Montreal that the next large building to be erected in the business section of Montreal will be a six-story brick and stone structure at the corner of Notre Dame street and St. Lambert Hill for the Mussen estate. This historic corner was formerly occupied by the Anglican Cathedral, and later on by the almost century old dry goods firm of Mussen & Co., the latter only giving up business a few years since. A strip of this property on the west side of St. Lambert Hill is now being expropriated. The new building is intended to measure forty feet on Notre Dame by a depth of eighty feet, six stories high.

ACCOUNTANT AND AUDITOR

At present engaged in public practice with large and prominent firm, desires engagement as Auditor, Secretary or Treasurer. Is experienced, energetic, reliable, possesses analytical and executive ability, and is capable of effecting simple and efficient systems of accounts, showing facts and their causes. Address Box 24,

Monetary Times.

MONTREAL capitalists are considering forming a company to build an electric street railway in Moncton, N.B., and its suburbs.

THE Crow's Nest Pass Coal Company has, we are told, ordered from the Robb Engineering Company, Amherst, N.S., two 175 horse-power, Robb-Mumford boilers for their mines at Fernie, British Columbia. Three of the same style were installed last year. The Amherst Company has also an order from J. G. White & Co., of London, England, for a 300 horse-power Robb-Armstrong tandem compound engine to be a duplicate of two engines supplied by them for the Perth Tramways, Western Australia, five years ago.

A FIRE, which started in the Berry Building, in the middle of Montreal's most congested district, caused a good deal of alarm on Friday last. The tenants in the above-named building, which was entirely destroyed, were: Watson, Jack & Co., commission merchants; S. Pitt, woolens and tailors' trimmings; Thos. Samuel & Sons, commission merchants; Robert Ross & Co., dry goods, etc.; Radway & Co., patent medicines; Imperial Neckwear Company; F. J. Elliott, manufacturers' agent; W. J. Tabb, importer; M. B. Steine, boots and shoes; the Atlas Brand, shirts and overalls. The three upper stories of Gault Bros'. dry goods warehouse were badly damaged. Total damage, estimated at $50,000; partially insured.

THE following is a record of patents granted recently to Canadian inventors: 755,609, straining attachment for milk cans, J. H. Blaney; 755,612, artificial fishing bait, F. Burdett; 755,694, legging, J. Peel; 755,763 tempering or hardening cast iron, W. Gilmour and A. Lindsay; 755,788, car fender, A. E. McLean; 755,805, auxiliary car coupling, J. W. Smith; 755,818, brick making machine, J. H. Venables; 755,839, hand tacker, S. Beauregard, assor. to J. Adam; 755,848, rail joint, J. B. Climo; 755,905, electric traction system for railways, A. Meuschels; 755,929, cash register, S. H. Pocock; 755,966 combined scoop and weighing apparatus, J. L. Taylor; 755,996, relief valve, S. O. Brune; 756,017, time-controlling mechanism for phonographs, J. E. Hett; 756,061, hot water cooler, J. S. Scott; 756,129, treating peat immediately prior to compression, W. A. Milne; 756,130, temperature and moisture regulating apparatus, W. A. Milne; 756,143, woven wire mattress, W. J. Remington; 756,192, carter-clip, J. D. Wood.

Mercantile Summary.

RUMOR has it that Campbellton is to have a new Intercolonial Railway station, and location will be in the lower end of the town.

APPLICATION for incorporation is asked by the Christie Wood Working Company, Limited, to carry on a general wood-working business at St. John. The capital stock is to be $40,000. The names of the applicants are: James Christie, Chas. D. Christie, William A. Christie, M.D.; Mary A. Christie, Alexander Christie, all of St. John.

MURRAY & GREGORY are bringing to completion at St. John the work on what will probably be the most up-to-date lumber mill in the province. It is expected that the mill will be in running order shortly after the beginning of May. The burning of the old mill, while considered at the time a great misfortune, has been almost forgotten in the interest taken in providing the new plant.

THE Melita, Regina, and Edmonton Railway Company is applying to the Dominion Government for an act of incorporation for the purpose of building and operating a railway and telegraph line from the village of Melita to the International boundary, to utilize water or other power, to compress air or generate electricity for lighting, heating and motive purposes, to build and operate sawmills, etc.

THE Boundary, Kamloops and Cariboo Central Railway Company is seeking a charter to build a line from near Midway northwesterly by the most feasible route to Okanogan Lake and Grand Prairie; thence northerly to Kamloops, thence along the valley of the North Thompson river, through Cariboo to Nechaco river; thence by Fraser lake northerly say by Bulkley river or Babine lake to the town of Hazelton, or somewhere on Skeena river, and following the Stickine river and Teslin lake, northerly to the confluence of the Hortalinqua and Yukon rivers, in the Yukon territory. The new line is expected to do much to develop facilities for travel to the Yukon, which are still quite deficient.

ARRANGEMENTS have now been almost perfected for carrying on the new locomotive works, near Montreal, under the new regime. The following are the offiers for the ensuing year: S. R. Callaway, president; A. J. Pitkin, vice-president; K. W. Blackwell, D. W. Morrow and Roger Miller, directors; Leigh Best, secretary; C. B. Denny, treasurer, and Roger Miller, manager. The company has leased offices in the new Imperial Bank building, in Montreal, and they have now in hand contracts to build ten passenger engines for the Grand Trunk Railway, eleven consolidated engines for the C.P.R., three for the Toronto, Hamilton and Belleville road, two for the Brockville, Westport and Northwestern, two for the Dominion Coal Co., one for the Cumberland Railway, and one for British Columbia.

BRIEF BAGS
Best Value in the World for $5.00.

Mercantile Summary.

THE Magog Cotton Mills started up to its full capacity last week, the water rising so that there was sufficient to run the whole plant.

THE Eastern Steamship Company, of Portland, Me., has been registered under New Brunswick laws as an extra-provincial corporation.

THE Canadian Pacific Railway Company has decided to sell its lands in future only to actual settlers, not to syndicates who are thus enabled to resell to people going on the land, at an enormous profit.

THE British-American Company, of Victoria, B.C., have let a contract to a San Francisco firm for a large dredge for recovering gold on Spruce Creek, similar to the one built for them last year, but larger. It will have a daily capacity for handling 5,000 yards of dirt.

MR. C. M. HAYS declared that the shareholders were well pleased with the showing the Grand Trunk system had made during the past year. He remarked that it had been the best in the history of the road, as the directors had been able for the first time to offer 2 per cent. dividend to the third preference stockholders.

A CORRESPONDENT at the Canadian side of the Sault Ste. Marie river, writing on Wednesday, says: "Ice is breaking in the river and the ferry expects to run on Saturday next. Quite a large number of people are coming to our town to be here for our spring opening. The influx of miners and mine operating machinery into this district will be very much larger than any previous year."

THE Leeming-Miles Company have taken possession of the Patrie building on St. Gabriel street, Montreal, and are placing there the manufacturing portion of their business. On May 1st they will occupy as offices and warehouse the Redpath estate buildings on Victoria Square. Under the expropriation now proceeding (St. Lambert's Hill), says the Montreal Gazette, the old Mussen building on the corner of Notre Dame street and St. Lambert will be demolished in May.

OUR enterprising contemporary, of Cleveland, Ohio, the Marine Review, is this week publishing a vigorous editorial urging the extension of the American coastal laws, so as to embrace the Panama Canal district for the benefit of United States shipping. It is pointed out that the canal zone is the absolute property of the United States by right of purchase; it is, politically, United States territory. American ships for the foreign carrying trade are becoming as extinct as the Dodo, and the Review suggests that here is an opening through which they might legitimately receive a little boost. The article, of which we are favored with an advance copy, is worth reading.

Mercantile Summary.

THE land sales of the Scottish, Ontario and Manitoba Land Company last year amounted in value to £23,957, with a net profit of £4,459. The annual meeting is to be held in Glasgow (Scotland), next week.

JACK HYLAND, of Telegraph Creek, B.C., has discovered what is believed to be a very valuable deposit of gold ore on Nahaani river, in northern British Columbia. Quite a stampede of miners has already resulted.

THE Butler Freight and Towing Company has been incorporated under British Columbia laws for the purpose of carrying on a general navigation, towing and lighterage business. Its capital is $25,000, and head offices will be at Victoria.

THE Canadian Pacific Railway has, it is stated, placed an order for eleven heavy-type locomotives to be built by the Kingston Locomotive Works, and ten by the American Locomotive Works, at Longue Pointe (Montreal). Many C.P.R. locomotives in the past have been bought in the United States and Scotland.

AN American steamship concern, the Indiana Transportation Company, has hit upon an ingenious manner of advertising the launching of one of their new vessels at Toledo. It is their desire that the prettiest girl in Indiana shall do the christening, and in order that there may be no mistake as to who really carries off the palm for beauty in that State, they are putting the question to popular vote. It is said that over 200,000 votes have been received already. The launching takes place next month.

WE note that all the locomotives on the Southern Pacific Railroad are in future to be run by petroleum oil, instead of coal, on account of the latter's dirt and smoke, and its scarcity in time of labor troubles. During the past year some 300 of the company's engines have been converted into oil burners, and all new ones are to be of that type. The change has involved the erection of great storage tanks at various points in Nevada and California on the overland route, and at others on the Shasta route. Oil fuel is now used exclusively on the coast line and the overland route, and the Southern Pacific's recently acquired oil lands in Southern California are a large source of supply.

PROBABLY the most artistically pleasing calendar it has ever been our lot to behold is that which is being sent out to the patrons and friends of the J. W. Butler Paper Company, Chicago. The ornamentation of this unique calendar comprises a photogravure reproduction of a clay statuette depicting an event of sixty years ago: "The Arrival of the First Butler Sample." Below this there is a frieze representing the various walks of life on which paper has become an indispensable commodity, represented by such characters as the Genius of

Paper (in the centre), to whom, to do honor, come Mercury, Pan, Science, Research, Engineering Art, and so forth. The astonishingly fine letter press in which this drama is set forth, needs to be seen to be appreciated properly.

TELEGRAPHERS' STRIKE.

Having a vivid recollection of the Great North-Western Telegraph operators' strike of 1883, the writer, on presenting himself yesterday at the office of the company named, was made welcome. He asked about the nature and extent of the strike, and was at once taken into the operating room in the head office building, and told to look about him and draw his own conclusions. In that large room there were 38 operators at work at 3 p.m. on Thursday, and the usual complement of messengers and waiters. Thus the places of the strikers must have been largely filled. The chief operator stated that every line was manned, and that the inconvenience was but slight. It appears, therefore, that the strike has not succeeded in its aim, which was to force recognition of the Telegraphers' Union.

The trouble arose through the dismissal by the G.N.W. Telegraph Company of five operators, whose union principles and practices were not approved by the general manager. This action was resented by the parent union, which sent a representative over here from the United States, who, by-and-by, ordered a strike unless these hands were restored to their places. Mr. McMichael refused to reinstate them, whereupon trouble was promised, and on Tuesday last trouble began. Some thirty, a good proportion of them women, left their keys. The company was able to fill their places, however, and has no notion of giving in to the union. To-day there is trouble in Ottawa, where certain of the company's operators are on strike. Some hands have been sent from Toronto. In Montreal there is no trouble of the kind, nor are other important cities affected. The business of the company, either press or commercial, has not been seriously affected.

THE SPRING TIME.

This month and next will be great times for weddings, since we are poetically told (and are yearly reminded), that the young man's fancy turns in spring to thoughts of love. It is possibly too much to expect love-sick youths to hearken to the lessons of age in such matters as subsistence of a newly-married couple. And yet we shall reprint something from the Chicago Times that may catch the eye of some young chap and induce him and his girl to wait a year or two:

"My son," said the old gentleman in his fatherly way, "you have a good deal to learn about matrimonial arithmetic. As you say, your salary is sufficient for two, and you think you clinch the argument when you add that one and one make two. That's all right in business, but matrimonial arithmetic is one of the most confusing things that ever happened.

"In the first place the minister takes the two of you and makes you one. That would seem to make it easier for you, but the history of the world shows that figuring matrimony, one and one cost any old sum per week. In view of this, can you make the requisite showing with your present salary and future prospects?"

THE NORTHERN BANK

(Opening of Stock Books.)

Public notice is hereby given that stock books of the Northern Bank will be opened at the offices of Messrs. Howell, Mathers & Howell, suites 13 to 16, Merchants Bank Building, in the City of Winnipeg, on Thursday, the 21st day of April, A.D., 1904, at ten o'clock in the forenoon.

Notice is further given that upon such stock books will be recorded the subscriptions of such persons as desire to become shareholders in the bank.

Dated at Winnipeg this 31st day of March, A.D., 1904.

J. H. ASHDOWN,
Chairman of Provisional Directors.
Howell, Mathers & Howell,
Solicitors for the Bank.

TRINIDAD QUOTATIONS.

A letter from Port of Spain, Trinidad, dated 10th March, speaking of the prices of provisions, etc., refers to them thus: Lately the demand for breadstuffs has not been so active, and our market is not quite so strong in tone, although previous quotations are maintained. All grades of flour are in supply and stocks of corn meal and other items are now ample for all immediate requirements. Pork and lard are selling slowly, and values have become slightly easier. Pork heads, loins, ribs, shoulders, etc., are all in demand. There is a steady enquiry for all grades of family beef and stocks are light. Good American and Canadian cheese are wanted, but for hams there is no enquiry at the moment. Stocks of Morlaix butter are much reduced and price is advancing. Split peas are saleable at quotations. Stocks of both oats and oil meal are nearly exhausted and next arrivals will sell readily. For American corn, there is not much enquiry. The only receipt of fishstuff recently has been some small consignments by the Canadian steamer "Dahome." With such moderate landings the position has become much firmer, and next arrivals should meet a good market. Latest sales of prime N.S. were $24 to $25, casks medium, and $28 to $29, casks large, $6 boxes, and $3 half-boxes, and $18 to $20 casks scale fish. For

Newfoundland cure there is now more enquiry and prices are advancing. Several lots of pickled salmon and herring have lately arrived supplying immediate requirements. Good medium and large mackerel are wanted. We have no fresh arrivals to report of pitch pine, stocks of which are ample to meet the demand for some time to come. There is not much enquiry for American white pine, but good Nova Scotia quality is wanted and dealers' yards are about bare of spruce. The potato market is amply supplied.

MONTREAL BOARD OF TRADE BUILDING.

It is agreeable to learn, as we do, that the offices in the Montreal Board of Trade building are nearly all rented. On 1st April there were only 30 out of the 225 offices in the building remaining unrented. All this has been accomplished in less than a year. The demand for office space there arises in part from the convenient situation of the building, and the excellent accommodation it affords.

STATE FLOWERS.

It is not generally known, even in the United States, that many individual States have chosen a flower which shall be emblematic of them. The Chicago Post has compiled a list of them, as under:

Colorado—Blue and white columbine.
Delaware—Peach blossom.
Maine—Pine cone and tassel.
Michigan—Apple blossom.
Montana—Bitter root.
Nebraska—Golden-rod.
Oklahoma—Mistletoe.
Oregon—Oregon grape.
Utah—Osage lily.
Vermont—Red clover.
California—California poppy.
Georgia—Cherokee rose.
Idaho—Syringa.
Kansas—Sunflower.
Minnesota—Moccasin flower.
Washington—Rhododendron.
New Hampshire—Oak leaf and acorn

HISTORICAL.

Her sleeves are 1830,
And her skirt is '61,
Her tresses in the manner
Of Louis Quinze are done.
Her hat is quaint Colonial,
Her brooch is pure antique,
Her belt is 1850,
But when you hear her speak
What year the maid belongs to
You do not wonder more.
Her dress in many periods,
But her slang is 1904.
—Washington Post.

FIRE-WATER.

As it chanced, Scotch whisky was the first whisky the Indians came in contact with.

The Man who Wants to Save
and also be INSURED, should write for particulars of the PREMIUM ENDOWMENT Plan of the
National Life Assurance Company.
Good men are required in the Northwest and on the Pacific Coast. 8
HEAD OFFICE, Temple Building, TORONTO, Ont.

PETRIE'S MONTHLY STOCK LIST.—Those in want of NEW and SECOND-HAND MACHINERY should send for this. — H. W. PETRIE, 131-145 Front Street West, Toronto, Ont.

At once they tasted the liquor they exclaimed:

"Where there's smoke there's fire."

First impressions abide, and to this day these people call whisky fire-water.—Puck.

POWER USERS
A smoke consumer that will consume, and at the same time effect a saving in fuel of from 5 to 25 per cent. must interest all power users.
That this is done by the
Royal Automatic Smoke Consumer
is clearly shown by the following letter from a well-known manufacturing concern.

Toronto, April 6th 1904.
The Royal Automatic Smoke Consuming Co., City.
Dear Sirs,—
In reply to your inquiry of recent date regarding the machine you furnished us, we are pleased to say that same is giving us good results, and it is decidedly the best apparatus that we have come across as it does all that is claimed for it. It gives us better results in Steam with less Coal, and the flues scarcely require cleaning, the smoke being almost invisible. We feel assured that the Machine will pay for itself in less than one year. We might say that the only criticism we could make is that you call it the Smoke Consumer, whereas, in our estimation it should be called the Smoke Preventer and Coal Saver.
Wishing you continued success,
We remain,
Very truly yours.
The Newell & Higel Co., Ltd.
(Sgd.) Otto Higel, Pres.
P.S. This boiler carries a pressure of 110 pounds.

The above is but one of a number of similar letters.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted—make the change—it's simple. Many hundred Bands running in Canada.

MARITIME PROVINCE BOARDS OF TRADE.

Some important awakenings are reported from Boards of Trade in our Maritime Provinces of late. Two boards in Nova Scotia, those of Halifax and Sydney, have practically at the same time, but without concert so far as we know, taken the resolve to enlarge their membership and to broaden the scope of their influence. The county of Kings, the chief centre of the Nova Scotia fruit-growing interests, has a very live Board of Trade. At its annual meeting last week three important matters were considered. Quite naturally two of these were of a local character, and had to do with the county's most important industry, the producing and marketing of apples. As long back as the writer can remember, Nova Scotia orchardists have had a grievance against the transportation companies, and no meeting of a commercial body in that section passes without this matter coming up in some form. For several years the Furness-Withy Atlantic steamers have been specially subsidized to carry apples between Halifax and British ports. Last year, in addition, a subsidy was paid the Canadian Pacific Railway to have its ocean steamers from St. John call at Halifax on their outward trip to load apples. Still the bulk of the apples went by the Furness-Withy boats, for the reason that these were favored by the English importers, who wrote their agents in Halifax and the buyers throughout the country to ship only by those steamers. It was freely stated at the Kings Board of Trade meeting that this was due to the fact that a rebate was granted, which helped to swell the profits of the commission merchants, and hence their desire to favor this particular transportation company. It is tolerably plain that the London and Liverpool merchants want no competition in steamship lines, so far as the apple trade is concerned. Notwithstanding this the board passed a resolution calling upon the Dominion Government to continue for another season the subsidy to the C.P.R. steamers. Another matter considered at the meeting of the Kings County Board was the size of the apple barrel, Nova Scotia shippers using a slightly smaller barrel than that used in Ontario; and after a protracted discussion it was decided to make no change. The third resolution was in support of Chamberlain's policy of preferential trade within the Empire.

We are pleased to learn that the Halifax Board of Trade is meeting with good support from the citizens in its recently inaugurated "Forward Movement." On Saturday last the three daily papers of that city contained strong editorial articles commending the movement, and quite a number of people have made application for membership in the board. The committee started out on Monday to make a canvass for funds. What they ask is that 50 men shall subscribe $25 each; 75 men $10 each, and 125 men $5 each, which will make a total of $2,625 for the first year's work. The indications are that they will have little difficulty in securing this amount. The project is to make the board a real factor in the well-being of the city and Province, and the response from the public-spirited men of Halifax should be spontaneous and hearty. The Sydney Board of Trade is also seeking to extend its influence and usefulness. An effort is being made to increase the revenues and membership of that body. Thoughtful persons will regard these movements to strengthen and popularize the commercial bodies of the country as an important step in the development of the resources of Nova Scotia, from which great things are to be expected.

NORTH-EASTERN ONTARIO.

In the Ontario district of Nipissing, a hundred miles due north of the lake of that name, lies a region which is becoming known as an inviting one for the settler. And settlers are not wanting, for on both the Quebec and the Ontario sides of Lake Temiskaming thousands have gone in, but the Quebec authorities and the French Canadian settlers appear to have earliest awakened to the attractions of the neighborhood. This beautiful lake, seventy-two miles in length and varying in width from two miles at Temiskaming post-office to seven miles at its northern end, is virtually an enlargement of the river Ottawa. A spur of the Canadian Pacific has for some time connected the lower end of the lake with the main line of that railway. But by the close of the present year it is likely that the Temiskaming and Northern Ontario Railway will be completed from North Bay to New Liskeard, 110 miles. Rails are already laid on nearly half that distance; in September last a Pullman car took an excursion party over twenty-eight miles of it.

The best description of this route and the best map, except the Quebec Government map of 1888, of the entire region, we have seen, are in the pamphlet entitled "New Ontario," compiled by the Canadian Press Association as a memento—and an eminently sensible one —of their excursion of September, 1903. In this modest but engaging book no fewer than thirty journalists have

separately recorded their opinions of this noteworthy portion of "the hinterland," as Mr. Bone calls it, of New Ontario. Here are to be found facts, figures, pictures, and forecasts as to the present and future of a region which offers attractions to fifty or a hundred thousand people. Some deal with its history and poetry, some with its remarkable scenic beauty, others, and the larger number, with its value for lumbering and farm settlement. Surveys are being made for the extension of the railway through the Temiskaming Valley to the vast clay belt lying beyond the height of land, between Lake Nepigon eastward to the Quebec boundary and beyond. This will some day connect with the Grand Trunk Pacific in the vicinity of Lake Abitibi, and with the railway from Sudbury to James Bay.

It is stated by the Assistant Commissioner of Public Works for Ontario that the line of the Temiskaming Railway "passes through a heavily-timbered virgin forest throughout its whole length, consisting of large white pine, spruce, black birch, balsam, cedar, hemlock, maple, and other timbers. The land along the line, while rich in timber and minerals, is only in parts suitable for agriculture until the Temiskaming Valley is reached." Ville Marie and North Temiskaming are settlements on the Quebec side of the lake, the latter having been a Hudson Bay post for generations; while on the Ontario side are Haileybury and New Liskeard. The place last-named, to the surprise of those who were unable to find it in a Lovell's Gazetteer of 1895, has to-day twelve or fifteen hundred inhabitants. There is good, arable land—rich, black mould overlying clay—around it, and the town has its full complement of stores, mills, hotels. North of it is Haileybury, an older place, and in the summer steamers run thirty miles northward on the lake and the Blanche river.

Strikingly encouraging is the testimony given by settlers as to the excellent character of the farming land. And the lot of those who go into this region in these days is vastly better than that of the much earlier settlers in older Ontario. In addition to colonization roads, present-day settlers have steamers and railways to take them in and to take their produce out. Mr. Carr, M.P.P., long familiar with Northern Ontario, has expressed the opinion that the land around New Liskeard and up the White river for future crop-growing, especially wheat, cannot be beaten by even Manitoba soil. And Mr. McGillicuddy, who saw the region and the people in the character of a delighted excursionist, but wrote about them in cooler blood after reaching his Goderich home, declares that it is "a magnificent agricultural and lumbering country," with residents "equal to the best on God's green earth." Entirely satisfied with what he experienced and heard of the character and climate of the Temiskaming country, the president of the Press Association has recorded in the Forest Free Press his conviction that "the building of the new railway" will do wonders to build up the trade of Toronto, and, indeed, of the whole Province.

TRANS-CANADA RAILWAY.

Some sixteen months ago, in one of our articles on the Trans-Canada Railway, this journal remarked upon the possible effect of the Grand Trunk Pacific Railway scheme on the interests of the Trans-Canada Railway, the first sixty miles of which was located in 1902, and which intended to run from Quebec, north of Lake Winnipeg, to Port Simpson or Port Essington on the Pacific. The route of this road was very nearly the same as that which the new Government road from Quebec to Winnipeg is to follow. It was stated in print last week that people connected with this road were asserting rights which they consider have been violated. For the violation of their rights and encroachment on their territory the Trans-Canada Railway Company, it was added, has presented a claim to the Government for $250,000. "The company declares that it has spent over $100,000 on surveys, and is willing to hand over to the Ottawa authorities all its field books and records on the payment of its claim. The balance of the claim consists of sums expended for promotion purposes."

This story of this alleged demand is utterly denied by Mr. J. G. Scott, who is one of the prime movers in the Trans-Canada scheme. The company, he says, has spent much money at certain points on the projected route, especially at Port Simpson, where its line has been located; but no demand on the Government has been made for any reimbursement of this. On the contrary, the promoters intend to go on with the work. The necessity for the Trans-Canada is quite as urgent as ever, because while the Government has decided to build their line south of Lake Winnipeg, the Trans-Canada takes a shorter route north of that lake, and will develop the valuable country north of the Saskatchewan and in the Peace Valley, and of the James Bay country. Besides, say the advocates of this road, we shall be able, if our plans are carried out, to give shippers the option of three summer seaports instead of one, namely, James Bay, the Saguenay and Quebec, and the shortest route to Halifax and St. John, in winter. That the people connected with the Trans-Canada scheme are very much in earnest appears when such men as Mr. William Price, of Quebec, subscribes, as he has done, for $100,000 of the stock, and this as lately as January, 1903. The company has had already some assistance from the Government of Quebec Province, but the land grant, we understand, is still unsettled. How the suggested subsidy from the Dominion Government is to be reached is a matter upon which definite information is not yet obtainable.

THE DRY GOODS SITUATION.

The downfall of Sully, the cotton speculator, as was forecasted at the time, made no real difference to the position of staples in the cotton products market. The prices for raw material have been easier, it is true; but the fact that it did not long ago fall very materially is a pretty sure indication that something stronger was behind the market than mere speculative influences. And, as we have pointed out before, the position of the manufacturers is such that, even were a violent decline to take place, which is far from probable, the value of ordinary goods made in this country would hardly be affected at all for months to come. Crochet cottons are meeting with a good demand at the recent 10 per cent. advance.

It looks at present as if the high price of cottons will be followed in some measure by those for some lines of woolens. Underwear, for instance, is showing great strength. Some of the manufacturers in this line are already sold out into next January, and even now these goods manifest symptoms of a further rise.

A good sorting trade in general dry goods is being carried on. Bad weather has, no doubt, delayed many orders which, but for it, would have been placed months ago, and prospects for an extra brisk late spring and early summer trade are good. A very pleasing feature dwelt upon by wholesalers is the increasing activity in

Canadian-made dress goods. Once introduced, they seem to retain their position well, and more. In both designs and coloring they are constantly improving, until now, in many cases, it is almost impossible to distinguish them from goods made in Europe. Comparatively plain designs are the ones most favored by popular taste. In men's tailoring cloths, the same remark applies—the domestic manufacturers are getting well into the running. Homespuns of designs on the order of the Scotch and Irish are asked for in greater numbers every day.

CANADA'S MANUFACTURES.

The increase in exports from Canada of manufactured goods during recent years has been a matter of satisfaction to those who have observed it. We may compare the figures of ten years ago with those of today in a variety of articles and see wherein we have made most progress. Where in 1893 the aggregate exports of manufactured goods, that is to say, goods which were made in Canada, were of $7,693,000 in value, the figure had in the fiscal year 1903 increased to $20,624,000. Much of this increase was in the articles of manufactured woods, which increased from $1,280,000 to $4,473,000; leather, more than doubled; iron and steel goods, which show a phenomenal advance; and agricultural implements, whose value was $462,000 ten years ago and $2,284,000 last year.

Exports of	1893.	1903.
Agricultural implements	$462,253	$2,284,904
Carriages, wagons, etc.	46,500	123,074
Clothing	51,119	112,284
Cordage, rope, etc.	18,486	152,226
Cottons	371,477	602,604
Drugs and chemicals	87,941	631,275
Iron and Steel—		
Castings	9,148	181,216
Hardware	83,342	67,292
Machinery	133,892	502,746
Pig and scrap	3,873	335,958
All other	68,137	2,149,799
Other metals	24,133	406,553
Leather	865,381	2,169,015
Boots and shoes	91,565	144,704
Cement and lime	106,999	130,281
Whiskey	135,606	493,458
Musical instruments	309,300	418,570
Tobacco	49,849	64,549
Woolens	35,992	55,892
Oil cake	336,714	289,945
Rags	36,725	86,051
Ships	363,916	50,307
Sugar	228,364	7,776
Wood Goods—		
Household furniture	174,261	359,062
Sashes and blinds and doors	130,349	331,959
Matches and match splints	204,410	112,011
Spool wood and spools	82,863	122,175
Wood pulp	455,893	3,150,943
All other wood	232,854	397,802
Household furniture	74,261	359,062
Sashes and blinds and doors	130,349	331,959
Matches and match splints	204,410	112,011
Spool wood and spools	82,863	122,175
Wood pulp	455,893	3,150,943
All other wood	232,854	397,802

It is proper to notice that the exports of 1902-3 were in many articles greatly exceeded by those of the preceding year. Of the first four items on our list above this is markedly true. Pig iron is an article noteworthy in this connection, for the export in 1902 was $1,262,000 in value as compared with last year. Of boots and shoes, too, the exports of two preceding years exceeded those of last year. The same with organs and pianos. Wood goods, however, maintained a steady increase all through, wood pulp, beginning with an export of $1,210,000 in 1898, increased to $1,816,000 in 1900, to $2,046,000 in 1902, and to $3,150,000 last year.

The field implements went to Great Britain to the extent of $1,866,768, but still were in the aggregate to other countries, which received $2,284,000 worth, namely, to the Argentine Republic, $60,923; Australasia, $902,201 (compared with an average of $547,687 a year in the preceding four years); British Africa, $70,109; Chili, $6,840; Denmark, $13,626; France, $238,868; Germany, $225,275; Holland, $44,215; Norway and Sweden, $4,579 (as compared with $25,844 worth in 1899); Russia, $121,925; United States, $609,120—which last item consists, in the return, of "binding attachments and parts of agricultural implements."

Our cotton manufactures went to the West Indies, Australasia, South Africa, Newfoundland, Japan, Great Britain and the United States to the total of $602,000 last year.

Of the iron and steel goods of Canadian manufacture exported, the larger part went last year to the United States—more than 74 per cent. in fact. A good deal of this consisted of pig iron and scrap iron and machinery, but by far the larger part of it is classed under "All other N.E.S."

Canadian leather and leather manufactures went in comparatively small shipments to Australia and South Africa, to the West Indies and Newfoundland, as well as several European countries. But the bulk of our leather export, seven-eighths in fact, went to Great Britain. Only $23,564 of our boots and shoes went to the United Kingdom, however, $121,000 going to other countries.

Musical instruments from Canadian factories are scattered over the world fairly well. Our pianos and organs can be heard in Sydney and Auckland, in Capetown and Elizabeth, as well as in several countries on the Continent of Europe. But our best customer for them after all is Great Britain, who doubtless exports much of the $300,000 or $400,000 a year she buys from us.

Manufactures of wood, other than lumber or timber, form, as might with reason be expected, a fairly considerable item in the return of exports. Out of a total of $4,473,000 sold, about 46 per cent. went to the United Kingdom, and nearly as much to the United States. The countries which got the rest were Australasia, Africa, the West Indies, Newfoundland, the Argentine, France, Germany, Spain, Portugal, Mexico and Japan.

THE FIRE WASTE.

The fire waste still goes on in the United States and Canada at a rate which ought to attract general attention, though it does not seem to. It is reported that for the first three months of 1904 total losses were $123,043,350, against $39,164,000 in 1903, and $48,099,900 in 1902. Now, even if we deduct the loss by conflagrations in Baltimore and Rochester, the remainder shows an increase over the like quarter of several previous years. The month of March shows a fire loss of $11,202,150, which exceeds that of the previous March by $1,300,000; January was greater, and February was, of course, the conflagration month. Tabulating the losses by fire for the first three months of three years we shall see how they compare:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
Feburary	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,202,150
Total	$49,109,900	$39,164,800	$123,043,350

If we deduct from the last of these totals the estimated loss by the two conflagrations mentioned, there remains $49,843,350 of a fire waste for three months this year, a sum greater than the like aggregate in either of two preceding years. So we cannot congratulate ourselves. The people of this North American continent are criminally careless about fire, and it does not seem possible to awaken more than one or two communities at a time to their duty in the matter.

THE SHOE AND LEATHER TRADE.

Business in the shoe trade of Canada for the first quarter of the year 1904 cannot be said to have been distinguished by any great exuberance. This was not, however, due to any traceable lack of consumptive power, but to severe conditions of weather which have prevailed throughout a large portion of the Dominion during the period named. Considering all things, it is matter for surprise and congratulation that trade has not been actually more dull. Looking back over a longer time, a review of the boot and shoe trade, say, for the past year, would show that manufacturers and dealers have probably never experienced such a busy time. On the other hand, it would be necessary to add that seldom have profits, in such period of vigorous activity, been so small. For this several causes are to blame. Primarily, there is the greatly enhanced cost of practically all the raw products which go to the make-up of boots and shoes. Labor is expensive; so is leather, especially sole and upper, and, still more so is cotton for linings. Then there is the question of needless competition, to which is, no doubt, due some of the unsatisfactoriness of net profits from the industry. In some few cases attempts have been made to place prices for finished goods on a more equitable basis, but they seem to have met with no easy success. There can be little doubt, however, that manufacturers will soon have to face the situation in a more effectual manner than they have in the past. Indeed, they are even now face to face with the immediate need for an advance in their price schedules; and we shall be surprised if something along this line is not accomplished in the near future. The spring trade is now over in the factories, and manufacturers are occupied with their fall samples. Prospects for this department at present look quite bright.

There is little apparent doubt that a period of plain styles has arrived, to stay a little while at any rate. Extremes of any sort are shunned. The renewed popularity for tans, while not very strongly in evidence yet, may certainly be said to be growing. Patent leathers manifest an equally unmistakable decline in popularity, particularly in the better-class trade. The numerous second-rate imitations have probably hastened this result.

Perhaps it is not too much to say that the now closing season for rubbers has been the most active on record, a feature due to the extraordinarily cold and prolonged winter. The new list for season from March 1st, 1904, to February 28th, 1905, is now in full operation. The advanced prices, considering all things, were reasonable, and kept on very similar lines to those mapped out in the new American schedule. The strongly advancing tendency in crude rubber, which has been in steady progress for something more than twelve months, continues in full force, and it is now on more than a dollar basis. Stocks for the past season have been completely cleared out; indeed, the demand on several occasions was more than the manufacturers could comfortably meet. For a time they considered a proposition to put out a line of seconds in boys' arctics and men's long rubber boots, but this was finally negatived.

The local leather trade, which has been for some time past fairly quiet, shows some signs of improvement, due, perhaps, more than anything else to the slightly better roads in the country. Prices for raw hides are quite steady. Chicago advices also report a firm market, and packers are said to be generally sold well up to their normal kill for this month.

In the various shoe and leather sections of the United States the problem of reciprocity with Canada continues to excite great interest. The army of reciprocitarians is divided into two camps (not necessarily hostile)—first, those who favor the free importation of raw materials, with their gaze fixed chiefly on hides; and second, those who believe in the mutual removal of restrictions upon the trade between Canada and the United States in boots and shoes. No doubt, benefit would accrue to both countries from such action, which would be in strict accordance with orthodox Cobdenite doctrines; but when one comes to enquire into the question of which country would reap the larger benefit, no great research appears to us to be needed, for nearly all the natural advantages at present lie with the American manufacturers, in older and larger establishments, more highly specialized industries, and so forth.

STATE OR MUNICIPAL FIRE INSURANCE.

It will be remembered that some weeks ago the State capitol of Wisconsin, a very handsome and expensive building, was burned down. Up to last year the Governor of that State, Mr. Schofield, had maintained on the building insurances against fire to the extent of $600,000. But the last Legislature of the State, becoming enamored of municipal fire insurance, instituted an insurance fund, and directed the State's officers to allow the insurance policies to lapse. Accordingly, in June last policies for $510,000 lapsed, and the remaining amount of $90,000 lapsed in December. The State insurance fund at present amounts to about $6,000, against which a loss by this fire, estimated at about $800,000, has to be placed. This, says the London Times, is an example of the insecurity of fire insurance which is done by State or municipal authority without adequate funds. The constant argument of those who prefer the municipal insurance idea to the safer indemnity afforded by sound companies is something like this: "We have been paying [for example] $25,000 a year to insurance companies in premiums on our city or town property, and all we have ever got back from them in twenty years is $5,000 for a single fire loss. Therefore, the business must be a profitable one, so let us do our own insurance, and save $1,000 a year." This is the way the Wisconsin legislators reasoned, and this is the way people in various Canadian towns are reasoning to-day. But it does not stand the test of experience. Another instance is given by the Times, of the worthlessness of municipal insurance. This is in connection with the losses in the Aalesund, Sweden, conflagration, which the Swedish Government insurance institution was unable to meet without raising more than £300,000 by loan. Insurance companies would have paid this money out of their premiums contri-

buted from all over the civilized world. But as it is, the whole $1,500,000 comes out of the pockets of the Swedish people themselves.

THE ADVANCE OF LIFE ASSURANCE.

The progress of life assurance has been described as the history of civilization. And the phrase is not too far-fetched. In one of its recent reminiscent editorials the London Review shows that the more progressive a country is, the more insurance business, life, fire, marine, or any other kind is transacted in its territory. And the statement is borne out by statistics of various countries. Taking the year 1900, the insurance in force in the German Empire was 350 millions sterling, averaging £6 10s. a head, as against about half this amount in 1885. In Austria-Hungary the insurances in force were for nearly 100 millions sterling in 1897, having practically doubled since 1885; the percentage of insurance was small, being only about £2 5s. In the United States the average amount of the insurance in force in 1900 was $90, as against $50 a head in 1870. The insurances in force in that country have nearly quadrupled in thirty years, being now $7,000,000,000. Great Britain showed in 1901 a total amount of insurance in force of 640 millions sterling, almost exactly double the amount in force in 1871

It is important to observe that in the United Kingdom the average amount of insurance per head of the population had risen from £10 in 1871 to £15 10s. thirty years later. This does not deal with industrial insurance at all, but the totals are startling in their magnitude. "We wonder," asks the Review, "if the total sum of 2,500 millions sterling covered by these policies will appeal to the intellect, reason, or poetic fancy of our readers. Two thousand five hundred millions is nearly four times the amount of the national debt of Great Britain." The beneficence of the system of life assurance has for years past commended itself to the thoughtful people of all countries. And it is now becoming apparent to the unthinking, not to say ignorant, among the people, that a system of indemnity which does so much for widows, orphans, and other helpless ones among the population as that of life, accident, and industrial assurance is one not for well-to-do persons alone, but for rich and poor alike.

OUR AUSTRALIAN LETTER.

For a month the Australian mouth has had lowered corners. In many parts of the Commonwealth the average rainfall for January and February was below the average, and concern was felt as to the future, but during the last days of February and the first of March rains have fallen on large portions of the land, which ensure good grass and plenty of water for the winter. This means a probability of a heavy crop of lambs next spring. It also means that the arable land is in good condition for the plough; that it can be prepared for a large seeding, the preliminary step towards another large harvest next year.

Business is reviving slowly. The truth is that farmers and pastoralists have heavy debts to meet, the product of previous years of drought, and this does not leave a large margin for liberal buying of merchandise. However, there is hope, and that makes things fairly cheerful.

Canadian trade is holding its own fairly well among us. The Massey-Harris Company, though it has had a better organized opposition to face than before, manages to hold its leading position in the agricultural machinery trade of this country. Its operations are a great credit to Canada. The Cockshutt Plough Company is also doing well. Its traveller, Mr. Yager, has just left here for New Zealand. He did not stay long in Australia, but he not only attended to ploughs but placed orders for Ingersoll binders and Brantford buggies, seed drills and windmills. There should be large sales for the latter. They have given high satisfaction when put in.

Such goods as Corticelli silks, Bell pianos and organs, being in a measure luxuries, were naturally affected by the drought, but still they kept up remarkably well, with even better prospects ahead. Cotton goods have not been pushed of late, owing to the high price of raw cotton, but the mills, with an exception or two, filled the orders forwarded to them.

The McLaughlin Company, of Oshawa, shipped a large order of buggies to a firm in Melbourne. For some reason the consignee went to England leaving orders not to accept the goods. Fortunately they have been placed with another firm, and it is probable that the change will in the end be an advantage to the company instead of a loss.

The Gutta Percha and Rubber Company, of Toronto, is another Canadian firm whose goods and business methods are a credit to Canada. Their customers have never complained, apparently have had no reason to complain, to the Canadian agencies of either. There is a sharp competition in rubber goods, but this firm is not suffering.

The bicycle business was good in Australia, and much improved in New Zealand last year. The Canada Cycle Company did very well, getting the top prices for its machines. It retained until a short time ago its separate Gould and Massey agencies, but recently these were combined. There is a growing trade in motor bicycles and carriages over here, which the Canadian manufacturers have not yet supplied.

The Manson Company, of Chatham, which six years ago introduced its farming mills into New Zealand, is now operating in Australia. It is a work of education, which takes time, to get the farmers to take such light machines, but a market will eventually be made.

The Canadian carriage trade in New South Wales has been very bad, hence the trade of the Canada Carriage Company, of Brockville, has fallen off for the past two years; but prospects are brightening and it is anticipated that new orders will shortly go forward.

Mr. D. H. Ross, the Canadian commissioner at Melbourne, reports that the Commonwealth Parliament will grant a preference to British goods. I wish I could be as sanguine as he upon this subject, but I can't. There is no Seddon in Australia, and the new Parliament is yet a muddle. The Government would like to give this preference, but as yet there is not evidence that they have the power.

The Royal Commission on Dr. Montague and the Independent Order of Foresters has met and adjourned again. The easy manner in which the third adjournment was granted is not against the theory that no one is very anxious to push the enquiry. Some papers have copied the Doctor's explanation, as published in your columns. As the case is before a court, they do not discuss it, but do call attention to two points. One is that the explanation does not meet the case. It is not a question of the dismissal of certain officials, but did the Doctor offer the money to Mr. Mitchell, as the latter in his place in Parliament says he did? And the other point is the discrepancy between the statements of the Doctor and Sir Alexander Peacock. The former says he contributed to Sir Alexander's election fund. The latter stated that the Doctor offered to do so but the money was refused. Where is the money? they ask. This may better enable the Doctor to understand the case against him, and a further explanation will be welcomed by his Australian friends.

Sydney, New South Wales, F. W.
4th March, 1904.

THE FAILURE LIST.

The commercial failures in Canada in the first quarter of the present year showed a considerable increase, both in number and amount, but particularly in the latter, compared with the same period last year. But this was owing primarily to the abnormally small amount involved in the latter, for it is this year less than in either one of the years prior to 1903. Losses in manufacturing enterprises were somewhat smaller

than last year, but this was more than offset by heavy increases in the trading branch, such as grocery and general stores, dry goods and hardware stores and hotels. The following is a summary of the failures for the first three months of 1904:

Provinces.	No.	Assets.	Liabilities.
Ontario	97	$ 314,332	$ 453,841
Quebec	121	841,096	1,148,615
British Columbia	22	596,091	615,498
Nova Scotia	44	197,150	403,600
Manitoba	18	55,400	58,100
New Brunswick	7	11,068	18,964
Prince Edward Island	2	6,000	6,000
Total, 1904	311	$2,021,137	$2,704,618
" 1903	288	1,089,954	1,754,173
" 1902	363	2,359,427	3,439,992
" 1901	424	2,740,649	3,333,722
" 1900	406	1,976,798	2,754,041

There was also in addition to these commercial assignments one small private bank failure, in Manitoba, to the amount of $20,000.

VANCOUVER AND YUKON TRADE.

According to a recent order from Ottawa, United States vessels will no longer be permitted to load Canadian goods at British Columbia ports, destined for transport to Dawson by way of St. Michael and the lower Yukon river route. In future, if merchandise of Canadian origin is to be shipped to Dawson by this route, it must be transported from Vancouver or Victoria by British bottoms. This will affect Vancouver considerably, as the trade from that port has shown a steady increase of late years. One result will be the impossibility of certifying as to the origin of goods shipped from Vancouver for Dawson via St. Michael on foreign vessels. Of course foreign vessels may take such cargoes from the British Columbia port, but as no certificate will be made out, the goods upon arrival at Dawson will be treated as of foreign origin by the Canadian customs officials at that place. Whether this will result in a general transfer of Yukon trade from American to British bottoms remains to be seen.

SIMCOE, ONTARIO.

A person who has not visited the Ontario town of Simcoe for some years, if he desired to know something of its present status might learn from Dun's Reference Book that it has to-day 3,000 people and a variety of industries, such as sawmills, flour mills, a shoddy mill; a woolen factory, a vegetable cannery, a mitt, glove, and robe works; seedsmen, foundrymen and lumber operators, among which last the McCalls bulk largely. Then if he looked further for information, and consulted Lovell's Gazetteer, he would find that Simcoe has churches for six denominations of Christians, three branches of banks, the Hamilton, Commerce and Molsons; two telegraph offices; one grammar and several common schools; and a lot more of what we shall style commercial and and sociological commonplace facts. If he looked up the history of the place he would find it strongly English and especially interesting; and he could not fail to remember, having once seen it, that it is a pretty place. But there have come to us this week from Simcoe a calendar and a magazine which show that the town has novelties to boast of which neither Dun nor John Lovell mentions.

The calendar is one which contains illustrations of a mechanical contrivance, one-third dwelling and machine shop, one-third steamboat, and one-third highway and forest locomotive. This remarkable "friend of the lumberman" is called an Alligator steam warping tug; it is patented in the United States and Canada, and well it may be. A strongly-built flat bottomed boat, iron-braced, forty feet long by ten or twelve beam, with a twenty horse-power engine, a big winch, a mile of steel wire, paddle-wheels (or stilts, as the case may be), an adjustable boiler and adjustable rudder, a gigantic anchor; this more recent "Walk-in-the-Water" startles the eyes of people who, although familiar with amphibious animals, have never seen an amphibious floating and rock-climbing machine. For a dozen years the Simcoe firm of West & Peachy have been making these "alligators," and they have sold fifty or more of them to such lumbering people as Eddy, the Gilmours, J. R. Booth and the Victoria Harbor Lumber Co., in Canada, and to firms in Michigan, Newfoundland and in South America. These boats not only tow rafts of logs, they are capital in a range of small lakes, will go through swamps and actually make portages, so that to say, using the sailor's phrase from Tom Cringle's Log, they are "half horse, half alligator," does not seem an extravagant description. Col. Denison ought to have had something of this sort when he went up the Nile on the Soudan expedition, which Dr. Drummond has celebrated in his poem: "Maxime Labelle," the opening lines of which are:

Veectoria she have beeg war;
Egyp's de name dat place.

Making these friends-of-the-lumber-driver is one of the more modern industries of picturesque Simcoe.

A commercial traveller tells us that Simcoe is a peculiar-looking place—we recall it as a pretty one—and so we have asked different persons what this peculiar distinction of Simcoe was. The town clerk replies: Its natural beauty; Col. Tisdale replies: Its asphalt sidewalks which give it a citified look. But those who attended the Buffalo Exposition might have seen, and those who go to the St. Louis World's Fair may see, an exhibit of hybridized gladioli from Canada which have attracted the attention of horticulturists everywhere. The American Florist, published in Chicago, devotes an article (with portrait), to Mr. H. H. Groff, of Simcoe, who has performed the seemingly impossible in the cultivation of these beautiful flowers, after experimenting for many years. It is something for Simcoe people to be proud of, that, to use the words of another writer: "A Canadian banker's hobby has become a commercial world-force, even invading Europe, which had nearly a century lead when he began fifteen years ago. . . To-day over a hundred men are employed cultivating his creations, which are known all over the world." We are aware that Dale & Algie have a rosary at Brampton, whose products find market by thousands of dozens in the big cities of the Eastern States. And now, in this Simcoe establishment, Ontario has offered another object-lesson in floriculture, whose fame has reached even beyond the confines of this continent, that is, the cultivation of the gladiolus. Floreant Simcoeses!

NEW LISKEARD AND THEREABOUT.

This Ontario settlement, which is said to be 160 miles from North Bay, has attracted a number of visitors to a degree that can only be adequately described by placing before our readers some of the papers prepared by members of the Canadian Press Association who were up there last September. Mr. Moore, of the Acton Free Press, says, respecting the advantages of settlers going in there as compared with south Ontario settlers of 1850: "Supplies can be secured with great facility. Sawmills are in operation at convenient points on all the leading roads and upon the river fronts; lime and brick are both manufactured at New Liskeard. Nails are selling there at $3.15, and other building hardware at similarly reasonable prices. The stores not only at New Liskeard and Haileybury, but at the interior villages, are well stocked in all lines. Ogilvie's No. 1 flour sold at $2.40 when we were at the town, and twenty pounds of the best granulated sugar for a dollar was the ruling price at the grocery stores. There are dealers handling agricultural implements, wagons, sleighs, pumps, windmills, sewing machines—yes, there is also a piano wareroom." Harold Jones, of the Canadian Horticulturist, tells of seeing wild plums, cherries, gooseberries, blueberries, raspberries, strawberries, and high bush cranberries growing to perfection in their natural abundance on the shores of numerous lakes and streams going from North Bay to Temiskaming. And, "in the vicinity of New Liskeard, I had the pleasure of seeing Wealthy and Hyslop crab apples in full bearing, Concord grapes ripening on the vine,

black and red currants doing splendidly." Mr. Gummer, of the Guelph Herald, speaking of the Fall Fair, at New Liskeard, as in many respects excellent, says that "the show of vegetables proved conclusively that in New Ontario vegetables are grown which cannot be excelled in any part of the province;" while "the samples of grain shown were fair for a new country." We should like, did space permit, to quote what Mr. Bridle, of the Toronto News, says eloquently of the prose and poetry contrasted in "the fossilized romance of the Upper Ottawa." But we cannot refrain from giving our readers a sentence or two from the reflections of A. T. Wilgress, of the Brockville Times, who expresses something like the thought of Charles Sangster about Indians on Lake Couchiching years ago. Sangster's sonnet begins:

> My footsteps press where, centuries ago,
> The Red Men fought and conquered ; lost and won.
> Whole tribes and races, gone like last year's snow,
> Have found the eternal hunting grounds and run
> The fiery gauntlet of their active days.

Wilgress puts it, not unpoetically: "Lake Temiskaming is full of the inspiration of those bold days; the steamboat and the telegraph wire seem an intrusion and a profanation in its historic water-reaches; but even these prosaic forces of modern civilization cannot entirely dispel the romantic charm of these rock-bound forest shores."

OUR HALIFAX LETTER.

I should like, even if repeating something which may already have been brought to the notice of your readers, to call attention to the report of the Nova Scotia Steel and Coal Co., of New Glasgow. This is a different company from the larger and more talked-about Dominion Iron and Steel Co., whose headquarters are at Sydney. The annual meeting of the former company was held at New Glasgow last Wednesday. The splendid statement presented shows what can be done in the development of the great natural resources of this province under careful management. The company experienced in 1903 the best year in its history, the volume of business being $200,000 in excess of that of 1902. The profits for the year were $859,397.19, and regular dividends of 8 per cent. on preferred, and 6 per cent. on common stock were announced. The quantity of coal it mined has been largely increased, the company now being the second largest producer in the province. Construction work on the blast furnaces at Sydney Mines was suspended during the winter owing to the difficulty experienced in procuring material, but it is to be resumed at once and completed as rapidly as possible.

Nova Scotia is watching closely the agitation for the removal of the duty on soft coal. Some of the statements recently put forward regarding the shipments of Nova Scotia coal to the St. Lawrence are absurdly incorrect. It is safe to say that this province will never be a consenting party to the removal of the coal duties while the duties on flour and manufactured articles, which our people are compelled to buy, are allowed to be maintained. There is a duty, however, that some would gladly see removed, that is the duty on crude petroleum. It is considered feasible to erect a mammoth refinery at a Nova Scotia port to which crude oil could be brought by tank steamers, and refined on an extensive scale for export to foreign markets. The proposal to limit the preferential tariff clause to goods imported via Canadian ports, also receives favor for obvious local reasons.

The organization of the Canso Cold Storage Company, Limited, is important to the fishery interests of the province. This company is capitalized at $100,000, and proposes to take over the cold storage portion of the business of A. N. Whitman & Sons, and erect at Canso a mammoth bait-freezer for the purpose of supplying bait to the Nova Scotia and United States Bank codfish fleets. The Dominion Government has recognized the necessity of such an establishment as an aid to fishermen, and last November a minute of council was passed accepting a proposition from the Whitmans for the construction of the plant and promising a grant of $25,000 towards the initial cost, and in addition a bonus of $4 a ton on all bait sold to Bankers for a period of years. This franchise has been acquired by the company which will at once proceed with construction. The Scotch expert herring curer, who is to make Canso his headquarters for his operations, has procured a "steam drifter," and will shortly arrive with a crew to commence operations. At present, Canso is a little town of about 1,400 population, in Guysboro County, at the extreme eastern end of Nova Scotia proper, but it is confidently believed that it is destined to play a very important rule in connection with the fishing industry, and the town, which is on Chedabucto Bay, some 12 miles south of Arichat, is likely to become of considerable importance.

Some ten years ago the newspaper publishers of the Maritime Provinces got together and formed a Press Association, and one very interesting meeting took place at Charlottetown. For some reason, best known to the officers, the Association was never afterwards called together, and indeed soon became extinct. Last week a number of publishers gathered at Truro and a new Association was organized, which it is hoped will have a longer life. The newspapers of these provinces are fairly well conducted, but there is a great deal of useful work which an association of this nature might accomplish.

I observe your editorial reference in last issue to the annual meeting of our Good Roads Association. I may add that the attendance was large and much enthusiasm was manifested. The weather keeps backward and is having a deterrent effect upon trade. Dry goods merchants, especially, have cause for complaint in this regard.

Halifax, N.S., 4th April, 1904. ***

JAMES BAY RAILROAD.

As an alternative to granting a subsidy to the James Bay Railway from Toronto to Sudbury, the Ontario Government proposes to guarantee the bonds of that road to the extent of $20,000 per mile, amounting to a total of about $5,000,000. Part of the road south of Parry Sound, a distance of 95 miles, has already been subsidized in the sum of $4,000 per mile, or $380,000 altogether, besides another amount of money and land for the section north of Sudbury to Lake Abitibi. These subsidies it is now proposed, we understand, to withdraw in favor of the above-named guarantee of bonds. The railway will pass through 32 surveyed and two unsurveyed townships, 22 of which are at present without railway facilities. It will serve Toronto, and the towns of Beaverton, Orillia, Parry Sound, Copper Cliff and Sudbury. The municipalities through which the line is to pass have urgently demanded construction, and a large number of deputations have waited upon the Government in connection therewith. It has been pointed out that if the railway is not extended southerly beyond the Canada Atlantic, the only direct outlet for its traffic will be easterly into the Province of Quebec. It will form a link in the Canadian Northern system.

LONDON GUARANTEE AND ACCIDENT COMPANY.

If we translate into Canadian currency the figures of this company's report for last year they will show up as large ones. For example, its premium was £323,600 sterling, which is equal to $1,618,000, and it has a reserve for £130,000, or say $650,000, in addition to £136,090 carried forward, for claims under investigation. Then the balances on revenue account show a balance from last year after paying dividend of £195,495 ($977,000), and the balance of account for this year is £30,687, after paying interim dividend. After paying 5 per cent. on the preference shares £5,000 is transferred to reserve, and a dividend is recommended of 10s. a share and a bonus of 2s.; this on the shares on which £2 has been paid, being roughly about 30 per cent. on the investment. Among the criticisms, all favorable, which we have seen in English journals, that of the London Review says: "This office appears to be doing uncommonly well," and the executive officers are referred to in warm terms.

OCEAN ACCIDENT & GUARANTEE CORPORATION, LIMITED.

This company has had a satisfactory year. The report for last year shows that the net premiums were £1,101,182, and the claims paid and outstanding were 60.07 per cent. of the premiums. The expenses and commission amounted to 37.58 per cent. There was thus a gross surplus of premiums over claims and expenses of £26,026 (nearly 2½ per cent.) At the end of last year the reduction in the premium income involved a corresponding reduction in the reserve for unexpired risks to £351,200. When this reduction had been taken credit for, the trading profit on the year was raised to £40,326. This shows that the improvement on the trading on 1903, as compared with 1902, was £135,126. Adding interest receipts, which were £29,292, there was a credit balance at revenue account of £66,608. A sum of £35,828 has been carried from revenue to the investment reserve and suspense account, making it £50,000, in order to provide for depreciation in securities. The directors recommend a final dividend of 7½ per cent., making, with the interim dividend, 15 per cent. for the year. There is thus no occasion for shareholders to grumble.

A SCOTTISH INSURANCE COMPANY.

A copy has been sent us of the proceedings at the annual meeting, in Perth, Scotland, of the General Accident Assurance Corporation, Limited. This company appears to have made great strides in thirteen years, for it is only so long ago that it was formed. It does accident insurance, workmen's compensation, fire, life, burglary, insurance and fidelity guarantee. Its capital is £400,000 subscribed, and £100,000 paid up. And it had managed to secure in the year 1903 no less than £262,479 of net premiums, which is equal to rather more than $1,312,000. It is paying comparatively low dividends at present, but manages to add £10,000 to £20,000 a year to reserve, which is £130,000. The surplus revenue of 1903 amounted to £30,379. These are very creditable figures, and it is satisfactory to learn that the management, while energetic, is conservative and sensible. The like cannot be said of all companies which have been doing accident and fidelity guarantee business in Canada.

We learn from the report and balance sheet that this company has home, colonial, and foreign branches and agencies to the number of thirty-six. The colonial ones include West Indies, Australia, India, and a letter tells us that it is the intention of the corporation to do business in Canada by-and-by. The company has its head office for the United States in Philadelphia, where it owns a building, corner Fourth and Walnut streets; it also owns its office buildings in London and in Perth. Col. H. S. Home Drummond, the chairman of the corporation, spoke strongly in his address at the annual gathering about the competition in the accident business in Britain, where he said rates were being accepted for Workmen's Compensation and Fidelity Guarantee that are utterly inadequate. Some agreeable compliments were paid at the meeting to the officers and staff, upon the fact that the present is the best report the shareholders have ever received. In acknowledging them, Mr. F. Norie Miller, the general manager, said that for more than a dozen years the company had been expending money to cultivate an enormous field, but he gave them no hope that dividends would be made larger until the reserve fund equalled the premium income.

PROVIDENT SAVINGS LIFE.

An increase in every important item is shown in the statement of the Provident Savings Life for 1903. Never before did the company write so much in one year as $42,000,000; and the amount of insurance in force at the close of the year was $105,138,035, showing a gain in the latter item of $6,978,402. The financial statement shows assets of $7,310,138, invested in excellent securities, and a surplus as regards policyholders of $1,030,999. We learn further from the statement that the company's payments to policyholders last year aggregated $1,765,090. The Provident Savings has a competent man at its head, has a good variety of plans of life assurance, and is deservedly popular. Its Canadian business is well looked after.

THE DUTY ON SOFT COAL.

The question of abolishing the duty on bituminous coal coming into Canada continues to draw a good deal of attention. The Ottawa Board of Trade the other day drew up a strongly worded resolution in favor of the step on the ground that manufacturers and railways, who use it largely, would benefit, to which the Montreal Gazette makes a forcible reply. The issue is not new, says our contemporary. It was discussed in all its bearings in 1879 and in the Parliamentary election campaigns up almost to 1900 and again in 1896, and judgment went in favor of retaining the duty." The case for the retention of the duty is just as strong now as it was then. Indeed, it may be said to be stronger. The investments in Nova Scotia coal properties are larger than ever, and development work is being begun in the New Brunswick fields. The industry is locally more important now than at any time in its history, while nationally it has lost nothing of its value. The duty on coal was imposed as part of the National Policy. It has justified itself. The increase in the output of the eastern mines has been profitable to the country generally, and it is true that anything that, without securing advantage for the home market, which would be calculated to injure interests too great to be needlessly sacrificed is to be deprecated. What is said on the subject by our correspondent in to-day's Halifax letter may be referred to in this connection. The abolition of the duty finds few friends down there. It may be remarked, that Mr. Eugene Hale, of Maine, who is just now advocating reciprocity with Canada, would like to see this duty removed on his side the fence.

CREDIT INSURANCE.

We drew attention last week to the strong array of names of gentlemen applying for incorporation of "The Canadian Credit Indemnity and Guaranty Company," at the present session of the Dominion Parliament. This proposal to introduce credit insurance in Canada has originated, we are told, with Mr. Frank Arnoldi, K.C., who is the solicitor for the applicants for the charter. The subject is evidently creating enquiry, as Mr. Arnoldi has many seeking information on the subject already.

INSURANCE ITEMS.

A clever man has said: "You may properly indulge in to-day's luxuries if you have provided to-morrow's necessities." Apply this remark to a life assurance policy for to-morrow before you buy that box of cigars to-day.

The President was asked on March 24th to direct that an enquiry be made by the appropriate department of the National Government into the destruction wrought by fire in the United States. The subject was presented to him by H. B. Seely, of Chicago, who appeared in behalf of the founders of the National Society for the Prevention of Loss of Life and Property by Fire in the United States, the Illinois Manufacturers' Association, the Civic Federation of Chicago, and the Chicago Credit Men's Association. The object of the movement is to have the Government undertake certain statistical and scientific work in connection with fire losses which shall form a correct basis for individual action and restrictive State and local legislation.

Since the big fire in Rochester, premium rates have been advanced there. This is done by the local board of underwriters, as directed by the New York State Association. The advance is in the congested district, and its terms are 20 cents on each $100 of insurance on all buildings occupied for mercantile purposes; 30 cents per $100 on contents thereof; 30 cents per $100 on all buildings occupied for manufacturing purposes and 30 cents per $100 on contents thereof. These rates do not apply to any other risks in this district, such as

dwellings, churches, school houses, club houses, charitable institutions or public buildings. Special fire mains are being adopted in Rochester, and the Holly system in use is to be improved. Chief Engineer Fisher explains the details of the new plan as follows: "This is a plan for the reinforcement of the water system for fire purposes. The present capacity of the Holly pumping station is about 4,500 gallons per minute. The total capacity to be provided will be about 9,000 gallons per minute, or double the present capacity. The proposed auxiliary station will be located in South Water Street, and pumped through a pipe of proper size into the large 16-inch main in Main Street. The plan will be much more efficient than if located at the present Holly station.

We find in an American paper a list of the most striking railway accidents of the year 1903, involving loss of life. They are twenty-three in number: 321 persons were killed and 622 injured. The worst disaster was on the Baltimore & Ohio road just before Christmas. In it 65 were killed and 30 injured, and in November on the Illinois Central, at Kentwood, 30 were killed and 40 injured. The Intercolonial appears in the list with 6 killed and 25 injured in the accident at or near Halifax in April, and the Grand Trunk accident at St. Catharines accounts for 3 killed and 31 injured. The list is a gruesome one, and reminds us in the first place of the uncertainty of the most human skilful arrangements, and in the second of the wisdom of life and accident assurance for those who travel by rail.

The loss of a hundred lives in three railroad wrecks in one week has aroused a renewed demand that American railroads be run with more regard for the lives of the passengers. Nor do these disasters stand alone. The report of the Interstate Commerce Commission, made public the week before, shows that in the year ending June 30th last there were 5,219 railway collisions of all kinds (about 14 a day) in the United States, in which 321 passengers and 3,233 employees were killed, and nearly 46,000 (mostly employees) injured. The commission remarks that this record is a disgrace to the American people.—Literary Digest.

As an instance of the sort of thing life assurance agents run up against occasionally, the Indicator prints the following, which, it says, was received by the Detroit agency of the Mutual Benefit Life from a town in Michigan:

February 24, 1904.

Gentlemen,—I hereby Notify yous about your agent Mr. Geo. Tucker he has written out an order for that Policy in the Mutual Benefit Life insurance Company and has not even seen my folks about it until I told him and he went and seen them and they told him that they would not alow me except it and I told him the same but he wanted to be mean I suppose I will return the Policy and please hand it to some one else I do not want it and another thing he put my age down for 20 I am not 20 yet I am 19 years of age. that shows how crooket he is Please hand the Policy to someone else I do not want it I did not tell him I wanted that Policy anyway he wrote it out before I said yes and dident see my folks. This is all at Prenant I remain

Yours truely

BANKING AND FINANCIAL ITEMS.

This is the way the Philadelphia Press tells the story of a creditors' meeting: "It's easy enough to pick out the bankrupt," said the unsophisticated reporter at the meeting. "Yes?" replied the other. "Yes. See how shabby and careworn he looks." But the man replied: "That's the principal creditor. The bankrupt is that man with the fur overcoat and diamonds."

Following the item which we printed last week under this heading, illustrating the derangement of business these two months past, comes a letter from New Liskeard, in the Lake Temiskaming district of New Ontario, asking us to make known to bankers and commercial men what is to be expected of the communications with that district during the spring break-up. The manager of the Union Bank at New Liskeard writes, on 28th March: "I beg to call your attention to the fact that communications in this part of the country will, in the immediate future, be subject to interruption for a period of three or four weeks. Would it be asking too much that you should in your "Banking and Financial" column insert a notice to the above effect. Owing to your extensive circulation, it would reach all banking offices, and thereby save them a lot of needless correspondence.

If what is stated about the late Sir Henry Bessemer and the British Government is true, it is not very creditable to the Government. People have long believed, says Cassier's Magazine, that the late Sir Henry was knighted in recognition of the steel process which bears his name. This, it seems, was not true. The honor was bestowed when he was 66 years old, as a tardy reward for a service rendered the British Government 45 years before. It became known, about 1878, that the Inland Revenue Department of the United Kingdom was being defrauded to an alarming extent, perhaps £100,000 in a year, by the repeated use of stamps affixed to deeds. Bessemer devised a means of curing this: it was that of perforating the Government stamps with dates. This process is now in use in almost every commercial country. But the shame of the Government is that Bessemer never got the reward in money for his invention that Somerset House and the other big-wigs promised him, and got his knighthood only after the lapse of so many years. Happily he did not need it.

TRADE OPENINGS.

The following enquiries were made to the curator of the Canadian Section, Imperial Institute, London, S.W., week ending with March 25th: A manufacturers' agent in Sheffield is open to represent a Canadian manufacturer of starch. A firm in Cairo, Egypt, seeks the agency of a Canadian life insurance company. A manufacturer of flour and other maltings wishes to develop trade in Canada. A firm manufacturing specialties in machine tools would like to be placed in touch with Canadian importers. A house in Constantinople would like to establish business relations with Canadian manufacturers.

Canadian Government Office, London, 25th March.

More enquiries have come in for names of Canadian exporters of cheese, apples, etc. An English firm, which consumes flax largely, would communicate with growers or dealers in Canada. A German firm wishes to know exporters of dried fruits, evaporated apples, pears, apricots. A South American asks names of large makers of printing papers who can ship to Valparaiso in Chili. Patent wire fencing tool makers wish to know a Canadian house which will manufacture on a royalty basis. A Somerset firm is prepared to appoint an agent in Canada to sell their dressed harness leather and dressed boot upper leather. A firm of hosiery makers contemplate appointing an agent in Canada. A clock manufacturer for the wholesale and export trade would get into direct touch with Canadian importers.

FOR GROCERS AND PROVISION DEALERS.

A Midland grocer was standing on the top of a barrel of pickles the other day when it broke and he took an involuntary bath in brine. A young woman who saw the accident was given a pound box of candy not to say anything about the grocer's brine bath until all the pickles were sold. But —well, you know how women keep secrets, don't you?

On Monday last a terrific fire swept through the great cigar manufacturing district of West Tampa, Fla., destroying hundreds of tenement houses, rendering thousands homeless, and gutting the cigar factory of Santa Ella & Co., Caro & Co., J. M. Martinez, and L. Sanchez.

Sweet Spring has come! Below there comes a yell:
"Fresh feesh, panutta, strawberry, banan!"
New bric-a-brac adorns the mantel shelf—
For heaven's sake, stop that grinning "ole clo'es" man!

GUARANTEED—Absolutely—Principal and Interest, by the Detroit United Railway to yield **5 per cent.**

OSBORNE & FRANCIS, MEMBERS OF TORONTO STOCK EXCHANGE, **Mail Building, TORONTO.**

TORONTO STOCK TRANSACTIONS.

Last week was a short one, so far as the local Exchange is concerned, it having been closed, owing to the Easter holidays, from Thursday evening till Tuesday morning. No new feature whatever has developed, but the tone of the market has been, comparatively speaking, steady. The following is a summary of transactions: Bank of Toronto, 10 at 225; Commerce, 10 at 152; Imperial, 44 at 219-220; Dominion, 174 at 224-224⅛; Hamilton, 16 at 208-209; Traders, 55 at 137; West. Assurance, 65 at 80; Consumers' Gas, 8 at 205; (xd.), C.P.R., 2,173 at 115-116; Tor. Elec. Light, 29 at 130; Bell Tel., 118 at 137-137½; Rich. & Ont. Nav., 8 at 83¾; Tor. Rail., 100 at 100½-100⅜; Twin City, 820 at 92¼-93⅛; Can. Land. & National, 5 at 103½; Can. Perm. Loan, 14 at 122; Lon. and Can. Loan, 7 at 90; N.W. Land, pref., 3,650 at 100; St. Lawrence Nav., 10 at 98; Dom. Coal, 296 at 59¾-60½; N.S. steel, 625 at 78-78¼; Dom. Steel, 50 at 9; pref., 25 at 24½; bonds, $5,000, at 58; Sao Paulo, 188 at 92¾-93¾.

—It is announced that Mr. Alexander MacLean, lately appointed commercial agent to Japan, will be in Toronto on the 14th and 15th inst., for the purpose of meeting business people who desire to see him. Mr. MacLean will make his headquarters in the council chamber of the Board of Trade, so the secretary informs us.

—Lumbermen of the State of Washington complain that, owing to the possibility of cheap production of shingles in British Columbia through the permitted employment of Chinese and Japanese labor and through cheaper stumpage dues, they are unable to compete with the latter even in the American market. They are agitating, therefore, for the application of the maximum of duty allowed under the Dingley tariff. Under this law it could be raised from 30 cents, the present scale, to 55 cents per thousand.

—We in Canada have got used, especially within the past one or two years, to hearing the phrase "speculating parsons." And indeed the names of some of these worldly-minded gentlemen have become known through stock exchange operators. That the commercial parson is not unknown in the United States appears from a despatch which came over the wires on Saturday last. In the court room, at Worcester, Mass., a case was being tried in which members of his congregation were suing Rev. Roland A. Nichols for commission money, alleged to have been withheld from them by Mr. Nichols, who was interested with them in an oil speculation. After hearing evidence, Mr. Justice Samuel Utley denounced this reverend sinner and his associates in no measured terms. Judge Utley, in concluding his views on the case, said that he could scarcely find words in which to express his disgust at the whole transaction. He characterized the oil stock deal as one of the worst schemes of deliberate theft which had ever come to his attention. His final words, applied to these representatives of the Highland St. Church of Christ were a quotation from the New Testament: "My house shall be called the house of prayer; but ye have made it a den of thieves."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, April 7th, 1904, compared with those of the previous week:

Cities	April 7th, 1904.	Mar. 24th 1904.
Montreal	14,828,457	18,706,208
Toronto	12,486,169	13,627,996
Winnipeg	3,934,114	4,436,754
Halifax	1,256,853	1,340,525
Hamilton	955,056	1,112,296
St. John	788,796	796,546
Vancouver	1,121,240	1,301,023
Victoria	367,579	526,890
Quebec	1,283,602	1,211,600
Ottawa	2,033,944	1,859,483
London	.....	750,955

KING'S COUNTY BOARD OF TRADE.

The annual meeting of this board was held at Kentville, N.S., on Saturday, 26th March, the president, Mr. C. O. Allen, in the chair. The president's address referred to the visit of the Chambers of Commerce delegates to the Annapolis Valley, and their delight therewith; to the newly appointed transportation commission; to the great industry of the district, apple cultivation and export; and to the work of the board generally. Dr. Moore, of the Kentville Board of Trade, spoke of the advantages from the visit of the British delegates, and advocated the publication and distribution of a well-illustrated paper each year in Great Britain, advertising and telling the truth about the fair Acadian land. A committee was appointed to confer with the Kentville Board about such a paper. Officers for the current year were elected as follows: President, Capt. C. O. Allen; vice-president, J. E. Kinsman; sec.-treasurer, H. G. Harris; auditors, M. G. De Wolfe and P. Innis. Council, Messrs. Hubbard, Lewis, Herbert Stairs, J. E. Kinsman, A. M. Covert, G. McLean, Fred. Fisher, E. S. Congdon, A. M. Griffin, Ainslie Bishop, J. L. Gertridge, Dr. Chipman, W. C. Hamilton, P. N. Balcom, W. W. Pineo, A. E. MacMahon, P. Innis, C. F. Rockwell, R. S. Eaton, J. W. Ryan, B. O. Davidson, F. J. Porter. We refer editorially elsewhere to the discussion which arose on the board as to subsidies for apple carriage and other matters. It is important to observe that 50 new names have been added to the membership roll of this board within the past twelve months.

PROSPECTS FOR NAVIGATION.

"And the spring comes slowly up this way," is the burden of many a letter from northern Ontario in these days. One communication from near Orangeville says: "The ice is *feet* thick, in some of the lakes near here, and the snow, up to Good Friday or thereabout, was four feet on the level, but now it is thawing underneath." From Owen Sound and Collingwood and Parry Sound the tidings are that a late navigation must be looked for. In Lake Ontario there is much floating ice. Toronto harbor is still solid and neither here nor at Kingston is there prospect of navigation until the end of April. But, per contra, we had the pleasure of receiving yesterday a letter from Amherstburg of a very different tenor. It says: "The weather here is quite spring-like. The steamer 'City of Detroit' has just come down the river from Detroit, bound for Cleveland, on her first trip this year, and this is earlier than we dared expect a month ago. There is very little ice in the river now." On the other hand there is ice in Lake St. Clair still, and the Detroit News doubts if a boat can go to Algonac by Sunday next. In the Lower St. Lawrence, conditions are wintry still. At Montreal on Wednesday there was a slight ice shove, and the ice was found to be quite rotten. A schooner left Quebec on Saturday last for Pentecost, in the Saguenay district.

THE Dundee mine, at Ymir, B.C., which was recently taken over by a syndicate of Toronto and Vancouver capitalists, has now resumed operations. The workings have been pumped out, and a trial shipment of 15 tons has been sent to the smelter, returns from which show a value of $32.05, chiefly in gold. Development work is to be carried on at a greater depth, and probably a concentration plant will be put in.

BY the construction of a new line, or rather by the extension of the Montfort and Gatineau from its present terminus at Morin Flats to St. Jerome, and thence in a straight line down to Charlemagne and over the Bout de l'Ile bridge, the Great Northern Railway will gain its desired direct entry into Montreal, instead of having to bring its cars from the west down by way of Joliette, as at present.

Distinctly in Your Interest

IS THE SERVICE RENDERED BY

The Canadian Casualty & Boiler Insurance Co.

This service explained to you by writing to-day to the Company at its Head Offices, 22 Adelaide E., Toronto. A large staff of employees who are

SKILLED ENGINEERS

and those expert in their business are at your service. We are closely in touch with all our clients, and vigilantly guard their safety, their interests, and endeavor to be of practical financial help to all steam users who insure their boilers with us.

Write to-day for information

A. C. C. DINNICK, Man. Director

22 ADELAIDE EAST, TORONTO

A STRONG COMPANY

NEW Brunswick lumbermen are not at all hopeful over the outlook for this season's trade. In the first place, the English market is not good, and few contracts are being made, while prices are much lower than last year. Then in the second place, there is much worry over the prospects for getting the winter's cut out. It is said that there is only about two and a half feet of snow at the headwaters of the St. John, while the average of other years at this season is five or six feet. It is obvious that unless there are unusually heavy rains the freshet cannot be as great as in other years. A meeting of St. John lumbermen was held recently to discuss action that may be taken in the event of a sudden break-up of the river, to save the 36,000,000 of logs that are now about Grand Falls.

MONTREAL MARKETS.

Montreal, April 6th, 1904.

Ashes.—There has been no improvement in receipts, and dealers appear willing to pay from $6.15 to $6.25 for No. 1 pots, and about $5.80 for seconds. For pearls a fair approximate quotation

would probably be $7 to $7.25, but there has not been a transaction reported for some weeks.

Dairy Products.—The butter markets appear to tend to easiness, probably due to the advancing season, though new grass butter is a long way off yet. New made creamery is quoted at 20½ to 21c.; held ditto, 19 to 20c.; dairy, about 15c.; rolls, 16 to 17c. Cheese is very quiet. Shipments since close of navigation have been over 400,000 boxes, and present stocks must be very low. Last quoted sales of desirable goods were at about 10c. Shipments last week, via St. John and Portland, were 40,405 boxes of cheese, and 1,709 packages of butter.

Dry Goods.—Travellers report that spring stocks in the country are not greatly broken into as yet, and sorting orders are said to be coming in rather slowly from this quarter, but city retailers are reported to be pretty frequent visitors among the wholesale warehouses, and are apparently fairly satisfied with their sales. Full returns as to 4th April payments are not yet made up, but they are not expected to show figures equal to those of last year. There is nothing specially interesting in recent European advices, except that linens are becoming dearer. There seems to be a growing expectation in the trade that the present session of Parliament will result in some increased protection to manufacturers of cotton and woolens.

Furs.—Spring rats are now offering, and dealers are quoting 23c. for extra large best; large, 22c.; medium, 20c.; small, 18c.; damaged, in proportion. For black bear, $12 would be about the limit for fine large skins. There has been some revision of quotations owing to result of late sales. Quotations for prime pelts are as follows: Beaver, $5 to $6.50 for large; medium, ditto, $4 to $4.75; No. 1 choice bear, $12 for large, $8 for medium, and $5 for small; badger, 30 to 50c.; fisher, No. 1, dark, $3.50 to $4.50; ditto brown, $3 to $4; pale ditto, $2 to $3; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $3 to $6 for No. 1 marten, $2 to $2.50 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—There is little new in this line. The general demand is a little improved, but remittances are on the slow side. The sugar market is a steady one; refiners report a steady demand from jobbers, and quote standard granulated at $4.15 in barrels, with yellows ranging from $3.55 upwards. Molasses seems a little easier at the island; a cable received on Saturday quoted 19¾c., but a second cable to hand yesterday asked for offers. For teas there is reported increased enquiry from the country, and values generally are firm. The canners are expected to shortly issue a revised price list for canned fruits, on the ground that the severe winter has done much damage, and that the crop for the coming season will be short.

Leather.—Boot and shoe manufacturers are now well through with spring deliveries and are turning their attention to fall samples, but there is a moderate, steady local business being done in leather, and continued good export demand is reported for sole. Jobbing lots of sole are scarce, and quotations are steady on the basis of about 24c. for No. 2 mfrs., and 25c. for No. 2 jobbing. In black leathers there is a tendency to firmness.

Metals and Hardware.—With the coming into effect of spring freight rates on the 1st, business in these lines shows some improvement. In prices there have been no recent changes of consequence. Bars are easy at $1.65 to $1.70, with bar steel to proportionate figures. For Canada plates the jobbing quotation is $2.20 to $2.25, but it is claimed fair lots can be done better. Galvanized sheets are quoted at $4.25, and galvanized Canadas at $4 for 52 sheets. Tinned sheets are unchanged. Iron pipe is

steady at $4.42 for inch. Ingot tin shows a little further strength in London, and is quoted locally at 32 to 33c.; lead firm at $3.35; the discount on lead pipe is 30 per cent. from list; copper is also firm at 13½ to 13¾c., and antimony at 7¾c.

Oils, Paints and Glass.—There is a brisk despatch of goods in these lines now that summer rail freight rates have gone into effect, and travellers are reported as doing better in the way of taking new orders. The only notable changes is a further decline in turpentine.

TORONTO MARKETS.

Toronto, April 7th, 1904.

Chemicals, Drugs, Etc.—Business has shown considerable improvement, no doubt owing to the resumed transportation facilities throughout the country districts. Quinine remains quite firm at the recent advance. A scarcity prevails in camphor, and it is very firmly held at high figures. Glycerine continues about normal. Codliver oil has taken an upward turn again, and it is still very scarce. Turpentine has declined slightly. Opium remains low-priced, but may go up a little shortly, judging from indications. There are few new features reported on the New York market. Menthol is a little weaker. Truxillo cocoa is stronger. Russian cantharides also is stronger, owing to light stocks held. The demand for cocaine is brisk.

Flour and Grain.—The flour market is quiet, with ninety per cent. patents quoted at $2.60 to $3.70 in buyers' bags, middle freights. Millfeed, both bran and shorts, has become firmer. A steady market obtains for oatmeal at old prices. No change has occurred in grain prices since last week's quotations. Little business is passing. Both Manitoba and Ontario wheat, however, keep steady and so does barley. Buckwheat is dull. Peas are as before.

Fruits and Vegetables.—A fair trade has been done this week by local fruit and vegetable firms. New features are rare, except the ordinary succession of products displayed on the market as the year progresses. The following represents trend of average prices: Apples, 75c. to $2.50 per barrel, according to quality; cocoanuts, $3.75 per sack; oranges, California navels, $2 to $3.25; Mexican, $2 to $2.50; Valencias, ordinary, $3.50; large, 714's $5; marmalade oranges, $2.50 per box; lemons, Messina, 360's, $2.50 to $2.75; 300's $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; cranberries, $7 to $9 per barrel, $1 to $1.25 per basket; Spanish onions, $3.50 to $4 per large case, and $1.25 for small; Malaga grapes, $6.50 to $7.50 per barrel; case tomatoes, $4 to $5; dates, Sair, 3½c. per pound; Hollowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; pineapples, $3.50 to $4.50 per case.

Groceries. —The improved conditions continue, and now the volume of trade may be classed as fully up to average. Sugars continue firm, in sympathy with New York. The trade in teas is quite active, and prices are firm. Canned goods have hardly kept up their usual activity this week. Payments are fair.

Hardware.—No change has occurred in the conditions prevailing in the hardware trade since last report. Trade is very fair and is likely to improve weekly from this time forth. Prices continue steady both for shelf goods and heavy metals, in which the movement is said to be normal.

Provisions.—Large dairy rolls are coming in in somewhat large quantities, and so is creamery, but the demand for both is pretty good, so there is little accumulation of stocks. Cheese is moving with some degree of briskness. Eggs have declined considerably, the price for new laid now usually quoted being sometimes as low as 18c. The demand for chickens is good, and prices are steady, at 15 to 16c. for choice stock. For turkeys, 13 to 14c. is wanted. Canada hops are steady at 27 to 30c. Prices for most lines of hog products keep steady, though the demand, as is usually the case at this season of the year, is not large. Improvement is expected shortly.

Seeds.—There is a brisker enquiry for all kinds of seeds now with the approach of the sowing season. Local dealers quote $5.25 to $5.75 for red clover and $6 to $6.50 for extra choice, $3 to $4.25 for ordinary alsike, and $5 to $5.25 for choice lots, $1.15 to $1.50 for machine-threshed timothy, and $1.50 to $2 for flail-threshed.

Wool.—But little business is being transacted at the moment in wool. Fleeces are very dull, and the wants of the domestic mills for pulled wools are very moderate.

FINANCES IN THE UNITED STATES.

Henry Clews & Co., in their weekly circular dated April 2nd, say: One effect of the merger decision has been to remove the uncertainty which held in check a number of important railroad deals. Now that competing roads cannot be put under control of a holding company, other means are being sought for railroad development, for restraint of cut-throat competition, and for stability in rates and earnings. The enormous growth of our railroad systems has created forces which tax the ingenuity of our ablest financiers and lawyers to withstand; and self-preservation is simply driving the great leaders into some sort of co-operation, which they naturally desire to make as permanent as possible. Just where the line shall be drawn between too much concentration and too much competition is the problem now before the railroad magnates of the West; and it is impossible for either insiders or outsiders to anticipate the final outcome. Suffice it to say that moves of great importance are now being made on the financial chessboard the ultimate outcome of which is likely to be beneficial to all concerned. The money market continues easy because business and speculative requirements are less urgent than formerly. Neither the April settlements nor the prospect of gold exports had any appreciable effect upon rates. Some comment was made upon loans passing the billion mark for the first time, and the prospect of diminished bank reserves; but even these factors created no uneasiness in banking circles, for the reason that the present high record in loans is largely due to the borrowings of strong corporations, who find it more advantageous to raise necessary funds in this fashion than to issue new security issues when values are low. London has been more friendly to American stocks; but no special foreign support can be counted upon until it is known what the war will bring forth. In the general situation, there has been little change from our previous advices. The approach of spring is causing more or less revival of industrial activity and resumption of business. Railroads are also experiencing the benefit of these conditions and reporting better earnings than one or two months ago. The outlook is for a fair spring trade, especially where price readjustments have placed business upon a sounder basis.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

HEAD OFFICE, LONDON, ONT.
JOHN MILNE, MANAGING-DIRECTOR
The Northern Life has some Good Districts Open for Live, Energetic Agents.

Strength and Stability

Are the important elements required in effecting insurance, —guaranteeing, as they do - the absolute fulfillment of the contract.

The financial position of the

NORTH AMERICAN
is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life Assurance Co., Home Office, TORONTO, Ont.
J. L. BLAIKIE, - - - - - - PRESIDENT.
L. GOLDMAN, A.I.A., F.C.A., - MAN.-DIR.

The ROYAL-VICTORIA Life Insurance Co. of Canada.

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE, A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS
in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

TORONTO.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in
THE BOILER INSPECTION & INSURANCE CO. OF CANADA,
Canada Life Bldg., Toronto,
which has been in this business for nearly THIRTY YEARS.

Then Insurance.

Mercantile Summary

The town of Sackville, N.B., is applying to Legislature for power to borrow $30,000, to be applied in extending the water and sewerage systems and installing a fire alarm system for that growing town.

The Boston News announces that capitalists of that city, New York and Worcester, Mass., are forming a company with a capital of $150,000 to build a factory for the manufacture of Wilton and Brussels carpets in Sherbrooke, Que.

The embarrassment is noted of F. Parizeau, dealer in lumber at Beloeil Station, Que., and he is making an offer to his creditors of 50 per cent. on liabilities of about $21,000. Mr. Parizeau has long been in business in the locality, formerly as an extensive operator in hay, in which line he is said to have met with variable success.

A despatch from Rossland, B.C., dated 6th inst., said that the Le Roi mine had suspended shipments of ore pending the completion of arrangements for resumption at the smelting works in Northport. A hundred and eighty men were laid off at the mine out of 400, the rest being retained for development and exploration. It is stated that work will be resumed in full at the earliest date possible. One of the difficulties in the way of the management is the shortage of fluxing ores.

A man in general trade at North Temiscamingue, Que., Z. Forget, has made an assignment. He was formerly of the firm of Samson & Forget, who dissolved in the spring of 1903, when he assumed the liabilities of the firm, amounting to about $7,000, on which the creditors gave him an extension, in payments spread over a year. J. Samson, his former partner, then opened store on his own account at Ville Marie, in the same district, and his assignment is also now reported. These two failures of traders ought not to prejudice the reputation of the Temiskaming country unduly, for there is probably mismanagement and over-buying on the part of either or both.

Last week the United States Government Census Office gave out a final summarized report on the ginning of the 1903 cotton crop. Counting the round bales as half bales, the total was 10,014,454, against 10,784,473 for the crop of 1902. Stated in equivalent bales of a 500-pound standard, the total was 10,045,614, against 10,827,168 for 1902. Counting the total number of commercial bales without regard to character or weight, the crop was 10,399,558 bales, against 11,275,105 for 1902. In each of these totals there are included 194,485 bales of linters reported from cottonseed oil mills for 1903, against 196,223 bales of linters for 1902. There are also included in each total 75,401 commercial bales not yet ginned. The returns by States show that, with the exception of the insignificant gain in Kansas, Alabama was the only State in which more cotton was produced in 1903 than in 1902.

THE provisional directors of the Trans-Canada Railway Company will apply at the present session of the Dominion Parliament for an amendment to the act incorporating the company, to authorize the holding of the first meeting of the shareholders of the company as soon as $1,000,000 capital has been subscribed and ten per cent. paid into some chartered bank in Canada, and also to amend the act by providing that $1,000,000 of the capital stock shall be expended thereon within four years from the passing of this act.

Mercantile Summary.

SHERBROOKE will have a branch post-office in the South ward by 1st June next.

THE Victoria, B.C., Printing and Publishing Company are about to put in machinery for the manufacture of automatic ledger binders and transfers.

NAPANEE council has decided to submit a by-law to the ratepayers for a bonus of $20,000 for the proposed electric road from Kingston to Toronto.

THE Keewatin Milling Company, recently organized with a capital of $2,000,000, is beginning the construction of a large mill at Lake of the Woods with a capacity of 3,000 barrels of flour per day.

THE contract for metal work on the proposed 11,000-ton floating dock, at Vancouver, has been awarded to Messrs. Swan & Hunter, of Newcastle-on-Tyne. All the iron and steel work will be turned out at that place, it appears, and transported to Vancouver by sea.

THE Dominion Government has extended the subsidy to the Vancouver-Australian line of steamships, which would have expired this spring, until May, 1905. They have also increased it by $45,000, on the understanding that the service will be more frequent.

A REPORT recently issued by Mr. C. W. Macara, president of the Federation of Master Cotton Spinners, at Liverpool, shows that the loss to wage-earners in the cotton industry, resulting from the necessity for short time, amounts to $550,000 weekly, or $6,875,000 since the short time was started. The total loss to the employers is $200,000 weekly, making the loss to Lancashire about $750,000 weekly.

THE Western-Canadian Collieries, Limited, a company incorporated with an authorized capital of £1,000,000, under British laws, and licensed by the Dominion Government to carry on mining operations in the Yukon and North-West Territories, has petitioned for an act to enable it to prospect, explore and own mines and ground containing or supposed to contain minerals, ores or precious stones, and to carry on the business of mining, smelting and refining.

RUSSIA, Denmark and other Continental countries are taking greater care than ever in their selection and manner of shipping eggs, butter, and similar products. As a result, these articles, especially those from Russia, which is surprisingly up-to-date in these matters, are becoming exceedingly popular. Surely here is food for thought on the part of Canadians. Last year the United Kingdom imported 19,848,897 great hundreds (120) of eggs, valued at £6,617,619. Canada's share of this large trade amounted to only 557,080 great hundreds, valued at £218,571. The imports from Russia amounted to £1,866,421, and from Denmark to £1,648,367. Germany, Belgium and France are the other leading exporters of eggs to Britain, each of these countries sending several times as many as Canada.

ACCOUNTANT AND AUDITOR

At present engaged in public practice with large and prominent firm, desires engagement as Auditor, Secretary or Treasurer. Is experienced, energetic, reliable, possesses analytical and executive ability, and is capable of effecting simple and efficient systems of accounts, showing facts and their causes. Address Box 24,
Monetary Times.

A CIRCULAR from the Eastern Townships Bank announces further changes in the staff: Mr. A. G. Campbell, late manager of Danville branch, is transferred to Bedford, as manager, succeeding Mr. W. H. Hargrave, now assistant manager at Montreal; Mr. W. N. Stone, of the Granby branch, succeeds Mr. Campbell, at Danville, as manager; Mr. R. P. Buzzell, manager of the Sutton branch, who it was stated had been transferred to Bedford, remains in his present position.

DURING March, the output of coal from the Dominion Coal Company's collieries was considerably larger than for some time previously, namely 236,290 tons, or 50,000 more than during February. They are expected this season to produce the greatest output in the company's history. Hub colliery, idle nearly all last year, will, it is said, soon produce a thousand tons per day. The severity of the weather and snow and ice interfered with operations this winter. The new colliery at Big Glace Bay will be producing coal before the end of the season. Dominion No. 1, which was on fire, is now nearly pumped out.

Standard Life

Seventy-Eighth Annual Meeting.

The 78th Annual General Meeting of THE STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Tuesday, the 29th of March, 1904.

The following results for the year ended 15th November, 1903, were reported :—

5,408 Policies were issued during the year, assuring	$ 11,718,525
The Total Existing Assurances in force at 15th November, 1903, excluding Bonus Additions, amounted to	$134,560,035
The Claims by Death during the year, including Bonus Additions, amounted to	$ 3,385,152
The Claims under Endowments matured during the year, including Bonus Additions, amounted to	$ 362,420
The Revenue for the Year from Premiums and Interest amounted to	$ 6,765,620
The Amount Received in Purchase of Annuities during the year, for which 171 Bonds were issued, was	$ 628,160
The Accumulated Funds at the same date amounted to	$ 53,603,009
Showing an Increase during the year of	**$1,808,648**

The average rate of interest returned from the funds, including unproductive balances, was reported to be **$4.13** per cent.

Mercantile Summary.

THE Rat Portage Lumber Company has been authorized to increase its capital from $500,000 to $2,000,000.

THE Frost Wire Company are about to build a two-story brick factory in Hamilton and move into it from Welland, Ont.

FORMERLY a farmer, Alex. McLeod, of River Dennis, N.S., who has been a storekeeper since 1897, has assigned. He has been reported very slow pay, for some time past.

THE Canadian Pacific Railroad is about to build two large freight sheds in Winnipeg, one of them 1,224 feet long, and the other 608 feet. The company has also begun construction work on its round-houses at Brandon, Moosejaw, Swift Current, and Ignace.

THE Department of Railways and Canals has awarded the contract for lighting the Welland Canal to the Canadian Westinghouse Company, Hamilton. The lamps will be placed 400 ft. apart, for a distance of 28 miles. Power for the purpose will be obtained from De Cew Falls.

THE firm of Gordon & Keith, wholesale and retail furniture dealers, of Halifax and Sydney, N.S., are reported as trying to effect a settlement of their recent difficulties by a cash compromise of 33 1-3 cents in cash, or 40 cents, cash, in the dollar on time. Their total liabilities are put at $98,604, of which $3,048 are preferred.

IT is announced by Mr. W. Whyte, second vice-president of the Canadian Pacific Railway, that what has been known in Manitoba and the North-West as the lumber combine, has now become a thing of the past, and that this article, so essential for new settlers, will be sold in future on an open market, no agreement restricting the different producers.

THE annual meeting of the Henderson Roller-Bearing Manufacturing Company, Limited, was held in Toronto on the 7th inst. The report for the year made a very satisfactory showing, and the directors recommended the payment of a dividend of 10 per cent. on the amount paid-up on stock. The company is considering the advisability of enlarging their capacity by the erection of another factory.

PETERBORO council will shortly submit to the people a by-law to guarantee the Peterboro Sugar Company's bonds to the extent of $100,000, taking a first mortgage as security. The council is willing, upon the arrival of the machinery ready to equip a completed beet sugar factory, to pay $50,000, and the remainder once the factory is in operation, while the company agree to return $50,000 inside of three years and the remainder in equal yearly instalments inside of seven years. It is said that upon the understanding that the city should do this, some capitalists connected with the Wallaceburg sugar factory would invest considerable money in the concern.

Mercantile Summary.

KINGSTON, Ont., council has made an agreement with Mr. J. M. Campbell to bring electric power from Kingston Mills to supply the city and two or three industries therein.

THE Northern Elevator Company have completed their plans for the erection of a large flour mill in Winnipeg. It will be of concrete, stone, and brick, and of a capacity of 2,000 barrels per day.

MESSRS. D. G. Loomis & Sons, contractors at Sherbrooke, Que., have been awarded a contract from the Goldie & McCulloch Safe Company for erecting two large buildings, 200 feet and 300 feet in length, respectively, at Galt, Ont. The firm have also received a contract for a warehouse at Montreal for Messrs. Coristine Bros., on St. Paul and Lemoine streets, 260 feet by 90 feet and six stories high.

F. PAYETTE, tailor and dealer in men's furnishings, at St. Johns, Que., one of the sufferers by the late fire in that place, is trying to arrange with his creditors at 50 cents. His stock of from $8,000 to $10,000 was destroyed, and he is said to have received $5,500 insurance.

AN offer is reported from O. A. Ham, general dealer and shipbuilder, of Mahone Bay, N.S., of 25 cents in the dollar. A year or so ago he was reported in difficulties and trying to compromise; subsequently a registration was made that he authorized his wife, Etta E. Ham, to carry on business.

RESPECTING the weather and the prospects of navigation at Quebec and the lower St. Lawrence, a letter of last Saturday says: "Everything hereabout is very wintry yet, but the river and gulf are clear for vessels. A few of them have been moving during the past week, but no regular liners have started."

ON Tuesday last, Mr. T. J. Jermyn, vice-president of the W. R. Brock Co., died of an apoplectic stroke. He was 58 years old. Mr. Jermyn came to Canada in the seventies, and lived at first in Hamilton. He entered the Brock employ 25 years ago, becoming a member of the firm ten years later.

A CONTRACT has been signed, says a Detroit paper, for the placing of a big coal lighter in the Detroit river. The lighter will operate in connection with the Pittsburg Coal Co.'s docks at Sandwich and Amherstburg. The contract in question is for the fueling of the big passenger steamers of the Detroit and Buffalo line. The lighter will be a great saver of time and labor. As soon as the big boats arrive from Buffalo the fuel carrier will go alongside and coal them up while the passengers and freight are being put ashore.

KEEWATIN FLOUR MILLS CO.

The Keewatin Flour Mills Company, Limited, is offering for subscription $1,000,000 worth of stock, of which $600,000 has been already taken up by the directors. It is to carry on a general

flour milling business and proposes to acquire a water power at Keewatin, on the main line of the C.P.R., four miles west of Rat Portage. From this, it is estimated, at least 5,000-h.p. can be obtained. The company also intends to erect a flour mill at Keewatin with a capacity of 3,000 barrels per day, to manufacture exclusively from the grain products of Manitoba and the North-West. As a rule, water power for running flour mills has been found to be much cheaper and more profitable than steam, and the above-named power, situate as it is at the outlet of Lake of the Woods, which is entirely free from the drawbacks of low water in summer and frazil or anchor ice in winter is expected to prove very advantageous in this regard. A dam at the outlet will keep the water at a given level, so that in effect there will be a mill-pond with an area of 3,000 square miles, entirely covered with ice in winter, and the flow never interrupted. As a result, it is estimated that the company will be able to make flour at an average cost of say ten cents per barrel less than steam power, and even seven cents less than many of the best water-powers in use. The annual output to start with is proposed to be nine hundred thousand barrels. If they can thus effect a saving in operating of power of $65,000 to $95,000 a year, this would be a large profit in itself.

SPRING FLOODS AROUND MONTREAL.

Some of the suburbs were on last Sunday and Monday visited by one of the worst floods in their history, and the city itself was only saved therefrom by hurriedly improving the dyke in St. Gabriel Ward. In Verdun, for some hours the water was half way up to the first story of many of the houses, and the occupants had to take refuge in the upper flats, while from three to five ft. of muddy water flowed through the streets. Nun's Island, above the Victoria Bridge, was inundated. The dyke extending from the tail race to Victoria bridge, protecting Point St. Charles, was severely tested, but stood the strain wonderfully. At the water-front along the harbor there was an anxious time. On Sunday afternoon the water rose from a height of 34 ft. 9 in. to 40 ft. 7 in. in the course of a few minutes, but fortunately it fell again within a few hours. At Maisonneuve, the new pier works are believed to have been injured, while at Laprairie considerable damage was done, four houses being completely demolished. The water rose 20 inches higher than it did in the great flood of 1886. At Lachine the water was within two inches of the top of the pier. At St. Lambert, across the St. Lawrence from the city, fifty houses were flooded. The ice in the Richelieu river has entirely disappeared, without causing any damage to the boats wintering at Sorel. At Three Rivers the ice, according to latest reports, still held firm, and the gulf was clearing rapidly.

"LE LAC TEMISCAMINGUE."

Edtior, Monetary Times,—

Sir,—I have read in your paper last week the article on North-Eastern Ontario, and what you say about New Liskeard, etc. But no one says much about what has been done on the Quebec side of Lake Temiskaming. I may remind you that, energetically as the Ontario Government and people have of late years colonized the upper part of Temiskaming, the Quebec authorities were ahead of them. In a book on the Upper Ottawa, *L'Outaouais Superieur*, published by C. Darveau, Quebec, in 1889, Arthur Buies has described, in his charming way, the settlement of the east shore of the lake. Indeed, he describes the whole Ottawa river, from Mattawa north. It was in the year 1884 that an ardent and indomitable Oblat priest, named Paradis, examined the whole Temiskaming Valley with a view to its colonization. His scheme at that time included "the removal of the rapids that hindered navigation on this portion of the Ottawa by lowering the level of the lake by blasting away the reefs that form the head of the Long Sault rapid, raising the level of the Ottawa by constructing a

TO THE SUBSCRIBERS OF THE CAPITAL STOCK OF THE CROWN BANK OF CANADA.

Public notice is hereby given that a meeting of the Subscribers of the Capital Stock of The Crown Bank of Canada will be held on the ninth day of May, 1904, at twelve o'clock noon, at the bank premises, No. 34 King Street West, in the City of Toronto, Ontario. The business of the meeting will be

To determine the day upon which the annual general meeting of the bank is to be held.

To elect such number of Directors duly qualified under the Bank Act—not less than five, nor more than ten, as the subscribers may think necessary—who shall hold office until the Annual General Meeting of the year next succeeding their election.

To fix the quorum for a meeting of Directors, which shall not be less than three.

To fix the Directors' qualification, subject to the provisions of the Bank Act.

To fix the method of filling vacancies in the Board of Directors whenever the same occur during each year.

To fix the time and proceedings for the election of Directors in case of the failure of any election on the day appointed for it.

To determine when to close the stock books for subscription of the bank's stock by the public at $110 per share.

To prescribe the record to be kept of proxies, and the time, not exceeding thirty days, within which proxies must be produced and recorded prior to a meeting in order to entitle the holder to vote thereon.

And to regulate such other matters by by-law as the shareholders may regulate, pursuant to the terms of section 18 of the Bank Act.

Dated at Toronto, April 8th, 1904.

By order of the Provisional Directors.

FRANK ARNOLDI,
Secretary of the Provisional Directors.

dam at Mattawa." Having attracted the attention of Bishop Duhamel, of Ottawa, that worthy prelate caused, in 1884, the formation of the Societé de Colonization de Temiscamingue, Rev. Father Gendreau, an excellent man, president. In 1886, another colonization society for that region was formed by merchants of Montreal, and the writer remembers seeing at an exhibition in Montreal, about 1890, exhibits of its grains, woods, and vegetables.

The next thing attempted was to get the Dominion Government to build a railway, or even a tramway, six miles long, to overcome the Long Sault and the Mountain rapids of the upper Ottawa. They did grant $3,200 a mile, and the Quebec Government $2,500 a mile, and an engineer had located there by 1887. In the interval, boats were built to run on the big lake, and also between Mattawa and the Long Sault. Two townships bordering on the lake, named Duhamel and Guigues, were surveyed, and by 1887 had 110 dwellings built on them; 1,535 acres in grain and pasture. A post office was placed at Baie des Peres, on the east shore, in 1886, in which year there was a church, a convent, a hospital, and some twenty families at that place, which has since grown, and is now named Ville Marie. In 1899, Buies tells us, both these townships were erected into municipalities. Father Paradis, in his report to his bishop, cannot say enough about the settlement: "Duhamel township," he says, "has a most favorable climate for all kinds of grain . . . the soil is of the best quality, watered here and there by pretty little brooks, and exposed in mild declivities to the mid-day sun. Grain ripens here marvellously fast. . . The canton is traversed by a road leading northward; it is the route of lumber shantymen, consequently a commercial channel." I am told that much progress has been made on the Quebec side since then.

Ottawa, 11th April, 1904. A. E. D.

Why Waste Coal?
A smoke consumer that will consume, and at the same time effect a saving in fuel of from 5 to 25 per cent. must interest all power users.
That this is done by the
Royal Automatic Smoke Consumer
is clearly shown by the following letter:

Toronto, Ont., April 8th, 1904.
Royal Automatic Smoke Consumer Co.
Dear Sirs,— Toronto, Ont.
With reference to the three Royal Smoke Consumers installed by you in connection with our Boiler plant we desire to say that the representations made by you as to their efficiency have been satisfactorily demonstrated and the boilers are in no way defaced by the attachment. A very considerable saving in fuel is evident and the smoke is almost entirely dispersed.
During the most severe weather of the past winter we have been able to operate with two boilers where three were previously required. The cold air drawn by the steam blanket when the doors are open to fire, driven direct into the fireplace, causes a thorough combustion and no carbon seems to escape. The flues do not require such frequent cleaning, and steam is decidedly easier to keep up.
Yours truly,
(Signed) H. L. WATT, Treasurer.
CANADA LIFE ASSURANCE COMPANY.
The above is but one of a number of similar letters.

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said:

"It's quality, not quantity, I'm after. I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

CANADIAN EXPORTS.

Continuing our examination of Canada's exports, begun in our last issue, we present a condensation of different tables to be found in the Trade and Navigation Returns. Our desire is to show briefly the nature and extent of the exports, and also, when possible, to what countries they go.

Acknowledgment should be made of the improved character of the Canadian Trade Returns of late years, not only in their arrangement but in fullness of indexing —by no means a slight matter to such persons, like ourselves, as have frequent occasion to consult them. There is less of the academic and more of the business-like in their contents.

Bringing down the totals of different departments of exports we find their distribution to our principal customers to be as under:

Recapitulation of Exports.

Produce of	To Great Britain.	To the U. S.	Total.
The mine	$597,130	$29,546,605	$31,064,861
The fisheries	3,904,793	3,760,266	11,800,184
The forest	16,742,435	16,977,232	36,386,015
Animals and produce.	62,998,927	5,319,198	69,817,542
Field products	34,206,693	3,882,282	46,624,321
Manufactures	6,728,298	8,236,129	20,624,967
Miscellaneous	21,704	44,655	83,784
Grand total	$125,199,980	$67,766,367	$214,401,674

Of this total of $214,401,674, which is the largest export of Canadian products in one year ever known, more than half, or 58.39 per cent. in value, went to the United Kingdom; 31.61 in value to the United States; the remaining 10 per cent. going to other countries.

The proportions of different kinds of products in the list show that our largest exports were those of animals, meats, dairy produce, etc., 32.32 per cent. of the whole, while field products amounted to 21.41. The remaining kinds of merchandise were in the following proportions: From the mine, 14.40; the fisheries, 5.50; the forest, 16.74; manufactures, 9.60.

Exports from Canada of Minerals, etc., year, 1903.

	To Great Britain.	To the U. S.	Total.

Total	**$34,206,693**	**$3,882,282**	**$44,624,321**

It will be seen by a little consideration of these tables what proportion of our different classes of products goes to countries other than the United Kingdom and the United States.

Thus, of the minerals and metals, $29,546,000 worth, mainly gold, silver, copper and coal, went to the United States ; $597,000 worth to the Old Country ; and $921,000 worth, or nearly three per cent. to other countries.

Of our fish, fish oil and seal skins Great Britain received the largest share of any one country, $3,904,000 ; the United States, $3,760,000 ; while $4,135,000 worth went to other countries. Brazil, Italy, Portugal, France, Germany, the West Indies, and Japan received most of this.

After sending some sixteen millions each to the U.K. and the U.S., Canada had still to spare for other countries $2,660,000 worth last year of square timber, sawn lumber, shingles, box shooks and other products of the forest.

Living animals have for years formed a large item in our exports: the number of horses shipped abroad last year was 3,878; of horned cattle 176,780; of sheep 401,443. The steers went mostly (90 per cent.) to Great Britain, the horses and sheep to the United States.

Of the $1,499,000 of animals and their produce sent to countries other than U.K. and U.S. living animals made up $284,000; furs and skins, $116,000; dairy products, $495,000; other meats and provisions, $260,000.

It is worthy of note that $432,000 worth of Canadian fruit, $283,000 worth of Canadian barley, $365,000 worth of Canadian peas, $1,030,000 worth of Canadian wheat went to "other countries," together with wheat flour to the value of $2,292,000 and seeds to the value of $393,000; also vegetables valued at $372,000.

SOUTH AFRICAN TRADE.

South Africa is shortly to have an international industrial exhibition, which is being arranged to be held in Cape Town next November, December and January. Its success seems already to be fairly well assured, judging from the character and the very large number of exhibitors who have already signified their intention of being represented. The holding of such an enterprise, which is under the patronage of Lord Milner, is looked upon as one of the most beneficent signs of the whole country's coming prosperity under British rule. From Messrs. McLaren & Sons, the advertising agents and publishers of catalogues and other official publications relating thereto, we have received some circulars which give a deal of information concerning the requirements of the growing South African markets. The extraordinary nature of this growth is evidenced by many facts. For instance, ten years ago the South African colonies stood sixth on the list of Britain's customers; in 1902 they stood second, and the increase in this regard has been still more extraordinary during the last two years. But it is not only with Great Britain that South African trade is advancing with rapid strides; the imports from foreign countries have more than doubled since 1901. This shows that while British manufacturers have shown commendable enterprise, those of other nations are very wide-awake to the latent possibilities also. In this lies the lesson for Canada. There are very many things which this country could and should supply; for South Africa as a manufacturing country, or rather conglomeration of countries, is by no means forward, its foremost industries being mining and agriculture. But this only suggests very great requirements from other countries in the way of machinery, mining and farming tools, breadstuffs, hardware, furniture, chemicals, general stores, etc. The Americans are making strenuous efforts to build up a large trade with the newly opened-up territories, and among the things which help to forward that aim may be mentioned, besides such natural advantages as a cheap and varied supply of good timber entering largely into the making of a bulk of the goods needed, the enjoyment of cheap freights, and the faculty of persistent advertising. Manufacturers in the United States furnish possible customers with the fullest available information, their idea being not merely to supply a demand, but to create it. It is stated, for example, that some of the electrical engineers and other professional men in South African towns are possessed of veritable libraries of pamphlets, attractively printed, illustrated with pictures of American appliances, and replete with information of special value to men living in sparsely populated country districts. This all counts when those men have an order to give. Among the requirements of such a market may be mentioned: adaptability to local needs, prompt delivery, standard sizes and designs, good finish and suitable packing. Where the Americans, as well as the Germans, score in comparison with their competitors is in their constant representation in large centres. In several, the manufacturers have joined together to form associations and open show-rooms, where samples of the goods they offer can be seen at any time. This is very different from the desultory manner in which Canadians too often think they can work up an export trade.

TEMISKAMING MINERAL RESOURCES.

The first mine discovered in the Temiskaming country may be said to have been the galena (or lead sulphide) property now known as the Wright mine. The fact of argentiferous galena having been found on the east side of Lake Temiskaming is recorded by some of the early Jesuit missionaries. The mineral was rediscovered by a Swede about twenty-five years ago, and Mr. Edward Wright, of Ottawa, having obtained the information, located the mine and made application to the Quebec Government for its purchase. In 1881 it

was examined by the president and managing director of the Orford Nickel and Copper Company, then of Capelton, Que., but it did not look sufficiently promising at that time to induce them to apply for purchase. It has been worked since then by several persons and companies, but none of them seems to have made a success of the venture, and at present the mine is idle. A little further north on the Quinze, which is really the Ottawa river, beds of magnetic ore were discovered fifty years ago by members of the Geological Survey of Canada, and these have been described in the report of the Geological Survey.

Up the Riviere Blanche, which flows into Lake Temiskaming from the north, some discoveries of hematite were reported late last season, but no development work has yet been done upon them. Some very excellent samples of copper ore have been got there from a point about twenty miles above the lake, but the size of the ore deposits remains yet undetermined. Then, on the west, or Ontario side of the lake, some promising discoveries of silver-nickel ores were made, and also some promising out-crops of arsenical pyrites located. This ore runs unusually high in cobalt. According to the Bureau of Mines of Ontario, 16.8 per cent. of cobalt, 7.0 per cent. of nickel, and 6 to 9 per cent. of arsenic. This deposit has been described in detail by Prof. Miller, of the Bureau of Mines, but unfortunately, at the time of his examination, no work had been done to test the ore in depth. Since his visit to the place a shaft has been sunk to a depth of nearly twenty-five feet. The rich cobalt ore has a width of 13 inches at the surface, but gradually thins down to about seven inches at a depth of nine feet, where it is abruptly cut off. The sinking has been continued about fifteen feet or so further, but no continuation of that massive ore has been found. About eight hundred yards west of that point a bunch or mass of nickel-silver ore has been found, and a trial pit put down to a depth of five or six feet. The width of ground charged with nickel and silver is about six feet, with a band of poor rock near the middle. Some of this ore assays very high in silver and nickel, but the nature of the deposit has not yet been determined. It appears to be somewhat lenticular, but this can only be proved by sinking and driving. The sudden cutting out of the cobalt ore must have its influence in forming an opinion as to the permanency of this nickel-silver vein.

A considerable area of land upon both sides of Lake Temiskaming is occupied by what is believed to be silurian limestone. It lies almost in a horizontal position and in rather regular layers, making it easily quarried; and producing a building stone which can be cheaply dressed and laid. The Church of England and some other buildings in Haileybury, at the north end of the lake, are constructed of this material, with excellent effect.

In the Temagami district large quantities of pyrrhotite and pyrites have been discovered, but no developments have yet been made to prove their value. A large body of arsenical pyrites has been uncovered on the south side of Net Lake. Surface work shows that there is a fair probability of this ore continuing in depth. In places it carries as much as six ounces of silver and a little gold. There are great beds of magnetic iron ore in that district. One may walk for four or five miles along the out-crop and a width of double or three times that of King Street, Toronto, containing this ore is visible. The ore, however, is comparatively low-grade, running from 30 to 40 per cent. of metallic iron. It is very free from phosphorus, although carrying occasionally considerable sulphur. The Ontario Government withdrew the lands for ten miles on each side of the railway from sale and prospecting, but by Order-in-Council those lands were again thrown open on the 6th inst. for location and prospecting. No doubt this coming season will see a great influx. The pine forests of the region are extensive and well preserved, and the regulations which the Government imposes on prospectors should have the hearty support of all those who wish to see the natural resources of the Province developed.

CROOKED METHODS IN MUNICIPAL ELECTIONS

After an honest, earnest examination into alleged frauds, such as ballot-stuffing and placing wrong names on the Voters' List in connection with the Toronto civic election of January, 1903, Judge Winchester sentenced a number of the returning officers and poll clerks, who had been found guilty, to various terms of imprisonment. The prisoners were not tried for offences under the Municipal Act, but for conspiracy under the common law to do an unlawful act. Three deputy returning officers were sentenced to two years each in the Central Prison, and the two poll clerks to one year in the same prison. One D.R.O. pleaded guilty, and the others were found guilty by a jury. A very general feeling of satisfaction was evoked by this result of the trial. And justly so, for it is of the gravest importance to the working of our institutions that the sanctity of the ballot box shall be maintained.

But within three days of the announcement of this decision we find the city council of Toronto passing by a pronounced majority—it is well that there were some who voted nay—a resolution asking clemency for those officials who were sentenced. Such a request, so far from upholding the hands of officials who aim to do their duty in the administration of justice, is a virtual imputation upon those who construe and apply the law—an entreaty that some culprit shall be let down easy because he did not think what he was doing; because he was "a decent fellow"; or because he was an old man. This is carrying humanitarianism to the verge of the maudlin. We have had too many instances in this Province and in Quebec of attempts to invoke sympathy for wrong-doers when the rigid application of law was needed for the protection of the community. Doubtless there is in many hearts sympathy with at least one of these culprits, whose age and position renders him a subject of compassion. But members of the city council whose status of respectability is directly affected by the very proceedings, the outcome of which has been the sentences we have described, are not the proper persons to ask for such clemency.

If wrong-doing of the kind elicited in this trial is to be excused or palliated because it was done as suggested, by way of friendship for different candidates for municipal honours election by ballot becomes a farce. One of the candidates indeed, has declared that he did not know it was wrong to put names on the Voters' List which have no right to be there. The more discredit to his common sense to say nothing of his sense of honor. Such a man is unfit to be placed in a position of trust, such as that of a common councilman is. It has been well observed with respect to the tardy resignation of one of the city controllers, whose letter to the mayor is a piece of weak special pleading, with a strong tinge of political manœuvring, that if this person, who profited by illegal votes had been a candidate for the Legislature or for Parliament he would have been

unseated without delay. The public conscience needed to be aroused to the wickedness of electoral fraud, for we have become used to thinking that dishonest things may be done in municipal life or in national politics which no merchant would condone in his business and no citizen tolerate in his private affairs. And the people of Toronto should heartily approve the result thus far of the efforts of counsel and judge to purge civic affairs from a bad element which has long been suspected and has now begun to be exposed.

THE WOOLEN SITUATION.

Attention is again strongly drawn to the state of some branches of the Canadian woolen industry by the announcement of the approaching sale of the Canada Woolen Mills properties, which include valuable plants at Hespeler, Carleton Place, Waterloo and Lambton Mills. Mr. W. R. Brock, of Toronto, is president of the company, and Messrs. R. Millichamp and Timothy Eaton, of the same place, are among the directors. The above decision was arrived at after a meeting of the directors this week, and the hearing of reports showing that business had been carried on at a loss during the past three years. It is stated that the above plants remain unencumbered, and that there are sufficient assets fully to satisfy every claim. These mills employ, all told, some seven hundred hands, and their closing, which will take place in the event of no sale being transacted, will mean a serious loss to the communities interested. As reason for the present unsatisfactory state of affairs is given lack of orders, believed to be the direct result of the preference to Great Britain, whose manufacturers have greatly superior advantages, compared with those of Canada, in the matter of high specialization, cheaper wages and machinery, etc. The Dominion Government's attention has been repeatedly called to the urgency for a revision of the tariff so far as this particular industry is concerned; but so far it has done nothing.

In the meantime trade in Canadian-grown wools is very dull. Prices for pulled are unchanged, ranging around 19 or 19½c. for supers and 22c. for extras. Very little fleece is changing hands, the old crop being nearly exhausted and new clip not being expected on the market in any quantity for some weeks to come. Considerable speculation is going on as to the chances for the latter, the general opinion being that values will approximate very closely to those of last year. A good deal depends upon the situation in the United States. In that country opinions differ widely, and for the present at least a waiting attitude is being widely adopted. One feature which is attracting attention is that now, for the first time since the Civil War, medium and coarse wools are on practically the same price level as fine merinos. The agricultural classes, as a rule, have more money to spend on clothing than ever before, while at the same time stocks are in light compass. These factors should mean high prices for raw wool. But against them may be set the facts that this is the year of the Presidential election, which is nearly always accompanied by falling prices, and that the consumptive powers of the country have been interfered with by strikes and by many reductions in wages. As the net cost of domestic medium and coarse grades is now actually above the parity of the cost of similar grades of laid-down, duty-paid foreign, though the latter are one-third higher in price than a year ago, many experts consider that values have reached their high water mark, and that the indications point to a fall. It would be unwise, therefore, for a time, at least, to make any forecast as to this year's prices.

ELECTING DIRECTORS.

A subject which may properly engage attention is the method often employed of late years of electing directors of companies. Instead of every shareholder at a meeting voting openly or secretly for each candidate for election there has come to be common a very different procedure, and one which we cannot help thinking improper, namely, that of electing a board of directors by one person casting a ballot for the whole board. It is a practice which seems to be gaining. How this method of electing directors came into vogue we do not pretend to say. But there are grave objections to it. In the first place, every member of a corporation has a right to express his preference for certain persons, either openly or by ballot, and should not have that right taken from him by any one man using the powers or voices of a hundred. Then, such irregular action as the deposit of a ballot by one person for fifty or more persons is unfair to candidates for office themselves. The candidates have a right to know whether there is a minority, no matter how small, who oppose their election to office.

The legal aspect of depositing one ballot for all voters in corporation and society meetings is discuseed by Judge William T. Forbes, of the Massachusetts Probate Court, in the Worcester Spy. Incorporated bodies in that State, as in many other States of the American Union, are required to elect their directors and principal officers by ballot. Judge Forbes states that it is a common practice for a corporator to move that the secretary or some other member cast one ballot for the list of officers reported by the Nominating Committee. This is done, and the officers are declared elected without giving possible objectors an opportunity to ballot for any other person than those whose names were brought in by the Nominating Committee. This, in the judge's opinion, is clearly an illegal practice. It is significant, too, that the late Commissioner of Corporations in Massachusetts, the Hon. Charles Endicott, always required corporations organized in this way to reorganize, even when every member was present and assented. This precedent has been followed by the present commissioner.

It is important to observe that, according to this interpreter of the law of Massachusetts, a motion at any meeting of shareholders to instruct the clerk or any other corporator to cast a ballot for certain persons is contrary to the statute both in letter and in spirit. Supreme Court decisions in various States of the Union have laid down the principle that "the ballot implies absolute and inviolable secrecy." And as every member of a corporation has a right to ballot, any procedure which would deprive him of this right renders the election invalid.

VICTORIA AND PACIFIC COAST AFFAIRS.

The annual spring rush of cannery hands to northern British Columbia points has begun in earnest. The capacity of the regular steamer for this work is unequal to the demand, so the Canadian Pacific Railway people have decided to put another boat on the route. Traffic with these northern points along the Strait of Georgia and up into Queen Charlotte Sound, is growing steadily, and is expected to be better than ever this year. For, besides the fisheries, development in mining and along agricultural lines is quite considerable; year by year this trade will expand. The salmon

canneries alone being numerous and extensive, require immense supplies of freight.

The waterfront of this city is quite springlike in these days; vessels are being overhauled, the rat-ta-tap of the riveting hammer and the caulking iron are heard, and everything is redolent of tar and new paint. It is a pleasure to find that the unsightly, rickety old bridge that used to span the James' Bay inlet has been removed, and something more in keeping with Victoria's charms is being built. A retaining wall of solid masonry has taken the place of the old structure. This new work has a clean and tidy, as well as a substantial look, and will be in harmony with the very magnificent Provincial Parliament Buildings, which it immediately adjoins, and will form a link with the Federal Buildings on the city side of the bay. Back of this massive wall and roadway, the Canadian Pacific Railway are going to build a $300,000 hotel. The company have not only received a free site for this, but also exemption from water rates and taxes for fifteen years. The Victorians are hot after the tourist trade, and they have every faith that the C.P.R. can bring such to their fair city.

The granting by the Government of the right to establish fish traps has very greatly encouraged all who are interested in the country's progress and prosperity. Canadians have for a number of years seen their neighbors to the south making use of the trap, catching fish by this means that there was good ground for believing were Canadian. This disability has now been removed, and with fish traps in operation during this season, and a good market in Japan, a great business is looked forward to. Up to the present time, trade in Victoria has been very quiet. As a matter of fact, indeed, this province has not shared as fully as it ought in the prosperity enjoyed by the rest of the Dominion. The local papers are doing something to work up a business revival; they cite, almost daily, favorable indications of one kind and another. I join in the hope that their predictions may be fully realized. A movement is going on quietly here, I find, of farmers who, after having lived on the Manitoba and Western prairies for a number of years, are taking up small holdings of land around here. There will soon be quite a big settlement of these on the coast. They engage for the most part in small farming and chicken-ranching.

In raising garden stuff and market truck, the ubiquitious Chinaman is a serious competitor with white folks. Their methods of operating, it must be said, are not appetizing, but their prices appeal to the pockets of the economical. John Chinaman has established himself and become a necessity in this community. The $500 tax has stopped Chinese immigration most effectively, with the result that those who are already here have "held up" the bossee-man for more money. The lessening of competition has given the wily heathen a chance to put on the screws, and he is doing it. Some of those who employ Chinese help are puzzling themselves about the wisdom of Chinese exclusion enactments, and who is hit hardest?

The announcement from Ottawa that the privilege granted to American vessels, for carrying freight from Canadian ports to the Yukon, had been withdrawn, gave general satisfaction here, because the Americans grant no such privilege to Canadian vessels. Disgust and indignation is heard expressed on all sides that these privileges are to be continued. What influences brought about the rescinding of the first order? Seattle went wild about the matter in the first place, and threatened the withdrawal of the bonding privilege. The local press have been chuckling and saying "rot," so "it is up to some one to eat crow." The sudden come-down of the Canadian Government has placed its friends in an unenviable position in the opinion of the people of Vancouver Island.

Victoria, B.C., 2nd April, 1904. VIATOR.

It looks now as if the entire stock of currants in Greece will be disposed of before the new crop becomes available, as shipments continue quite heavy. In this case high prices will be the order of the day.

A COPPER SMELTER FOR SHERBROOKE.

The scheme of a smelter in Sherbrooke, to treat the copper ores of the Eastern Townships of Quebec, which we referred to repeatedly in 1903, is still in view. At a meeting of the council of that city last week, the granting of a bonus to the Eastern Townships Mining and Smelting Company came up, when Mr. J. R. Woodward, president of the company, was present and addressed the council on the subject. Objection having been made that the fumes from such a smelter would damage vegetation and injure the health of the citizens, it was replied that no such injury would result if the smoke-stack were made high enough. Mr. Woodward also produced communications from mine owners in the district, agreeing to supply the smelter with a total of sixty tons of ore per day. Lake Memphremagog mine owners stated that they would be able to supply the smelter with ore for the next five years with what was already in sight. Councillor Farwell moved that the city attorney be instructed to prepare a by-law for submission to the ratepayers, wherein the city would grant $10,000 to the smelter project in accordance with Mr. Woodward's agreement that before the money should be paid over, the company would have to erect a smelter costing $25,000, and have $40,000 capital subscribed. The motion carried.

HAMILTON'S CLAIMS.

In these days of travel and of curiosity, when people are continually asking: "Where shall we go this summer?" or, "what shall we see if we go to so-and-so?" it is well to have Tourists' Associations or municipal authorities who will take the trouble to inform travelling folk what is to be seen or done if they go to a certain place. Hitherto, the city of Hamilton, Ontario, has not exploited itself, as might well have been done. It has not made the most, so far as we have ever heard, of its advantages of situation and of scenic surroundings as these might be presented to the tourist. But now we have pleasure in finding that Hamilton shows a disposition to do itself justice. And we welcome the booklet, "Hamilton, Canada," published by the assessment department of that city.

Traditionally, says the pamphlet, Hamilton was visited, or rather the site of Hamilton was visited, by La Salle in 1669. But we find this somewhat more than tradition, for, according to Galinee's Relation, quoted by Parkman at page 17 of the third part of his Historical Narratives, the Iroquois colony of Otinawatawa was in that year "a few miles north of the present town of Hamilton," and it afforded a guide to La Salle and his companions. Among the earliest settlers from the British Islands was Robert Land, 1778. Great have been the strides from that day to this. Beautiful as its site and neighborhood have always been by nature, industry and art have done much to add to its attractions.

Incorporated in 1847, the inhabitants of Hamilton have shown how, by enterprise and thrift, a comparatively quiet community of 10,000 could become in half a century an active centre of commerce and industry with a population exceeding 50,000. With a mild and even climate, a situation on one of the Great Lakes, with abundant railway and water communication, good drainage, good pavements, better tramway intercourse with the garden-like country round about than perhaps any place in Canada, this Ambitious City well deserves its name. "The Birmingham of Canada" is another title bestowed upon it years ago, not unworthily, for it has a surprising number of industries, great and small. One of these, probably the latest important works, has acquired 125 acres of land, which it is covering with huge buildings, one of them a thousand feet in length, to produce agricultural implements. *Nine pages* of the pamphlet under notice are occupied with a list of machine shops, wire and brass works, silverware establishments, iron and steel works, pork packers, sash and door makers, hollow-ware shops, foundries, spice mills, stock yards, soap makers, canning companies, toolmakers, wire mills, textile factories, iron ore smelters, and a great variety of manufactures of novelties.

A feature of Hamilton's recent development which merits notice, is the arrangement made for producing and transmitting electric power for industrial use. Since 1899 the pressure from the De Cew Falls, some 35 miles away, has been transmitted into electric energy on a scale so large that the city is lighted, most of her factories, and her entire electric railway system (65 miles of road, inter-urban and radial) operated, by electric power from this source. This is a powerful attraction to offer to industrial establishments which may wish to locate within her borders.

The most striking page in this publication in the matter of statistics, is probably that which is headed "Facts about Hamilton boiled down." We select some of the most salient facts: Present population estimated at 60,000—110 miles of streets—60 miles of sewers—19 miles of street railway—1,732 telephones—reservoirs with 14,000,000 gallons' capacity—two sewage disposal works—105 miles of granolithic walks—25 restaurants—100 hotels—465 street electric lights. Further selections from this page of Facts we must defer, wishing to refer to Hamilton, by-and-by, educationally and socially. But we note that the city's imports last year were valued at $8,424,000; its assessment valuation, $33,062,000; and its civic expenditure for 1903 no less than $1,555,901. Hamilton is a charming place to visit.

OUR SAINT JOHN LETTER.

In the Legislature on Monday afternoon, Attorney-General Pugsley delivered the budget speech, taking the place for that purpose of Premier and Provincial Secretary Tweedie, who is ill. The estimated receipts of the province of New Brunswick for the year are $878,547.08, of which $491,360.96 consists of Dominion subsidies, and $275,000 is territorial revenue. The territorial revenue last year was $210,000, and this was the largest amount ever received from this source. The Government recently increased the stumpage rate and other charges in connection with lumbering that are expected to give the additional revenue predicted. The Cabinet also count on receipts of fully $15,000 in royalties. This is a new item in this province, and will result from the opening up of the coal fields of Queen's and Kent counties. The Government estimate the expenditures of the year at $856,966.91, leaving a surplus of $21,580.17. It remains to be seen how much of this surplus will materialize; the probability is that there will be capital expenditures that will eat up the estimated surplus many times over.

Announcement has been made that the Dominion Line, which, for several winters has operated steamers between this port and Glasgow, will run a boat monthly during the coming summer.

At a meeting of the civic board of works on Monday it developed that Messrs. James Fleming & Son, the local firm who secured the contract for the new steel ferry boat, had arranged with the Bertram Iron Works, of Toronto, to build the hull. When tenders were opened for the job that of the Bertram works was the lowest, but aldermen who favored having work done at home succeeded in securing the contract for the Flemings, who are engine-builders. They planned to have the boat's hull built in the States and to make the engines themselves; but they have now arranged for the Toronto concern to build the steamer.

The St. John civic elections will take place on Tuesday next, and the labor organizations are nominating several candidates. The contests promise to be lively. Up to this year only those whose taxes were paid could vote at civic elections. The labor bodies promoted legislation to allow all tax-payers to vote whether taxes are paid or not. The City Council of St. John protested strongly against this, but the politicians, desiring to curry favor with the working men, passed the measure, with an amendment allowing tax-payers to vote who are not more than two years in arrears. The result will be that some three thousand or more tax-payers will be able to vote who have not voted in previous years. It is with this vote, largely of working men, that the labor organizations hope to carry their candidates.

There is trouble with the St. John water supply and the insurance underwriters are trying to compel the city fathers to grapple with the situation. At a meeting on Monday, it was decided to enforce an increased rate of 25 per cent. on all new business, and to appoint a committee to consider carefully further action. During the last few years St. John has spent large sums of money improving its water system, but the improvements are not really apparent, and it now looks as if a much larger expenditure will be necessary—involving probably extensions so as to take in new, and higher sources of supply.

New Brunswick lumbermen are on the anxious seat these days. They are daily looking for the opening of the St. John river, and if the ice breaks up quickly many million feet of logs hung up last winter may be carried to sea. If the break-up is slow, and the freshet a mild one there is a probability that the logs hung up will be saved, but that much of the cut of the past winter will be "hung up."

Saint John, New Brunswick, 12th April. * * *

DEATH OF MR. JOHN BROWN.

Word comes from Quebec of the death, in that city, of Mr. John Brown, elder brother of Mr. Adam Brown, the well known postmaster of Hamilton. The deceased gentleman was prominent in the commercial life of Hamilton during the fifties, sixties and seventies. Born in Langholm, Dumfries-shire, Scotland, he came to Canada as a young man, and settled in Hamilton in 1848. During his residence in that city he was identified with the large wholesale business of Kerr, Brown & Co., a dry goods house, well known throughout Ontario, and later the wholesale grocery business of John Brown & Co. He was an able merchant and much respected.

On leaving Hamilton twenty years ago, or more, Mr. Brown went to New York, where he engaged in the tea business for some years. From there he moved to Quebec, where he has since resided. An unusually active and healthy man all his days, Mr. Brown lived a long life, for he was in his eighty-first year when carried off by pneumonia on the 6th of April. He was one of the capable business men, manufacturers and merchants, who made Hamilton famous as a mart for Western Ontario's trade while Toronto was yet a political and education centre merely; and saw it grow during his residence in it from a population of 10,000 to more like 40,000.

WELCOME VISITORS.

Canada is steadily attracting more attention in the British Islands. The visits thither of some of our representative men, and the presence among us at various times during the past twelve months of many persons, such as tradesmen, journalists, members of Parliament, commercial delegates, in the role of observers has resulted in an awakening of interest about Canada in the chief centres of the United Kingdom. And the efforts of Canadian Government agents in the country districts of England and Scotland have been productive not only of curiosity about this country, but have secured to us farming and other desirable immigrants from that quarter who are slowly beginning to arrive. Among those whose visits to us during 1903 and 1904 may be expected to produce good results for Canada we mention the British Chambers of Commerce delegates last autumn and the present visit of the Duke of Sutherland. The Duke has been, in company with Sir Charles Ross, during part of March in the Provinces of New Brunswick and Quebec, where they are understood to have commercial interests. They passed through Ontario, and are now, we understand, in our North-West.

His Grace of Sutherland is a nobleman of marked distinction and influence, who has been in Canada before, and is desirous of seeing as much as possible of this country for himself and to learn all he can about the views of commercial and political persons respecting the great topics of the day. He and his party have shown an intelligent interest in people

and things which adds to the welcome with which they are being received. We do not know so much about their reception in cities to the eastward of us, but the gathering at the King Edward Hotel in Toronto, arranged by Mr. W. H. Beatty, was one which included representatives of most phases of active life in this community. The host had invited to meet the Duke: Hon. James Sutherland, Minister of Public Works, Hon. G. A. Cox, Senator, J. F. Ellis, president Board of Trade, T. G. Blackstock, W. D. Matthews, Walter Beardmore, W. H. Cawthra, John I. Davidson, W. R. Riddell, K.C., J. J. Foy, K.C., M.P.P., James Hedley, Wm. McKenzie, Colonel Denison, Hon. J. M. Gibson, Attorney-General, Ont., Hon. G. E. Foster, Chester D. Massey, Massey-Harris Company, Duncan Coulson, general manager Bank of Toronto, Sir Charles Ross, W. G. Gooderham, J. W. Flavelle, of the Wm. Davies Co., Hon. Justice Nesbitt, J. S. Willison, John Hoskin, K.C., LL.D., Hon. G. W. Ross, Premier of Ontario, Lieutenant-Governor Mortimer Clark. The affair was very informal, Mr. Beatty having wisely arranged that there should be no speeches. But every guest had a chance to speak with His Grace, who seemed best pleased when he could get some man to "talk Canada" with him by the hour. Renewed interest in Canada in important quarters in England is sure to result from the present trip to the Dominion of this very influential party.

TRAVELERS' INSURANCE COMPANY.

It is interesting to read of the origin of the Travelers' Insurance Company, which celebrated last week its fortieth anniversary. In 1864 it started with a staff of three persons; today there are 278 clerks in the head office in Hartford, and its staff of agents and brokers all over this continent numbers more than 5,000. It may be said to be virtually three companies within one—a life company, an accident company, and an employers' liability company. The life company has its separate organization, managers, agents and medical examiners; the accident department has its separate organization, with surgeons and adjusters; while the liability department calls for managers, agents, surgeons and a large corps of inspectors and lawyers.

The growth of the company's business is, perhaps, best illustrated by comparison. So we may present here a contrast of the first year's and the fortieth year's results in different items:

1864.	
Income	$179.499 79
Assets	372,121 81
Reserves, etc.	8,922 00
Surplus	363,199 81
1903.	
Income	$11,670.889 99
Assets	40,105,849 39
Reserves, etc.	34,876,533 29
Surplus	5,229,316 10

Its first rates, based upon English experience, then recent, were not found applicable to American risks and so the Travelers' had to gather its own experience. The company took up life assurance in 1866 and employers' liability assurance in 1890. The late James G. Batterson, who founded the company and was for 37 years its president, has been succeeded by S. C. Dunham in the presidency. Mr. John E. Morris has been secretary for thirty consecutive years, and there are eight other prominent officials who have been an equally long time in the harness. The Travelers' Insurance Company is "a stayer," and those who work for it may be expected to be stayers also.

ROYAL-VICTORIA LIFE.

The statements and figures in the report of this company show that it has made fair progress during 1903. It has issued something over a million dollars in new policies, and the insurance in force is very close upon four millons. We observe that the total income from premiums and interest, $145,871, is eleven and a half per cent. greater than in 1902, while the ratio of expense to income has been reduced during the year by 7½ per cent. This is a sort of record in the direction of economy which ought to be aimed at. In the six years of the company's existence there nas been a steady increase in its assets, and the reserves, as required by the Government standard, have been maintained. These reserves amount now to $302,611.

Since the annual meeting in March, 1903, the Royal-Victoria Life has lost by death one of its vice-presidents, Mr. A. F. Gault, and two of its directors, Hon. James O'Brien and Mr. Samuel Finlay. All three were prominent Montreal merchants, and had been connected with the company from its start. They have been replaced by other valuable men, and the board is a strong one. The presidency is retained by Mr. Crathern, and Hon. Robert Mackay and Hon. L. J. Forget are the vice-presidents. The new members of the board are: Lieut.-Governor Mortimer Clark, Mr. Chas. F. Smith, and Mr. George Caverhill.

TORONTO EMPLOYERS' ASSOCIATION.

The Employers' Association of Toronto held its second annual meeting on Thursday of last week, when some very encouraging reports of the work of the organization during the year were read. Mr. D. H. McKay, vice-president, took the chair in the absence in Europe of President F. B. Polson. During the year two hundred meetings had been held; situations had been found by the association for about 1,400 workmen, and a form of apprenticeship articles had been drawn up. A new set of shop rules has been made out, and will be issued shortly. Employers in many parts of the Dominion are proposing to form similar associations. By the treasurer a large surplus was reported, as well as the accumulation of a large reserve fund for the purpose of assisting any member who may be attacked by labor unions. The following gentlemen have been elected officers for the ensuing year: President, Mr. F. B. Polson; first vice-president, Mr. A. F. Rutter; second vice-president, Mr. D. H. McKay; treasurer, Mr. W. T. Kernahan.

MINES, CLAIMS AND PROSPECTS.

In the last ten years, and especially within the past five years, many hundreds of people in Canada have sunk money in the ground or else put money in the hands of speculators in the belief that they were actually investing in a mine. It is a pity they were not sooner undeceived. But it may not be amiss to point out the failure to distinguish between the relative value of the terms claim, prospect, and mine. It is frequently provocative of much amusement. The matter is thus commented on by the Rossland Miner: "It is the rule, not the exception, for the man who may have just located a mining claim to speak of it as 'his mine,' it becoming, in his view of the case, a mine from the moment his location stakes have been driven. Rarely do you find a man who speaks of his mining property as a 'prospect.' A 'prospect' is suggestive of that intermediate stage, between a 'claim.' The fact of location presupposes a mine; that is to say a mining property from which he is going to extract rich ore in large quantities. It is well that such hopes accompany the act of location, otherwise the number of claims located would be small; the prospector would disappear from the scene."

BANKING AND FINANCIAL.

Replying to a correspondent, who writes under date 8th April, we would say that the holding of consols by the Bank of British North America amounts to two hundred and twenty-five thousand pounds sterling, not two hundred and twenty-five thousand dollars, as by a typographical error we were made to say in our issue of 1st April. The amount was correctly stated in the balance sheet, £225,000 at 86, £193,500; but the comment on page 1319 was misprinted dollars.

On behalf of the creditors, Mr. George W. Beardmore, of Toronto, has issued a writ to set aside the agreement between A. E. Ames & Co. and the individual members of that firm and the Securities Holding Company. The various properties transferred as mentioned in the writ comprise three seats on the Stock Exchange, several blocks of real estate, and some thousands of shares of various kinds.

We have learned with satisfaction that the metal brass grill-work of the counters, etc., which forms so important a part of the interior fittings of the Bank of British North America's Toronto office, were produced in Canada. They were made and put in by T. G. Rice & Co., of Toronto. It is the more interesting to note this because a number of Canadian banks appear to have favored United States concerns for their fittings. The fact that such work can be made in our Canadian factories, equal in appearance to that produced by foreign concerns, should attract more attention to our home products of the kind.

Defalcations to the extent of nearly a million and three-quarters of dollars have become known in the United States during the month of February last. They are stated, as follows, by the Fidelity and Casualty Co., of New York: Defalcations in banks, $77,000; benevolent institutions and societies, $56,811; building and loan associations, $32,000; court trusts, $3,000; federal and state, $71,008; firms and corporations, $1,133,796; insurance companies, $212,000; municipal, $4,424; miscellaneous, $122,350; total, $1,712,389.

Great interest has been manifested in a St. John bill which is now before the legislature of New Brunswick, dealing with the assessment on branch banks. Under the existing law banks and similar institutions are required to fill out a statement of their earnings for each year, and on this their assessment is made up. Some of the banks by showing that they did not have any profits, have been able to escape all taxation except on their real estate. The Bank of New Brunswick, which is a local institution, with its head office in Saint John, has on the other hand been compelled to pay a tax on its capital stock. The city sent a bill to the legislature providing for a tax of 1-5 of 1 per cent. on the business of the year in addition to a special tax or license fee of $500. This bill was intended to apply only to the branch banks. The city did not propose any change in the Bank of New Brunswick tax. The branch bank managers went to Fredericton, the capital, to oppose the bill before the Legislature, while the Bank of New Brunswick practically supported the bill, but asked that it be extended so as to apply to them. Under the present assessment act the shareholders of the Bank of New Brunswick escape taxation on their stock. The matter is still before the Legislature and giving rise to a very vigorous fight. On a motion for a three months' hoist of the bill there was a tie vote, and the chairman of the committee voted in favor of the proposal; and now there is to be a reconsideration.

INSURANCE MATTERS.

The National Assurance Company of Ireland has reinsured its Canadian business in the Western Assurance Co. The policyholders of the National have the option of replacing their policies with those of the Western for the unexpired term.

Mr. J. H. Ewart, formerly manager of the National Assurance Company of Ireland, which is leaving the fire insurance field of Canada, has become connected with the Phoenix Fire Office of England in the capacity of city agent. Both company and agent are to be congratulated.

We learn, upon the authority of Mr. Gillespie, general manager of the company for Canada, corner Yonge and Wellington streets, Toronto, of the appointment of Mr. Murray Hendrie, and Mr. Allan M. Taylor, of this city, as special agents of the Provident Savings Life Assurance Society.

Some kind of a sand fire engine seems to be needed for certain fires of electrical origin, according to The Electrical Review. It says: "Recently smoke was noticed coming from a sub-station near London. The fire department responded to the alarm and quickly flooded the place, making matters worse, not only for the sub-station, but for the power-station as well. To meet such emergencies, Mr. E. Kilburn Scott says: 'It looks as though special fire engines are required, which would throw a jet of sand in place of water.'"

One of the prominent fire underwriters of the United States, Mr. John H. Washburn, of the Home Insurance Company, of New York, has retired from the presidency of that sound old company and from active business. He is 76 years of age. Becoming connected with the Home in 1859, he was made secretary in 1867; promoted again to be vice-president in 1884 and finally to be president in 1901. He was the first president of the New York Fire Insurance Exchange, and has been president of the Union. Elbridge G. Snow, vice-president of the company, who succeeds Mr. Washburn, is also an underwriter of great experience.

The Mr. Bennett, styled in last week's cable a Canadian insurance man, who was found on the bank of the river Thames on April 7th, unconscious from an apoplectic seizure, is Mr. J. S. Bennett, manager of the Royal Marine Insurance Company, headquarters in Montreal. He had gone to London to establish a branch of the company. A year ago, namely, on April 3rd, 1903, we mentioned the formation of this company, to do marine business on the St. Lawrence and the Atlantic, and gave the names of some of those to be connected with it. About the close of last month it held an annual meeting and declared dividends.

The entire United States business of the Thuringia Insurance Company, of Erfurt, one of the strong German companies, has been reinsured in the Fireman's Fund Insurance Company, of San Francisco, which is the prominent Pacific Coast company.* The Thuringia will cease to do business in the United States, having done fire assurance there since 1896. The reason for its retirement, given by Dr. Max Ludwig, the managing director, to a New York paper is a desire to extend its large life business and other branches which it is doing in other countries. The sentiment of the companies on the Continent of Europe is in many instances adverse to American business since the Baltimore fire, which is in some quarters felt to demonstrate the possibilities of sweeping fires on this continent. Although the Herr Doctor did not say so, we have no doubt this was one of the causes of the Thuringia's withdrawal.

FOR GROCERS AND PROVISION DEALERS.

A very firm market prevails for tea. London prices show an advance of ½d. per pound for several lines of Ceylons.

The new crop of citron around Leghorn, Italy, is said to be not only late, but considerably smaller than that of last year. Curers are asking higher prices.

A report is current on the Coast that the British Columbia Packers' Association will only operate some seventeen of its canneries during the coming season.

A company has been formed in Nanaimo, B.C., to exploit the herring fishery in the harbor of that place on a large scale. C. E. Stevenson, of Vancouver, and G. L. Schetky, of Nanaimo, are prominently interested.

As a result of the Dominion Government's decision, to allow licenses for trap-fishing on Vancouver Island, some salmon cannery concerns, at Victoria, B.C., are organizing more than one company to carry on business there.

Mr. S. Stein, of Liverpool, an expert who has for long been associated with the sugar refining industry, is interesting himself in a scheme for making sugar in England from home-grown beets. Experiments already made appear to show that many parts of the country are admirably adapted to the cultivation of the root, and considerable interest is now being shown in the idea.

A London (Eng.) fruit dealer makes the suggestion of laying choice apples in barrels, using a pulp paper circle between layers. He thinks that fancy apples packed in this manner would land in far better condition and fetch correspondingly higher prices, much more than sufficient to pay for the increased trouble and expense involved in the packing.

The Keewatin Flour Mills Company, Limited

Incorporated by Letters Patent of the Dominion of Canada

CAPITAL AUTHORIZED, $2,000,000; PAR VALUE PER SHARE, $100.

PROVISIONAL DIRECTORS

JOHN MATHER, Director The Bank of Ottawa, Ottawa
ANGUS W. FRASER, K.C., Ottawa.
ROBERT M. COX, Lumber Merchant, Ottawa. and London, Eng.
EDWIN C. WHITNEY, President St. Anthony Lumber Company, Whitney.
DAVID L. MATHER, Lumberman, Rat Portage.

Hon. JAMES D. McGREGOR, Vice-President Nova Scotia Steel Co., New Glasgow, N.S.
R. L. BORDEN, K.C., Director The Bank of Nova Scotia, Halifax.
GEO. BURN, Gen. Mgr. The Bank of Ottawa, Ottawa.
Hon. E. H. BRONSON, Pres. Bronson Co., Ottawa
JOHN COATES, M. Inst. C. E., of John Coates & Co., of London, England, and Melbourne, Australia.

BANKERS
The Bank of Ottawa and The Bank of Nova Scotia.

SOLICITORS
Perkins, Fraser, Burbidge & Gibson, Ottawa.

This Company has been formed for the purpose of carrying on a general flour milling business.

It is proposed to acquire a water power situated at Keewatin, on the main line of the Canadian Pacific Railway, 129 miles east of Winnipeg and 4 miles west of Rat Portage, with about 18 acres of land fronting on the railway. This water power, it is estimated, is capable of being developed to the extent of at least 5,000 h.p., and is a permanent, never-failing power, having the Lake of the Woods, about 3,000 miles in area, for a mill pond.

The Company intends to erect a flour mill at Keewatin with a capacity of 3,000 barrels per day, so designed as to be capable of being extended as future requirements may demand. Large storage capacities at the mill, and elevators throughout Manitoba and the Northwest Territories, will also be provided.

Manitoba and the Northwest are already recognized as the coming granary of the Empire, and the unequalled reputation of the flour made from "Manitoba No. 1 Hard Wheat" must ensure an increasing demand for it in the markets of the world.

The Company proposes to manufacture exclusively from the grain products of Manitoba and the Northwest Territories.

MANAGEMENT—It is the intention of the Directors to secure men of the highest experience for the management of the various Departments

PROFITS—The great success achieved and large profits shown by leading Companies engaged in manufacturing flour from Manitoba wheat, indicate that under proper management, and with the advantage of economical power, this new enterprise offers an excellent opportunity for investment.

It is proposed to organize the Company on a strictly cash basis, with a present issue of $1,000,000 stock—A large amount of this has already been taken, and the remainder is now offered for subscription. It is not the intention to issue bonds or preferred stock.

Application will be made in due course to have the stock of the Company listed on the Montreal and Toronto Stock Exchanges.

As far as possible stock will be allotted pro rata in case the amount is over-subscribed, but right is reserved to allot small amounts in full, or to decline any application.

TERMS—20% of the par value on application, and the balance in calls not exceeding 10% per month, as the Directors may determine.

Forms of application for stock may be obtained and subscriptions made at the offices of The Bank of Ottawa and the Bank of Nova Scotia throughout Canada.

Subscription lists will be open on 14th April, and closed on 22nd day of April, 1904.

In order to prevent Puget Sound canneries from obtaining salmon from the Fraser river, intending to put them up in American factories, the Dominion Government announces that the foreign sale or exportation of raw sockeyes during the fishing season will in future be prohibited.

An imitation "coffee" has lately been brought out, which is made from dried bananas. The inventor claims that, with his method, it is possible to prepare an article having all the rich flavor of genuine coffee. Bananas grown in Mexico and South America are used, and are evaporated on the spot. The product is then shipped to Philadelphia, where it is again evaporated, roasted and ground. The finished "coffee" has no particular coffee flavor in the ground form, but is said to be very similar to coffee in the cup.

A Norwegian correspondent of the Keewatin Mills Company, of Keewatin, Ont., draws attention to the good field for Canadian flour offered by Norway. In 1902 the importation of flour into that country amounted to 500,000 bags of 220 pounds each, and it is likely to increase owing to the gradual abandonment of rye as a food. Most of the trade in the past has been carried on by Minneapolis millers, but what flour has come from Canada has been thought well of. There are, however, in Norway, said to be no fewer than 120 importers of American wheat flour.

The action of Mackie and others against the British Columbia Packers' Association and other canning concerns on the coast to obtain damages of $44,000 on the ground that the former, fishing on the Fraser river during the 1902 season, had not received the full amount of money for their catch, has been dismissed by the Supreme Court by consent, with costs in favor of the defendants. It was contended by the plaintiff that the amount sued for was the difference due as between what the canners claimed the catch had been and what the fishermen claimed it was. If the pack at the end of the season amounted to over 250,000 cases and up to 300,000 cases, the fishermen were to receive 16½ cents per fish; if the pack was over 200,000 cases, and did not exceed 250,000 cases, the fishermen were to receive 18 cents per fish. Upon the conclusion of the packing season the canners announced that the pack had exceeded 250,000 cases by some odd thousands of cases, and they stated that the fishermen would receive 16½ cents per fish, but some of the fishermen claimed that the pack had been under 250,000 cases, exclusive of fish caught in traps, and it was upon this point that action was taken. This has fallen through, as above stated, after a good deal of delay.

DRY GOODS ITEMS.

Messrs. Brown & Co. have purchased the old McDonald woolen mill property at Carleton Place, Ont., thus becoming the owners of the water power on both sides of the river.

The John Murphy Company, Limited, has received a Dominion charter. It will take over the general dry goods business in Montreal, heretofore carried on under the name of John Murphy & Company, and will purchase, sell and deal in general merchandise.

A report recently handed in to the Australian Government states the conclusions of experts to the effect that the cultivation of cotton in the north by white labor is perfectly feasible. A scheme suggested by the Melbourne Geological Survey for growing cotton by means of indentured colored labor is being severely criticized, as a violation of the policy of "Australia for the white man."

For the new Montreal civic loan of $476,000 for forty years at 4 per cent. interest ten tenders were received, most of them slightly above par. The Finance Committee advise the awarding of $150,000 to R. Wilson-Smith, of Montreal, and the remainder to an American firm under certain conditions.

—The indications are that there will be an enormous area under grain in Manitoba during the coming season, the acreage being estimated at 4,000,000 acres. It is recalled that usually a hard winter has been followed by a bounteous yield in grain crops, and the sanguine Manitobans promptly seize upon this piece of experience to build an unusually high fabric of hope. No one will care to argue contrariwise, for everybody wishes the Manitobans prosperity.

FIRST MORTGAGE BONDS

GUARANTEED—Absolutely—Principal and Interest, by the Detroit United Railway to yield **5 per cent.**

OSBORNE & FRANCIS, MEMBERS OF TORONTO STOCK EXCHANGE, **Mail Building, TORONTO.**

TRADE OPPORTUNITIES.

Canadian Offices, London, 18th March.—A London importer seeks supplies of maple and hickory skewers from Canada in car lots of 160 barrels. The Swiss proprietor of a process for preserving boilers against incrustation, wants a Canadian agent. An English firm making preservatives for butter would correspond with butter factories in the Dominion. A London merchant offering good references is open to represent Canadian houses as either a selling or a buying agent. A Canadian maker of extension ladders, reclining chairs, lawn swings and such goods, wishes to extend his business in the United Kingdom. Goods can be shipped in the knock-down condition, crated.

—The attractions of Banff, in the Selkirk range of British Columbia mountains, as a place of residence, having become known of late, there is something like a boom at that place. Mr. W. L. Matthews, manager, has been in Montreal engaging help for the C.P.R. hotel there. He states that an exceptional amount of building is being done at Banff. Probably over $400,000 will be put in construction this season. The Dominion Government is erecting a bathing-house at the hot springs at a cost of $16,000.

—For a long time past coal mine owners, operators, exporters, shipowners and other powerful interests in Great Britain have been trying to induce the Chancellor of the Exchequer to repeal the export duty on coal on the ground that it enables German and other rivals to displace the British article. The Minister, however, Mr. Austin Chamberlain, compared the forebodings of the above-named, who recently sent him a deputation, with actual facts, which showed that the past year's exports of coal were the largest on record.

—It is important to notice that the department of mines of British Columbia has issued the statement, so a British Columbia paper states, that no assayer is entitled to use the words, "provincial assayer," this title belonging exclusively to the departmental official thus described. Assayers having passed the provincial examination, are entitled to describe themselves as "certified" or "licensed" assayers, but under existing conditions the expression "provincial assayer" in general use is misleading, inasmuch as it might be confused with the government official.

—Recently the Dominion Government passed an order-in-council forbidding to foreign vessels the privilege of carrying Canadian freight in bond from Vancouver to Dawson by way of St. Michael and the Lower Yukon river, as announced in a recent issue. Now, however, this order has been countermanded, we understand, with the result that American vessels may take Canadian freight and transport the same to St. Michael for transhipment to river steamers to Dawson. The press of the Canadian Pacific coast is incensed at this change, and it is not to be wondered at. Why was the order-in-council ever passed if it was not to be maintained? Some flaw must have been discovered, or possibly some "superior reasons of state" prevailed in the circumstances.

—In a suit in the New York courts the other day involving the National Salt Trust a fresh illustration of the old saying, "There are tricks in all trades," was given in the testimony of Receiver Beardslee, of the trust. " 'Purity' brand salt," said Mr. Beardslee, "brought $7 a ton and had a good market," Justice Scott asked: "Was the 'Purity' salt different from the rest of the company's products?" Beardslee smiled: "Well," he said, "they all came out of the same kettle. No; it was all the same salt." When the laughter had subsided, Justice Scott asked: "Why did the 'Purity' salt command the high price and good market?" "The extensive advertising the brand got—that's all," said Beardslee.

Writing from Birmingham on 19th March, Mr. P. B. Ball, Government agent for Canada, gives a lot of good advice about better grading and packing for that market. He adds: "If Canada wishes to export to Great Britain she must pack her goods according to the taste of the buyers. . . . Everything shipped to this country should be most carefully done up. More care should be taken in the finishing of all packages, particularly in fruit and butter." As to eggs he says: "A large quantity of Canadian eggs are brought to this market. . . . The quality of the eggs coming from Canada is much better than the quality of eggs coming from any other country. They are larger, more even, and better in color; they come splendidly packed, and there are very few losses in the way of breakage. The only thing I am asked is: 'Why don't you send us more of them?' Enormous quantities of eggs can be taken by produce dealers in this country."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, April 14th, 1904, compared with those of the previous week:

Cities	Apr. 14, 1904.	Apr. 7, 1904
Montreal	20,328,444	14,828,457
Toronto	16,581,868	12,486,169
Winnipeg	4,805,335	3,934,115
Halifax	1,686,462	1,256,853
Hamilton	1,107,585	955,056
St. John	946,007	788,796
Vancouver	1,318,195	1,121,240
Victoria	774,078	367,579
Quebec	1,278,967	1,283,602
Ottawa	2,193,088	2,033,944
London	963,829	937,051
	$51,983,858	$39,992,826

The Royal-Victoria Life Insurance Company

Annual Meeting.

THE Annual Meeting was held at the Company's Offices, Royal Building, Place d'Armes, Montreal, on Wednesday, March 30th, when the Directors' Report and the Financial Statement were submitted. The President, Mr. James Crathern, occupied the chair, and Mr. David Burke, General Manager, acted as secretary, and read the notice published according to by-law, calling the meeting. The adoption of the report was moved by the President, seconded by the Hon. Robert Mackay, Vice-President, and unanimously carried.

Directors' Report.

Your Directors present herewith their report of the Company's business for the year 1903, together with the financial statement.

The Applications for Insurance submitted, amounted to $1,211,476, under which, after careful selection, policies were issued for $1,100,476, the balance being declined or not completed when the year closed.

The Insurance in Force at the end of the year amounted to $3,928,115.

The Total Income from premiums and interest, reached $145,871.70, being an increase (excluding single payments for annuities), of 11½ per cent. over the year 1902.

The Expenses of Management have been carefully regulated, with due regard to the probable new business available under existing competition, with the result that the ratio of expenses to income on the above basis has been 7½ per cent. less than in the previous year.

The Claims by Death, although larger than in previous years, were well within the mortality tables.

The Annuity Payments made to holders of that class of policies, amounted to $4,854.28.

The Accumulated Assets of the Company have now reached $398,542.27, which, together with the guarantee capital, makes the total sum of $1,198,642 27, as security for the payment of policy obligations, as they fall due by death or maturity.

The Directors again wish to express their satisfaction at the loyalty of the agents and staff of the Company, in advancing its interests during the year.

The Directors would intimate to shareholders and policy holders, that in using their influence in directing agents and insurers to the Company, they will, in their own interests, assist in increasing the business.

During the Year, your Directors elected to membership on the Board, Hon. W. Mortimer Clark, K.C., of Toronto, Lieutenant-Governor of Ontario, and Messrs. Chas. F. Smith and George Caverhill, of Montreal, duly qualified shareholders of the Company, who now retire, together with the Rev. R H. Warden, D.D., and Dr. T. G. Roddick, all of whom are eligible for re-election.

Respectfully Submitted,

DAVID BURKE, General Manager. JAMES CRATHERN, President.

HEAD OFFICE, MONTREAL.
January 1st., 1904.

DAVID BURKE, A.I.A., F.S.S.
General Manager.

Auditors' Report.

To the President and Directors of The Royal-Victoria Life Insurance Company:— MONTREAL, 28th March, 1904.

GENTLEMEN,—We beg to report having completed the audit of the books of your Company, for the year ending 31st December, 1903. The statement signed by us shows the financial position of your Company at that date, according to the books of the Company. We have verified the Securities deposited with the Dominion Government, with a certificate from them, also the Loans on Securities, with certificates from the borrowers.

Yours obediently,

MACKINTOSH & HYDE, Chartered Accountants and Auditors.

A ballot for the election of directors having been taken, the retiring directors were unanimously re-elected for three years. At the close of the annual meeting, the directors met and re elected Mr. James Crathern, president, Hon. L. J. Forget, and Hon. Robert Mackay, vice-presidents, and T. G. Roddick, Esq., M D., medical director.

Board of Directors.

MONTREAL MARKETS.

Montreal, 13th April, 1904.

Ashes.—A lot of thirty barrels of American ashes is reported at the inspection stores, a big lot as trade goes now, but they have not been offered on the local market, and it is presumed are held for shipment on opening of navigation. Some English enquiry is reported, and $6.25 per cental has been paid for No. 1 pots, with about $5.80, a figure for seconds.

Cements, Firebricks, Etc.—In cements there is as yet no briskness of demand. and the spring business in both these commodities opens up slowly. Freights and makers' prices are just about on the same basis as a year ago, and there will be little variation from quotations of last spring for new supplies about to arrive. In fire clay and firebricks a very fair business is doing at from $8 to $9.50 per ton for the former, and from $19 to $22 per thousand for the latter.

Dairy Products.—The cheese market is a very quiet one, with an entire absence of any recent business, and it is difficult to establish anything in the shape of a definite quotation. Butter prices tend to easiness, and 19c. is now considered an extreme price for new creamery, while held creamery is quoted at about 17½c.; dairy makes range at about 14½ to 15c.

Dry Goods.—Full returns regarding 4th April payments show that retail paper was rather better met than anticipated; one leading house reports about 75 per cent. of its bills receivable due that day as being met, but these are exceptional figures, and general remittances are of a backward character. The weather at moment of writing is very unfavorable to retail trade, and as the season is getting on, it is feared that sorting business will be considerably behind that of last spring. On fine days city trade is good, but in the country spring stocks move out slowly. A letter from a leading English carpet manufacturing concern advises a general advance in all their makes of goods in this line.

Leather.—Boot and shoe manufacturers are reported as cutting a fair proportion of stock, and for the season of the year a moderately good business is reported. Some fair export movement is reported in splits as well as sole. Prices of black leather tend generally to firmness, tanners claiming that there is little profit to be made at present figures. Best Western splits are in light supply and are firm at 21c.; Quebec, ditto, 17 to 17½c.; glove grain is very steady at 11½c.; pebble is comparatively scarce, and is quoted at 12 to 12½c., and buff at similar figures; harness, 30 to 32c.; russet, 40 to 42c.; Scotch grain, 14 to 15c.; chrome calf, 17 to 21c. Sole steady at former quotations.

Furs.—Receipts continue light, and dealers are indifferent buyers, and are culling their selections very closely. Quotations for prime pelts are as follows: Beaver, $5 to $6.50 for large; medium, ditto, $4 to $4.75; No. 1 choice bear, $12 for large, $8 for medium, and $5 for small; badger, 30 to 50c.; fisher, No. 1, dark, $3.50 to $4.50; ditto brown, $3 to $4; pale ditto, $2 to $3; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $3 to $6 for No. 1 marten, $2 to $2.50 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; spring ditto, 23c. for extra large, 22c. for large, 20c. for medium, and 18c. for small; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—Nothing of special interest is reported in this line. The molasses market in Barbados is showing further easing off in quotations for new crop, late offers being at about 18½c., landed gauge, and local jobbing quotations for stock on hand are being shaded. The sugar market is a steady one; local refiners report good demand, and still quote $4.15 for standard granulated, and proportionate figures for yellows. The London and Ceylon tea markets show steadiness.

Hides.—Receipts of beef hides are smaller now that Easter is past. and prices remain steady at 9c. for No. 1

EMBEZZLEMENTS OF $30,548,935.74

Managers and Underwriters.

"Glen Mawr."
RESIDENTIAL AND DAY SCHOOL FOR GIRLS.
651 Spadina Ave., Toronto.

Thorough English Course. Individual Attention. Pupils prepared for the Universities and for Examinations in Music and Art. Large staff of Resident and Visiting Teachers.

MISS VEALS,
LADY PRINCIPAL.

city hides. Calfskins are coming in freely, and bring 13c. for No. 1 city skins, and 11c. for No. 2. Country hides and skins bring lower figures. New lambskins are quoted at 10c. each.

Metals and Hardware. — Hardware orders are coming in more freely, and heavy metal men report somewhat better business, but the volume of trade is not equal to that prevailing at this time a year ago. The British iron and plate markets are reported rather easy, and expectations of lower values in various lines seem to be entertained in some

THE COMMERCIAL
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

New possible buyers of your goods are coming into the country every day, and will continue to come. They read "The Commercial."

Your announcement will introduce the traveller or secure mail order business. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe and keep posted on Western trade.

quarters. Locally, pig iron and bars are quoted at old figures. Iron pipe is steady at $4.42 for inch. Canada plates are easy at $2.20 to $2.25, but black sheets are relatively higher at $2.25 to $2.30. Galvanized sheets, tinplates, etc., are unchanged. Lead is steadily advancing, and is now quoted at $3.50 in a jobbing way; a meeting of the lead pipe manufacturers was held yesterday, but it was not decided to advance prices as yet. Copper is also showing a gradual firming up, and 13¾c. is the present jobbing price. Spelter is steady at 5¾ to 6c., and antimony at 7¾c.

Oils, Paints and Glass.—The improvement in the movement, as noted last week, continues, and a fair seasonable trade is doing. In quotations not a change is reported, but further decline is expected momentarily in turpentine. Quotations are: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c.. net 30 days, or 3 per cent. for four months' terms. TORONTO MARKETS.

Toronto, April 14th, 1904.

Chemicals, Drugs, Etc.—Trade in local drug circles is about fair, without any particularly noteworthy feature presenting itself. The most important point in the situation in New York has been the decline in refined camphor of 8c. per pound, owing to the fact that crude is again coming forward from Japan. It keeps steady. No change in menthol has occurred since the drop reported a week or two ago. Opium is easy.

Dry Goods.—Wholesalers report a fairly busy week. No further changes have taken place in staple cotton goods, but prices continue very strong. Travellers report prospects for the coming season as excellent. Payments early this month were hardly up to the average, but this had not been expected.

Flour and Grain.—The only change reported in grains is in the price of rye which is 1c. higher, being scarce and wanted. Wheat is quite dull. Little business is being done, and receipts are almost nil. Flour is steady at $3.57 for ninety per cent. patents in buyers' bags, with extra brands a little higher. Oatmeal is very firm. Bran and shorts remain without change.

Groceries.—There has been no change this week in sugars, though the New York market has strengthened still further. Canned vegetables are in very good demand, and prices are firm. Teas also show a rising tendency, and business is fairly active. In dried fruits no special feature is displayed, but currants promise to be firmer.

Hardware.—Trade in general lines of hardware is becoming more active, as spring requirements become more urgent. No price changes have been made recently, and values keep firm. All the indications point to a good season's business as soon as navigation opens. Metals are moving fairly well, considering all things, but a considerably brisker trade is looked for at an early date.

Hides and Skins.—Trade may be described as quiet, but steady. The offerings, for this time of the year, are fair. Calfskins have made no change. Leather is showing considerable activity and a good deal of talk of advancing prices is heard.

Provisions.—The butter market is easy, owing to the liberal receipts of large dairy rolls. For choice dairy and creamery, the demand is good. Not much change has occurred in the cheese situation. A steady market prevails for eggs (new laid) at 14 to 15c. Hops are dull, with Canadian crop quoted at 28 to 30c. The offerings of dressed hogs continue rather small, but prices continue easy. Hog products are in fair demand, but this is expected to improve with the opening of navigation.

Seeds.—Greater quietness than is usual at this time of the year prevails in the seed business, but this no doubt is due merely to the lateness of the season. Prices are quoted as follows: Alsike, $4.25 to $7.80 per bushel; red clover, $5.25 to $7.50, and timothy, $1.50 to $2.75, the latter for flail threshed.

Wool.—Business is still very quiet. In fleece very little is doing, while in pulled wools, the demand from the domestic mills is very slow.

"The Unexpected Always Happens."

Who is there but has had brought home to him the truth of the above statement? It is always the accident that was least looked for that actually does occur. Nobody is immune from accident. Your experience and observation confirm that fact.

WISE men prepare for such emergencies by carrying an accident policy. The WISEST men see to it that that policy is an Employers' Liability Combination Policy, issued by

THE EMPLOYERS' LIABILITY ASSURANCE CORPORATION, LIMITED

MONTREAL - - TORONTO

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

As an... Investment

We believe our **5% DEBENTURES** to be one of the safest and surest that you could possibly enter into. It is safer than a Bank, because you have all of our Permanent Capital Stock, and the whole of our Assets, consisting of first mortgages on improved real estate, as a guarantee behind the Debenture. It is the surest, because the half-yearly coupons are attached to the Debenture and can be cashed at any bank in the country. . . . . .
Write to-day for our booklet, entitled, "An Investment of Safety and Profit."

Mercantile Summary

The New Brunswick Consolidated Railway is applying to the New Brunswick Legislature for a charter empowering it to construct and operate railway lines from Adamsville to some point in Queen's County, and to absorb by purchase the Bearsville, the Kent, Northern and the Kent Northern extension railways.

The public accounts of Prince Edward Island were submitted in the Provincial Legislature at Charlottetown on the 11th inst. They show ordinary expenditure, $328,600; ordinary receipts, $319,000; immediate liability of the province, $431,000; total debt, $667,000. The revenue includes: Dominion subsidy of $212,000; land tax of $32,000; road tax of $13,000; income tax of $19,000; commercial travellers' tax of $8,000; succession duties, $3,000; insurance companies' tax, $6,000; public lands, $6,000. The largest items in expenditure are for education, $124,000; ferries, $18,000, roads and bridges, $50,000; insane hospitals, $28,000; interest $29,000.

The Temiskaming and Northern Ontario Railway Commission has awarded the contract for a steel bridge over the Montreal river, about ninety-four miles north of North Bay, to the Dominion Bridge Company, of Lachine, Que. It will consist of three spans 125 feet long, and will cost about $20,000. For the construction and supply of six 40,000 gallon water tanks, a contract has been awarded to Messrs. O'Boyle Bros., of Sault Ste. Marie. Three of these water tanks are to be completed on or before September 1st next, and the others on or before December 31st, 1904. The contract for passenger equipment has been awarded to the Crossin Car Manufacturing Company, of Cobourg. The order calls for three first-class and four second-class coaches and two baggage mail and express cars to be delivered in September and October.

The Crude Oil Producers' Association, of Canada, have established an imposing headquarters office at Petrolia. The formal opening of this on the 14th inst. was made the occasion for a banquet, at which speeches were made by many men prominent in the oil business. Mr. W. Gleason, who presided, explained that the objects of the association were non-political, but merely to secure by united effort the advancement and protection of their industry. Mr. J. D. Noble, the Mayor of Petrolia, referring to the efforts being made to have the duty on crude oil imported into Canada taken off, said such a step would be ruinous. The officers of the association are: Honorary president, Mayor J. D. Noble; president, Wm. Gleason; secretary, George M. Cary; treasurer, Chas. Egan, all of Petrolia; vice-presidents, George Parrott, Glencoe; M. Lodge, Moncton, N.B.; A. W. Parks, Oil Springs; John Campbell, St. Thomas; John Waddell, Grand Rapids, Mich.; H. T. Beamer, Detroit; F. M. Lucking, Detroit; F. L. Goold, Brantford.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are:—
"General Principles for Investors."
"Stock Markets and How to Profit by Them."
"The Theory of Option Dealing."
"How to Invest in Mines."
"Insurance as an Investment."
"Colonial Land: Its Coming Importance."
An entirely new feature is a collated list of "Average Values," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages). Post Free on mentioning The Monetary Times.

DEBENTURES FOR SALE.

The undersigned is prepared to receive offers for the purchase of debentures of the undermentioned Drainage Districts in the Province of Manitoba to the amount in each case set opposite the district, all of such debentures being guaranteed by the Province of Manitoba and issued under the provisions of "The Land Drainage Act, 1895" and amendments thereto, such debentures to be in denominations of $1,000.00 each, payable in thirty years from the date thereof, and bearing interest at the rate of four per centum per annum, payable half-yearly at the Union Bank of Canada, Montreal.

Drainage District No. 2, ...	$140,000 00
" " No. 6, ...	4,000.00
" " No. 7, ...	2,000.00

The debentures will be dated the 15th day of May, 1904.

All offers must be addressed to the undersigned, marked "Tenders for Drainage District Debentures" and must reach this office not later than the seventh day of May, 1904

Delivery of bonds to be made in Winnipeg.

J. H. AGNEW,
Provincial Treasurer.

Provincial Treasurer's Office.
Winnipeg, Manitoba, April 11th, 1904.

Mercantile Summary.

THE J. R. Booth saw mills at Ottawa have started up operations in full, for the summer, with a force of 1,900 men.

THE Hampstead Steamship Company has purchased a new steam-boat, the "Elaine," which made her trial trip on the St. John's River, last week.

IN a fire on the 14th inst., in Paris, Ont., the alabastine works were destroyed at a loss of about $10,000, and a fireman was killed and three injured.

MR. ALEX. McLEAN, of Ottawa, has been appointed trade commissioner for the Dominion in Japan, to which country he will sail from Vancouver on the 2nd inst.

THE Herring Cove Railway Company has received a charter from the New Brunswick Government to construct a line from Alma to Herring Cove, on the Bay of Fundy.

THE customs returns for the port of Vancouver in March were $102,012, as against $88,644 for that month last year. The Inland Revenue figures were $30,121 compared with $25,396.

RHODES, Curry & Company, Amherst, N.S., have just completed for the Temiskaming and Northern Ontario Railway Commission over 60 flat cars of 60,000 pounds' capacity. This was considerably within the term for delivery specified in the original contract. Thirty or forty more cars are to be built by the same concern.

"THE Scotch Hero," one of the new charter boats of the Dominion Iron and Steel Co., arrived at Sydney the other day, her cargo including 378 tons of rail. They were made in England from steel made by the Dominion Iron and Steel Co., and are to be sent to different parts of Canada to be tested on railways.

THE Minister of Marine and Fisheries will provide for the licensing of whaling along the Canadian coast. This means the establishment of a new industry, so far as Canadians are concerned. The whale fishing takes place, of course, beyond the territorial waters of the Dominion, so the license is really for the land establishment that is part of the industry. The permits will be for five years. The fee in the first year will be twelve hundred dollars, increasing to two thousand.

THE second annual meeting of the Trinidad Electric Company, which operates in Port of Spain, was held in Halifax on the 14th. The year's receipts from the tramway and light services amounted to $176,631. After paying bond interests, paying expenses and providing for the last quarterly dividend, at the rate of 5 per cent. per annum, the balance of $52,285 was carried to surplus. The net earnings were $101,185 ,and the interest charge $36,000. W. D. Ross, Toronto, general manager of the Metropolitan Bank, was added to the board of directors.

A DEMAND of assignment has been made upon Louis Bergevin, tailor and dealer in men's furnishings, Quebec, by the Gault Bros., Co., of Montreal. He was formerly of Bergevin Freres, who did a fairly successful business for a number of years, and dissolved in 1902. His troubles are stated to be largely due to a want of proper attention to business. His liabilities are estimated at about $13,000.

Mercantile Summary.

H. A. SIROIS, of Montreal, a maker of self-rising flour in a small way, has assigned on demand, and is said to owe $3,650.——Clovis St. Onge, of the same city, a suburban grocer, has also assigned, owing $1,400. or thereabout.

THE Quebec Steamship Company have elected the following directors for the current year: Hon. P. Garneau, D. C. Thomson, J. C. Thomson, A. F. Hunt, W. Simons, G. T. Davie, W. Price, of Quebec; F. H. Botterell, and M. N. Delisle, of Montreal.

TILLSONBURG, Ont., was on Wednesday last visited by a fire which did some $25,000 worth of damage. The chief sufferers were: C. W. Conn, stoves and tinware, loss $5,000; insured for $2,500; G. E. Burke, loss on buildings, $3,000; W. Dalrymple, store, loss, $5,000; insurance, $2,000.

HUGH MCCULLOCH, JR., Joseph Stauffer, of Galt, and others, have received a charter from the Ontario Government, empowering them, under the name of the Galt Art Metal Company, Limited, with a share capital of $100,000, to manufacture and deal in all kinds of sheet metal material for roofing, sidings, ceilings, cornices, etc.

A LARGE number of poles and wire lengths, belonging to the Montreal Light, Heat and Power Company, on Bout de l'Ile, having been carried away in an ice-break, the ninety-inch wire bringing electric power from Shawinigan Falls to Montreal, has been rendered useless, probably for several days, with the loss of at least 10,000-h.p.

A COMPROMISE arrangement is reported as having been made by D. Rancourt & Co., dry goods dealers, at St. Johns, Que. They were one of the firms burned out at the large fire in that town about a month ago, but had been reported as embarrassed previous to the event.——W. Langlois & Son, general dealers, Gaspe Basin, recently failed, are said to be offering 15 cents on liabilities of $2,200.——Eustache Gamelin, running a butter factory at St. Chrysostome, Que., is reported insolvent, with small liabilities.

THE quantity of ore shipped from the Rossland, B.C. mines last week was as follows: Le Roi, No. 2, 440 tons, milled 300; Centre Star, 1,157; War Eagle, 766; White Bear, 200; Spitzoe, 90; total, 2,953 tons; year to date, 126,927 tons. This is a considerable reduction from the usual figures this year, which is to be attributed to a succession of slides and washouts on the Red Mountain Railway preventing shipments to Northport smelter, while the washout of the transfer tracks between the Red Mountain and the Canadian Pacific lines shut off shipments to boundary plants late in the week. At the White Bear, construction of a concentrator is to be proceeded with at once.

OUR NUMBER
999 BAG

Buyers of this bag frequently say to us: "It looks worth five dollars more than you ask for it." It would have to sell for five dollars more if we made a few of them but the hundreds we have made makes the price where it is.

Mercantile Summary.

THE death is announced of Claude McLachlin, a member of the well known lumber firm of McLachlin Bros., Arnprior, Ont.

THE ratepayers of Niagara-on-the-Lake have passed a by-law granting a bonus of $10,000 and exemption from taxation for twenty years to the Niagara, Queenston and St. Catharines Railway Company, who are to build an electric railway from St. Catharines to Queenston.

Two hundred town sites along the line of the Canadian Northern between Port Arthur and Edmonton have been purchased by Davidson & McRae, of Duluth, for $1,000,000. Or, rather, we understand, they have been placed in their hands for disposal among actual settlers.

IT is stated that the Frontenac Cereal Company, of Kingston, will shortly erect a large mill in British Columbia, at a cost of $250,000 or over, probably either in Vancouver or Victoria. The demand for Canadian grain goods in Australia and the Far East is growing, and it is hoped by this step to take advantage of the fact.

B. F. WARD, of Bricton, N.S., now an elderly man, and long in business in the district, is reported insolvent. He was formerly in the milling line, but not very successful, at Melvern Square, and for some years has been conducting a stove business at present address.——C. C. Nickerson, a lobster packer, of Wood's Harbor, N.S., is also reported as having assigned.

IT is reported that J. A. Michaud & Co., general merchants of Chicoutimi, Que., are asking a compromise at the rate of 50 cents in the dollar, cash, on an indebtedness of about $7,000. Mr. Michaud, was, we are told, in the building and contracting line in Ottawa some years ago, and afterwards engaged in farming for a time before commencing storekeeping about eighteen months ago.

THE merchants of Gananoque have organized an association to protect themselves against "dead beats," and people of doubtful pay. Once a month they will have printed on a sheet of paper a list of those who run accounts and refuse to pay them. A copy is to be furnished every member, and a part of the agreement is that no one whose name appears on the list shall receive credit.

THE Ontario Agricultural College is branching out. C. A. Zavitz has been appointed to look after a plot of land which has been set apart for forestry near the Macdonald Institute building in the college grounds at Guelph. Some 30,000 seedlings will be planted, principally Norway spruce, white pine, white ash, basswood and sugar maple. These young trees are intended to be ready for distribution among the farmers in the spring of 1905 and 1906.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E. J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

AFTERMATH OF THE FIRE.

The scores of merchants and others whose premises were so swiftly swept away in Tuesday night's conflagration are losing no time in making arrangements for the future. Many of them have already made preparations to continue business as usual, and have secured temporary quarters in other parts of the city, among them the following:—

Gordon, Mackay & Co. have dispatched three buyers to Europe to secure new stock. Temporary premises 12 Front street west, and a four-story building is being already planned on the old site.

Brown Bros. will attend to business at 96 Yonge street.

The Henderson Roller-Bearing Company have their office as usual at Temple Building, and have succeeded in obtaining a good factory building at 785 King street west. It had been their intention, in any case, to put in a large assortment of new machinery.

The Office Specialty Mfg. Co. have opened temporary offices at 55 Yonge street, and can supply all orders.

The W. R. Brock Company will be in a position to supply customers from their Montreal warehouse. They intend to rebuild without delay. Temporary office accommodation has been found with Mr. H. Barber, 18 Wellington street east.

Warwick Bros. & Rutter have obtained premises in Johnston's Lane, whereat to handle ten Government printing contracts. They are already making preparations to rebuild, and offices have been opened at 26 Victoria street.

The Copp, Clark Company will rebuild their warehouse, but for the present have headquarters at their factory on Colborne street.

E. B. Eddy Co., temporary offices at 9 Front street east.

Merchants' Dyeing and Finishing Co. are making their temporary headquarters at 18 Front street east.

Robert Darling & Co., temporary offices 13 Wellington street west, with warehouse accommodation at the Nordheimer building.

Barber & Ellis Co., have taken up their quarters in the Board of Trade building, and have rented the Granite Rink as a warehouse.

A. A. Allan & Co., have taken temporary offices at 18 Wellington street west.

McClary Stove Mfg. Co. will have temporary offices in the Land Security building, and their London and Montreal branches will supply orders.

Kilgour Bros., paper bags, etc., will rebuild their burned premises at once. In the meanwhile they are carrying on business in the factory building behind the old offices.

Wyld-Darling Co. have secured temporary premises in the Standard Bank building.

E. & S. Currie, neckwear manufacturers, will resume business at once,.

The

TO THE SUBSCRIBERS OF THE CAPITAL STOCK OF THE CROWN BANK OF CANADA.

Public notice is hereby given that a meeting of the Subscribers of the Capital Stock of The Crown Bank of Canada will be held on the ninth day of May, 1904, at twelve o'clock noon, at the bank premises, No. 34 King Street West, in the City of Toronto, Ontario. The business of the meeting will be:

To determine the day upon which the annual general meeting of the bank is to be held.

To elect such number of Directors duly qualified under the Bank Act—not less than five, nor more than ten, as the subscribers may think necessary—who shall hold office until the Annual General Meeting of the year next succeeding their election.

To fix the quorum for a meeting of Directors, which shall not be less than three.

To fix the Directors' qualification, subject to the provisions of the Bank Act.

To fix the method of filling vacancies in the Board of Directors whenever the same occur during each year.

To fix the time and proceedings for the election of Directors in case of the failure of any election on the day appointed for it.

To determine when to close the stock books for subscription of the bank's stock by the public at $110 per share.

To prescribe the record to be kept of proxies, and the time, not exceeding thirty days, within which proxies must be produced and recorded prior to a meeting in order to entitle the holder to vote thereon.

And to regulate such other matters by by-law as the shareholders may regulate, pursuant to the terms of section 18 of the Bank Act.

Dated at Toronto, April 8th, 1904.

By order of the Provisional Directors.

FRANK ARNOLDI,
Secretary of the Provisional Directors.

Brereton & Manning, furriers, temporary offices, Carlaw Building.

G. Goulding & Son, milliners, temporary premises 5 King street west.

W. B. and V. E. Blackhall are looking for new premises.

The Gutta Percha & Rubber Co. state their orders can be supplied as usual from the factory. They have secured temporary premises in Sun Insurance building.

Charles Home, tailors' trimmings; building owned by Major John A. Carlaw, who will rebuild at once.

George H. Hees & Co., window shades and upholstery, are doing business as usual, the damage to their building, though situate within the fire area, having been slight.

City of Vancouver.

Sealed tenders will be received by the undersigned up to Friday, April the 22nd, 1904, at 4 p.m. for the purchase of $150,000 worth of Vancouver city debentures, payable at the City Treasurer's Office. Such debentures bear interest at the rate of 3½ per cent. per annum, payable half-yearly, and extending over a period of forty years. Interest and principal payable at the City Treasurer's Office in the City of Vancouver.

The Corporation reserves the right to reject any or all tenders.

THOS. F. McGUIGAN,
City Clerk.

Vancouver, B.C., March 25th, 1904.

THE PURITY AND EXCELLENCE OF
COWAN'S
PERFECTION
COCOA
IS ACKNOWLEDGED BY THE WONDERFUL SALE IT IS HAVING

H. S. Howland, Sons & Co., are endeavoring to obtain permission to open temporary headquarters on the Exhibition grounds.

The McLaughlin's flour mills will probably be rebuilt at once; temporary offices have been secured with Mr. Watts in the Board of Trade building.

McMahon & Broadfield, crockery, temporary offices 28½ Adelaide street west.

The Gale Mfg. Co. are occupying temporary offices in the Lowndes Company building, 142 Front street west, and expect to have a factory in operation by May 1st.

A SIGNIFICANT fact in connection with the recent fire was the almost complete destruction of the paper and printing business of the city. Such a condition of things makes it very inconvenient for many establishments, but help in this dilemma has been found in the fact that several of the more enterprising printers in outside cities and towns are well supplied and can fill orders promptly. The Planet Publishing Co., of Chatham, is in this happy condition.

—The aggregate export and import trade of Canada for the nine months ending with March 31st last amounted to $345,307,651, which is $14,832,238 more than for the same period a year previously. The figures include coin and bullion. The increase, however, is in the imports for consumption, for domestic exports showed a falling off equal to more than $7,000,000.

—To us in this country, at least, some of the remarks attributed to Sir Michael Hicks-Beach, in a speech a few days ago before the Bristol Chamber of Commerce, sound strange. "Any Government," said he, "which ventured to attack the value of a penny or the length of an inch would have an almost impossible task. The introduction of the Metric System in France was accomplished by a revolution which he hoped to God that Britain would never see. He disapproved of the appointment of a Minister of Commerce. The proper function of a Government was to leave trade alone. He hoped level-headed business men would think carefully before changing the country's fiscal system.

—Within the week there has been launched at Lorain, which is on the Ohio shore of Lake Erie, a steamer large enough to have attracted attention anywhere except on the great American lakes, where people are used to seeing big steamers. This one is the "Augustus B. Wolvin," constructed by the American Shipbuilding Co., and is called the largest steel steamer ever built on fresh water. [We do not say that she is not but—the good Americans are always turning out the biggest, or the finest, or the fastest something-or-other.] The "Wolvin" is to have a carrying capacity of 10,000 gross tons of iron ore on a mean draft of 19 feet. Her length over all is 560 feet; length of keel, 540 feet; beam moulded, 56 feet; depth moulded, 32 feet; water ballast capacity, 8,000 tons. Her engines are quadruple expansion, and she has thirty-three cargo hatches.

Why Waste Coal?
A smoke consumer that will consume, and at the same time effect a saving in fuel of from 5 to 25 per cent. must interest all power users.
That this is done by the
Royal Automatic Smoke Consumer
is clearly shown by the following letter:

Toronto, Ont., April 8th, 1904.
Royal Automatic Smoke Consumer Co.
Dear Sirs,— Toronto, Ont.
With reference to the three Royal Smoke Consumers installed by you in connection with our Boiler plant we desire to say that the representations made by you as to their efficiency have been satisfactorily demonstrated and the boilers are in no way defaced by the attachment. A very considerable saving in fuel is evident and the smoke is almost entirely dispersed.
During the most severe weather of the past winter we have been able to operate with two boilers where three were previously required. The cold air drawn by the steam blanket when the doors are open to fire, driven direct into the fireplace, causes a thorough combustion and no carbon seems to escape. The flues do not require such frequent cleaning, and steam is decidedly easier to keep up.
Yours truly,
(Signed) H. L. WAIT, Treasurer.
CANADA LIFE ASSURANCE COMPANY

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band - Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

CANADA'S EXPORTS.

Having seen by our last article on Canada's exports that nine-tenths of the products of this country go to the United Kingdom and the United States, we may now discover from the last Blue Book where the remaining tenth amounting to $21,460,000, goes. Half of it went in 1903 to British Possessions in various parts of the world; the other half to foreign countries other than the United States of America, thus:

Exports to	Value.
Australian Commonwealth	$ 2,897,528
New Zealand	450,567
British Africa	1,931,541
West Indies	2,158,850
British Guiana	513,295
Newfoundland	2,381,966
Other British Possessions	212,899
Total to British Possessions	$10,546,616

Of the $10,888,711 worth of Canadian produce sent to foreign countries besides the United States of America, the bulk went to eleven European countries, thus:

Exports to	Value.
Belgium	$ 1,658,163
Germany	1,618,517
France	1,330,713
Holland	600,452
Italy	295,470
Norway and Sweden	268,515
Russia	224,502
Denmark	166,105
Portugal	164,184
Spain	138,553
Switzerland	7,433
Foreign West Indies	1,269,491
Argentine Republic	1,010,827
Brazil	701,100
Japan	324,938
St. Pierre and Miquelon	227,549
China	175,636
Chili	153,008
Mexico	105,365
Hayti	73,161
Peru	67,210
Spanish Possessions	62,403
South American countries	76,667
Other countries	184,749
Total to foreign countries	$10,888,711

It may be necessary to remind the non-Canadian reader of these figures that the total exports of Canada last year were of the value of $214,401,674, of which 58 per cent. in round figures went to the United Kingdom of Great Britain and Ireland, while 32 per cent. went to the United States.

Of our grain, Belgium received $1,308,584 worth, mainly wheat, pease, barley, rye and oats; Germany, $670,009 worth, divided between wheat, rye, corn and buckwheat; Holland, $125,074 worth; Russia, $49,968; British Africa took $299,531 worth; Australasia, $129,493 worth; the West Indies, $300,010.

Canadian wheat flour was shipped to other countries than the United Kingdom and the United States to the extent of $2,292,860. Newfoundland, Australasia and British Africa received the bulk of this; to the West Indies went $160,668 worth; to British Guiana, Russia, Denmark, Norway and Sweden smaller quantities.

Our carriages, carts and bicycles are getting to be known in outlying parts of the world. Japan buys Canadian bicycles to a small extent, and Australasia took last year $113,000 worth of them, South Africa and Holland trial lots. Our shipments abroad of carts and carriages were only $179,000, but they went to more than a dozen countries.

Paper, of various kinds, is an item which has grown of late in importance of export. The combined purchases of Canadian paper by Great Britain and the United States, $379,000 in value, were exceeded by the purchases of Australasia, which were $386,593. Belgium bought $26,126 worth; Africa, the West Indies, the Argentine, Brazil and Peru helped to swell the total to nearly a million dollars.

Exports of provisions are shown by the comparative table at page 288 of the Blue Book to have increased pretty steadily from a total of $33,586 in value in 1899 to $50,569,000 in 1903. It is curious to observe that almost the whole of this large quantity—that is to say, $49,701,000 out of $50,569,000—went to the United Kingdom. Less than two per cent. was purchased by other countries. Butter to Africa and the West Indies, Newfoundland and St. Pierre; cheese to ditto ditto and a little to Australasia and the United States; bacon and hams to South Africa and Germany, a trifle to Guiana and Brazil help to make up this two per cent.

Lumber shows a more varied export, for no fewer than thirty countries are mentioned in the list on page 299 as receiving our "wood and manufactures of." The Argentine Republic took a fair share, nearly a million dollars worth; next, British Africa, then the West Indies, Belgium, Australasia, France, Spain, Portugal, Chili, Peru, Japan. For wood pulp, Belgium was our biggest customer outside of our American neighbors and Great Britain. Our household furniture went mainly to South Africa and Australasia; the former also bought Canadian doors, sashes and blinds.

THE LUMBER TRADE.

A few weeks ago, at the meeting of the Association, the possibility of advancing prices materially was freely discussed. So far nothing has been definitely fixed in this direction, but recent developments have certainly brought forth nothing to make such a course less probable. Building operations, which were looked for to begin on a large scale in many Ontario towns and cities so soon as the season would allow, are now likely to be required of a more extensive nature still, owing to the calamity in Toronto this week. In fact, it is not unlikely that that event, coming on top of an even then existing comparative shortage in materials will serve to bring the question of prices to a crisis. Up to the present trade has been steady, with no prominent feature except an improvement in transportation facilities since the cessation of severe weather.

In Quebec Province lumbering operations have been interfered with by the great depth and slow melting of the snow, while in some sections of New Brunswick conditions quite opposite have prevailed; and even yet lumbermen are not sure whether large portions of last season's cut can be saved.

Latest reports to hand from the Old Country say that a waiting game is being played by buyers, who seem to be unable to make up their minds as to the stability of the market. According to Farnworth & Jardine's (Liverpool) wood circular of 2nd inst., during the past month the arrivals from Canada in March were 10,401 tons register, against 6,278 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1902, 1903, and 1904 has been 61,752, 61,241, and 70,693 tons respectively. Business in March was unusually active, particularly as regards contracting for the coming season. The arrivals all round, although not excessive, have been more than sufficient for present quiet trade, and stocks generally are ample. As to Canadian woods, of waney about 32,000 cubic feet have been imported via Portland, Me., the deliveries have been fair, prices are steady, but stocks are ample. There have been no arrivals of square pine; the demand is quiet, stocks are large, but there is little change in value to report. For red pine enquiry is very limited. The demand for oak continues dull, the deliveries unsatisfactory, and stocks are large, but values are unchanged. Elm has been in request, stocks of prime wood are very small, and values rule high. The import consists of round wood, for which there has also been more enquiry. There is only very limited enquiry for ash. Of pine deals the import has been light but the consumption has been disappointing, and stocks are now larger than same month last year, but there is little change in value to report. For red pine deals the demand is quiet. New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals have been on too large a scale, and much in excess of the corresponding month last year, viz., 5,720 standards, against 2,680 standards in 1903; the consumption has barely kept pace, and consequently little impression is being made on yarded stocks, which are large; consignment parcels by the liners show a further decline in value, and are difficult to place. The demand for pine deals is quiet. Birch logs, both Quebec and St. John, N.B., have arrived more freely. The deliveries have been fairly satisfactory; prices are steady, and stocks are not too large. Planks have arrived more liberally, there has been more enquiry and stocks are moderate; prices show a little improvement.

THE TORONTO CONFLAGRATION.

The fire which devastated so much of the business quarter of Toronto on Tuesday night last was of a startling and distressing character. Starting at 8 p.m. in a neckwear factory on Wellington Street, west of Bay, it swept south and east, impelled by strong winds varying from west to north, until buildings covering twelve or fourteen acres, and ranging in height from three stories to seven, were gutted or levelled. Four blocks, extending from Wellington and King Streets to the Esplanade, were absolutely consumed, and parts of a fifth and sixth block further north are gutted. The force of the flames, fed by a strong wind, was appalling and the heat intense. The fire brigade worked like heroes from eight till daybreak in the morning, when the fire had spent its force. On Front Street the flames swept eastward as far as the custom house on the one side and the Bank of Montreal on the other, both these buildings being spared, as well as the old McMaster buildings, whose high and solid brick wall proved a barrier that the flames seemed able neither to surmount nor to destroy. At Bay Street the solidity of the Telegram building and the pluck of its private fire brigade probably saved another block from burning.

The disaster bears heavily on a great many firms whose buildings and stocks are thus wiped out of existence. It is a paralyzing blow to the paper and stationery houses in particular, and the wholesale dry goods trade, with one exception, lost their entire stocks. Factories and warehouses of many kinds, and scores upon scores of commission agents were burned out clean. And now that these people are trying to get temporary premises in which to carry on their businesses, it becomes known how really scarce warehouses are in Toronto. The interruption to trade will be felt by the city for a year or two at least.

A view of that dreadful scene from an elevated point close by impressed one with the awful force and fury of flames impelled by a strong wind. No person who witnessed it can longer doubt the reality of the conflagration hazard. Structures that looked massive and strong proved as helpless in the grasp of the devouring flames as the slighter and more flimsy buildings. And all the efforts of a good fire brigade, helped as they were by firemen and steam fire engines from Hamilton, Buffalo, London, and nearer-by places, were unable to stay the flames till they had destroyed ten million dollars worth of property.

Now is the time for citizens, whether property owners, architects, builders, insurance men, city authorities, or, above all, merchants and manufacturers, to see to it that this calamitous lesson shall not be lost. Let the community resolve that, in rebuilding, the materials which have been shown to be useless as fire-resisting shall not be employed. Wooden cornices, excessive window openings, combustible fittings, wooden partitions with lath and plaster finish, openings

through floors, wooden roofs, invite destruction by fire. On the other hand, brick or cement walls, terra cotta partitions, arches, floors and furring, hollow tiles, fire-proof roofs, steel beams and pillars, or heavy timber beams and supports, are necessary elements in slow-burning or fire-proof construction. Experience has shown all this, time and again, and people of ordinary prudence ought to heed the lessons of experience.

Another lesson to the community taught by this great fire is the inadequacy of Toronto's water supply in the congested down-town district. This defect was made very plain on Bay Street when streams from hose that should have reached four or five stories high did not reach the third floor. As we write, a meeting of Canadian managers of fire insurance companies is being held in the Royal building. It is too early yet to state what action will be taken, but the general feeling amongst underwriters points strongly to an increase of rates in Toronto.

Lists have appeared in several of the daily papers of the city purporting to give the amount of losses suffered by each fire insurance company. One paper makes out the aggregate insurance to be $7,830,000, and another gets it as high as $8,300,000. We have endeavored to compile such a list, and to make it accurate, but find this impracticable for, perhaps, a week yet. Some companies have given their gross policies, others the net amounts; some losses have been guessed at, others overstated in error. The true sum cannot yet be ascertained. Good opinions among underwriters place the probable destruction of property at nearer ten millions of dollars than twelve; and they think the losses to insurance companies in Canada will reach $7,500,000. This estimate does not take into account insurances carried in Lloyd's or elsewhere.

THE PRODUCE TRADE.

The quantity of dairy butter coming forward is large, and prices are decidedly easier. Buyers have things much their own way, and there has been during the last ten days a decline of 1 to 2c. per pound. Creamery is not quite so plentiful, as several of the winter creameries have changed to making cheese. However, to counteract this a number of the summer creameries are expected to start right away, and increased shipments will be the result. Dealers look for very low prices for butter this spring. The first reason for this exceptionally low value for butter is, of course, the easiness in the Old Country markets, due to heavy importations and to a lessening of the consumptive demand in factory districts. Some people have gone so far as to advise Canadian factorymen to confine their attention almost exclusively to cheese-making instead of butter, but whether this would prove good advice in the end is doubtful, to say the least.

The cheese market, too, is a quiet one for the same reason as the above, namely, the limited demand from Britain, where stocks are larger than they should be at a period so near the beginning of a new season. However, we understand that stocks on this side are now getting into comparatively small compass, and the reasonable prices should help to put business on a better footing. At present, holders seem anxious to clear up their stock. Some new cheese is being offered, with prices quotable at about 10c. the pound.

For some time past the trade in hog products has been dull, owing to the very large importations by Great Britain from other sources. For instance, it is stated that the number of live hogs killed in Denmark for British consumption was (during the last week of March) 40,500, as compared with 30,500 for the same period in 1903, or 25,000 for that in 1902, or 18,000 for that in 1900. The Danish farmers employ more scientific methods of feeding, and thus are able to tighten their hold on the British market. It may be stated that the price of bacon on the English market has dropped from 58 to 64s. per cwt. last September to 38 to 45s. two weeks ago. However, there is now a visible improvement, both in the British and local markets. Live hogs have advanced 25c. per hundred, and there are prospects of still further advances.

The receipts of eggs are increasing, but owing to the cold weather they are not nearly so large as usual at this time of the year. The season is now three or four weeks behind that of last year. With warm, seasonable conditions, however, dealers look for very free deliveries, everything having been tied up for so long.

CANADIAN FISHERIES.

For a long series of years the fisheries of Canada have formed an important part of her national industries, and have yielded a very considerable portion of her wealth. It has not always been possible to arrive at what annual value could be placed upon the products of our waters or our shores. The exports of them which we tabulate form but a minor share of the total produce. Four out of five of the great chain of lakes we share with the Americans, we have shores on the Pacific and the Atlantic oceans, and our streams, great and small, and our lesser lakes afford enormous supplies of fish food and fishery wealth. For many years we have placed an annual value of twenty millions or more upon this element in our national stock-taking. And it is very significant that in a period of thirty-three years no less than $378,000,000 has been yielded to the country by its five principal kinds of fish, thus: Cod, $125,200,000; salmon, $74,552,000; lobster, $68,645,000; herring, $66,106,000; mackerel, $43,444,000.

According to the report for the calendar year 1902 of the Minister of Marine the total value of our fish and fish product in that year was $21,959,433, while in the year preceding it was $25,737,153, and in 1900 it was $21,557,639. The principal reason for the decline was the lessened value of the British Columbia salmon pack and of the mackerel catch in 1902; but the decrease is general, the only exception being Manitoba. The share of fishery products exported is put down at $11,826,646, a sum which compares favorably with the exports of preceding years.

Our fisheries gave employment during the year to 77,801 persons, and the craft and gear used are valued at $11,305,959. The lobster fishery alone employed 13,563 persons. There are at present 723 lobster canners in the Dominion, and the plant for this purpose is valued at $1,287,656. In British Columbia there are 75 salmon canneries, valued at $1,500,000, employing 17,098 persons and producing 30,103,776 cans of salmon annually, so that the salmon and lobster industries are very important ones. Then there is the seal-hunting. In 1902 there were 34 sealing schooners and last year 24. Eight Canadian vessels operating near the Falkland Islands in the South Atlantic last year took 21,126 seals. The expenditure of the Federal Government in looking after our fisheries was $527,944; the revenues derived from them, $78,635.

A table on page 9 of the report of the Deputy Minister gives what appears to be a resumé of the tables

on pages 12 to 15, showing the estimated value of fishery products in each of the Provinces and a comparison with the yield of the previous year. We subjoin this resumé:

	Value of all fish.	Increase over 1901.	Decrease from 1901.
Nova Scotia	$7,351,753	....	$ 637,795
British Columbia .	5,284,824	....	2,657,947
New Brunswick ..	3,912,514	....	280,750
Quebec	2,059,175	....	115,284
Ontario	1,265,706	....	162,372
Manitoba and North-West ...	1,198,437	$240,027	....
Prince Edward Island	887,024	....	16,359
Total	$21,959,433	.....	$3,777,720

In the fresh water species of fish, says Col. Gourdeau, pickerel, whitefish, pike and sturgeón make the best showing as compared with the previous year, but among the salt water kinds a dozen show a decreased production, while only four kinds show an increase, viz.: halibut, pollock, alewives and clams. A comparative table on page 10 shows that the production of salmon exceeds in value for 1902 that of cod. Its total was $4,335,039, consisting of 5,050,609 pounds of fresh salmon, valued at $790,567; 3,025,386 cans of preserved, valued at $3,012,119; and $532,353 worth of smoked, pickled or dry salted. Codfish is put down at a value of $4,028,788, the great bulk of it from Nova Scotia Next in the list come lobsters, $3,133,737, from all the Atlantic Provinces. Of these, $1,903,491 worth (93,830,000 pounds) were canned and the remainder alive or fresh. The value of herring was $1,723,098; next to them in the salt water list is haddock and halibut, in about equal proportions, the latter, however, showing an increased product. Smelts, sardines, hake, pollock, clams, alewives, oysters and eels conclude the list. With some surprise one sees Ontario put down as the producer of 33,804 pounds of canned lobsters, valued at $17,013. Supposing these were brought from some seacoast and canned in Ontario the Province has no right to claim them as a product.

HANDY INSURANCE ARRANGEMENTS.

We have had some enquiry about the Toronto Life Insurance Company, which is being heard of in various parts of Ontario. In the abstract report of the Inspector of Insurance for 1903 we find that this company has 1,421 policies in force, amounting to $1,269,550, which shows the average size of each policy to be between $800 and $900. "What is the strength of the company?" one enquirer asks, and we reply that we do not think it has much strength. The total assets are put down at $86,648, of which $14,791 consists of premiums outstanding, $2,387 of deferred premiums, and $437 of bills receivable. Stock paid up is put down at $48,050. They owed at the end of 1903 no less than $12,177 for commissions and $3,584 for medical fees, besides $4,030 on advance premiums. And they calculate their insurance reserve at 4½ per cent. interest. Any insurance man can judge—even an unscientific business man may see from these figures how much "strength" there is in the thing. The fact is that the Toronto Life is a sort of attachment to that already unwieldly concern, the York County Loan and Savings Company, whose affairs have lately been the subject of legislative enquiry in Nova Scotia and of popular enquiry in many other parts of Canada. The president of both concerns is Mr. Joseph Phillips.

Here is an illustration given us of the way in which the attachment is attached. Some young fellow, for example, has been induced by a glib-tongued agent to deposit so much a month of his savings with the York County Loan Co. When he has accumulated $50, or possibly $100, he may want to draw some of it out. But no, by no means. That does not suit Mr. Phillips' book at all. Instead, he is then told: "See here, now is the time for you to insure your life. We cannot give you any money back out of your deposits, we need that all ourselves; but you take out a policy in the Toronto Life Company and we will settle for the premium. That will leave you still with $20 or $30 in our hands *at interest*." Anything rather than to be called upon to pay out money to shareholders—the concern apparently exists only to *take in* money. But this insurance thing is a handy arrangement of theirs—very handy. So is the piano selling attachment; so is Mr. Phillips' magazine; so was the penny-box feature. They all show what a student of credulous human nature the president is, and how many people there are in the world ready to be humbugged. A Woodstock man asks us the question: "Would you insure in the Toronto Life if you were in my place?" and our answer is emphatically that we would not.

FIRE INSURANCE IN CANADA.

The fire insurance companies' record in Canada for the year 1903 is not a bad one. The aggregate of loss suffered was less than in any of half a dozen recent years, as a small table of comparison below will show. On page 1424 we give a reproduction of the Abstract for the Year, just issued from Ottawa, showing premiums taken, losses incurred and total at risk in the case of all companies reporting. The number of Canadian and American companies operating in the Dominion is the same as in 1902, namely, nine and eight, respectively, but the British ones number nineteen where in 1902 there were twenty-one, the Imperial and the Lancashire having been absorbed during the year. Total losses incurred were $5,815,860, which is equal to 50.86 per cent. of the $11,434,856 premiums received. The volume of insurance at risk is $1,140,812,000, an increase of more than $65,000,000 over the preceding year.

Total losses incurred,	1898	$4,784,487
" "	1899	4,568,393
" "	1900	8,078,931
" "	1901	6,783,617
" "	1902	4,288,562
" "	1903	5,815,860

Speaking roughly, the British companies did two-thirds of the business; the Canadian, one-fourth; the American, one-eighth—the exact proportions are 63.74 for the British; 22.89 for the Canadian; 13.37 for the American in 1903.

The ratio of loss incurred to premiums received was in the same order: 50.98, 52.71, 47.90 per cent.—showing that the Canadian companies suffered most and the United States companies least.

Taking the aggregate of losses incurred and dividing it by the net premiums we find the ratio of loss over the whole business to have been 50.86 per cent. This, while not disquieting compared with the loss ratio of some preceding years, compares but poorly with the 40.53 record of 1902.

The principal figures of groups of companies are as under:

	Premiums.	Amount at risk.	Losses of the year.
Canadian companies ..	$2,330,549	$261,144,099	$1,228,491
British companies	7,336,485	727,135,427	3,740,352
American companies ..	1,767,832	152,433,226	846,817

The British America and the Western had respectively at risk in Canada $46,000,000 and $58,000,000. and the London Mutual $67,000,000. The largest amount at risk is shown by the Royal, namely, $104,000,000; next comes the Liverpool and London and Globe with $68,690,000; then the North British and Mercantile with $63,771,000 and the Phœnix of England with $61,801,000. The Queen, of America, the Commercial Union and the Guardian have about $45,000,000 worth of risks each.

Canadian companies, while they show the lowest rate of premium obtained per cent. of risk taken ($1.07), have the unpleasant pre-eminence of exhibiting the largest percentage of expense namely, 33.70 of the premiums; while the British get along with 29.49 and the American with 27.14 per cent. This is partly owing to the head offices' expenses of the Canadian companies, which the others do not have to bear.

INVESTMENTS OF CANADIAN LIFE COMPANIES.

Particulars of the investments of Canadian life insurance companies is set forth in the recently published Abstract of Statements of Life Insurance Companies for the year ending 31st December, 1903. The total assets of the twenty-one home offices now reach $81,667,747, an increase for the year of no less than $8,147,365. It is interesting to note how these funds are invested; this is set forth in the following table. By way of comparison we have included the various assets for the year 1902:

	1902.		1903.	
Class.	Amount.	Percentage of total.	Amount.	Percentage of total.
Real estate	$ 4,979,627	6.77	$ 4,789,302	5.86
Loans on real estate..	19,597,517	26.66	21,095,905	25.83
Loans on collaterals.	3,595,546	4.89	3,152,264	3.86
Stocks, bonds and debentures owned	33,124,857	45.05	38,860,795	47.58
Loans on policies	7,044,112	9.58	7,942,580	9.73
Cash	1,471,370	2.00	1,568,093	1.92
Agents' balances	85,271	.12	106,492	.13
Interest and rents due and accrued	1,044,660	1.42	1,169,586	1.43
Outstanding and deferred premiums	2,424,535	3.30	2,838,571	3.48
Other assets	152,887	.21	144,159	.18
Total	$73,520,382	100.00	$81,667,747	100.00

"Real Estate," "Loans on Collaterals," and "Other Assets" were less at the close of 1903 than at the close of 1902. All the other items show an increase for the year. The two most noticeable increases are, "Loans on Real Estate," and "Stocks, Bonds and Debentures Owned," the increase in the former item being $1,498,388, and in the latter $5,735,938. We presume that a large proportion of the increase under the heading of "Stocks, Bonds and Debentures Owned" arises through the purchase of bonds and debentures rather than of stocks. Mortgages on freehold and bonds and debentures constitute together no less than 73.41 per cent., or almost three-quarters of the entire investments of life insurance companies; they are rightly regarded as the most suitable classes of investments for the purposes of a life insurance company, yielding, as they do, a fair average rate of interest, and keeping the capital actively employed for a comparatively large number of years. These investments, wisely selected, also rank very high in respect of security, which is the main desideratum in the investment of life assurance funds. We are interested to find that the item "Real Estate" not only shows a decreased percentage so far as the total assets are concerned, but that in amount the figures for 1903 are about $200,000 less than those for 1902. This form of investment has not proved profitable. "Loans on Collateral" show a decrease of about $450,000, and in percentages from 4.89 to 3.86. Life insurance funds are usually only loaned in this way when waiting permanent investments. Loans to policyholders on the security of their contracts have increased about $900,000. This investment is, of course, beyond question, both from the standpoint of security and interest return. "Agents' Balances" have increased about $20,000. The total amounts to but $106,492, distributed amongst thirteen offices. We are of the opinion that this item should be written off and expunged from life companies' accounts. It is generally regarded as of doubtful value, and some insurance supervisors in the States do not admit it at all. The investments of our Canadian life offices appear on the whole to have been judiciously made in the light of the special financial requirements of the business.

BRITISH AND AMERICAN VIEWS OF CANADA.

Manitoban.—"The reason we are getting so many Americans into our Province as commercial investors as well as farmers is that the American is among the quickest of men to see "a good thing," and to get hold of it."

Ontarian.—"Then, I suppose we may expect to see a million of American residents in our North-West before the slow Englishman is aroused to the great value of that western country."

A Canadian who has just returned from a visit of some weeks to the United Kingdom, hearing the above conversation, commented upon it thus to one of the speakers: "It is a mistake to call the Englishman slow, or even dull of apprehension. I have seen enough of the Old Country during my recent visit to convince me otherwise. But they are *conservative*—disposed to let well alone, unwilling to believe in wonders which they themselves have not seen. And so when they are told of what Canada has to offer in her rich lands they are not easily roused from their usual attitude of calm satisfaction. And as to the Chamberlain idea, so far as Canada is concerned they judge her often by the extent of her present trade with them, which is so small compared with their world's trade that it does not move them."

There is something in the statement, no doubt, to account for the unmoved way in which the English farmer or farm laborer hears of a hundred thousand people from the United States flocking into the plains of Manitoba and Assiniboia; or the calmness with which the English merchant or manufacturer hears of the sale in Canada of $156,467,000 worth of merchandise by the Americans, Germans and French in one year while his trade with Canada is only $58,596,901 in the same year. Of course, he does not, probably, see the Canadian Blue Books, but he may see the British ones if he cares to look up the proportions of Canadian trade

in them. We may here take the opportunity to cite, for the information of the British exporter, the figures of imports into Canada from the four countries at two dates, thirty years apart:

Year.	Imports into Canada from United Kingdom.	Imports into Canada from United States, France and Germany.
1873	$68,522,776	$ 50,858,981
1903	58,596,901	150,467,861
	Increase	
Decline of British.	$ 9,925,875	of foreign $105,608,880

The total imports of Canada during the first of these years amounted to $127,514,000, and in the last to $233,790,000.

In the first of these years the share Great Britain sent us of these totals was $68,522,000, and in the last $58,896,901—a *decline* of nearly two millions of pounds.

The United States sent us only $47,735,000 in 1873, which sum had *increased* to $137,605,000 in 1903.

Germany's sales to us were only $1,099,000 in 1873, but had *grown* by 1903 to $12,282,000.

France sold Canada $2,023,000 worth of merchandise in 1873, which she *increased* to $6,580,000 last year.

"It would be an excellent thing," said a distinguished Englishman on his recent visit to the Dominion, "If more of our people [of the United Kingdom, he meant] could be got to come to Canada and see the country, as well as ascertain your point of view." He was right. Not one alone, but half a dozen at least of the British Chambers of Commerce delegates, after spending six or eight weeks here, and seeing Canada from Halifax to Vancouver, voluntarily confessed to the writer of this article that what they saw and learned while here had greatly changed their opinions upon trade matters, and had besides enabled them to understand Canadian trade policy and feeling.

We can think of no better means of enlightening the English mind about this country—nay, we might almost say there is no other means of persuading the stubborn Englishman than to get him out here on a visit. And the best time for him to come is in the summer or the autumn. Let a group—a dozen groups—of sensible, practical men, not mere figure-heads, come out to Canada about or before the time of harvest in the North-West and see that wonderful harvest. Let them attend the Winnipeg Summer Exhibition in July or August, then go to the Pacific Coast, and come back east in time for the Toronto Industrial Fair in September, and on to our Atlantic ports. Let them keep their eyes and ears open, and stay long enough to see some district of the Dominion thoroughly. Then they will not wonder that the wide-awake folk of the United States are coming into our borders by tens of thousands as manufacturers, miners, investors, farmers. And they will begin to think of Canada, in virtue of her enterprise, her resources, and her thrift, as one of the coming countries of the world.

WINNIPEG, AND THE MANITOBA FAIR.

As the West grows, Winnipeg grows; and both are growing unmistakably. There is certain to be a continuation of the influx of people from the United States into our North-West, and the advent of many more immigrants from Europe is to be expected. As a distributing point for these, Winnipeg is unrivalled; and, since the new comers are not all farmers, she may reasonably expect to retain quite a proportion of them among her residents. In any case, each successive train-load of those who enter the Gate-way City means additional business for her, because a considerable proportion of them will either become residents within her borders or take up land not far away, and hence increase her wholesale business.

It is interesting to hear what is being done in preparation for the exhibition of 1904 at Winnipeg. The accounts of the new arrangements being made are quite startling, so greatly are the accommodations to be increased over former years. The space for cattle, for example, will be double that of 1903—the space for horses, double—the space for swine, double. Two new buildings are to be provided for Canadian manufactures exclusively, each eighty feet by four hundred, and a building is being erected for miscellaneous exhibits whose dimensions are eighty feet by four hundred. The contracts for these have been let, so that they will be ready for the opening of the Exhibition, which is to be held during the last week of July and the first week of August.

A very great improvement will be seen this year in the general arrangement of grounds and buildings, and the plan seems to us in some respects a model for such occasions. Through the courtesy of Mr. Heubach, the manager, the most prominently known, perhaps, among the live men who have built up this great fair, and who has just passed through Toronto on his way from England to Manitoba, we have seen the new plan of the grounds and buildings. Entering the grounds from the street car terminus, the race track, etc., is on the right hand, the amusement grounds, grand stand, etc., on the left, the latter succeeded as the visitor progresses by great spaces for agricultural machinery and traction engines. Proceeding from the race track across a spacious lawn, one comes to a curved facade of stucco, forming nearly a semi-circle. Behind this ornamental facade are ranged, parallel and close to one another, the various Exhibition buildings, the railway tracks in their rear. By this arrangement one does not have to walk an interminable distance to get from one kind of exhibit to another. And the administration buildings are close by. The advantage of this, to a tired spectator, is manifest. Nearly every building already on the ground will be moved into a new place to conform to this plan. The benefit of this concentration to a manufacturing exhibitor will, we should think, be very great. While it is too early to say what spaces have as yet been taken, it may fairly be concluded that the Winnipeg Fair, with its increased accommodation and its up-to-date arrangements, will be one of the greatest that has been.

PRICES OF COMMODITIES.

The London Economist's Index Number stood at the end of last month at 2234, compared with 2212 at the end of February, and with 2099 at the end of March, 1903. In fact it is higher than at any time since 1900, when there was a boom in the coal and iron trades, and it may be remarked that it is chiefly in minerals that any decline since then has taken place. In illustration take the prices at the end of the first quarters of 1900 and 1904, respectively, for the following articles: Scotch pig iron, 74s. 7½d. in 1900, and 51s. 6d. in 1904; steel rails, 150s. in 1900, and 90s. in 1904; best Wallsend coal, 21s. in 1900, and 16s. 6d. in 1904; copper, £78 in 1900, and £57½ in 1904. Against these declines may be placed the following advances in the same period: Wheat, 25s. 11d. in 1900, and 28s. 6d. in 1904; sugar, 12s. 3d. in 1900, and 14s. 9d. in 1904; cotton, 5 7-16d. in 1900, and 7.72d. in 1904; flax, £35½ in 1900, and £39 in 1904. Minerals and metals, after a regular decline for the past two years, however, now seem to have steadied. Pig iron has advanced materially during the last month or two, and stocks in hand are light.

Not very dissimilar results are shown by Dun's Index Number of commodity prices in the United States. On April 1st it stood at $102,482, compared with $103,615 a month previous, and $99,267 on April 1st, 1903. The slight decline during March may be attributed to the natural influences of the advancing season and in a measure to a reaction in some staples from the effects of speculation. The uncertainty of the weather makes it easy to sustain quotations

in agricultural items. There has been one notable decline, however, viz., in wheat, which fell off about 5 per cent. Meats, too, are slightly lower, while some other food products are a little higher.

OUR HALIFAX LETTER.

A number of business men of this city have organized a Country Club, and have purchased the property known as "Summer's Rest," on the western side of the Arm. The property comprises four hundred acres, and there is an old-fashioned residence upon it, which for the present will be used as the club house. There are a couple of lakes on the property, which are to be stocked with fish. Probably in no other city in Canada do the citizens combine as much pleasure with business as here. The mad rush for wealth which is characteristic of so many commercial centres, is not greatly in evidence, and Haligonians of all classes devote a good portion of their time to recreation. The place is famous for its hospitality, the number of its clubs, its outdoor recreations, and the natural beauty of its surroundings. Those who have an eye only to the business side of life have characterized the city as "slow"; but after all, perhaps there is more in life than the mere accumulation of wealth.

Mayor Scarfe, of the town of Dartmouth, fell heir to $500,000 last week. A brother died in Australia, leaving an estate of about $5,000,000, and under the will Mayor Scarfe comes in for the amount above stated. Over half a century ago the male members of the Scarfe family decided to emigrate, three going to Australia and one coming here. All have been successful; those who went to Australia being particularly so. The one recently deceased was a member of the shipping firm of Harris & Co., Adelaide, Australia. Mayor Scarfe is seventy-nine years of age, and has been chief magistrate of Dartmouth for nine consecutive terms. About the middle of May, accompanied by his daughter, he will leave for a trip to England, and will also pay a visit to a surviving brother in Australia if he feels he can stand the voyage.

The Halifax City Council has had its ire aroused by a special Act of the Provincial Parliament, which renders the city liable for consequential damages in connection with the payment for the right of way for the Halifax and South Western Railway. The Act was passed against the protest of the Premier, the Attorney-General and the representatives of Halifax city and county. The council will obtain a legal opinion on the matter from the legal firm of Borden, Ritchie & Chisholm, although it is generally believed the Local House acted within their powers in passing the Act.

The civic elections take place on the 27th inst. Very little interest is being taken in them this year. No opposition has yet developed to the re-election of Mayor Crosby, and the only contest of any note is in Ward 3, where N. V. Gastonguay is running against ex-Alderman Mahoney.

The new Government Sanitarium for the treatment of tubercular diseases is now completed, and will be opened next month for the reception of patients. It is located on an elevation in the charming town of Kentville, the most healthful spot in the famed Annapolis Valley, Nova Scotia. Several years ago the British Government offered a prize for the best design for a sanitarium for tubercular diseases and a number of plans were submitted. When a similar need arose in this Province the home Government was applied to, and the design winning the prize was forwarded, from which the present building at Kentville has been constructed at a cost of $20,000, and with accommodation for eighteen patients.

It would be better for Halifax if her monied men would talk less about Cuban or Trinidad railroads, South American enterprises or Mexican plantations and give a little more consideration and money to the establishment of small local manufacturing and other companies that would benefit a wide circle of people. I am impelled to say this after reading the report of the Amherst Board of Trade.

There are two men in Nova Scotia who have refused a Senatorship. Some time ago Mr. Rufus Curry, of Windsor, was appointed Senator, but declined the seat. Recently Mr. C. C. Blackadar, of the Acadian Recorder, was similarly honored, but decided for private reasons not to take upon himself the new duties of a legislator in the Canadian Senate. In addition to the conduct of a daily newspaper Mr. Blackadar is associated with a number of private enterprises and charities, and to accept the Senatorship, involving a six months' residence at Ottawa, would necessitate a great decrease in the time and attention he could bestow on these interests. The Acadian Recorder is the oldest newspaper in Canada, and the business is very remunerative.

The Munro Wire Works at their annual meeting made a very satisfactory statement. A dividend of 6 per cent. was declared and the reserve doubled. The company is continually extending its connection, and has lately opened up a good trade in Western Canada.

Halifax, 18th April, 1904.

AMHERST BOARD OF TRADE.

The annual meeting of the Amherst Board of Trade was held last Thursday. During the past two or three years this Nova Scotian Board has been doing aggressive work on behalf of the town. Largely through its agency the Henderson Woolen Mill was established in the place. The first step towards securing a wharf at Fort Lawrence was taken by the Board, and in a few weeks Amherst will have water communication with the outside world. Increased facilities for the handling of freight was another question taken up, with the result that the Intercolonial Ry. authorities have decided to spend a large sum of money at the Amherst station this year. The freight house is to be enlarged, commodious offices constructed and extra sidings built.

The number of industries in the town is increasing. The latest addition to the list is the Amherst Decorative and Flooring Company, the stock of which has been taken exclusively by the business men of the place. This company is formed for the purpose of manufacturing a flooring equal to marble in durability and appearance, but far less expensive. The process was invented in Germany. The King Edward Hotel in Toronto is partially finished with tiling and pillars of this material, as is also the Queen Hotel in Halifax.

There is one good thing that can be said for the people of Amherst. They do not lock up their capital in stocks or invest it in far-away enterprises; but any good proposition that comes along for the creation of a local industry in the town, where the people can watch how their money is expended, is always sure of liberal backing and support. In too many localities it is to be deplored that a spirit the reverse of this is manifested.

A NEW WELLAND CANAL.

The Dominion Marine Association has sent a resolution to the Governor-General urging that in view of the expenditure of $101,000,000, about to be made upon the Erie Canal from Buffalo to New York, it is important that no further delay should be allowed in commencing the improvement of our own inland water route necessary to ensure and maintain its supremacy. It suggests that the Welland Canal should be enlarged so that the larger upper lake vessels would be able to extend their voyage to the full length of deep water at or below the east end of Lake Ontario. By the New York route, it is pointed out, when the Erie Canal is deepened, a steamer of 6,000 tons will be employed from western lake ports to Buffalo, a distance of nine hundred miles, and a barge of 1,000 tons for 450 miles to New York. By the Canadian route, if the Welland Canal were deepened, a steamer of 6,000 tons would be employed for 1,100 miles, and a barge of 2,000 tons for 170 miles to Montreal. Canadians must look mainly to superiority of inland facilities to counteract the disadvantage of this country's position with regard to ocean freights.

The Association suggests that a shorter route could be obtained for a canal from the Lake Erie level, west of the

present canal, and that only seven or eight modern locks of large dimensions would be necessary instead of the large number of smaller ones now in use.

ANSWERS TO ENQUIRERS.

A subscriber at Sainte Basile, which is on the north shore of the St. Lawrence not far from Quebec, asks us for some explanation of the terms used in our weekly report of the ashes market from our Montreal correspondent, and a description of the different items and their packages. Potash and pearlash are quoted in Canada, both obtained from wood ashes. Potash is obtained by leaching wood ashes, evaporating in iron pots the solution obtained, and calcining the residuum. It is also derived from refuse of beet-root and can be got from sheep's wool. Pearlash is simply potashes purified by solution in water, filtration, and ignition. In former years, when the Canadian forests were being cleared of trees and their branches—very often their whole trunks—burned wood ashes were very plentiful, and leaching establishments, or potasheries as they were called, were numerous in Quebec and Ontario. The writer can remember one in the town of Amherstburg owned by the late John MacLeod, as lately as 1860 or 1865, where rows of huge iron pots were set in stone and iron furnaces, in a large wooden shed, containing the lixivium or lye of wooden ashes. This lye was boiled for a long time, day and night, until the lye evaporated and only the salts remained. It was a treat for the school-boys of those days to be allowed to go "down to the ashery" and listen—all the better if at night, when the glare of the fires and the fumes from the pots made an inferno—to the darkies singing in chorus. In many other places in the West of Ontario were asheries which shipped their product also to Montreal, thence to go to England and Germany for use in making flint glass, prussiate of potash, etc. In 1870, or thereabout, some 9,000 tons a year was imported into Britain. But since the discovery in Saxony of minerals which contain the requisite salts, and since the production of wood potash has become more expensive in this country, there is no longer a great export of ashes from Canada.

In the years 1868 to 1875, exports of potash and pearlash ranged from 22,000 barrels, valued at $720,000, down to 15,000 barrels, worth $519,000, in the later year, a good deal of it going to the United States. The export has gradually declined, almost year by year, to $100,000 in 1889, until it reached the lowest point in 1903; namely, 1,516 barrels, valued at $45,846, of which 304 barrels went to the States, and 84 barrels to Belgium and Australia, the rest going to Great Britain.

Our Montreal correspondent says: "I imagine your enquirer, in speaking of 'making a lot of ashes,' refers to ordinary raw ashes from the furnaces, which would have to be treated in the manner described by you above, in order to turn them into the 'pot' and 'pearl' of ashes of commerce. In this respect there is nothing to be added to the description of the necessary process, as given by you. If there are no potash makers in the vicinity of Ste. Basile, a purchaser might be found for the raw ashes in the city of Quebec, where there are, if not recently closed up, several asheries located in the suburbs, a prominent maker there having been one N. Depatie, but I cannot learn if he is still to the fore. If your correspondents have a large quantity of ashes themselves, and could buy further supplies, as it is deemed quite likely they can in that part of the country, it would probably pay them to hire a competent potash boiler, and install an ashery plant, which would be quite inexpensive, consisting only of some leaching vats, and a battery of potash kettles. Potash is made from hard wood ashes, but excellent pearlash is made from soft wood ashes. The manufactured ashes is packed in very strongly made barrels, of ash or oak, weighing themselves 80 to 90 lbs., and the contents average a weight of about 700 lbs. The quotations, as given by us, are so much per hundred lbs. The principal buyers in the Montreal market are H. Dobell & Co., and Wilson, Paterson & Co."

C. D., Brantford.—Will you inform a subscriber what sort of goods Canada sends to Japan? I see you mention that country in one of your late numbers as buying Canadian manufactures.

[We reply that we sent to Japan last year wheat flour, cheese, butter and condensed milk; fruits, fish and fish products; coal, cotton goods, carriages and bicycles; metal goods and machinery, wood and wooden manufactures. The whole of our export to her only reached $325,181, and the principal items were fish and fish products, $158,371; provisions, $23,764; planks and boards, $68,140; cotton goods, $20,250; metal goods, $14,476. Canada bought from Japan last year $114,000 worth of rice, $363,000 worth of silk goods, $673,000 worth of tea, besides other merchandise to the value of $336,451.]

WESTERN BANK OF CANADA.

An increased business and a larger margin of profit than in the year 1902 are shown by the report of the Western Bank, just to hand. The proportion of profit to amount of resources handled is greater in 1903; there is a larger proportion of current discounts, and, of course, a lessened proportion of readily available assets, though this proportion, almost 38 per cent., is very creditable. It is always a pleasant thing for the management of a bank to have its rest in good ratio to its capital, and the directors will feel entitled to congratulation that in the twenty-second year of the Western Bank its rest reached fifty per cent. of the paid capital. The sum added to this fund last year was $42,500 out of total earnings amounting to $76,415. Deposits have gone up to $3,341,000, an increase of more than $400,000 in the twelve months. The report is a satisfactory one, and shows that the district of Ontario in which this bank is situated is sharing in the general prosperity of the country.

FIRE INSURANCE ITEMS

Wood & Kirkpatrick, the well known fire underwriters, who for some years past have been at 24 Scott street, this city, have just moved into new and larger offices in the Sun Fire Building, 15 Wellington St. E.

The insurance office of Mr. Alfred W. Smith has been removed from 72 King Street East to No. 9 Toronto Street. Mr. Smith represents the Alliance Fire Office, the Pelican and British Empire Life office and the Employers' Liability Company.

The reports of the city engineer's inspection on leakages show that 37,592 visits were paid to houses and places of business in Toronto, and 5,960 defects found in the water services. In the second visit 4,778 inspections were made and 2,338 defects were repaired.

A week ago, the fire underwriters of St. John decided to increase the insurance in that city on renewals. A few days ago they raised the rates 25 per cent. on all business, and the latest decision is to lift the rates on renewals. The cause of the increase is the poor water service in the city.

It is interesting to learn that the combined losses of the Western and the British America assurance companies by the Toronto conflagration of Tuesday night last will not exceed $440,000. The recent assumption by the Western of the risks of the National Assurance Company of Ireland prepared one to expect a much larger loss. There must have been a deal of judicious reinsuring done by both, as well as careful distribution of risks for they have both been doing business here for sixty or seventy years.

As an illustration of the almost inconceivable rapidity with which the fire last Tuesday swept over the doomed district may be related the experience of a young man who, upon hearing the news, rushed to his place of business, a factory on the Esplanade. Upon arriving, he found the inmates in a state of great apprehension, though the fire was still two blocks away. He joined energetically with them in removing valuables, but only for twenty minutes was that possible, for within that period the flames had begun to

eat into the back part of the premises. They seemed literally to lick up everything in their path like so much tinder.

Times of calamity and distress bring out people's kindliness sometimes. Instances of this were seen at the big fire the other night, when scores of merchants were seeking for means to move their valuables from buildings that the fire was threatening. Timothy Eaton sent his whole staff of delivery wagons and drivers down to the wholesale quarter with instructions to help in removing any one's goods to places of shelter or safety. Robert Davies, of the Don Valley, seeing about midnight that Hendrie & Co.'s cartage stables were likely to burn, went down to the man in charge and said: "Send your whole stable full of horses down to the Woodbine, I have a big building near there that will hold them all." And it was done.

FINANCIAL ITEMS.

The first shipment of gold from New York this season was made for the account of the Royal Bank of Canada. This Halifax institution had engaged some $600,000 for shipment to Paris.

The Bank of Nova Scotia is opening a branch at River Hebert, in Nova Scotia. It is not a very large place, but some important lumbering and mining interests are centred there.

American Magnate—What! You insist upon my settling a million on you? Why, yesterday you said only $500,000. Duke—But since then I've seen the girl.—Town Topics.

I say, asked Tom, Why did you change your wedding from the afternoon to the morning? To which Dick replied. The old man is going to give us a check at the wedding, and the banks close at 3.

The second annual convention of the American Institute of Bank Clerks is to be held in St. Louis, Missouri, on the 25th, 26th, and 27th August this year. Inasmuch as the "Louisiana Purchase Exposition" will be open then, an unusually large attendance is expected.

The net earnings of the United States Steel Corporation for the first quarter of the present year were $13,208,826, or $11,859,821 less than in the same period of last year, and $11,828,295 less than in the last quarter of 1903. The regular quarterly dividend of 1¾ per cent. was declared on preferred stock, but nothing done on the question of a dividend on common stock.

"We are not overcapitalized, and our plants could not be duplicated for their present capitalization," declared before the house committee Vice-President C. W. Lyman, of the Intercolonial Paper trust, against which recently the business managers of the big New York papers preferred charges. Lyman stated that the trust had $22,000,000 in preferred stock, $177,000,000 in common stock, and $13,000,000 in bonds. No dividends have been paid on the common stock since the first year, when a 2 per cent. donation was made.

A Fly's Leg Raises a Check.—An incident to a common house fly is reported to have caused the employment of an expert accountant for a period of seven months in the offices of a prominent grain company in the Chamber of Commerce, of St. Paul, Minn. For months this accountant has been seeking to find an error of an even hundred dollars on the books of the company. He went over the books hundreds of times, but found no error. Finally, he paused suddenly at the item of $140. His pencil rested on the figure 1, when it suddenly broke in two and slid down the page. It turned out that the supposed figure "1" was a fly leg, which had become pasted in front of the $40, making the item to all appearances $140. The fly had undoubtedly been jammed in the book when it was closed and one of the legs had adhered to the page in such a way as to baffle the expert

SAO PAULO TRAMWAY, LIGHT AND POWER CO., LIMITED

We have before us the third annual report of this enterprise which shows a healthy growth when compared with the report for 1902. An interesting fact brought out is that while the net income increased from $455,369.22 in 1902, to $612,543.33 in 1903, or 34.5 per cent., the operating expenses have decreased from 37.2 per cent. to 31 per cent. After paying one quarterly dividend at the rate of 1¼ per cent., and three quarterly dividends at the rate of 1½ per cent., aggregating $391,378.95, there was carried forward the sum of $221,164.38.

According to the manager's report, all branches of the company's operations are in good condition, and the prospects for development and expansion are exceptionally good. The general condition of Brazil is improving all the time. Politics continue stable in that part of the world, and such a condition is of course very desirable if such an enterprise is to attain the fullest stature possible Sao Paulo itself is making great strides; last year there were a thousand new houses erected, and the prospects for still more activity in building lines in 1904 are bright. All these facts combine to make this enterprise more successful and augur well for its future prosperity.

LIFE INSURANCE ITEMS.

Methuselah was glancing over his papers. "What a chump I was," he said, "not to take an endowment policy instead of an ordinary life." But, making the best of it, he started to sing: "A man's just as old as he feels."—Chicago Journal.

No fewer than twenty-one of the life assurance companies of the United States have each more than a hundred millions of dollars insurance in force. The New York Life heads the list with more than seventeen hundred millions. and the Provident Savings Life, with $105,000,000, is the latest to join the aforesaid list of twenty-one.

In the recent report of the Eagle Insurance Company, of London, England, the assets are stated to be over $14,000,000, the average rate of interest earned was 3.83 per cent.; the rate of expenses on net premium income, 17.8 per cent. The amount of new business written was about $2,800,000. While the number of claims was only 90 per cent. of the expected, the amount of claims exceeded the expected by no less than $75,000. Instead of volume of new business, quality, moderate expense rate, careful and judicious management would appear to characterize the management.

The following encomium on accident assurance is to be found in Cornelius Walford's Insurance Encyclopedia: "Accident insurance in its present form represents one of the most popular adaptations of the principle of insurance to the requirements of everyday life. It meets a recognized want. It gives to the professional and better classes a means of protection from the pecuniary and other consequences of disablement in a purely business form. What friendly societies do for the industrial classes accident insurance does for the higher classes. The cost of accident insurance may be said to be within the reach of everyone for whom it is intended."

Mr. J. B. Gillison, F.F.A., F.I.A., manager for the United Kingdom of the National Mutual of Australasia read a paper at the last meeting of the Faculty of Actuaries, in Scotland, on the subject of Investments of Australasian Life Companies. The average rate of interest earned in Australasia is slightly higher than that earned by British and United States companies, and lower than that of Canadian life offices. A large proportion of the funds, viz., 47.2 per cent., is invested in mortgages on improved city and agricultural property. The investments which rank next in importance and amount are loans to policyholders, and government and municipal securities and debentures.

The French insurance journal, L'Argus, tells some things not generally known about the greatest of all the French insurance companies, viz., Assurance Generales. It is, it appears, controlled by the French branch of the Rothschild

family, as the Alliance of London is similarly dominated by the English branch of that wealthy family. The Baron Alphonse de Rothschild has recently resigned the vice-presidency of the board of directors of the Assurance Generales in favor of his son, Baron Edward. This corporation has three separate branches of its business, each with its own capital, though all are managed by the one directorate. The stock of the fire branch is quoted at 26,400 francs per share upon a par value of 1,000 francs, the life branch sells for 31,700 francs per share upon a par value of 750 francs, while the marine branch has a market value of only 8,500 francs per share, its par value being 5.000 francs.

The year 1903 was the most favorable for interest rates for United States life companies since 1899. The average rates for 1903 for all companies was 4.09 per cent., an increase of seven points over the previous year's rate; in 1902 the rate was 4.02 per cent.; in 1901, 3.97 per cent.; in 1900, 4.07 per cent. The rates for the United States companies operating in Canada for 1902 and 1903, are as follows:

	1903.	1902.	Increase or Decrease.
Aetna	4.24	4.06	+ .18
Travelers	4.27	4.17	+ .10
Equitable	3.70	3.78	— .08
Metropolitan	3.98	3.75	+ .23
Mutual Life	3.96	3.66	+ .30
New York	4.17	4.09	+ .08
Provident Savings	4.05	3.74	+ .31
Union Mutual	3.81	3.80	+ .01
United States	4.69	4.50	+ .19

The lowest rate earned by any life company in that country was 3.63 per cent., which are the Prudential's rates; the highest was 5.72 per cent., the Union Central's rates, while the average, as before stated, was 4.09 per cent.

TRADE OPENINGS.

The following enquiries were made to the curator of the Canadian section of the Imperial Institute, London, during the week ending 8th April, 1904: A firm in Yorkshire asks to be placed in touch with Canadian manufacturers of extension ladders. A firm manufacturing steam shovels, excavators and other mining machinery wishes to obtain a market in British Columbia. A manufacturer of cheap watches is open to appoint a suitable Canadian resident agent. A company manufacturing dry and pulp colors is ready to appoint a Canadian representative possessing a connection in these lines. A firm in Northern France is open to represent Canadian shippers of apples and other fruits, butter, preserved goods and potatoes, or would sell on account.

DRY GOODS ITEMS.

Further information is to hand concerning the proposal of an English syndicate to take over the management of the currant crop in Greece for the benefit of the growers on a fixed commission. The methods suggested are to purchase the entire crop, to utilize any excess in various ways, to make advances as required to growers, to maintain a currant bank, and to erect warehouses in Greece and in the chief consuming markets.

At a recent meeting of the Wholesale Dry Goods Merchants' Association, in Toronto, a plan was talked over for the obtaining of uniformity of prices and methods for the whole Canadian trade. The procedure adopted by Montreal wholesale houses varies, for instance, from that of the Toronto concerns, especially with regard to the terms upon which goods are sold to retailers. What the wholesale Association wants is that business shall be put upon a more satisfactory basis generally.

The market for raw cotton has been almost wholly of a professional character lately, and there has been an absence of aggressive operations by either the bull or bear element. The public appears to have been effectually scared out of the market, and speculators are taking advantage of comparatively narrow fluctuations to scalp the market. No clique has been prominent and the New Orleans crowd appear to have sought at least temporary obscurity.—New York Dry Goods Economist.

All the raw silk markets have ruled in the buyers' favor and concessions from recent asking prices have been so broad as to attract quite liberal buying for forward as well as for spot delivery. As compared with the market situation ruling early in the season, that now prevailing closely resembles demoralization. The change, however, has been gradual, and its effect on the goods market has been beneficial rather than otherwise. At present silk prices, manufacturers can figure a fair profit on their goods, and the moderate price concessions that they are able to allow are stimulating demand for their products. What is more to the point the demand for silk fabrics is steadily increasing, and the outlook for fall is far more bright than it was at the opening of the year.

—The Forestry branch of the Department of the Interior are sending out 2,000,000 trees to farmers in Assiniboia, and, we understand, prizes aggregating in value to $1,000 are to be awarded to those who produce the best results in the way of plantations, windbreaks, hedges, etc.

—Under the direction of Hon. Clifford Sifton, Minister of the Interior, there has been published a geography of the Dominion of Canada, with maps of the different provinces, and many illustrations. It sets forth, for the use of schools and the guidance of intending settlers, an account of Canada's resources. Incidentally, it deals lavishly in information of a general and historical and physiographic character, and should prove of interest to the classes for whom it is intended.

—The extraordinary continuance of wintry weather in Ontario and Quebec is a feature which affects business injuriously in many ways. In South-western Ontario it has seemed during all April as if no sooner did a balmy day come than it was succeeded by a snowstorm. But we do not know that the latitude of Toronto has suffered anything so exasperating as that related by our Montreal correspondent. Writing on Wednesday night, Mr. Murray says: "The weather has ruled cold all week, and at the moment of writing snow is falling just as steadily as it has done for these last eighteen hours."

—A bill has been introduced in the Australian Parliament to authorize the payment of £324,000 in bounties on iron products, spread over a term of years. It may be remarked that, in the commission appointed some time ago to make a report upon the bonus system, five members voted against it, but since that time the Labor party, which is strongly in its favor, has been greatly strengthened. At present crude manufacturers of iron and steel are on the free list, though the Minister of Customs has the power to levy a duty of 10 per cent. ad valorem, as soon as he considers that a native industry in that line shall have been established.

—The commission of experts on steel manufacture, which left Canada for Europe last January, with a view to making a thorough investigation of the various electro-thermic processes employed in the smelting of iron ores and the making of steel, have now returned. It is believed by some that, as a result of their enquiries, the manufacture of iron and steel in the Dominion will be greatly encouraged, the report from one place visited by the commission stating that steel can be made by the electric process at a cost not exceeding $8 per ton. This certainly opens up wonderful possibilities for this country, which possesses such wonderful resources in iron ore and in water-powers.

--Forestry is to become an important feature at the Ontario Agricultural College at Guelph. Some thirty thousand seedlings will be planted, principally Norway spruce, white pine, white ash, basswood and sugar maple. These young trees will be ready for distribution among the farmers in the spring of 1905 and 1906. Mr. Zavitz will attend to the cultivation and distribution of the plants.

—The Associated Boards of Trade of Eastern British Columbia have unanimously endorsed the memorial of the Associated Silver Lead Miners and Smelters to permit of the temporary export of a limited quantity of lead ore, the quantity exported to share in the benefits of the Dominion lead bounty. If this is done the quantity of silver lead ore produced is likely to be greatly increased. They also approved of the memorial of the Rossland board, asking that the duty on acid not manufactured in Canada, used in lead refining at the Trail smelter, be remitted.

—It is a praiseworthy use of wealth to build churches, and this is quite often done. But not every donor of a church edifice to a parish takes so much pains to preserve it or shows as good sense in the conditions attached to an endowment fund as the donors of St. Mary's Church and rectory in Walkerville to the Church of England in Canada. These gentlemen are the three sons of the late Hiram Walker, to whose memory the buildings are erected. A friend in Windsor has sent us a pamphlet describing the church, and we cannot refrain from extracting the following passage from it: "An endowment fund has been provided, the income from which is charged as follows: To insure the buildings against fire and the stained windows against storm or tempest; to keep the buildings in proper repair; to maintain the churchyard and grounds in good order; and to support the musical services. Numerous lots in the churchyard (not separated as a 'potter's field,' but distributed), are set aside to provide free graves for poor parishioners; and a sum derived from the sale of lots is to purchase headstones for those buried in free graves." It enhances the value to a community of such a present when care is taken that the premises shall be adequately maintained, inside and out.

Meetings.

WESTERN BANK OF CANADA.

The twenty-second annual meeting of the shareholders of the Western Bank of Canada, was held at the head office of the bank, Oshawa, Ontario, on Wednesday, April 13th, 1904.

The following shareholders were present:—W. F. Allen, Dr. McIntosh, Thomas Miller, John McLaughlin, C. W. Scott, W. F. Cowan, T. H. McMillan, F. W. Cowan, John Cowan, Thos. Conant, W. H. Williams, and Thos. Paterson.

The President, Mr. John Cowan, occupied the chair, and Mr. T. H. McMillan acted as secretary to the meeting. The following report was submitted:—

Report.

The directors have pleasure in submitting the twenty-second annual report, for the year ending 29th February, 1904

The business of the bank has continued active and progressive during the year. The net profits of the year have amounted to $76,415.33, being in excess of 17½ per cent. upon the paid up capital of the bank, which, added to the balance carried forward from the previous year of $14,446.01, amounts to $90,829 94.

Out of this sum two half yearly dividends of 3½ per cent. each have been paid, absorbing $30,442.24. $42,500 carried to the rest account, and $2,887.70 carried forward to the credit of profit and loss.

The deposits of the bank have increased $417,778 23, and the circulation $12,815 ,and the gross assets $485,101.44 over the previous year. The losses of the year have been of a normal nature.

The rest account of the bank now stands at $217,500, or equal to 50 per cent. of the paid up capital

The agencies of the bank have all been recently inspected and found in a satisfactory condition.

John Cowan, President.

Oshawa, 13th of April, 1904.

Statement of Profits for the Year Ending 29th of February, 1904.

Carried over from profit and loss account last year	$14,414 61
Net profits of the year	76,415 33
	$90,829 94
Paid to dividend No. 42	$15,221 12
Paid to dividend No. 43	15,221 12
Carried to past due bills	15,000 00
Carried to rest account	42,500 00
Balance at credit to profit and loss account	2,887 70
	$90,829 94

Statement of Assets and Liabilities on the 29th Day of February, 1904.

LIABILITIES.

Capital account	$434,889 77
Rest account	217,500 00
Notes in circulation	407,235 00
Deposits with interest	3,341,637 69
Due to Royal Bank of Scotland	25,133 55
Due to dividend No. 43	15,221 12
Balance at credit of profit and loss account	2,887 70
	$4,444,504 83

ASSETS.

Specie	$30,122 41
Legals	24,253 00
Notes and cheques of other banks	39,582 33
Due from other banks in Canada	714,577 42
Due from banks in foreign countries	14,084 27
Deposit with Dominion Government to secure note circulation	21,655 16
Dominion and Provincial, municipal and other debentures	842,101 58
Assets readily convertible	1,686,376 17
Bills discounted current	2,692,184 04
Past due bills	5,301 42

T. H. McMillan, Cashier.

Moved by the chairman, and seconded by Mr. Allen, that the report as read be adopted, printed and circulated among the shareholders.—Carried.

Mr. Miller, seconded by Mr. Conant, moved that the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors of the bank for the manner in which they have conducted the affairs of the bank during the past year.—Carried.

Mr. F. W. Cowan, seconded by Mr. Scott, moved that the thanks of the shareholders be given to the cashier and other officers of the bank for their attention to the interests of the bank.—Carried.

Dr. McIntosh, seconded by Mr. W. H. Williams, moved that this meeting do now proceed to elect, by ballot, seven directors to fill the place of those retiring, and that Messrs. C. W. Scott and John McLaughlin be scrutineers for said election, and that the poll remain open for one hour to receive the votes of the shareholders, but that should five minutes elapse at any time without a vote being taken the poll shall be declared closed, and that the scrutineers be paid $4 each for their services.—Carried.

The scrutineers reported the following seven gentlemen as having received the unanimous vote of the shareholders, viz.:—John Cowan, Esq., R. S. Hamlin, Esq., W. F. Cowan, Esq., Dr. McIntosh, W. F. Allen, Esq., T. Paterson, Esq., and J. A. Gibson, Esq., who were duly elected directors for the ensuing year. A vote of thanks was then tendered to the chairman for his able conduct in the chair, and the meeting then adjourned.

At a subsequent meeting of the new board, John Cowan, Esq., was unanimously elected president, and R. S. Hamlin, Esq., vice-president.

THE SAO PAULO TRAMWAY, LIGHT AND POWER COMPANY, LIMITED.

Third Annual Report of the President and Directors for the Year Ending 31st December, 1903.

Submitted at the 3rd Annual Meeting of the Shareholders, Held on Wednesday, the 20th Day of April, 1904.

Report.

Your directors beg to submit to the shareholders their annual report, together with the financial statement for the year ending 31st December, 1903.

The earnings of the company have been most satisfactory, showing gross income amounting to $1,303,175.16, as compared with $1,123,285.17 for the previous year, an increase of $179,889.99, or 16.1 per cent.

The net income, after deducting all expenses and fixed charges, is equivalent to 9 per cent. on the issued capital stock of the company, the figures for the year being $612,543.33, as compared with $455,369.22 in 1902, an increase of $157,174.11, or 34.5 per cent. The operating expenses have decreased from 37.2 to 31 per cent.

There has been declared out of the net profits, one quarterly dividend at the rate of one and one-quarter per cent., and three quarterly dividends at the rate of one and one-half per cent., aggregating $391,378.95, leaving the sum of $221,164.38 to be carried forward.

The total expenditure on capital account during the year amounted to $537,295.78. This expenditure includes the construction of additional track, a duplicate pipe line, the installation of a 1,000-K.W. generator at Parnahyba (capable of generating 1,900-h.p.) and the extension of the overhead and light and power systems.

As will be seen by the attached report of the manager, Mr. James Mitchell, the fourth generator and turbine were installed at Parnahyba and put in service in April, 1903.

The duplicate pipe line was completed and put into service in the early part of the year.

Two additional circuits of transmission line were extended from the power house at Parnahyba to Sao Paulo.

During the year the rolling stock has been increased by thirty new cars, twenty of which were built of native wood and were constructed at Rio de Janeiro. There were also constructed in the company's shops a number of cars for use in freight traffic, an important and growing department in our railway service.

Owing to the increased demand for light and power, primary lighting circuits have been extended to all the populous sections of the city and to the most important suburbs.

The company's power plant, tracks, rolling stock and other property have been maintained in a high state of efficiency.

Statistical statements will be found attached to the report which show the continued increase in the different branches of the system.

I would also refer you to the attached report of our resident vice-president, Mr. Alexander Mackenzie. This report is particularly interesting as dealing not only with the company's affairs in Sao Paulo, but also with the general condition and future prospects of the United States of Brazil.

The books of the company have been carefully audited. Certificate of auditors will be found attached to the balance sheet.

In moving the adoption of the report now presented for your approval, I do so with great pleasure.

The year has been a most successful one, showing, as it does, remarkable progress in all branches of the system. I may say the prospects for the year 1904 are exceedingly bright. I quote from a letter recently received from our resident vice-president, Mr. Alexander Mackenzie, as the result of the company's advertisements, setting forth the advantages that Sao Paulo offers to manufacturers, a Scotch shoe firm has decided to locate in Sao Paulo, also that a cable has been received stating that manufacturers in Sao Paulo have contracted for 600 additional horse-power. We are to begin supplying this power within six months. This means an increase of 25 per cent. in horse-power now supplied and contracted for and an increase of at least $40,000 in our annual income from the power department.

It is gratifying to note that our list of shareholders is steadily increasing, the number on our register at the present time is over 650.

I would further call your attention to the statistical statement in which you will notice the excellent showing for the year, as compared with previous years. It will be seen that the gross income for the year 1903 exceeded that of 1901 by $550,000, that the net income for 1903 exceeded the gross income of 1901 by $150,000, and the net income of that year by $610,000.

Owing to last evening's most regrettable and disastrous conflagration, in Toronto, I am sorry to say there will be a delay in getting out the full complement of our printed report. When ready a copy will be mailed each shareholder.

I now beg to move that the report for the year ending 31st December, 1903, be adopted and distributed amongst the shareholders.

Respectfully submitted,

William Mackenzie, President.

The report of the manager, Mr. James Mitchell, dealt with the power house, pipe lines, machinery, etc., all of which are in perfect condition. As to the traction department, it also was in good shape and new opportunities for additional earnings were constantly appearing. He reported the prospects for public lighting as very good, and closed by stating that the company's plant and property have been well maintained throughout.

RESIDENT VICE-PRESIDENT'S REPORT.

William Mackenzie, Esq.,
President, The Sao Paulo Tramway, Light and Power Co., Limited, Toronto, Ont.

Dear Sir,—In making a general report to you upon the company's properties in Sao Paulo, I may say, as to the future, I see no reason why we should not show considerably better results this year. The general condition of the country is improving. Brazil controls the coffee and rubber trade of the world, producing 75 to 80 per cent. of the world's supply of both, and must continue to do so. It is also a large producer of sugar, cotton and tobacco. Each year of late, the output of national factories has been increasing and new industries are constantly starting. Notwithstanding almost prohibitive import duties, comparatively little has as yet been done in the line of national manufacturing. Here are some samples of existing duties: Cotton textiles from 100 to 200 per cent.; hessians and jute manufactures about 100 per cent.; woolen textiles from 100 to 200 per cent.; shoes from 80 to 120 per cent.; furniture about 100 per cent.

Formerly coffee was almost the sole product of the State and the adjoining State of Rio, all other necessaries being imported from abroad. Since the price of coffee became so much reduced, farming has become more diversified, and to-day many products are cultivated, of which immense quantities used to be imported.

The National Government is faithfully keeping up all its obligations, and its credit in London is so good that it recently floated a loan there of some eight millions sterling for the new port works in Rio, which was many times oversubscribed. What applies to the National Government applies with greater force to the Government of this State, which is the backbone of the country, and has always taken the leading part in national affairs.

Brazil is taking great interest in the St. Louis Exposition, having appropriated $600,000 towards expenses of its exhibit. This State will have its own separate exhibit. At the request of the Government, we are having large photographs taken of our plant at Parnahyba, which will be sent there.

Political conditions are stable, and whatever may be heard about revolutions in republics like Uruguay, Paraguay and Bolivia, Brazil must not be confounded with such countries. Any one of the least important of the twenty States of Brazil is of at least equal importance with these other republics.

Exchange has been steady around 12d. throughout the year. Many people expect higher exchange this year on account of the sudden rise in coffee. This, however, is pure guessing. The best that can be said is that indications are for at least as good exchange as obtained during last year. I believe it is to be the policy of the Government to favor high exchange, and gradually bring the milreis back to par. This, however, must be a very gradual process. Last year our remittances were made at an average exchange of slightly over 12d.

The city has made extraordinary strides since we began work in 1889. In 1902 there were over five hundred new houses built. Last year there were about one thousand, and the licenses asked for so far show that there will be considerably more building this year than last. The city is conducting public improvements on a large scale, and paying for the same out of the ordinary revenue. These works are chiefly in the way of pavements and other street improvements. In the centre of the city, where the streets are narrow and locomotion difficult, buildings are being expropriated, old streets widened, and new ones opened. Altogether, Sao Paulo is by far the most progressive city in Brazil, and outside of Buenos Ayres, the most up-to-date city in South America, and there is no doubt that having regard to the climate, its position as the distributing point of the chief state of the Republic, it is bound in the near future to increase greatly in size and importance. Its population to-day is somewhere between 285,000 and 300,000.

Faithfully yours,

Alexander Mackenzie, Vice-President.

Sao Paulo, 30th January, 1904.

LIFE IN WALL STREET.

Mr. Henry Clews has had such a long and close acquaintance with New York Finance that his book, entitled "Twenty-eight Years in Wall Street," which is enlarged from former editions by the additional experiences of the last fifteen years, cannot fail to find a very wide circle of interested readers.* The writer's advent on 'Change was made in 1857, the year following the great panic known as the Western Blizzard. His reminiscences of that early time, when the great financial institutions of the United States were controlled so largely by "old fogies," are amusing in the light of later history. But between the lines it is easy to trace the author's desire to enlighten the public on what he would call the true status of Wall Street, and to help efface the many wrong or narrow impressions which the community have received regarding its methods of doing business. According to Mr. Clews, Wall Street is the very back-bone of the country's progress and prosperity, not the den of gamblers pictured by the ignorant prejudice of the majority. "The latter idea," he says, "has been largely fostered by clergymen on hearsay evidence, as well as by the practices of professional swindlers who have been smuggled into Wall Street from time to time, but who have no legitimate connection therewith. . . . Speculation is virtually a great productive force in our political and social economy, without which railroad enterprises and other branches of industrial development that have so largely increased the wealth of the nation, would have made but slow progress." And just as Macaulay considered that the true value of history lay not in the intrinsic importance of any past event, but only in its power to enable us to form just calculations with regard to the future, so does Mr. Clews relate his story.

Incidentally a lurid light is cast upon some branches of American financing. For instance, it is acknowledged that in railroad building, the law has permitted such enterprises to be undertaken with so much concealment, misrepresentation and actual fraud, and has so disregarded the rights of bondholders that the national credit has become almost a by-word on the European bourses, with the result that foreign capitalists have sought other fields for investment. The consequence is that the latter have obtained fresh sources for the supply of products which otherwise would have continued to be readily taken from the United States. "Such," adds Mr. Clews, "are the rewards of immoral financing." The book contains a carefully thought out chapter analyzing the tendency of the United States money markets to periodical panics. These are not accidental freaks of financing, but are due to the great mass of new and immature enterprises which necessarily are in much greater volume on this continent than in the older countries of Europe, and which naturally contain in themselves the momentum for vast and sudden movements. Panics, our author thinks, are liable to become rarer and more controllable with the passing of time and the rapid accumulation of surplus wealth acting as a steadying influence, but even yet America is largely a nation of pioneers, and this implies powerful oscillations in securities for a long time to come.

*"Twenty-eight Years in Wall Street," by Henry Clews, LL.D.—J. S. Ogilvie Publishing Co., New York.

—A Chicago letter of Easter Monday refers to the presence in that city of Mr. C. E. McPherson, general passenger agent of the Canadian Pacific Railway, in Winnipeg, who is making arrangements for next summer's emigration from the United States to the Canadian North-West. According to that gentleman's observations, the prospects are that a larger number of American farmers will settle there this season than ever before.

TO GET SATISFACTION

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

BEET SUGAR MAKING.

The Ontario Sugar Company of Ontario held their annual meeting in Toronto, on Tuesday last, Mr. Hugh Blain, who was in the chair, stated that while the past year's operations had not proved sufficiently profitable to justify the declaration of a dividend, yet the outlook for the future, providing that farmers will keep up a regular and sufficient supply of beets, was quite promising. To the farmer, also, it had been shown that raising beets was a remunerative industry. The record of the Berlin factory for the year was 7,000,000 pounds of pure sugar, the yield from raw material having been at the rate of 246.6 pounds per ton. The following directors were elected: Messrs. C. R. Hagedorn, W. B. Rouse, E. T. Carrington, R. Smythe, E. W. B. Snider, J. Kaufmann, Hugh Blain, A. Jaffray and M. McLaughlin. At a subsequent meeting of directors, Mr. Hugh Blain was re-elected president, and Mr. E. W. B. Snider was elected vice-president.

EIGHTY MILLIONS OF PEOPLE.

By the census of 1900, there were 75,000,000 people in the United States. The census bureau, at Washington, announced on April 7th that at the close

of 1903 there were estimated to be in the United States, exclusive of Alaska and the Philippines, 79,900,389 of a population, an increase of 3,905,814 since the census of 1900. The estimates show the population of principal cities thus: New York, 3,716,139; Chicago, 1,873,880; Philadelphia, 1,367,716; St. Louis has just passed and Boston has almost reached, the 600,000 mark; Baltimore has 531,313; Cleveland, 414,950; Cincinnati, 332,934; San Francisco, 355,919; Pittsburg, 345,043; Detroit, Milwaukee, and New Orleans have just passed 300,000; and Washington is close to that figure. Considered by states, New York State leads in population, having more than seven and a half million.

TRADE WITH SCANDINAVIA.

Mr. C. E. Sontum, Canadian commercial agent for Norway, Sweden and Denmark, writes to the Department of Trade and Commerce that while there is no demand in those countries for Canadian butter, as that is an article they already largely export, yet with cheese the case is somewhat different. Quantities of cheddar cheese are at present imported into Norway from England, but much of it probably comes originally from Canada. Mr. Sontum believes that if Canadian manufacturers would come into direct contact with the importers, they could work up a fairly large trade. The duty is about 9½c. per kilog of 2 1-5 lbs. The cheeses preferred are of the flat, round shape, of medium thickness, and not too compactly made. Since the war began between Russia and Japan the market for wood pulp and paper has become stronger. Manufacturers are holding back in expectation of further advances in price. Cellulose continues to go up, the value, f.o.b., Scandinavian ports, being quoted at £6 8s. 6d. for strong, and £7 10s. 8d. for easy bleaching, or 11s. more than a year ago.

MONTREAL MARKETS.

Montreal, April 20th, 1904.

Ashes.—The market is unchanged. There is practically no stock in store, and as there is some fair amount of English enquiry, prices continue to rule high, and dealers quote $6.20 to $6.25 per cental for first quality of potash, and from $5.75 to $5.80 for seconds. An approximate quotation for pearls would be $7 to $7.25.

Dairy Products.—The butter market still inclines towards weakness, and from 17 to 17½c. per lb. appears to be about the figures for fresh-made creamery, indeed, it is claimed, business has been done under these figures in the country. Fall made creamery is quoted at 15 to 16c. Some attention is now being directed to fodder cheese, for which from 8 to 8¼c. appears to be a fair quotation. Any holders of old stock stand to make quite a loss, and it is claimed that a recent purchase of choice Western goods was made at 9c.

Furs.—Some fair offerings of spring rats are reported, but apart from this there is really little business doing. Quotations for prime pelts are as follows: Beaver, $5 to $6.50 for large; medium, ditto, $4 to $4.75; No. 1 choice bear, $12 for large, $8 for medium, and $5 for small; badger, 30 to 50c.; fisher, No. 1, dark, $3.50 to $4.50; ditto brown, $3 to $4; pale ditto, $2 to $3; red fox, $2.25 to $4; cross fox, $5 to $10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $3 to $6 for No. 1 marten, $2 to $2.50 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; spring ditto, 23c. for extra large, 22c. for large, 20c. for medium, and 18c. for small; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—The distribution of merchandise in this line has not materially increased since a week ago, and the volume of trade can hardly be called fair for the season of the year, while there is general complaint of poor collections. The sugar market remains

ESTABLISHED 1858.

Managers and Underwriters.

without change, factory quotations being based upon the level of $4.15 for standard granulated, a figure which has remained stationary for some weeks. Refiners report the demand as just moderate. The demand for molasses is now light, the season being pretty well over, and following the recent marked decline in quotations for new crop at the Island, local prices are somewhat unsettled; it is reported, however, that spot stocks of last year's crop are comparatively small. A circular has been issued by the Canada Canners' Co., advising an advance of about 5 per cent. on all lines of canned fruit, to take effect on the 25th inst. We referred to the probability of this step several weeks ago. Teas all rule firm, and some fair-sized sales are reported by brokers of cheap China greens, ranging from 10 to 16c., to fill the place of Japans.

Dry Goods.—Since last report the atmospheric conditions have continued of a character entirely unfavorable to trade in this line. The weather has ruled cold, and at moment of writing snow has been steadily falling for 18 hours. City retail dealers say that with anything like fair weather business livens up briskly, but under existing conditions comparatively little shopping is done. Letters from the West and other sec-

THE COMMERCIAL
Established 1882
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

New possible buyers of your goods are coming into the country every day, and will continue to come. They read "The Commercial."

Your announcement will introduce the traveller or secure mail order business. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe and keep posted on Western trade.

tions of the Dominion also speak of snow and backward weather, and sorting business among the wholesale warehouses is quite dull. Remittances are also reported as irregular and rather unsatisfactory. Nothing new is reported in the way of market changes.

Hides.—There has been no advance as yet in lambskins, but it is probable prices will be put up on the 1st of May. For No. 1 beef hides dealers are still paying 9c. per lb., and 13c. for No. 1 calfskins.

Metals and Hardware.—At this time a year ago there were considerable shipments being made by boat to river points, but at date there are no distinct signs of the opening of navigation, and the movement is not up to the average of what is expected at this season. The threatened strike of the plumbers, who have served the masters with a notice that after May 1st, they want 35 cents an hour, and an 8-hour day, is also affecting business adversely, orders being placed with supply houses in moderation, and subject to revision or cancellation. With regard to prices there are a few special changes. Londonderry pig-iron is quoted at $19 to $19.25; No. 1 Summerlee at $19.25 to $19.50, and No. 2 at $18.75. Bars remain at $1.65 to $1.70. Standard brands and weights of tinplates are quoted at $3.65 for cokes, and $3.90 for charcoals; Canada plates, $2.25 to $2.30; black sheets, $2.25 for 28 gauge, and $2.20 for No. 26 gauge; galvanized sheets, $4 to $4.25. Lead has eased off a little, being quoted at $3.40 to $3.50; ingot tin, 32 to 32½c.; antimony, 7¾ to 8c.; copper, 13¾c.

Oils, Paints, and Glass.—While business is better than it was several weeks ago, there is no special "swing" to trade, and the movement is not up to that of a year ago. Not a variation of any kind in prices is reported for the week. Quotations are: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 87c. single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon; steam refined seal, 62½ to 65c.; straw seal, 42½ to 45 to 55c. per gallon; tinged and brown ditto, down to 35c.; sweet pale whale oil, 50 to 55c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and firstclass brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break ,and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, April 21st, 1904.

Chemicals, Drugs, etc.—Business has now about regained its usual proportions, though no doubt a large part of the trade which would have been done during the first two or three months of the year, but which was prevented owing to the severity of the season, has been more or less irretrievably lost. Opium continues very dull, but quinine is firm and stocks in first hands are small. There is no noteworthy feature in the New York market. Advices from Great Britain refer to a dull trade, especially for home requirements, though for export it is not so bad.

Dry Goods.—The terrible conflagration on Tuesday night, which wiped out so many of the city's great dry goods warehouses, has rendered it difficult to speak in a general way of the present conditions and future prospects in this line. Trade, it may be said, however, has continued dull, owing to the unseasonable weather for this time of the year. Judging from travellers' letters, the indications for good business in the future are fairly good. Prices remain as before, very firm.

Flour and Grain.—The usual quotation for ninety per cent. patents to-day stands at $2.60 in buyers' bags, middle freights, while extra makes would be a few cents higher. Manitoba flour is unchanged. Bran, shorts, and oatmeal are all as before, and steady. Quotations for grain remain as listed last week. The market is dull, with little business being done.

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE

TORONTO.

Agents Wanted in All Unrepresented Districts.

Fruits and Vegetables.—Unseasonable weather has not improved the general conditions in the fruit trade. Spanish onions are now practically out of the market. Semi-tropical fruits are still plentiful, and pineapples are becoming more so every day. The following are the quoted prices:—Apples, 75 to $2.50 per bbl., according to grade and quality; cocoanuts, $4 per sack; oranges, California navels, $2.75 to $3.50; Valencias, ordinary, $4.50 to $5; large, $5.50 to $6; lemons, Messina, 360's, $2.25 to $2.50; 300's $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $4.50 to $5.50 per case, and 75 to 90c. per dozen; cranberries, $6 to $7 per barrel, $1, to $1.25 per basket; Malaga grapes, $6.50 to $7.50 per barrel; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8 to 12c.; tap figs, 3½c.; pineapples, $4 to $5 per case; strawberries, 10 to 12c. per pint box, and 18 to 20c. for quarts; Egyptian onions, $3.50 per sack. Liverpool apple market is reported quiet, and without change, but there is a good demand for sound fruit.

Groceries.—Sugar continues firm at the recent advances, with a fair movement. In dried fruits, there is a seasonable activity, while the demand for canned goods is very brisk. Prices for the latter were this week advanced about 5 per cent. Teas, stocks of which are in not over-large compass, are selling freely, with prices very firm.

Hides, Skins and Leather.—Moderately good shipments of hides are coming forward, and a steady market prevails. Sheepskins and calfskins remain without appreciable change. Tallow is a little easier in price. The improvement in leather noted a few days ago can hardly be said to have continued, though this is probably due merely to the bad weather. The prospects for an active season's trade are quite good.

Wool.—Nothing is being done in fleece wool now, and new clip is not expected to arrive in any quantity until after considerable improvement in the weather. Trade in pulled wools is quiet.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

You will make no Mistake if you Take out a Policy in THE NORTHERN LIFE.

HEAD OFFICE, LONDON, ONT.
JOHN MILNE, MANAGING-DIRECTOR
The Northern Life has some Good Districts Open for Live, Energetic Agents.

Strength and Stability

Are the important elements required in effecting insurance, —guaranteeing, as they do—the absolute fulfillment of the contract.

The financial position of the

NORTH AMERICAN

is unexcelled, making it a most desirable Company for Policy-holders and Agents.

Vacancies for active, energetic men to act as representatives.

North American Life Assurance Co., Home Office, TORONTO, Ont.

J. L. BLAIKIE, - - - - - - PRESIDENT.
L. GOLDMAN, A.I.A., F.C.A., - MAN.-DIR.

The ROYAL-VICTORIA Life Insurance Co. of Canada.

HEAD OFFICE, - - MONTREAL

The Guarantee Capital and Accumulated Assets of the Company for the protection of Policy holders amount to..... $1,200,000.00

STEADY PROGRESS OF THE COMPANY.

Cash Income	1899	$ 68,435.85
	1901	104,406 87
	1903	145,871.70

The market value of securities deposited with the Dominion Government for the protection of Policy holders amounts to over .. $202,600.00

Liberal commissions paid for desirable business. Applications for agency to be made to
DAVID BURKE, A.I.A., F.S.S.
General Manager.

Sometimes a revision of policy forms means little. It stands for

THOROUGHNESS

in every detail in the changes that have been made by the Union Mutual—re-arrangement of features, reduction of rates, liberalizing of rights, a contract modern to the highest notch. A policy that looks well, sells easily and pleases long.

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Agents always desired—the kind who write policies and hold them.

Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in]
THE BOILER INSPECTION & INSURANCE CO. OF CANADA,

JOHN HILLOCK, President. JOHN FIRSTBROOK, Vice-Pres.
A. J. PATTISON, - MANAGER.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

Mercantile Summary

THE Star Steamship Company have just purchased a new boat for the route between Gagetown and Fredericton.

FROM Hull, Que., we learn of the insolvency of E. E. St. Jean, who began as a grocer in June last. Originally he was a grocery clerk in Ottawa, and subsequently he did business for a short time in that city as a manufacturers' agent.

J. FLANAGAN, dry goods merchant at Moncton, N.B., whose affairs have been in complicated shape for several months past, with frequent suits and judgments recorded against him, has written his creditors making an offer of 60 cents, secured, payable in four quarterly installments. This has not been generally accepted, some of those interested evidently thinking he should pay more. His liabilities are stated at about $30,000.

THERE is on exhibition at the House of Commons, Ottawa, before being sent to the St. Louis Exposition, a large plate glass model, prepared by E. R. Faribault and J. A. Robert, of the Canadian Geological Survey, to illustrate the mode of occurrence of gold in one of the forty-nine gold mining districts of Nova Scotia. This is of great interest in connection with the bill passed last session by the Government of that province to assist in the sinking of shafts from the surface to a vertical depth of not exceeding 2,000 feet.

R. A. ALLEY & Company, of Tacoma, Wash., will inaugurate in July next a direct freight and passenger steamship service between Vancouver and Puget Sound and Australian and New Zealand ports. At first, the service will be every six weeks, and the port of Honolulu, and perhaps that of Suva (Fiji Islands) will be touched at. The first vessel to be placed on the route will be the British steamship, "Maori King." Negotiations are now going on with the Dominion Government for the payment of a subsidy. In future, the steamers also of the Canadian-Australian line will call at Auckland, N.Z., and Brisbane, Queensland, will be cut out.

ACCORDING to an illustration, the Canadian Building at the St. Louis Exposition of 1904 is a square two-story building with a verandah all around its ground floor. In the second story are four large bays, with semi-circular arches, looking to the four cardinal points of the compass, and above the spandrils of these arches the word "CANADA" in large letters. There are innumerable wooden posts and flagstaffs in the construction of the verandah, while the cornice and turrets are "fairly ornamental" with wood, if the expression is allowable. But this may be because the architect, or the commissioner, or the Government, or all of them were resolved that a good display of our varieties of Canadian woods should be made on that occasion.

IMPORTANT WORK.

"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are:—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages), Post Free on mentioning THE MONETARY TIMES.

Winnipeg, Manitoba, April 11th, 1904.

Mercantile Summary.

FOURTEEN hundred immigrants passed through Montreal on the 25th inst., en route for the North-West and points in Ontario. Six hundred more went by way of Outremont.

AT a meeting of the executive of the Montreal branch of the Canadian Manufacturers' Association, Mr. J. S. N. Dougall and Secretary Cooper were delegated to Quebec to oppose certain clauses in the bill to amend the charter of Montreal. Among the clauses opposed are the ones taxing manufacturers of varnishes and all inflammable material and that taxing three-horse vehicles.

THE Mansfield Glass Company, one of the largest glass manufacturing concerns in the States, with works at Lockport, N.Y., proposes to establish a Canadian branch in Hamilton. It controls some valuable patents for making gem jars and other glassware. The factory will probably be located in the east end. It is proposed to employ from 100 to 150 skilled hands. There is an ample supply of sand near Hamilton said to be exactly adapted to glass-making.

THE widening of St. Antoine street, in Montreal, has been under consideration by that city for years. Owing to its present narrowness, trade has dwindled away in the locality, and the value of property has decreased. On Monday last the indemnities awarded by special commissioners for the widening of St. Antoine street, south side, from Craig to Inspector street, were submitted to the City Clerk. The total amount is $105,902, of which one-half is payable by the city, and the other half by proprietors.

IN former years, Eugene Phoenix was a custom tanner in a small way at French Village, Que., and in 1898 he went into general storekeeping there, associating himself with several farmers in that venture. Results were apparently not satisfactory, and the partnership was dissolved in the summer of 1901, the stock being sold out at auction. With his share of the proceeds, Eugene then opened up at Windsor Mills, but he has never been credited with much aptitude for merchandising, and his assignment now reported creates no surprise.

THE Americans are shrewd caterers. At present the St. Louis Exhibition managers are bidding for the Irish people to come to their show. And here are some of the Irish things they will have on exhibition: The Cunard line steamer "Etruria," which arrived last Sunday from Liverpool and Queenstown, brought a number of people, and exhibits, which compose the Irish section of the Exposition. The party consists of 72 persons, whom 40 are musicians, pipers, dancers, etc. Others are lace makers. The exhibits include lace said to be valued at $2,500,000, and several tons of soil, gathered from four provinces of Ireland.

TORONTO city council, in spite of the action of the Board of Control in favoring the Canada Foundry Company, who had tendered at a higher figure, has decided to award the contract for a 72-inch steel water conduit, across the Island, to James McNeil & Bros. Company, Pittsburg, Pa., at $14.48 per lineal foot. The council has also authorized the preparation of plans for a new Pavilion in Allan Gardens, at a cost of about $60,000.

ON demand, an assignment has been made by P. Ouellette & Co., general store proprietors, Hebertville, Que. The firm is composed of P. Ouellette and his mother. The former is a young man, without any former trade experience, but desirous of trying his fortune in business, and his father sold some property to advance him the amount of his prospective inheritance, giving him $1,050 in cash, with which he paid for part of his first stock in August last. and already the end has come. The object of taking his mother into partnership is not apparent, as she was not in a position to contribute any capital of consequence. But it may be put down to youthful and indefinite notions of business procedure—perhaps a little vanity or an admixture of filial pride to have his mother's name associated with his.

IT is reported in Montreal that a deal is being consummated whereby a company being organized under the name of the Montreal and Boston Consolidated Mining and Smelting Company, with a very large capital, will take over and consolidate the old Montreal and Boston Copper Company, Limited, and several British companies. After the organization is completed, the idea is to make important additions to the smelter plant operated by the companies, including an additional furnace and a converter plant that will give a capacity of 1,500 tons per day. All the smelting operations will be performed at Boundary Falls. An effort will be made to secure a British Columbian coal mining property to use in conjunction with the smelter plant. Among the parties interested are: H. H. Melville, Boston, vice-president of the Great Northern Railway of Canada; J. N. Greenshields, Montreal, and Thomas Crockett, of Riviere du Loup. The head office of the new company will be in New York, but a branch will be operated in Montreal.

Mercantile Summary.

A MECHANIC with whom trade unionists refused to work was awarded $1,500 damages against the union in Lawrence, Mass. He was discharged, it was claimed, on account of the attitude of the union.

THE cross-lake trips to and from Toronto have now started for the season. On Saturday last, the S.S. "Macassa" arrived in port on her first trip this year from Hamilton. The ferry service began on the same day to Hanlan's Point and the Island. The Turbine Steamship Company, the new Hamilton-Toronto line, have appointed Mr. G. D. Ellis manager.

IT now would appear to be amply proved that the Fraser river bed contains considerable wealth. The Iowa-Lillooet Dredging Company, which has been operating a dredge, near Lillooet, has lately taken in, it is said, an average of 40 ozs. of gold per shift, or nearly $1,000 per day. The gravel so far has been turned up to a depth of 30 feet, without encountering bed rock.

THE General Post Office of the United Kingdom and the Marconi Wireless Telegraph Company have at last come to an agreement, whereby the Marconi Company will be recognized by the Post Office as on the same footing as the cable companies. As soon as the contract has been formally completed, wireless messages will be delivered by the Post Office.

A LATE despatch from Hamilton states that the Mansfield Glass Works will locate in that city, and build a $150,000 plant, while the Petrie Machine Co., of Guelph, which will need a building worth $100,000, has decided to go to Hamilton. The Petrie Company, burned out in Guelph, makes cream separators.

THE Midland Railway Company's elevator, at Midland, Ont., which has a capacity of 500,000 bushels, has been destroyed by fire.

THE White Horse, Kluane and Northwestern Railway Company is applying to the Dominion Government for incorporation in order to operate a railroad from White Horse, Y.T., thence running in a northwesterly direction to a point at or near Kluane Lake, with branch lines and roads, ways, ferries, wharves, docks and other works in connection therewith, and with power to operate steam and other vessels on any navigable waters within the said territory, etc., etc.

THE Standard Oil Company are now putting into service between important points on the Great Lakes a fleet of oil steamers, the purpose apparently being to lessen shipments of oil by train and to avoid the anti-rebate laws. Each ship, which is described as a kind of great floating tank of the whaleback order, was built at a cost of $250,000. A large wharf is being put in at Whiting, Ind., where is the company's largest refinery. By the new method oil can be carried from Chicago to Buffalo for 5c. per gallon

Mercantile Summary.

THE office-boy's record: Monday, hired; Tuesday, tired; Wednesday, fired! —F. R. Batchelder in Lippincott's.

THE Canada Paper Company has opened temporary offices in the Toronto Board of Trade building.

MUNTZ AND SCOTT, have formed a company in Fort Steele, B.C., to establish a brewery. The capital stock is $150,000.

THE municipality of Verdun is claiming from Montreal in the neighborhood of $185,000 for damages alleged to have accrued from the recent floods. Legal action may perhaps be taken in the matter.

MR. J. McNamara, representing a New York syndicate, is investigating in British Columbia as to the best route for a railway line to the Yukon country with steamship connection with Pacific Coast ports.

THE stock of Phillips & Wrinch, the only dealers in smallwares in Toronto, we believe, which escaped destruction in the fire last week, was on Friday last destroyed at a loss of over $25,000; covered by insurance.

THE negotiations for the purchase by Sir William Van Horne's Company of a site opposite Moron Castle, in Havana, Cuba, have now been successfully concluded, and the work of erecting a splendid million dollar hotel is to be proceeded with at once.

THE Provincial Government has decided to give an ample bonus to the British Columbia, Northern and MacKenzie Valley Railroad, provided the latter undertake to deposit a forfeit fund of $26,000, as a guarantee to have the road built within a specified time.

THE cigar-makers' union in Hamilton has made a demand for an increase of $1 per thousand in the pay for making standard cigars, and, as a consequence, the Tuckett Company have paid off about 140 hands until the settlement of the difficulty.

IT is interesting—if somewhat depressing—to note what a London commercial paper draws attention to, namely that, for space in the all-British Floating Exhibition (recently referred to in these columns), there are four or five foreign applications for every one British.

ONE result of last week's disastrous conflagration in Toronto is that the United Typewriter Company have received an enormous accretion to their business, owing to so many writing machines having been destroyed. The visible-writing Underwood appears to be a particularly popular instrument.

THERE have been few recent failures in Montreal City. For the week only two small insolvencies are noted. W. H. Hope, picture dealer, or rather his estate, he being recently deceased, has gone into insolvency, liabilities being $3,300.——An assignment has been made by R. Aird, who started in a small shoe manufacturing way last autumn, with the assistance of his father.

Mercantile Summary.

THE Underwriters' Storage Company, of New York, have been appointed to look after the different companies' interest in salvages. Its manager is Mr. Joseph Appleton.

S. F. BOWSER & COMPANY, incorporated under the laws of the State of Indiana to carry on the manufacture and sale of self-measuring oil-tanks, wash-boards, and such articles, has been authorized by the Ontario Government to operate in this province with a capital not exceeding $40,000.

THE Canadian Elevator Company, Limited, Winnipeg, has bought out the lumber stock of Van Wart & Co., Calgary. The former concern intend to establish a number of yards in different parts of Alberta, their headquarters for the North-West Territories being in Calgary.

A RESOLUTION has been presented before the Dominion House of Commons asking for energetic measures to put an end to such concerns as the various compagnies de credit, which operate in the province of Quebec. It is alleged that they, while owning charters for the purpose of dealing in merchandise, have in reality become financial institutions, and to the unfortunate speculators, very delusive ones.

—The student summer mining class in connection with McGill University, 20 students in number, has left on its annual western tour of inspection, under the supervision of Dr. J. B. Porter, professor of mining engineering. The first stop will be made at Sudbury, Ont., where instruction will be given in field geology. At Sudbury, Dr. Porter will join the party, which will proceed to Lethbridge, B.C., to investigate coal mining. Other places which will be visited are Nelson, Rossland, Grand Forks, Phoenix and Greenwood. The party will travel by special train.

A STOREKEEPER of Beaupre, Que., T. Simard, recently insolvent, has compromised liabilities of $3,400 at 50 per cent. ——Elie Lemire, carriagemaker at Port de Maskinonge, Que., offers his creditors 35 cents on the dollar.——A week or two ago we reported G. Morin, general merchant, Windsor Mills, Que., as insolvent. He is now proposing a composition at the rate of 40 cents on the dollar.——Walter Hebert, of Stratford Centre, Que., who failed last month, after a brief career in the general store line, is trying to effect a settlement at 40 cents on liabilities of $5,368.

A ST. JOHN lumberman says that the lumber driving prospects seemed pretty good. He said that there was plenty of snow in the woods, and that some heavy rains were about due. He thinks there are excellent prospects for saving the 40,000,000 feet of logs in the ice above the Grand Falls. He said that the water was so low that the logs were struck solid, and there is a likelihood of saving at least the greater portion of them.

PLANET WHIST TRAYS

A MOVEMENT is on foot in Charlottetown to have the prohibition law now in force there repealed by the Legislature and a high license one substituted.

PART of the plant for the new electric light of the Montreal Pipe Foundry is now in Londonderry preparatory to the fitting up of the electrical equipment. The motive power is to be supplied from the water course of the West river, which offers a good opportunity for the operation of hydraulic machinery.

THE shipping season is fully a month later in opening this year than last at Sydney, C.B. Extensive preparations, however, have been made by the company to bring the shipments for the year up to the 3,500,000 mark. To this end improved facilities have been adopted at all their collieries and shipping terminals.

TO THE SUBSCRIBERS OF THE CAPITAL STOCK OF THE CROWN BANK OF CANADA.

Public notice is hereby given that a meeting of the Subscribers of the Capital Stock of The Crown Bank of Canada will be held on the ninth day of May, 1904, at twelve o'clock noon, at the bank premises, No. 34 King Street West, in the City of Toronto, Ontario. The business of the meeting will be:

To determine the day upon which the annual general meeting of the bank is to be held.

To elect such number of Directors duly qualified under the Bank Act—not less than five, nor more than ten, as the subscribers may think necessary—who shall hold office until the Annual General Meeting of the year next succeeding their election.

To fix the quorum for a meeting of Directors, which shall not be less than three.

To fix the Directors' qualification, subject to the provisions of the Bank Act.

To fix the method of filling vacancies in the Board of Directors whenever the same occur during each year.

To fix the time and proceedings for the election of Directors in case of the failure of any election on the day appointed for it.

To determine when to close the stock books for subscription of the bank's stock by the public at $110 per share.

To prescribe the record to be kept of proxies, and the time, not exceeding thirty days, within which proxies must be produced and recorded prior to a meeting in order to entitle the holder to vote thereon.

And to regulate such other matters by by-law as the shareholders may regulate, pursuant to the terms of section 18 of the Bank Act.

Dated at Toronto, April 8th, 1904

By order of the Provisional Directors.

FRANK ARNOLDI,
Secretary of the Provisional Directors.

THE Dominion Coal Company are to ship more than 50,000 tons of coal to Sweden this year, the first to be made about the middle of May.

THE Barber & Ellis Company have decided not to rebuild their warehouse site on Bay street, but on some other location not yet chosen. They will remove their factory to Brantford.

NEW DUTCH TARIFF.

While Free Trade has for a long time been a powerful factor in Dutch politics, it is worth noting that a tariff is now being prepared by the party in power, which distinctly proposes retaliation on high-duty countries. It is endeavoring to remove faulty parts of the existing tariff policy, and to continue the interests of trade and industry with those of the treasury. Raw materials which industry and agriculture must import from foreign countries—for instance, metal, timber, cotton, wool, coal, etc.—remain free of import duty. On semi-manufactures a moderate duty will be imposed in proportion to the degree of work in their production. If so far finished that they can be made to serve as component parts of other manufactures they will have to pay a duty of 2 to 5 per cent. ad valorem—for instance, plain or grooved timber, plates or blocks of stone, leather, etc. Semi-manufactured goods, partly finished but not ready for immediate use, and which require to be finished in the country, must pay 6 to 8 per cent. ad valorem—for instance, roughly-finished iron and steel, copper-work not fitted, doors, windows and other frames for houses, unfinished frames for pictures, leather work ready for finishing, etc. Articles such as machinery, tools, nails, screws, etc., though finished which are to be used for industrial purposes, and therefore are materials in aid of industries, are to be placed on an equal footing with semi-manufactured goods. Entirely finished manufactures are to pay 6 to 12 per cent. ad valorem, the lower duty being for articles of daily use, the higher duty for articles of luxury. Articles of food and for enjoyment shall be treated according to the same principle, the raw materials thereof being free of duty. All machines, implements and tools, with few exceptions, must pay 3 per cent. ad valorem, and an equal duty will be charged on all parts or accessories of implements and tools imported separately—such as pipes, taps, fittings, belts and printing materials.

SETTLEMENT OF FIRE LOSSES.

The committee of underwriters, chosen from among the companies which suffered by last week's Toronto fire, have recommended that a manager or inspector from each of the following companies shall form a committee of nine to pass upon all accounts and matters in connection with the adjustment of losses: The Hartford, Western, Royal, London & Lancashire, Home, Liverpool & London & Globe, Atlas, Anglo-American, London Mutual. A secretary has been appointed in the person of Mr. E. F. Garrow. This committee has been at work for a week, night and day; and we are told that they have reached a stage in the matter of apportionment of loss, which it took a similar organization in Baltimore two weeks to reach. Of course it is yet too early to state what amount each company is liable for, or how much the aggregate loss comes to. But good progress is being made towards adjustment. Salvage is a questionable quantity: in most cases the loss is total.

To such members of the community as are making a great to-do about the increased rates imposed by the Canadian Fire Underwriters' Association presumably as a consequence of this fire, we may commend the words of the Montreal Gazette. Says that journal: "Toronto merchants are protesting loudly over the increase in rates made by the underwriters. No man is compelled to pay them. There are ways of getting cheaper insurance; but there is none that is as reliable. When a man has been burned out he wants his insurance a great deal more than he wanted the extra dollars he had to pay for sound insurance."

TORONTO STOCK TRANSACTIONS.

A fair volume of business has been recorded this week and most stocks have held fairly steady; in spite of the

AUSTRALIAN TRADE.

Mr. J. S. Larke, Canadian Trade Agent in Australasia, in a recent report to the Department of Trade and Commerce remarks that the market of Australia in proportion to its population is a large one, the imports amounting to nearly eighty dollars per head or double that of Canada, but the trade is made up of a large variety of articles rather than a large trade in one article. This fact conduces to a misunderstanding in Canada of the conditions here. The population is scattered over a great extent of country and the costs of travel considerable. It is necessary, therefore, that a traveller should carry a larger line of goods than is deemed necessary in eastern Canada. The industries and conditions, not only of the different sections, vary. A firm selling the machinery and implements for wheat-growing only could do business profitably in the central division, but not in the other sections. On the coast the traveller should be able to offer dairying and corn-growing appliances, and in the west, the dry region, he should be equipped with windmills, pumps and other irrigating materials. Travellers confine themselves to the special districts and become experts in the special requirements of their district. Where the business is still done by local firms, who purchase their goods outright, the trade naturally gravitates to the house which can supply the largest variety of the lines required by them. So far as expenses are concerned this applies to goods sold only to wholesale houses. With much enterprise Canadian firms have sent out travellers selling only such lines as silverware, graniteware, umbrellas, neckwear, etc. A young manufacturing country such as Canada could not get the larger share of the trade in these lines, and could not expect, in the face of the competition here, to sell enough to maintain a representative, but there appears to be no good reason why one man could not combine umbrellas and neckwear, and another plated goods and graniteware, particularly as these lines are sold to the same houses. Handled singly the business did not and could not pay, but by combination it might be made to pay. There have been some instances of effective combination on the part of Canadian exporters, but not many, and our trade suffers in consequence.

ROOM Z, CONFEDERATION LIFE BUILDING, - - - - TORONTO.

—One of the former assessors of Montreal, Mr. Frederick Hamilton, has gone to Quebec to oppose, before the Legislature, an increase suggested in the school tax. He very warmly attacks the system he alleges to exist in Montreal of partiality in assessment—or rather, partiality in reducing assessments already made. Hundreds of reductions, he declares, are made after the roll is made and sworn to, simply at the request of interested parties. And he asks: "When the city of Montreal makes special reductions on values to syndicates and corporate bodies, have they the right to reduce the school taxes in proportion?. . . I am opposed to real estate being assessed for more than a good elementary education, for which the present rate of one-quarter per cent. of the municipal taxes would be ample if the city administration was conducted honestly and no favors shown."

Reduced Cost of Production

is the goal all are striving for.

One of our Band Mill customers in comparing the **Band** with the **Gang** said: **"It's quality, not quantity, I'm after.** I have stood over my men this year and insisted on quality. In selling my cut I arranged for an advance of 25c. per M for every 1% advance in quantity of the cutup and better grades. By the use of the Band I have secured 8% advance, which means $15,000 extra profit this season."

Several gangs have been discarded for the Pony Band double cutting, adding much to quality while only slightly reducing quantity. Many hundred single and double cutting bands running in Canada. Simple—easily managed—it's worthy of investigation.

CANADA'S FREE IMPORTS.

Judging from communications received from both sides of the Atlantic within past weeks we imagine that the same sort of misconception exists in the residents of each with respect to the nature of Canada's imports from the United Kingdom and the United States. While it is true that we imported in round figures $136,000,000 worth of goods from the United States last year as compared with $65,000,000 from the Old Country, it would be wrong to infer that the character of the goods purchased was the same in both cases.

Those we buy from the United States are more of the character of raw materials for our manufactures. This is manifest from the classification made by the Customs authorities. In the case of the United States, more than half of our imports thence are free goods—anthracite coal, hides, rubber, leaf tobacco, raw cotton, furs, seeds and roots, wood and wood goods, wool, mostly needed in our manufactures, the total for 1903 being $60,251,000.

In the case of the United Kingdom, the goods we imported free of duty consisted of dyes and chemicals, flax and jute, hides, metal goods, paints and oils, precious stones, rags, salt, tea, wool, coin and bullion to a total of $19,866,000—less than a third in value of the free goods purchased from the States. But we bought largely of manufactured goods from the Mother Country: of cottons, to the extent of $5,824,000; of woolens, $11,896,000 worth; of silks, $1,970,000; of flax goods, $3,360,000; of fancy goods, $1,274,000, besides books, earthenware, glass, leather ware, spirits, etc. And these paid duty.

In order to show more clearly the main items of our free purchases from the United States and the extent to which these are raw materials for Canadian manufactures we make a list of principal articles. This list, which is not complete, shows that out of free imports from the United States of $60,251,000 four-fifths is composed of the items given. The only articles among them of which Great Britain sold us more than the States were wool, and flax or jute.

To distinguish the principal articles we bought from the United States and used mainly in our manufactures, we make a list of free goods below: Broom corn, $165,231; anthracite coal, $7,835,936; drugs and chemicals, $2,397,801; fertilizers, $89,751; fish nets and seines, $361,243; flax, hemp and jute, $534,653; fruit, $903,261; furs and fur goods, $1,207,123; fibres and grasses, $358,529; gutta percha and rubber, $1,816,682; hats and bonnets, $179,730; hides, raw or salted, $2,613,520; brass goods, $562,214; copper goods, $1,362,878; iron and steel goods, $7,070,186; lead and manufactures of, $36,918; tin and manufactures of, $578,217; zinc, spelter, etc., $34,984; other metals and minerals, $875,986. Total of above metals, minerals and manufactures of is thus $10,521,943. Further additions to the list of articles which paid no duty are: Oils, $143,374; paints and colors, $80,874; precious stones, $92,369; rags, $117,888; seeds and roots, $1,345,629; settlers' effects, $5,287,883; silk and manufactures of, $384,979; stone, etc., $120,147; tobacco and manufactures of, $2,357,534; wood and wood goods, $5,023,038; wool and woolens, $351,509; coin and bullion, $8,814,958.

Principal Free Goods.	Imported from U.S.	Imported from U.K.
Anthracite coal	$7.835,936	$ 345.015
Broom corn	165.231	.....
Cotton, raw	5.936.725	26.216
Drugs and chemicals	2,397.801	864.031
Flax, hemp, and jute	534.653	1,435,511
Furs and fur goods	1,207.123	383,171
Fruit	903,261	.....
Gutta percha and rubber	1,816,862	7,119
Hides	2,613,520	1,301.762
Seeds and roots	1,345.629	81,711
Settlers' effects	5,287,833	1.117.843
Tobaccos and manufactures	2,357,534	76,797
Wood and wood goods	5,023,038	13,517
Metals and metal goods	10.521,943	5,085,697
Wool, noils, felt	351.509	790.496
Silk	384.979	733
Value principal articles	$48,683,600	$11.529.600

The articles bought from the United States on which Canadians paid duty were sufficiently varied. While we pay no duty on anthracite coal, we pay half a dollar per ton on bituminous, of which there was brought in last year over $7,000,000 worth. The next item in the dutiable list from the States was cotton goods, $8,293,000; and the largest item of all was metal

goods and machinery, $23,582,000. Further imports from the Americans were cordage, fruits, wood goods, hats and caps, electric apparatus, boots and shoes, fancy goods, carriages and books.

BANKING RETURN.

We present below a condensation of the monthly statement of Canadian banks for March, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities; average holdings of specie, and Dominion notes, etc.:

CANADIAN BANK STATEMENT.

LIABILITIES	Mar. 1904	Feb. 1904.
Capital authorized	$97,046,666	$97,046,666
Capital paid up	78,727,552	78,701,542
Reserve Funds	50,892,024	50,752,405
Notes in circulation	$59,760,119	$57,736,243
Dominion and Provincial Government deposits	9,239,464	8,812,976
Public deposits on demand in Canada	106,484,714	107,706,725
Public deposits at notice	297,913,232	289,547,284
Deposits outside of Canada	40,506,257	38,287,160
Bank loans or deposits from other banks secured	680,491	559,647
Due to other banks in Canada	4,028,681	3,959 970
Due to other banks in Great Britain	6,274,919	3,861,423
Due to other banks in foreign countries	1,329,125	964,828
Other liabilities	9,032,039	7,850,728
Total liabilities	$535,249,114	$519,287,061
ASSETS		
Specie	$16,805,962	$15,934,688
Dominion notes	30,422,417	31,259,929
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	16,759,669	17,338,598
Loans to other banks, secured	707,322	593,935
Deposits with other banks in Canada	5,493,626	4,955,710
Due from banks in Great Britain	5,482,816	4,139 291
Due from other banks in foreign countries	12,138,236	11,088,353
Dominion or provincial Govt. debentures or stock	10,441,895	10,506,347
Other securities	53,288,086	52,816,665
Call loans on bonds and stocks in Canada	37,553,851	38,109,805
Call loans elsewhere	41,004,443	40,395,339
	$233,229,167	$230,266,504
Current Loans in Canada	403,566,588	389,627,686
Current Loans elsewhere	18,523,514	17,995,796
Loans to Dominion and Provincial Governments	2,500,970	2,622,953
Overdue debts	2,390,807	2,527,696
Real estate	726,434	741,872
Mortgages on real estate sold	736,501	745,434
Bank premises	9,238,012	9,078,050
Other assets	4,931,790	5,393,993
Total assets	$675,843,963	$659,000,158
Average amount of specie held during the month	15,532,100	16,011,771
Average Dominion notes held during the month	30,483,050	30,823,857
Greatest amount notes in circulation during month	60,947,515	58,661,768
Loans to directors or their firms	10,871,685	10,917,108

An increase in the totals of the return to the extent of between sixteen and seventeen millions of dollars is the first thing to strike the reader. Among the liabilities, deposits on demand have decreased a million and a quarter, while deposits at notice are more than eight millions greater. And deposits in the United States and Britain have increased to the very considerable sum of forty millions.

Of the assets of the banks, more than a third is in readily available shape. The current loans in Canada show a growth of fourteen millions, and the current loans outside of Canada are grown to eighteen millions and a half. It is noticeable besides that circulation reached $60,947,000 at one period in the month, and at its close was about two millions ahead of the same date in February.

ABSTRACT OF BANK RETURNS.

Description.	Mar. 31st, 1903.	Mar. 31st, 1904.	In Month 1904.
Capital paid up	$74,883,000	$78,727,000	Inc. $ 26,000
Circulation	58,283,000	59,760,000	" 2,024,000
Deposits	418,324,000	458,849,000	" 9,979,000

La Caisse d'Economie, Quebec	7,132,000	
Loan Companies Est	20,000,000	
		104,075,000
Bank Deposits		458,849,000
		$ 562,924,000

GOVERNMENT CIRCULATION.

Large	$ 27,704,000
Small	$ 12,073,000

Gold held, $27,377,000. or 70 per cent.

THE INCREASE IN BANK LOANS.

On the 29th February, 1904, the banks reported under the heading, "Current Loans in Canada," $389.-627,686. This constitutes a new high record, being an increase of $57,981,466 for the twelve months, and an increase of $97,567,908 for the two years immediately preceding. A great deal has been written about the rapid expansion of our bank loans. Some persons profess that their anxieties are aroused by the magnitude of the figures. Although they cannot tell exactly from what quarter of the compass danger is to be apprehended, the vague alarms that possess them refuse to be quieted. Others, again, have taken the opposite side. These point with satisfaction to the growing cash holdings of the banks; they explain that bank stockholders have contributed a large proportion of the funds that were used for making the new loans; they say, furthermore, that notwithstanding the increased loans a proper proportion has been preserved between the total loans and the total deposits, between the total deposits and the total cash.

Allowing all due weight to the arguments on both sides of the case, it yet seems to us that the question goes deeper; that it is not a case to be judged in bulk; not one which can be settled by a recital of percentages and proportions. If we would know whether the great and rapid increase in loans has been altogether wise; whether the result will be good or evil for the Dominion, we must discover something of the nature of the new loans that have been made. Who has borrowed so heavily? For what purposes? And have the banks, in the majority of instances had due regard to the old-fashioned rules as to security, etc.?

None of us, of course, can give complete answers to all of these questions; the most that can be done is to observe the "straws" that float on the surface of our affairs, and from them to draw inferences as to what is taking place underneath. In the search other interesting questions will be raised, questions having an important bearing on our prosperity and progress, and which doubtless are being well pondered in bank head offices.

In the address of Mr. Walker at the annual meeting

of the Canadian Bank of Commerce on the 12th January last, there is one sentence bearing pointedly on the matter of the new loans. It is this: "During the past year it is clear that we have been sharply warned as to our capacity for hindering rather than aiding the industrial development of Canada." What is meant here is that a grave responsibility rests upon the banks. Through the credits they grant the great bulk of the country's industries is carried on; if they are unable or unwilling to place these credits at the disposal of capable, responsible men who see undoubted opportunities of developing and exploiting profitably our latent resources, then the industrial progress of the Dominion is certainly arrested to that extent. Although money has been tight, the brunt of the hard times has fallen chiefly upon the speculator in stocks, the needs of the commercial borrowers of the banks have apparently been satisfied wherever the proper security has been forthcoming. It is tolerably clear that Canadian banks have made careful arrangement to protect their wholesale and manufacturing customers.

Most people who keep track of financial affairs have noticed the remarkable change that has come over the world's financial centres in the last couple of years. Since the Boer war London has been much upset, and it has become increasingly difficult to float new issues of securities there. To a greater or less extent the same feature has been in evidence also at New York and at the great continental money centres. It is the condition of the London market that has had the greatest effect on us in Canada. The majority of Canadians do not realize how important it is that we should have free and easy access to London's supply of capital. It is not the closing of the market to the large, well-advertized loans that affects us so deeply. There are numerous smaller applicants in whose ranks are to be found, cities, towns and other municipalities, mortgage and loan companies, industrial and other corporations, who depend largely in normal times on English capital for carrying out many of their enterprises. The securities of these borrowers need not necessarily be floated on the London market; they are customarily taken by Canadian financial houses operating with English capital. With British consols in the neighborhood of 86, and other gilt-edged stocks also at low levels, there is not such strong temptation for English investors to send their capital abroad.

The difficulty which some of our largest cities are now experiencing in getting bids for issues of debentures furnishes eloquent proof of the diminution that has lately taken place in the flow of outside capital to Canada. One consequence of this is that these borrowers have had to lean heavily upon the banks. And as the loans they need are frequently large this would account for a considerable part of the increase in bank loans. Besides this, there is, of course, the great demand for capital from Manitoba and the North-West; the rapid increase in bank branches there indicates that bank loans must have expanded very materially in that section of Canada. Branches in a new country just in the act of development are much more apt to be loaning branches than are those planted in the older and more settled East.

It does not appear that the banks had much choice in the matter of making these loans; the great demand arose from circumstances which were in a measure outside their control; when their best customers—cities, towns, corporations, wealthy men—came to them offering undoubted security they could not well refuse accommodation; neither could they very well refuse the farmers, grain dealers, merchants and business men of the North-West, so long as they had the means. All that was left to them was to economize their credits and their facilities to the best of their abilities. At the Bank of Commerce meeting it was also mentioned that the great competition prevailing amongst the banks resulted in wasting facilities. Particularly is this the case where three or four banks open branches in a place able to support only one or two. Among the questions which these competing branch managers have to answer are these: "Do your loans, which you are so eager to make, result in setting up in business new merchants and new traders when there is really no room for them? Are you careful, in making a loan, to see that your borrower stands to make a profit?" It is not enough that the bank is in such case repaid without loss. Unless the borrower makes a profit the country's capital is impaired, and the banker who made the loan has, unwittingly, perhaps, but none the less effectually for all that, arrested our progress.

ASSESSMENT LEGISLATION.

A bill has been introduced in the Senate by the Hon. J. K. Kerr, of Toronto, to amend the Insurance Act. The apparent object of the bill is to give relief to those concerns which have been operating on the assessment system. In effect it provides that the average annual calls or assessment heretofore made will be regarded as the premium to be paid in the future without increase or further assessments, and that the amount of the certificates will be reduced to such sum as such average annual call will secure in whole life non-participating insurance, utilizing in the calculation the Institute of Actuaries Table of Mortality and 3½ per cent. interest, and the present age of the certificate holder. An addition of 5 per cent. to this new net premium is to be made to cover expenses. An example will make the scheme clear. Assume that a member secured ten years ago, at age 30, a $1,000 assessment contract, and paid mortuary assessments for the first five years at the rate of $8 per year, and during the last ten years at the rate of $10. The average annual assessment paid would be $9. The age now would be 40, and $9 per annum at that age would buy $365 whole life insurance according to net rates; consequently his contract would be reduced from $1,000 to $365, while the annual premium would be $9, with an addition of 5 per cent. for expenses, i.e., $9.45. The bill is deserving of careful study, inasmuch as its provisions are novel and far reaching.

A BRITISHER'S VIEWS OF THE WEST.

Anything which reveals an intelligent interest in Canada on the part of influential English people commands our attention. Therefore we give some prominence to the expressed views of the Duke of Sutherland, who has been in Canada some weeks, and has lately given an interview to a Western newspaper. He relates how he is impressed with the agreeable climate of the Dominion, and adds: "You certainly have every variety of country in Canada. I have seen woods and prairies and mountains, flat bottom lands and scrub, limitless farms and pastures, lakes and rivers, and streams which cannot be appreciated by one who has never been outside of the Old Country. I had no idea

that there was such a tremendous area of farm lands available."

The contentedness of the average settler seemed to impress this nobleman. He declares that "the pessimists are rare throughout the Canadian West, and the one idea seemed to be to welcome the new arrival, to make him feel at home, and to persuade him that he is the man whom that particular portion of Canada was needing." That the Duke has his eyes, as well as his ears open is manifest from the following. Speaking of Alberta and British Columbia: "The mountains, too, will be a great benefit to the ultimate development. With timber, coal and unlimited mineral resources so near at hand, the greater number of the needs of the West may be easily supplied. The great feature of the country is that it seems divided into separate and distinct areas, each of which has its special usefulness in the universal scheme. One section is especially adapted to wheat, another mixed farming, a third ranching, a fourth mining and a fifth to timber. When these are brought together by the railways, the scheme is complete. Each assists in the development of the other."

May Britain send us more observers like the Duke of Sutherland. Such men have a great and enviable mission to make known to one crowded part of the Empire the real capacities and character of outlying parts.

THE TORONTO FIRE.

It is gratifying to learn that a number of firms, sufferers by the fire of the 19th instant, have found their books and papers intact in their safes and vaults. Among those who have had this agreeable experience are Messrs, H. S. Howland, Sons & Co., the Copp-Clark Company, the Carter-Crume Company. And though these firms have lost practically every vestige of stock, there are some, such as Brown Brothers, A. A. Allan & Co. and the W. R. Brock Company, which will have a fair amount of salvage, the fur house through having storage vaults underneath the sidewalk on Bay Street, the others through having parts of their stocks saturated with water or having the contents of their basements covered by masses of debris, which hid them, so to speak, from the flames.

But a commoner and less agreeable feature is the loss of *all* books and papers by a number of prominent houses—the Barber & Ellis Co., the Wyld, Darling Company, Rolph, Smith & Co., for example. The delay and perplexity which this condition of things entails can only be understood by those who have to endure it. There is almost no standing-ground from which to proceed to reconstruct a business whose counting-house data are practically destroyed. A circumstance which is peculiarly exasperating in this connection is that owners or tenants of premises threatened by the fire, who wished to enter and save their books of account, were on Tuesday night refused by the policemen in charge permission to do so, even when they produced the key of the premises and offered to have themselves identified. We should like to hear some justification for so outrageously high-handed a stand for police authorities to take under trying circumstances. Granted that there was risk of looting if premises were permitted to be opened, and that the police were instructed—by whom does not yet appear—to allow no admission, the case is altogether different when a man who owns or occupies a building asks leave to save his books, the recovery of which may make to him all the difference between prosperity and insolvency. A policeman should have some liberty of judgment in such case. We shall not be surprised to find that suits will lie against the city of Toronto for damages in instances like those cited.

In going over the burned district, a disheartening task, and not an easy or a safe one, it becomes increasingly apparent that, but for some barriers, such as a thick and high wall intervening, or the persistent efforts of faithful fire-fighters at certain critical points, whether members of the fire brigade or not, the area swept might easily have been doubled. Going to the rear door of the Davidson & Hay Company one finds what few people but firemen or adjusters know, that the fire had eaten its way at this point *almost* to Yonge Street. A single strong wall next to that of the old McMaster building on Front Street saved the Salada building and adjoining premises on Yonge Street, and probably saved the blocks eastward therefrom as far as Church Street, including the Board of Trade building and the British America office.

A responsibility rests upon those who are to rebuild the devastated portion of the city. From the mayor and council to the architect who plans and the builder who erects new structures every one should regard the conflagration hazard. Lanes should be wider, walls should be thicker, roofs should be safer, window openings should be protected. Let each proprietor get rid of the accursed fatalist notion: "*My* place will never burn; it is the other fellow who has got to take care, not I." Every man should build for the future with reference not only to immediate exposure and to interior conditions, but with the conflagration hazard in view.

In an American publication, entitled "Fireproof," we find a description by the editor, himself an expert in construction, of the condition of a number of structures after the Baltimore great fire. He examined the Calvert, the Maryland Trust, the Equitable, and the Continental buildings after the fire, and his conclusions are thus given:

The net showing is:

First—The perfect preservation of the structural steel, saved throughout by its encasement in hollow tile.

Second—The utter insufficiency of wire lath and plaster.

Third—The complete consumption of every vestige of wood within the buildings.

Fourth—The advisability of reducing to a minimum the quantity of non-fire-resisting ornamental work.

Fifth—The futility of wood.

Sixth—The indispensability of complete and perfect covering of steel structural members with a full and adequate encasement of tested fireproofing.

SOME FINANCIAL EFFECTS OF THE TORONTO FIRE.

The fire occurs at an unfortunate time for rebuilding premises for there is no cheap money immediately in sight. Such an active demand exists for money for ordinary business purposes that it is at the moment impossible to obtain round sums for rebuilding at less than five per cent. Nay, it is not difficult to obtain 5½ and even 6 per cent. on loans for regular commercial use. It should be remembered that such sources as the Old Country insurance companies, which have been accustomed to furnish cheap money for large warehouse loans, are at the present moment paying out large

sums for losses by the Toronto fire of April 19th, and, therefore, cannot be expected to be prominent in the Toronto market as lenders just yet. There is, however, reason to think that money will be cheaper before long. A feature of the week is the readiness of merchants in Toronto to make purchases of real estate on which to build new premises, or land adjoining their burnt-out warehouses on which to erect additional buildings. W. R. Brock & Co. furnish an instance of this, in buying the site of Rolph, Smith & Co.'s building alongside their former warehouse. The same firm purchased on Saturday, we are told, the warehouse of Harvey & Van Norman, opposite the Queen's Hotel, which they will occupy as temporary premises till their warehouse is rebuilt at the corner of Bay and Wellington Streets. Central sites are in request, and can readily be sold if their owners are not possessed by the demon of avarice and resolved to take mean advantage of their neighbors' necessity.

TORONTO'S WHOLESALE TRADE.

The recent conflagration in Toronto was bad enough, but in one way it was not quite so bad as some of the reports which have gone abroad from the city would make it appear. Many of out-of-town papers have announced in "scare-head" articles the practically total destruction of Toronto's wholesale quarter. Now, it is true enough that the wholesale quarter was the scene of the greater part of the damage which occurred, but to proceed from that, and say that the entire wholesale section of the city had been laid in ruins is to go a great deal too far. How about the wholesale grocery trade? That, at all events, remains intact. And the hardware trade is not "cleaned out." The paper trade was badly hurt, perhaps worse than any other branch, but the men affected are still mostly doing business. Some of the biggest dry goods concerns in the Dominion were burned out on April 19th, but some remain; and even those merchants who lost their warehouses are for the most part already ensconced in temporary quarters and facing the future with a bold front. The blow was unquestionably a bad one, but bearing in mind the character and enterprise of the men interested, it should not be considered as of more than passing moment in the onward career of the place. This city must lose trade for a time: of that there is no doubt, for many of the retail merchants outside must get their supplies somewhere else. Montreal is profiting meanwhile, as our correspondent tells us, by increased trade; so doubtless are Hamilton, Kingston, London and Brantford. Still, the check will be only temporary; the future of Toronto as a great manufacturing and distributing centre is assured.

TRUSTS AND TRUST COMPANIES.

At the annual meeting of the American Academy of Political and Social Science, held a week or two ago in Philadelphia, a very exhaustive investigation of the relation of the financial trust company to the industrial trust as illustrated by the United States Shipbuilding Company, was undertaken by Mr. L. Walter Sammis, one of the editors of the New York Sun. This gentleman does not discuss the subject from a necessarily hostile attitude towards combinations; he carefully explains that in his opinion the movement is not in itself bad, nor are all combinations productive of evil in their results. It is palpable, too, he acknowledges, that not only were trust companies originally trustees, but also that many of them remain so in the true sense of the word. Originally, they partook of the character of the name "Trust." They took charge of estates and managed them; they were custodians of mortgages, fiscal agents of railroads and other large combinations of capital; they attended to all the business pertaining thereto, and transacted business of a solely fiduciary nature. They were managed with a conservatism admired by our fathers and commended by ourselves. On the other hand, trusts, or industrial combinations, are not the natural result of business conditions; neither are they the pure outgrowth of economic principles. "They are," says Mr. Sammis, "creatures of invention which find their origin in the brain of the industrious promoter, whose inventive faculties are stimulated by the desire to possess other people's money. Necessity is the mother of invention, even as applied to the invention of a trust, but the necessity in this case is not the necessity created by economic laws, but is the necessity of the impoverished promoter—the necessity that he shall produce or go to work. Trust companies and similar institutions bear the same relations to industrial combinations as manufacturers do to the product of the mechanical or scientific inventor's brain. They make it—produce it in concrete form, place it on the market and find purchasers for it, compensating themselves, as manufacturers do, by the difference between the cost of production and the price at which they can induce the public to buy."

As a good illustration of Wall Street methods of this era of "high finance," accompanied generally by "low morality," of that triangular alliance between the promoter, the lawyer and the financial agent, Mr. Sammis goes thoroughly into the circumstances surrounding the conception and formation of the United States Shipbuilding Company. And those circumstances are by no means savory.

CANADIAN MANUFACTURES.

The extent and importance of manufacturing establishments in Canada may be judged from the following figures supplied by Government authorities in response to an enquiry by Mr. Kemp, M.P. According to the census of 1901 there were in Canada 14,650 industrial establishments, having a total fixed capital of $209,378,638, and a working capital of $237,537,849, employing 313,544 hands on wages and 14,403 on salary. The total amount of wages paid in the year was $89,573,204; in salaries $13,411,464; the value of raw material, $261,527,858; value of articles produced, $481,053,375. Industries which pay, in the course of twelve months, one hundred and three millions of dollars in wages and salaries, and turn out manufactured goods to the extent of four hundred and eighty-one millions, are a very considerable factor in the prosperity of the country.

OUR AUSTRALIAN LETTER.

An addition to the list of Canadian firms doing a good business in Australia is Watson, Foster & Co., of Montreal, represented by Mr. Fotheringham. Canadian wall paper has not been easy to introduce owing to the English width being used here, but it is getting in. One firm in Launceston, one of the smallest of the Australasian cities, gave a $7,000 order the other day. A good trade in the article is being done in New Zealand. Colin MacArthur & Co. are also

getting business in wall paper out here, but the direct representative has the advantage. Mr. Fotheringham, I find, has one or two other lines of goods in which he is getting a trade.

Four Canadian carriage builders are getting orders in Australia and New Zealand, but the trade is distributed. The Grays, of Chatham, for example, derive their chief orders from New Zealand; the Brantford Works from Melbourne; McLaughlin, of Oshawa, from Sydney and Melbourne; and the Canada Carriage Company, of Brockville, from Sydney. Some little time ago the Armstrong Company, of Guelph, did business in Sydney in this line, and it is likely to be renewed in better hands. A large trade with improved conditions could be done by direct representation. It would be largely in buggies in the white and parts.

You would hardly expect the Massey-Harris Co. to be short of stock, but at this moment they are in trouble over a new line of ploughs. There is not one on hand, and the travellers say they have orders by the dozen. It is a plough of Australian design, known as the "Stump Jump." When the mould-board strikes a strong root or other obstruction it falls back, and when it has passed over the obstacle springs back into place again. This implement ploughs three or four furrows, is heavy, has at least half a dozen horses hitched to it, and tears up the soil effectively without breaking the ploughman's ribs.

British Columbia is making an effort to get a trade in fish other than tinned and frozen salmon. One of the difficulties found in getting in fish in brine is that they carried badly, the brine leaking away and the fish spoiling. Late shipments arrived here in good order, showing improvement both in the kegs used and the method of carrying them on the steamer. Some tinned herring have been sent to this market; some of them were in good order, other too soft, so that the fish went to pieces. It is a bad year for fish; the consumption is much below expectations and the market overstocked. British Columbia will yet, I think, make its new departure successful.

April is the Australian's trans-ocean journey month. The busy season is over, and he hies himself to the "home" steamer, and lands in England in warm June. Canada is getting its share of travel, all the space of the "Miowera" for that month being taken. The "Aorangi" for this month has every berth filled. Some persons, of a good class, are going to Canada to settle. One will have thirty thousand dollars to invest in land and equipment; others will have to start much as people did in the early days—with bare hands.

Rains for the month have been good, and prospects for the future are very favorable. but as yet trade lags in Australia generally. There is a good deal being done, but there is no "spring" in it as yet.

The Canadian Commissioner left for New Zealand over a week ago for the purpose of beating up Canadian business. The harvest there is not so good as last year, but the colony is prosperous. Both imports and exports of 1903 were ten per cent. above that of the previous year.

The Vancouver correspondent of the Sydney Daily Telegraph stated in his recent letter that neither the Canadian Government nor the people were taking any interest in the New Zealand preferential policy. As cables state that the Canadian Government has extended its preferential rate to New Zealand, which it need not have done, the first part of the statement does not appear to be correct, but the last is justified. New Zealanders expect that Canadian sales will greatly increase, but the Canadian manufacturers' indifference to the opening has disappointed them so far. They may wake up yet.

There are not many evidences that the Commonwealth Government will introduce the subject at an early date. The education of the people by the newspapers is all the other way, and even were the Government ever so willing it can only do what the people will permit. F. W. L.

Sydney, New South Wales, 22nd March, 1904.

The Montreal Grocers' Association, at a largely attended meeting the other day, decided to fight vigorously against trading stamps.

OUR SAINT JOHN LETTER.

Shortly after the Iroquois Theatre fire, in Chicago, the city of St. John authorized the Chief of the Fire Department, the Director of Public Safety, and the Chief of Police to inspect various public buildings and report on the means of escape of the occupants in the event of fire. These officers have just submitted a lengthy report, which shows that they inspected places of public amusement, school buildings, churches and Sunday schools, hotels, factories and some private dwellings. If the city calls upon the owners of the different buildings to put into effect the changes recommended, carpenters and builders, makers of fire escapes, etc., will have a busy season. Hardly a building inspected was found satisfactory, and it was discovered that many schools and churches had doors that open inwards and very unsatisfactory exits. A sweeping condemnation of the public playhouses was looked for, but strange to say the report makes fewer recommendations with regard to these places than was anticipated.

Since my last letter the St. John civic elections have been held. There was interest in the contests from the fact that organized labor ran three candidates for the council, and elected two of them. In all, five of the old board were defeated. The new council will be sworn in early in May, and it is anticipated that the labor men will endeavor to have affairs managed on lines approved by their organizations.

For some years past there has been complaint about the inadequacy of the St. John water system. The insurance underwriters have demanded improvements, and the city engineers have made recommendations favoring important work, but little has been actually done. Now matters have reached a head. The underwriters, a few days before the Toronto fire, met and decided on a flat increase of 40 cents in the rates. In announcing this, they declared that a reduction of 15 per cent. would be made just as soon as the city purchased two chemical engines, and they have intimated that the old rates will be restored when the water service is improved. This has stirred things up mightily, and a meeting of leading citizens has demanded of the city council the purchase of the new engines and the employment of a first-class hydraulic engineer to report on the present water system and the best means of improving it. The expectation is that the decision will be to extend the mains to Loch Lomond. This is a chain of lakes about eleven miles from the city and sufficiently high to give a gravity system equal to that in any Canadian city. In fact, one plumber caused something of a scare by declaring that if the extension is made the pressure will be so great that it will be necessary to put new plumbing in most buildings in the city.

The death is announced to-day of a well known business man, Mr. Walter O. Purdy, one of the greatest shareholders in the James Pender Co., Limited, manufacturers of horse and wire nails. Mr. Purdy suffered from tuberculosis, and made a great fight for life. Word was received to-day that another prominent citizen, Mr. C. H. Dearborn, head of Messrs. Dearborn & Co., the largest spice and coffee concern in Lower Canada, is seriously ill at Melrose, Mass., where he had stopped for a few days on his way home from a winter in the south. Mr. Dearborn's recovery is not looked for.

The last steamer of the winter port fleet, the "Montrose," from Antwerp, arrived here on Monday, and will get away by Saturday, when the business of the winter will be wound up. Details of the business will not be prepared for a couple of weeks yet, but officials of the railroads and steamship companies are all satisfied that the figures will show the best business since St. John became a winter shipping port. The immigration figures will not show up so well as last year, but so far as Canada is concerned, the result is better. In the winter of 1902-1903, nearly seven thousand immigrants for United States points came out to St. John in Canadian steamers. This winter there have been less than 3,000 for the United States and the number for Canada, chiefly for the Canadian Northwest,, has been four times as great, or well up to 12,000. It is thought that by another year the steamers

coming to Canadian ports will bring only Canadian immigrants.

The Government of New Brunswick did not pass the factory act introduced at the recent session of the Legislature, because it was unsatisfactory to both the manufacturers and the labor organizations. It is now intended to appoint a commission to go into the matter and to draft a bill that will meet the requirements.

The Star Line Steamship Company, operating boats on the St. John river, is negotiating with the Richelieu and Ontario Navigation Company for the purchase of a small steamer now at Quebec, to be run between Fredericton and Gagetown, in Queen's County. This will open a new route and one that will benefit farmers on the upper portion of the St. John river.

Saint John, New Brunswick, * * *
26th April.

MUNICIPAL OWNERSHIP AT PORT ARTHUR.

Some months ago, a special commissioner of the Ottawa Free Press visited Fort William and Port Arthur and afterwards wrote articles in that paper, reflecting upon the financial conditions of those towns, and animadverting strongly upon the system of municipal ownership strongly entrenched there. Both towns now assert that, far from being impartial, the commissioner's account of what he saw and heard was very far from representing the truth, and they have published official brochures setting forth the points upon which he erred most grossly. As showing the wide discrepancies existing between the Free Press report and what the Port Arthur town officers assert to be the truth, the concluding words of their book may be quoted thus: The preceding statements prove that the town's financial condition is sound; her municipal undertakings on an assured basis; the profits rapidly increasing; contributing in 1903 $3,310, to reduce general taxation. The time may not be far distant when these profits will almost cover the general expenses of the town, which should be the ultimate aim of municipal ownership."

A LITTLE INCONSISTENCY.

The sort of loyalty to Canada that does not come out well in the washing is the sort that calls upon everybody to patronize goods "Made in Canada," but which goes to the other side of the lakes or the other side of the Atlantic to buy its luxuries and its fire insurance. That is to say, suppose one Canadian speaking to another: "I am a Canadian merchant or producer, it is your duty as a Canadian to buy Canadian-made or grown products, for my benefit. You really must not go to those nasty Americans or those stupid English people for your goods. But as for me, I don't need to take my own medicine at all—I may buy my clothes where I like; my wife can buy her jewellery in New York or London, my daughter prefers to get her dresses in Paris, and I don't see why she shouldn't." Now, the fellow spoken to in this imaginary but not unlikely conversation has exactly the same rights as the speaker. And he is entitled to retort upon the Canadian rich man who occasionally wants goods other than Canadian, and even quibbles at the duty he has to pay on them. Similarly, why should the rich man not pay for insurance in Canada at the same rates with other people? The game is by no means one-sided.

A FIREPROOF BANK.

An object lesson in modern fireproof construction has already been given in Toronto in the new building, on King street West, which has just been taken possession of by the Bank of Nova Scotia. In this very handsome structure, modern methods of fireproof construction have been adopted throughout. The exterior walls are of unusual thickness, laid with hard brick and cement mortar, lined inside with hollow terra cotta fireproofing. Inside the building, partitions are of hollow terra cotta, and the floors are all made of steel beams and concrete expanded metal floor arches. The floors, except where they are laid with marble tile, have a top finish of marble terrazzo. Except for door and window finish, combustible material has been avoided, and steel filing cabinets have been largely adopted for papers and books. This very substantial structure should be visited by those proprietors in Toronto who are rebuilding mercantile premises after the recent conflagration. They will find that it possesses a cement roof over the five-story portion of the building fronting on Melinda street, and a wire glass skylight over the banking room, which fronts on King street. The base-boards around the rooms are of cement, and the window sills of cement, instead of wood. There is a standpipe to the top floor, and fire hose at every landing. A sprinkler system is to be installed, "sufficient to fairly drown the place." Evidently the authorities have in this case resolved to have a fireproof building in deed as well as in name. May they find many imitators. The interior of the banking room is a dream of beauty.

INSURANCE EXAMINATIONS.

A good work is being done by the Insurance Institute of Toronto in the examinations of insurance students and employees. It was a pleasing sight to see the studious interest with which thirty or forty students, arranged at a series of desks and furnished with questions which they were allowed such and such time to answer, tackled the examination papers. These examinations are, as we have previously stated, graduated; there are junior and senior classes. It is a decided advantage to young men employed in insurance offices, who have had perhaps only slender schooling before becoming wage-earners, to be taught by experienced and well-informed men the minutiae of their business, whether fire, life, accident or other forms of insurance.

A CANADIAN AGENT FOR JAPAN.

Numerous Toronto wholesale houses were called upon during the week by Mr. Alexander MacLean, of Ottawa, who has recently been appointed Canadian Commercial Agent to Japan. It may be remembered that in an interview which the Monetary Times had not long ago with Mr. Nosse, the Japanese Consul, that shrewd gentleman strongly advised the Government of Canada to continue sending representatives to Japan at shorter intervals, or else to appoint a resident agent. "Keep our people in mind of Canada," he said, and the advice was good, if we desire to build up a trade with the Japanese. Mr. MacLean is making a tour of the leading Canadian cities and tons, in order to see manufacturers who may wish to export to Japan, and merchants who desire to import thence. About May 10th, he expects to leave Ontario for Vancouver, and thence shortly afterward for Yokohama. All letters addressed to him after the date mentioned should be addressed to 910 Bank street, Ottawa. They will be forwarded. We are not definitely told that Mr. MacLean is to reside permanently in Japan, but he will be there some months, we have no doubt; and it is to be hoped that we shall hear of some increase of trade between the two countries as a result of his efforts.

A SUGGESTION FOR GOOD ROADS.

Some years ago, the United States Department of Agriculture conducted several experiments with steel rails for use on country roads, and found that the 8-inch rails required for a mile of roadway would weigh about 100 tons and could (then) be purchased for about $3,500. With one or two small exceptions, we believe, no practical use has been made in the United States of the experience then arrived at. In Spain there is a short steel road, where the average traffic is about 3,200 vehicles daily, and on which the annual cost of maintenance is $380, as against the $5,470 annually to keep the

flint road in repair. But aside from the permanency and consequent cheapness of such a road, an exchange refers to the great advantage offered in the reduction in power required to haul loads. Tests have shown that while it requires five times as much power to pull a given load on a loose gravel or dirt road, as it does over good macadam, and ten times as much power to pull the same load through loose sand or mud, on steel rails only one-sixth as much power is needed as on macadam. This great reduction in power, and consequent diminishment of wear and tear on draft horses, is all the more valuable in that it is permanent and lasts throughout all seasons; so that the farmer is not obliged to figure on a greater loss of time and fatigue of his horses at one season of the year than at another. The comparatively recent advent of the day of the horseless vehicle, which serves so admirably as an index to the amount of friction needed to be overcome by power of some sort or another, makes a specially good opportunity for calling attention to the apparent soundness of the suggestion of steel roads for country districts. Truly, the waste of power, of horse flesh, of patience and of money, caused by present conditions, especially during a season such as this has been in Canada, is appalling, and perhaps the use of steel rails may help solve the problem.

BOOKS RECEIVED.

"Curling in Canada and the United States."—It may truly be said that in this most engaging book, so long expected by thousands of Canadian curlers, the author hath better bettered expectation. To say that the subject expressed by the title is an interesting one tells only part of the story, for an added curiosity arises out of the facts that the book is a record of the tour of the Scottish team in the States and the Dominion in 1902-3, and that the author, who is an F.R.S.E. and an F.S.A., Scot., and the minister of Dirleton Parish, is an author of repute. The book* is something more, however, than the record of games of curling in five Provinces of the Dominion and among our American neighbors, it contains impressions of educated and observant men as to matters of wider moment than sport, for the captain has wisely given a whole chapter to members of his team in which to record their recollections of what they saw in Canada and the reflections to which their observations gave rise.

Beginning their Canadian tour at Halifax and ending it at Winnipeg, the visiting team of twenty-four men stopped in sixteen different places and played against nearly fifty different clubs. St. John, Quebec, Montreal, Ottawa, Peterboro', Lindsay, Toronto, Hamilton, Guelph, Niagara Falls, Stratford, London and Windsor were all visited. In the course of their observations certain features were noted by several members: Major Bertram speaks of the "intense loyalty of the Canadians and their hospitality. . . . The thing one misses out there is the leisured class; every one is hustling to make money and position." Provost Ballantyne was favorably impressed with "the natural advantages of Canada from a manufacturer's point of view, owing to its enormous water power. . . . and with their energy and pluck municipally." Mr. Henderson, of Coupar-Angus, was struck by "the extraordinary extent of ground occupied by even the small towns. . . . Canada is securing advantages far ahead of us for her people in their industries and the conditions of their social life." And every one of them who has written speaks with warm admiration of Canada and the Canadians. With no place apparently were they more delighted than with Winnipeg. Some of the captain's references to that stirring city we must give. He calls it "the great Mecca of the curling brotherhood. . . . During the time of this annual [curling] gathering at Winnipeg that city presents the spectacle of being wholly given over to curling for a fortnight. In the life of those who, out in the Far West, are seeking to make gold out of grain the rather monotonous work of the farm is varied twice in the year—first, by the Exhibition which takes place annually at Winnipeg in summer; and second, by the great winter curling carnival." After reciting the distances, 1,000 and 1,500 miles, which some rinks of curlers came to attend the bonspiel, the captain says: "For the time, as Athens was given over to idolatry, Winnipeg is wholly given over to curling." The captain's miscellanies and stories are delightful. The visiting team were too sensible and too Scotch to "gush" over everything and everybody they saw, but they were appreciative of efforts for their comfort, and but little given to grumbling, or even to criticism. Of the Manitoba winter they say: "What most surprised our Scottish team at Winnipeg was the delightfulness of the climate. . . . The temperature might be very low, as it undoubtedly was, but the air was dry and bracing, and the pleasant sunshine made everything most enjoyable."

At the smoking concert of welcome given the team the captain was called upon to respond to presentations of various kinds. Concluding a reply, the warmth of which was delightful, the reverend gentleman said: "We shall all say when we get home, Canada is the country for all who desire by industry to achieve a competency; where land is plentiful and laws are liberal; where the standards of education and morality are high; and where the larger conditions of life are creating a greater Scotland over the seas."

The book, which is one of 787 pages, is admirably produced, clear type on good paper, and the portraits and illustrations, of which there are probably four hundred, extremely well done. There is a copious index—no small charm—and the descriptions of the games, the citations from British and Canadian literature, the details of travel (they journeyed 9,918 miles by land and sea) the original songs, addresses, and anecdotes make this sonsie volume one to revel in and to keep in a cosy nook in one's library for many a day.

*"Curling in Canada and the United States."—A record of the tour of the Scottish curling team, 1902-3, by the Rev. John Kerr, M.A., F.R.S.E., etc. Price, $2. Edinburgh: Geo. A. Morton, George Street. Toronto: The Toronto News Co., Limited, 1904.

BANKING AND FINANCIAL.

A friend of mine, a commercial traveller, visits Toronto twice a year; he also takes in at least once in the twelve months every State in the Union. He said to me the other day: "I like Toronto, it is an up-to-date, go-ahead place. And—speaking comparatively, of course—it is the most thoroughgoing sporting city on this continent. Mind, I express no opinion as to whether this be good or bad, but I do say that in no place I visit is the conversation in the hotels, in the streets—in fact, wherever men assemble—is it so generally about horses, odds, and stocks."—Flaneur, in the Mail.

A few days ago, the Merchants Bank new offices in Meaford were opened. The building was erected by W. W. Stephen, and is well placed on the corner of Sykes and Trowbridge streets. It is a two-story building of red brick, 33 by 47 feet, the interior well adapted for banking purposes. In the outer office are oak desks for the use of the public, also a heavy oak settee. The entire counter work, desks and fittings, were supplied by the Canadian Office and School Furniture Company, of Preston, Ont. The manager's room is finished in shades of red, and there is a very comfortable fireplace therein. Altogether it is a very neat and cosy place, a creditable addition to the appearance of a lively town.

"Is it true that there are a dozen new Canadian banks chartered, and how many of them may be expected to come into existence?" asks a subscriber in Manitoba. We reply that in addition to the Home Bank, which is already in existence as a loan and savings company, and will take its place as a bank very shortly, and the Crown Bank, which has made its deposit, and will hold its first meeting of shareholders next month, there have been chartered on 25th June, 1903, the Northern Bank, headquarters Winnipeg; the Pacific Bank of Canada, Victoria, B.C.; the Bank of Winnipeg; the Sterling Bank of Canada, London, Ont.; the City and County Bank of Canada, headquarters, Ottawa. Then, on 13th August the Citizens' Bank of Canada, Toronto, and on the 24th October the Alliance Bank, at Halifax, N.S. It is said that the Northern Bank has opened its stock books already, and that the Pacific Bank is nearly organized. The others

are not in so forward a state, if they ever reach the stage of organization and deposit, for which a year is the time allowed.

The American Bank Note Company, of Ottawa, has decided to open in Montreal and have a handsome suite of offices in the Alliance Building. Their manager will be Mr. James Monk (son of Judge Monk), who was some years with the Burland Company.

The Montreal aldermen think it a proper and opportune thing to exact a tax of $100 from each branch of a bank planted in that city, and they ask the Legislature of Quebec to enact accordingly. Then they also want to tax brokers who are not members of the Stock Exchange the sum of $100 per annum. But the regular brokers, in addition to a license of $100, are to be taxed one-twentieth of one per cent. upon the amount of all stock transactions. No wonder they object.

In the thirteenth chapter of his book descriptive of the tour in Canada of the Scottish Curling Team (which chapter is, to a Canadian, alone worth the price of the book, composed, as it is, in part of the Captain's impressions and some capital stories) Mr. Kerr, discussing the confusion of the coinage, which was most complained of by the visitors, says: "Now, in the name of all that is reasonable, when one hears so much of the federation of the Empire and the distinction between the United States and Canada, why should this similarity of coinage [the decimal system] unite them, while its dissimilarity separates our greatest colony from Great Britain? There is something far wrong here. Might we not say, something dangerous? For in these matters great issues are often involved?" And he quotes language used before an Imperialist meeting in 1901 by Hon. George W. Ross thus: "There is much to be done in the way of unifying the Empire. If you go to the Old Country you feel yourself a stranger in many ways. The coinage is different. You are puzzled sorely to transmute—you can easily transfer—the dollars and cents into pounds, shillings and pence. You are puzzled with the weights and measures. These are matters of trade. I would like all the colonies to feel that there was a unification of every matter affecting trade and commerce, so that when we carried on exchange with London we could do so as easily as with Montreal."

FIRE INSURANCE ITEMS

One of the largest and costliest fires that London has had in years started at midnight of Monday last in the London & Northwestern Railway Company's freight warehouses in Minories. Four six-story buildings, together with their contents, were soon destroyed, and the fire burned till nearly noon of Tuesday. The loss is £500,000. Fifty engines were pumping water on the blaze.

"Why did the fire not get past our building?" asked Joseph Kilgour, of Kilgour Bros., in speaking to the Toronto World. "Simply because we had a perfect automatic sprinkler system. Every four feet of floor space was covered by a sprinkler. The windows were also protected by sprinklers, and that is what checked the flames."

A Chicago letter contains the following reference to last Tuesday night's fire: "You may depend we had some unpleasant reflections on reading of the Toronto conflagration. We feared it might have spread so as to embrace some of your beautiful banks and public buildings. But we now know it was in another quarter—the wholesale quarter. I am not so familiar with that. However, judging from the estimated loss, it was a hot fire. You may rise from your ashes better than ever."

Fire insurance experts of the highest ability and of long experience do not like to see granite buildings of importance going up in this era. A monumental public structure of great size may be safely built of granite if it stands alone, with wide spaces all about it, say in the centre of a park. But the great fires in Chicago, Boston and Baltimore prove beyond question that thick walls of granite crumble and flake, disintegrate and tumble when beaten upon by tempests of flame.

The Montreal city council has been arranging a new scale of civic taxation: so much per annum for licenses to "horse traders, umbrella menders, collecting agents, insurance agents." Among the new licenses is one taxing insurance companies in proportion to the amount of business done rather than by a fixed tax. This change has been brought about, it is said, by the protests of the smaller underwriting companies, which claimed they were paying more than their scale of civic taxation; so much per annum for licenses to the premiums collected by fire insurance companies, provided the maximum tax in each case shall not exceed $1,000 a year, with a mimimum of $200. The by-law takes effect 1st May.

An increase of one per cent. has been made in the marine insurance on sailing vessels on the Great Lakes during the coming season of navigation. Owners of this class of property threaten, therefore, to go without insurance for a season. The increases are: On steamers valued at $40,000 and over rates are increased from 5½ per cent. to 6 per cent., and on vessels valued at from $30,000 to $40,000, from 6 per cent. to 7 per cent. On values between $20,000 and $30,000 the rate is 7½ per cent., and under $20,000 it is 8 per cent. On vessels built before 1886, regardless of rating, there is an advance of one-half per cent. The tariff on wooden schooners and barges valued at $30,000 and over is 7½ per cent,; between $20,000 and $30,000, is 8½ per cent., and under $20,000, 9 per cent.

The following quotation from a letter written on Sunday by a Montreal merchant, taken in connection with the messages of condolence received by the Mayor from various towns and cities, shows how warm a feeling is evoked by a calamity like the recent fire: "The fire of Tuesday night, my dear H——, must have been a grand and awful sight. Even to read of it, as we did here, gave one a shock, to think of so much property gone in smoke and flame. How much more dreadful to look on at it, as you Toronto people had to do, and to realize how helpless man is when the Storm Fiend and the Fire Fiend combine! I can hardly take it in that so wide a swath was cut by the fire. I feel deeply for the group of people on Wellington street that I knew, in particular. And one thing you may be very sure of, namely, that there is a very widespread feeling of sympathy in Montreal for your city. That the blaze did not sweep further eastword and destroy the group of banks thereabout is a merciful Providence. Doubtless, it is bad enough as it is; but that would have been still worse."

There are some folks who can get fun out of even a fire. Here is the way the Gutta Percha and Rubber Company, whose warehouse in Toronto was destroyed on Tuesday of last week, announce to their customers that they have found a place to hang out a shingle. We quote from their advertisement in the Globe of Monday:

STOP AT 15 WELLINGTON ST. EAST,

THAT'S WHERE WE ARE.

Having "gone up in smoke," we are still way up—3rd floor. The elevator isn't working, and the electric lights are disconnected, and our landlords don't approve of signs, so we can't catch your eye. But come on up anyway, it's great practice. If you are in a hurry, whistle outside, and we'll come down. Our cross is the Maltese Cross; factories [Parkdale], running nights. P.S. (1) Only one of our four telephones is yet helloing, viz.: Main 1234. P.S. (2) Don't come many at a time unless prepared to sit on each other's laps.

It has been suggested that this company has imported a funny man from Akron, Ohio, to produce this and other pleasantries in newspapers, but we don't believe it. They don't need to. They have barrels of fun and wit in stock—which was not burned. Likewise they had the wit to put plenty of insurance on the stock that did burn.

In a letter dated 25th April, an old friend and subscriber of this journal, J. C. Schleihauf, writing from Bismark, West Lorne P.O., Ont., says: "Well, you had an awful singeing—too bad such fine buildings and such a large amount of pro-

perty gone. A great loss. One great blessing was that no lives were lost."

The cause of the Baltimore loss has at last been discovered. It was caused by a lighted cigarette. It was caused by the spontaneous combustion of oily waste. It was caused by a gasoline tank in the Hurst store. It was caused by the failure of the automatic alarm. Take your choice.—Insurance Age.

The Canadian Fire Underwriters' Association concluded its meeting on Saturday morning. The General Adjustment Committee, which will have charge of the fire losses, appointed Mr. Peter McCallum, of the Hartford, as permanent chairman, and Mr. E. F. Garrow, of the British America, as secretary.

The German Government has placed insurance upon its exhibits at the St. Louis Exposition as set forth below. Three companies assume a line of 1,000,000 marks each.

—U. S. Review.

The city council of Toronto has passed a resolution thanking the city of Buffalo for help at the fire here on Tuesday night. Similar resolutions will be sent to Hamilton, Brantford, London, Peterboro', Toronto Junction, Kew Beach, East Toronto, and also to the Waterous Engine Company of Brantford for lending the firemen of that city a fire engine to bring with them to Toronto.

It is with interest we note that at the annual meeting of the Canadian Club of Toronto, held on Monday, April 25th, both the first and second vice-presidents chosen for the ensuing year are two insurance men. Mark H. Irish, who was chosen first vice-president, is well known in fire insurance circles, being connected at present with the Western Assurance Co., while Mr. C. W. I. Woodland represents the accident and liability branch of the insurance business, being one of the Canadian managers of the Employers' Liability Assurance Corporation of London, England.

Toronto aldermen made their annual tour of inspection of city fire stations a few days ago. While some of the halls were found to be in the pink of condition, there were others of which such could not be said, owing to bad drainage, lack of small repairs, etc. We believe, however, that this was due not to any fault of the men, but to circumstances over which they have no control. As it is now, when repairs are needed, they are not allowed to make them as they would like to do in spare time, but a man is sent from the City Hall, and much time wasted.

LIFE ASSURANCE ITEMS.

You can't insure your house when it is in flames. Don't put off life insurance till your veins are on fire with fever, or your lights and liver pulpy with disease. It is bad policy to reject a good (insurance) policy.—Insurance Age.

A handsomely engraved signet ring, bearing the emblem of the Equitable Society, has been received by Mr. R. J. Hamilton, of Toronto. This is a result of his excellent record during the last three months of the past year. He wrote and paid for over seventy-five thousand dollars of personal business in this time, which is a good year's work for the ordinary insurance man. Mr. Hamilton was winner of the gold watch given about a year ago to the leader among the hundred or more graduates composing the Equitable school. In addition to his insurance work, Mr. Hamilton is business manager of the University of Toronto monthly.

The annual examinations of the Actuarial Society of America, and of the Institute of Actuaries of Great Britain, are now being held in Toronto. Several candidates from distant places are writing, as well as a number resident in the city. F. Sanderson, actuary of the Canada Life, is the supervisor of the examinations of the Actuarial Society of America, and T. Bradshaw, actuary of the Imperial Life, is supervisor of the examinations of the Institute of Actuaries of Great Britain.

A large business is shown by the Standard Life Assurance Company for its latest year. The issue of new policies was 5,408 in number, assuring $11,718,000, and the existing assurances at close of November amount to $134,560,000. The revenue of the twelve months was $6,765,000, and the outgo for claims by death and additions to policies out of earnings was $3,385,000. Matured endowments, $362,420, is another item of outgo. Patrons of this long-established and strong Scottish company do not need to be told how liberal it is, nor yet how strong, but other people may be interested in knowing that it has accumulated funds of fifty-three millions of dollars.

The amount paid yearly to policyholders in Canada by life companies is becoming quite important. During 1903 no less than $10,254,578 was thus distributed. The large proportion was, of course, for death claims, but other items, such as matured endowments, dividends, etc., are not insignificant. The details are as follows:

Death claims	$5,946,270	58.0 per cent. of the whole.
Matured endowments.	2,111,164	20.6 " " "
To annuitants	212,259	2.1 " " "
Surrender values ...	1,121,064	10.9 " " "
Dividends	863,821	8.4 " " "
Total.....	$10,254,578	100.0

Of the total payments to policyholders, $5,517,105, or no less than 53.8 per cent., was made by Canadian life companies; $1,243,892, or 12.1 per cent. by British companies, and $3,493,581, or 34.1 per cent. by United States companies.

A new feature of the Government Report on Life Insurance in Canada is the separating of the amounts insured into the four classes: (1) "Life" contracts, including ordinary life and limited payment life policies. (2) "Endowment" contracts, including endowment assurance, and limited payment endowment assurance policies. (3) "Term and all other" contracts, including three, four, five, seven years' term insurance, as well as renewable term insurance, and (4) "Bonuses," being the addition made to policies at surplus distributions. The following table sets forth the amount of insurance involved in each class, and the percentage of each class to the total:

Life	$347,676,150	62.89 per cent.
Term and all other	35,326,786	6.39 "
Endowment	162,212,835	29.34 "
Bonuses	7,608,096	1.38 "
Total	$552,823,867	100.00

These figures serve to indicate the system of insurance which the public is applying for. If the "life" class were analyzed, we think it would be found that the 20 payment life system would represent at least 75 per cent. thereof. This is the most popular form of policy issued.

DRY GOODS ITEMS.

The Canada Woolen Mills Company, which owns plants at Hespeler, Waterloo, Lambton, Markham, and Carleton Place, is said to be in course of being wound up by the courts.

The Executive Board of the United Garment Workers of America have ordered a strike of some 100,000 workers in the

United States. The industry in this country is not likely to be affected in any way.

The prices of carpets have advanced in England about 5 per cent., and some lines also have advanced considerably in the United States. It is not unlikely, therefore, that prices in this country will shortly rise in proportion.

Says our Montreal correspondent, writing on Wednesday: "The old adage which declares it be an ill-wind that does not blow good to somebody is being exemplified in Montreal this week. Owing to the great fire in Toronto, which has destroyed so many stocks and disturbed trade for the time, many Western buyers are now looking for goods in this city. This is especially the case in dry goods. Our wholesale houses hope from this source to make up in some degree for the small volume of assorting trade which is just now going on."

John Macdonald & Co., are, as may be imagined, excessively busy just now. Owing to the backward state of the season, however, they still have unusually large and fully assorted stocks on hand, and these having been bought before the recent advances in price, they are selling at the old prices—in some instances, even cheaper than the present mill quotations.

Mr. Sully, recently distinguished in the cotton corner operations, has succeeded in forming a company to manufacture an improved machine for baling cotton, and a new roller gin. The company, of which he himself will be president, has received a New Jersey charter, under the name of the Daniel J. Sully Cotton Improvement Company; capitalized at $5,000,000.

Tinsel is a great feature of trimmings this season. The leading colors will be browns and leaf greens. For backing laces, and chiffon embroideries, and other trimmings, and giving the smart touch of gold, without which no toilette is now complete, there is one of the most enchanting trimming fabrics ever put on the market. This is rightly called drap d'or. It is radiant with its bright sheen of gold, and forms a beautiful foil for laces, and blends in and enriches the colors and embroideries and trimmings used over it.

Mr. W. R. Dunstan, of the Imperial Institute, has compiled a report on cotton cultivation in the British Empire and Egypt. He looks to little extension of production in Egypt, but speaks favorably for the prospects in the Soudan, where the suitable area is very much larger. That the British cotton industry is so dependent on the United States for supplies is largely due to the deterioration of Indian cotton, the replacement of cotton by sugar cane in the West Indies and the continuous improvement in the quality and fibre produced in the United States. He considers the shortage of American supplies (so far as Great Britain is concerned), to be permanent, as the extension of manufacture in the United States will entail a greater home consumption. The paramount position of the United States in cotton cultivation is attributed to the operations of the well-organized and splendidly-equipped experiment stations of the department of agriculture, and he considers that the best means of helping the British colonies to compete with the United States in the cultivation of cotton would be to provide them with equally as good means of scientific experiment and advice.

The W. R. Brock Company, Toronto, have purchased for cash the commodious warehouse formerly occupied by Harvey & Van Norman, on Front St. West, which they are having fitted up on an up-to-date way, and expect to occupy within a few weeks, with a fine stock of new goods. This will only be a temporary location, however, pending the construction of a new warehouse on the old site on a very much larger scale even than before. It will be six stories high, of L shape, with front on both Bay and Wellington streets, and will have very superior shipping and handling facilities. Work on this will be rushed through as quickly as possible; it will be fitted up with splendid new stocks in every line, and the result will be looked for as one of the very finest dry goods establishments in the Dominion. In the meantime this house is not idle; it has offices and warerooms in Wellington St. East, and many travellers are on the road as usual. Its new building is expected to be in readiness for occupation by October or November.

—It looks as though the reported attempt of British steel producers, to reach an agreement as to prices, will not prove wholly successful, owing to their lack of organization and the conflicting nature of their interests. The desire to check the dumping of crude steel is by no means universal, as some branches of the industry gain thereby considerably.

Canada

owes to herself the support of her own enterprises.

Our Factory is thoroughly equipped for the manufacture of Interior Fittings for

CANADIAN BANKS.

J. M. COURTNEY,
Deputy Minister of Finance

FOR GROCERS AND PROVISION DEALERS.

The prices of canned goods have been advanced 5 per cent.

The plant and fixtures of the Pakenham Pork Packing Company, Stouffville, Ont., have been sold to Puddy Bros. for $2,100, who will remove them to Toronto.

A large part of the catch last season of codfish was sent abroad to supply a shortage in the European markets, so that high prices are likely to prevail here.

The Dominion Government has granted a charter to the British-American Fish Corporation, Limited, Montreal, capital stock, $500,000, to catch and preserve fish, operate cold storage, do a general mercantile business, etc.

The marketing of hogs in the West continues moderate, says the Cincinnati Price Current. Total Western packing, 355,000, compared with 355,000 for the preceding week, and 420,000 two weeks ago. For corresponding time last year the number was 365,000, and two years ago 350,000. From March 1st the total is 2,585,000, against 2,415,000 a year ago —an increase of 170,000. The quality in some instances is not being maintained. Prices are lower than a week ago.

There is not the slightest doubt, says the Leamington Post, that the past winter has been a hard one on the peach trees; and a large number have been killed. While the loss is not as heavy as that of five years ago, it is a severe blow to the fruit growers of Essex County.

P. B. MacNamara, Canadian Commercial Agent at Manchester, reports that there is an excellent market in England for Canadian fruit pulp. At present only small quantities are received from Canada. There is also a good outlook for potatoes. Speaking of waxed cheese, Mr. MacNamara states that it is not objected to, provided that care is exercised in applying the paraffine.

Last year the exportation from Cuba of tobacco amounted to 300,000 bales, valued at over $12,000,000, besides 209,000,000 cigars, which at an average valuation of $60 per thousand would yield about $12,500,000. The United States took considerably more than half of the tobacco in bales, but less than 46,000,000 cigars, or about half what was sold to England.

CANADIAN RAILWAY STATISTICS.

According to a report recently issued by the Minister of Railways and Canals, the length of railways in the Dominion on June 30th, 1903, was 19,836 miles. Of this, 19,077 miles was operated by steam, and 759 by electricity. The latter includes street, as well as suburban and general lines, which latter are growing with some rapidity, especially in Ontario. The capital reported as being paid up on both classes of roads was $1,193,647,222. The gross earnings amounted to $103,298,404, and the working expenses to $71,945,381, leaving net earnings of $31,343,822. The number of passengers carried was 177,811,554, with 47,744,703 tons of freight. The steam railways number 167, including two lines owned by the Government. However, owing to the tendency towards amalgamation, this classification may be classed rather as nominal than real, as the number of operating companies, in addition to the Government, is 79. The length of the roads (in Canada) controlled by the leading systems is as follows: Canadian Pacific, 7,439 miles; Grand Trunk, 3,154 miles; Canadian Government, 1,516 miles; Canadian Northern, 1,236 miles; Canada Atlantic, 458 miles. More than two-thirds of the railways of the country, it will thus be seen, are controlled by the Government and four companies.

We are told that the Ontario Wind, Engine and Pump Co. made a shipment of two of their well-known airmotor outfits recently to Paris, France, which was a partial shipment of order received from their representative in that city. This is the result of an exhibit at the Paris Exhibition in 1900, where the company was awarded a medal for their goods. Also from Labrador, the Ontario Company received an enquiry for their goods. Truly, "The Sun Never Sets on the Canadian Airmotor."

—A circular has been sent by the Canadian Manufacturers' Association to members noting the fact that a bill has been introduced into the British Parliament to render the metric system of weights and measures compulsory in the United Kingdom, and that the Government of Canada is also considering the advisability of taking steps to introduce the system here. The members are, therefore, asked to consider carefully the effect which such a law would have on their business, with the intent that the association should express the views of its members on the question. An interesting paper on the metric system is to be found on page 451 of the April issue of "Industrial Canada."

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing House for the week ended with Thursday, April 28th, 1904, compared with those of the previous week:

SOLD BY ALL LEADING WHOLESALE HOUSES

FIRE PROTECTION.

At almost any time, it has been difficult to get manufacturers and merchants, as a rule, to pay proper attention to this subject, to that phase of it, we mean, which has to do with construction of premises, their equipment, and their exposure with reference to fire. They were for the most part too easy-going or else too parsimonious to provide the safeguards which their architects suggested or their insurers insisted upon. And they had many a time to pay for their neglect by interruption of business and loss over insurance. To-day it is different. In the United States, at the present time, there is probably no other branch of fire protection receiving as much attention as the exposure hazard. When underwriters insist earnestly upon better fire protection either by way of proper construction or water pressure or more fire engines, declaring that if these are not provided they must put up premium rates, they are called robbers, or other fancy names. If any one will read the figures below, elicited by a governmental request for a return as to the money insurance companies had made in Montreal, he will be likely to moderate his opinion about the profits of underwriters:

In the Senate, on Friday last, the Hon. Mr. Scott brought down a return showing the amount of premiums against fire insurance paid in Montreal during the last ten years. It shows: Anglo-American Fire Insurance Co., in three years, from 1900 to 1st of July, 1903, it received premiums in that city of $16,-179;, and paid losses of $15,454; Connecticut Fire Insurance Company, premiums, $55,244.81; losses, $61,847.34; Law Union and Crown Insurance Company, from April 1st, 1899, four years, to July 1st, 1903, premiums, $11,306.01; losses, $20,863.57; London Fire Insurance Company, three and a half years, January 1st 1900, to July 1st, 1903, premiums, $62,-495.21; losses, $23,560.01. The companies are not obliged by law to make this return, and only the above companies, it is stated, answered the circular issued.

CONTRACTS have been let for a large tannery to be erected at a cost of $75,000, on the east bank of the Rideau river, near Ottawa.

—Under the spreading chestnut tree the village smithy stands; but there the smith no longer wields the sledge with sinewy hands. The olden sign of "Blacksmith's Shop" there greets the eye no more; but "Bysickels Repaired" is seen above the smoky door.—London Tit-Bits.

NOTHING more humorous has happened in a long time than the decision of the Central Federated Union to call upon the labor unions of New York to organize for a rent reduction campaign. High rents in New York are caused by lack of accommodation, lack of accommodation is due to strikes in the building trades, the strikes being ordered by the unions. They alone are responsible for the grievance of which they now complain. They burned the candle at both ends and must pay for their folly. —Mont. Gazette.

MONTREAL MARKETS.

Montreal, 27th April, 1904.

Ashes.—Receipts are still abnormally light, and dealers are ready buyers at $6.20 to $6.25 for No. 1 pots, and from $5.75 to $5.85 for seconds. For pearls from $7 to $7.50 is an approximate price, but there have been no offerings for some weeks.

Cements, Firebricks, Etc.—There is now more enquiry for cements, for building purposes, which are quoted as follows: Belgian, $1.80 to $2.05; English, $2.15 to $2.25; German, $2.15 to $2.35. Firebricks are quoted at $19 to $22 per thousand, and fire clay at $8 to $9.50 per ton.

Dairy Products.—The cheese market is in a rather demoralized shape, and fine fall makes will now only bring from 8½ to 9c., meaning a heavy shrinkage for those who are holding any stock. For new fodder cheese the quotation has declined to 7¾ to 7½c. Butter rules low, though some claim a rather steadier market. For fine new creamery 16c. is the generally quoted price; seconds, 15c.; dairy makes, 13 to 14c.

Groceries.—No special briskness is yet reported in the demand from the country, and collections are still spoken of as slow. The one noteworthy feature of the week is the advance of 5c. a cental on all grades of refined sugars, owing to the strong outside markets for both raw beet and cane sugars, and further advance is deemed not improbable as New York refiners put up quotations to-day by 5c. Local jobbers are reported as buying freely. The molasses market still rules weak, last cabled quotation being about 17½c., landed gauge, and owing to the unsettled market, no cargo orders are reported as being yet placed by local buyers. Some further good-sized sales are reported by importers and brokers of low and medium priced gunpowders, and young hyson green teas to replace Japans of similar price, which are not available.

Dry Goods.—The weather is more

TO GET SATISFACTION

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

springlike—though there is still a lingering chilliness in the shade—and there is more business doing in both a retail and wholesale way. The old adage about an "ill wind," etc., is being well exemplified by the fact that owing to the Toronto fire which has had such a disturbing effect on trade, many Western buyers are now looking for goods in this city, and local wholesalers hope to largely make up for the shortness reported in sorting business from this source. With regard to values of textiles, nothing new is reported. Money is still coming in somewhat slowly.

Hides.—Business in beef hides is reported slow, but there is a good trade doing in calfskins. It is expected lambskins will be advanced from 10 to 15c. next week, but the quotations for beef hides and calfskins are unaltered at 9c. for No. 1 hides, and 13c. for No. 1 calfskins per pound.

Leather.—The movement is a fair one for the season, and prices are well maintained, with a material scarcity in some lines both of sole and black leathers. No. 2 mfrs.' sole is quoted at 24c., with other lines at proportionate figures. Western splits, 21c.; Quebec ditto, 17 to 18c.; harness, 30 to 32c.; pebble and buff, 12 to 12½c.; glove grain, 11½ to 12c.; Scotch grain, 14 to 15c.; russet, 40 to 42c.; chrome calf, 17 to 21c.

Metals and Hardware.—A fair volume of orders is reported in the hardware line, but business is not at all equal to that of last spring, and heavy metal men find trade slow. Little change can be noted in the markets. Quotations for new arrivals of pig iron are made, exwharf, in car lots, as follows: No. 1 Summerlee, $19.25; Eglinton, $18.15; No. 3 Middlesboro, $6.95. Bars are barely firm at $1.65 to $1.70. Boiler plate, $2, and tank steel, $1.90. Iron pipe is steady at $4.42. Tinned plates, galvanized sheets, Canada plates, etc., all remain as last quoted, and in wire nails, etc., there has been no recent change of any kind. Lead is steady to firm at $3.45; copper, 13¾c.; tin, 32 to 32½c.; spelter, $5.75; antimony, 7¾c. per pound.

Oils, Paints and Glass.—In these lines there is little new beyond a decline of 2 to 3c. in turpentine. Quotations are: Single bbls., raw linseed oil, 47c.; boiled, 50c., net 30 days, or 3 per cent. for four months' terms. Turpentine, 84½c. single barrels; olive oil, machinery, 90c. to $1; cod oil, 35 to 40c. per gallon; steam refined seal, 62½ to 65c.; straw seal, 42½ to 45 to 55c. per gallon; tinged and brown ditto, down to 35c.; sweet pale whale oil, 50 to 55c.; castor oil, 7½ to 8c. for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and firstclass brands), $4.50; No. 1, $4.25; No. 2, $4; No. 3, $3.80 to $3.90; No. 4, $3.60; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4½c.; genuine red ditto, 4 to 4¼.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in bbls., $1.90; ditto, in kegs or tins, $2.65; London washed whiting, 45c.; Paris white, 75c.; Venetian boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3 to $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break, and $1.80 for second break.

TORONTO MARKETS.

Toronto, April 28th, 1904.

Chemicals, Drugs, etc.—No local feature of any importance has developed in this market. Trade may be said to be up to a fair average in general lines. In the United States market particular dullness is reported in opium. Menthol is firmer, and quinine quite steady.

Flour and Grain.—Dullness prevails in the local market for flour, and the price for ninety per cent. patents has fallen to $3.50 in buyers' bags, middle freights. Oatmeal continues without change, and millfeed steady. Wheat has declined all round 1 or 2c. per bushel. Barley is 1 to 2c. lower. Peas continue unchanged. Rye is firmer at a one cent advance. Corn and buckwheat remain unchanged. Business is dull with little doing.

Fruits and Vegetables.—A fairly good business is being transacted in the fruit circles. Apples continue at former prices of 75c. to $2.50 per barrel according to grade. Liverpool prices are easier. Cranberries have now about all gone. Oranges are becoming scarcer, but pine-

apples more plentiful. Strawberries, too, are more abundant. Quotations may be made as follows: Cocoanuts, $4 per sack; oranges, California navels, $2.75 to $3.50; Valencias, ordinary, $4.50 to $5.; large, $5.50 to $6; lemons, Messina, 360's, $2.25 to $2.50; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; Malaga grapes, $6.50 to $7.50 per barrel; dates, Sair, 3½c. per lb; Hallowee, 4c; figs, 8c. to 12c.; tap figs, 3½c; pineapples, $4 to $5 per case; strawberries, 15c per pint box, and 25c to 28c for quarts; Egyptian onions, $3.50 per sack.

Groceries.—Some falling off in general trade has been experienced this week, due probably to the still backward season. There was on Tuesday last an advance of 5c. per cwt. all round in the price of sugars, which are moving fairly briskly. New York values are very firm. In teas there is great firmness and a good demand may be noted. Canned goods are very strong, especially peas, corn and tomatoes, and this condition is likely to continue until the new crops come in some time hence. In dried fruits an average seasonable business is going on.

Hardware.—No appreciable firmer changes have occurred since last report, and values keep firm. Trade can only be described as fairly good, the lateness of the season affecting country retailers adversely. Metals are moving fairly well, without presenting this week any startling feature.

Live Stock.—At the western cattle market there was an active trade this

THE COMMERCIAL

The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

week, with offerings fairly plentiful. The call for export cattle seems to be increasing with the approach of the navigation season. For good medium butchers' cattle the demand is good, and prices have an advancing tendency, while for the extra choice at the prices charged, the market is a little easier. Stockers and feeders sold well. Milch cows sell at $30 to $60. Sheep and lambs were in small supply and sold rapidly. Calves also were in light supply, but the market continued easy. Hogs were steady at the recent rise of 10c. per cwt.

Provisions.—Offerings of butter, both dairy and creamery have been so large the past few days that the market has become decidedly easier. Extra choice rolls, however, sell well. Eggs in spite of comparatively heavy receipts, continue steady at about 13c to 14c for new-laid. Hops are quiet at 26 to 30c for Canadian. Cheese is easy.

Seeds.—A better demand has sprung up owing to the warmer weather and the market is steady. For alsike, the price is $4.25 to $7.50; red clover, $5.25 to $7.75; timothy, $1.50 to $2.50.

Wool.—Some small lots of unwashed new wool are now coming forward, but the market both for fleece and pulled is very quiet. New washed is not likely to arrive in any quantity for some time.

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in their letter dated April 22nd, say: Notwithstanding the essentially dull markets and the lower tendency in prices which has been observable during the past week, we think the course of the market has justified the statement in our last letter of our opinion that the public were gradually gaining confidence. After an upward movement in prices of a satisfactory character, which lasted considerably longer than such upward movements ordinarily do, and much longer than any we have had for some time, a reaction was but natural. This reaction, so far as we can judge, appears to have failed in bringing about any real liquidation, and, while it has encouraged the bear party to active operations, yet the resistance shown in the decline is very marked. The result of the last few days' operations is, we believe, to have materially increased the short interest in the New York market. This was clearly evidenced yesterday by the increased demand on the part of traders in New York for the loan of stocks. It is a bull argument that both in England and on this continent money appears to be very plentiful. One sees the rate for call money in New York constantly quoted below 3 per cent., and we hear also of long time loans being made for 4 per cent. and even lower. In England the position with regard to the supply of money is very clearly demonstrated by the action of the Bank of England. They have reduced their discount rate twice within a short period of time, an unusual thing for them to do. The reduction is from 3½ per cent. to 3 per cent. and this is the lowest it has been for more than a year past. Money locally appears to be gradually working easier. It is not unlikely, however, that there may be a temporary check in this direction as the result of the heavy sums the insurance companies will be called upon to pay to the owners of buildings destroyed by fire here. As to the United States, Henry Clews & Co., New York, in their circular of April 23rd, say: Activity on the Stock Exchange has been confined to a few specialties. Outside of these the security market has been dull and the drift of values has been more downward than the reverse. This state of affairs is chiefly attributable to complications arising from redistribution of the merger stocks and the unusual backwardness of the season, the latter exerting an unfavorable influence upon both crops and general trade.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policyholders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.

THIRTY DAYS' GRACE

for the payment of Renewal Premium is invariably allowed by The Canada Life. During this period the policy remains in full force, and should the Assured die within it, the claim would be promptly paid whether the premium had been paid or not.

This has been the practice of the Company for over 50 years, and is but one of many valuable privileges

Allowed by The CANADA LIFE.

Fire Proof Safes.

IT IS STRANGE

how frequently merchants and others put off the matter of protection for their books and other papers. One fire will do more damage than the cost of two or three safes Send to the Goldie & McCulloch Co., Limited, Galt, Ont., for a Catalog of Safes and Vault Doors that are suited for stores and other buildings.

The Goldie & McCulloch Company, Limited, GALT, Ontario, Canada.

We make —Wheelock Engines, Ideal High Speed Engines, Gas and Gasoline Engines, Boilers, Pumps, Water Wheels, Flour Mill Machinery, Oat Meal Machinery, Wolf Gyrators, Emery Choppers, Wood Working Machinery, Shingle Machinery, Heading and Stave Machinery, Wood Rim Split Pulleys, Iron Pulleys, Shafting, Hangers, Friction Clutch Couplings, Friction Clutch Pulleys, Safes, Vaults and Vault Doors. Protection from Loss.

The business of boiler insurance is an engineering business; the insurance is only a guarantee of the trustworthiness of the engineering services.

Measure the value of those services and then consider the guarantee. In doing this remember that EXPERIENCE, SKILL, and ABILITY are the determining qualifications of the value of those services.

Insure your boilers in

THE BOILER INSPECTION & INSURANCE CO. OF CANADA, Canada Life Bldg., Toronto,

which has been in this business for nearly THIRTY YEARS.

LA BANQUE NATIONALE.

NOTICE—On and after Monday, the second of May next, this Bank will pay to its shareholders a dividend of three per cent. upon its capital for the six months ending on the 30th April next.

The transfer books will be closed from the 16th to the 30th April next, both days inclusive.

The annual meeting of the shareholders will take place at the banking-house, Lower Town, on Wednesday, the 18th May next, at three o'clock p.m.

The powers of attorney to vote must, to be valid, be deposited at the Bank five full days before that of the meeting, i.e. before three o'clock p.m., on Wednesday, the 11th May next.

By order of the Board of Directors.

P. LAFRANCE, Manager.

Mercantile Summary

THE St. Louis Purchase Exposition was formally declared open on the 30th ult.

THE proposition to establish zinc smelting works at Fernie, B.C., appears to be taking more tangible shape.

ANOTHER lumber deal is reported from Nova Scotia. R. McGregor, of New Glasgow, has bought the mill and property of the late C. W. Lantz, at Milford. The purchase price is said to be $29,500.

THE Boston Transcript of April 26th says: The Boston and Nova Scotia Woollen Company, Limited, has been incorporated under the laws of Massachusetts with a capital stock of $150,000 to manufacture woollen cloths in Nova Scotia.

Two of the large wholesale and retail book and stationery firms in Montreal were amalgamated last week in the purchase of the business of Cadieux & Derome by the Beauchemin Book Company. The new firm will supply French-Canadian literature to French-Canadian readers.

As an illustration of the fact that it is not only Government and railway lands which are feeling the results of the influx into Western Canada, the report of the Calgary and Edmonton Land Company for the past year may be quoted to show that its sales were 129,975 acres, the price realized being $535,329, or an average of 64 cents per acre more than the year previous.

FOR fifteen years a clerk in Quebec, M. A. Gauvreau, of St. Raymond, Que., began storekeeping for himself about eighteen months ago. He is already reported in embarrassed shape, and is arranging an extension of time on liabilities of about $1,800.—J. B. Bornais, engaged in the saw milling business at the same place, is reported to have compromised liabilities of some $6,000 at 20 cents on the dollar.

THE retail furniture dealers of the Province of Quebec have formed a district association in affiliation with the National Retail Dealers' Association of Canada, the officers for the current year being as follows: Messrs. A. Renaud, Montreal, president; D. Wishart, secretary-treasurer; Executive, Messrs. Geo. Vallier and James Perry, Quebec; J. Keith Edwards, Sherbrooke; M. Laurin, Three Rivers; N. G. Valiquette, G. A. Emens and Wm. Tees, of Montreal.

It is many a day since visitors to that beautiful Canadian summer resort, Prince Edward Island, have commented upon the lack of hotel accommodation in its capital, Charlottetown. One day last week one hundred and six passengers from the "Minto" were landed in the morning, and more than half of these people were obliged to go wandering around the streets seeking accommodation wherever it could be found. Does Charlottetown not want visitors? or does she expect them to be contented with her old-fashioned boarding-houses?

IMPORTANT WORK.
"Investments" is admitted by the Press to be a work of great value as a guide to Investors. Among the specially contributed articles are :—
"GENERAL PRINCIPLES FOR INVESTORS."
"STOCK MARKETS AND HOW TO PROFIT BY THEM."
"THE THEORY OF OPTION DEALING."
"HOW TO INVEST IN MINES."
"INSURANCE AS AN INVESTMENT."
"COLONIAL LAND: ITS COMING IMPORTANCE."
An entirely new feature is a collated list of "AVERAGE VALUES," enabling an Investor to gauge the value of any particular security. "Investments" (148 pages), Post Free on mentioning THE MONETARY TIMES.

GEO. A. STIMSON & CO.,
24-26 King Street West TORONTO, Ont.

THE Dominion Government Public Works Department has awarded a contract for the building of a wharf at Paspebiac to Messrs. Burns & Charleson, of Ottawa.

BRITISH Columbia lumbermen are continuing their agitation for a reasonably high tariff duty on United States lumber, without which, they claim, the Canadian industry will be ruined.

THE Canadian Tin Plate Decorating Company, of London, Ont., is about to remove its factory to Hamilton. It will also increase its capital to $100,000 and double its capacity. It manufactures principally fancy boxes for biscuits, tobaccos, lards, canned meats, etc.

THE Canadian Improvement Company, which is financing the reorganization of the Consolidated Lake Superior Company, has been granted an extension on its option in order that all the creditors of the Consolidated Lake Superior Company may have another opportunity to transfer their interests to the Canadian Company. All the New York banks interested in the Speyer loan have, we understand, consented to the extension.

Mercantile Summary.

MRS. LIDA KEELEY, of Ottawa, dealing in ladies' wear, is reported insolvent. Of late years she has carried on the business started by her husband, Thomas Keeley, in 1896, who failed in 1901, owing $8,700.

IT is announced in British Columbia that the St. Eugene mine at Moyie and several other silver-lead properties, at which operations have been suspended for some time, are about to resume. This is taken as an indication of the more settled conditions which seem now to prevail in mining centres in that Province.

A SOMEWHAT important failure is reported from Yarmouth, N.S., A. F. Stoneman & Co., fish and West India merchants having suspended. The business has been many years in existence, and has always stood well. Several years ago, it is said, they made some material losses through endorsations, and again recently they are reported to have suffered in this respect, besides which Mr. Stoneman has been in poor health and unable to attend to business of late. They are understood to owe about $50,000, largely to their bankers, and have made a proposition to settle at 40 cents.

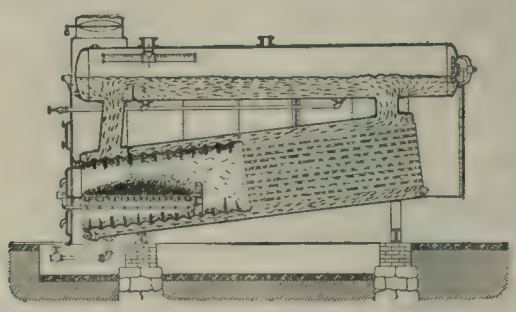
AT Chicoutimi, Que., Mrs. G. O. Tousignant, general store, has assigned. Over thirty years ago the business was established by her late husband, who died in 1894. She has since kept on the store, but custom has gradually declined, and she has now been obliged to abandon the assets to an assignee.

GEO. DESCHENES, of Hunterstown, Que., was long engaged at shoemaking, his regular trade. In 1899 he started a small grocery, ultimately branching out into keeping a general stock in the fall of 1902. This latest venture did not prove successful, and he sold out several months ago, but has now been obliged to assign.

NO HEAT WASTED.



The Robb-Mumford Boiler is internally fired and no heat is wasted by radiation as in an externally fired boiler.

The furnace is long and of large diameter with greatest height at the back, giving good combustion.

The boiler is built with sheet steel case, ready for use when it leaves our works, or for bricksetting if preferred.

Mercantile Summary.

HULLETT, Ont., ratepayers have voted in favor of giving a bonus in aid of the proposed branch of the Canadian Pacific Railway from Guelph to Goderich.

IT is still a moot point whether this season's lumber cut on the St. John's River in New Brunswick can all be saved. Above 25,000,000 feet of last year's cut above St. Clair's Station will probably be saved, but this year's drive seems more than doubtful.

THE International Bridge Company, of New Brunswick, has been incorporated under a provincial charter. It will build a railway bridge over the Restigouche River, near Campbelltown, to connect with Bonaventure, P.Q., at a cost of over half a million dollars.

IT is believed in New York that Alex. Mackenzie, a professional beggar, has solved the problem of a device for the protection of the third rail on the elevated tracks, and will receive the prize of $100,000 offered by the Interborough Company for such achievement. Mackenzie was in his younger years an electrical engineer.

ON demand an assignment has been made by J. D. Gauthier & Co., hotel, St. Hyacinthe, Que. Gauthier was previously in the same line at Sherbrooke and Dudswell, respectively, and is reported to have failed at the former location. Latterly he has been doing business under cover of the name of his mother-in-law, Dame Mary Griffin.

A MANUFACTURER of trousers in a small way in Montreal, D. Goldenburg, offers his creditors 50 per cent. on liabilities of about $3,800.—Mrs. Gratton, a milliner, of the same city, is trying to settle liabilities of $2,000 at ten cents on the dollar.—R. Aird, shoe manufacturer, reported insolvent last week, proposes a settlement at 50 cents.

THE assignment is reported of L. J. Seguin, who started at St. Simon de Bagot, Que., in the fall of 1902 with a stock of groceries, liquors and shoes. Formerly he was of the firm of Sequin, Lalime & Co., at one time a very important firm of boot and shoe manufacturers at St. Hyacinthe, and whose failure several years ago will be remembered.

THE old saying regarding a rolling stone is lately and well exemplified in the case of J. B. McNulty, at present a hotelkeeper at St. Cyrille de Wendover, Que., who is declared to be trying to settle his indebtedness at 25 cents on the dollar. McNulty was originally a storekeeper at Henryville, and from thence moved to L'Ange Gardien, subsequently going to Farnham. After a brief residence at Farnham he returned to L'Ange Gardien, where he failed in 1899. So far he had been a storekeeper. He next went into the hotel business at Frelighsburg, removing to Eastman in the spring of 1902, but soon sold out at the latter place and located at his present address last spring.

Mercantile Summary.

A COMPANY has been formed in Vancouver, with the intention of establishing, either in that city or elsewhere in British Columbia, a large distillery.

THE C.P.R. will this spring build a twenty-five mile stretch of line east from Wetaskiwin, one of twenty-five miles east from Lacombe, and a forty-mile piece from Pheasant Hill to Lost Mountain. Foley, Larson & Co., of St. Paul, Minn., were the successful tenderers for these works.

THE Grand Trunk Railroad is said to be behind an extensive project which is on foot to build hotels at Lachine and various points. A company has been organized with Dominion charter under the name of the Imperial Hotels Company, Limited, capital $100,000 at the start, for the purpose of carrying out the scheme.

THE Canadian Pacific Railway is said to have closed a contract with Foley Bros., Ottawa, for the construction of a section of railroad from Sudbury to Toronto. The route proposed is for it to leave the main line at Romford, six miles east of Sudbury, run through the townships of Dill, Burwash and Delamere, and cross the French River near Recollet Falls.

WE hear from Kingsville, Ont., of the death of Mr. Colin Fox, well known as an old-time telegrapher in Detroit and Chicago, and as a newspaper proprietor in Amherstburg nearly forty years ago. Mr. Fox was born in or near Kingsville, and returned thither a dozen years ago to reside. He has been clerk in a store and telegraph operator for the last few years. A bad cold some three months ago resulted in death on Wednesday.

THREE considerable fires in two days are reported from Montreal. A fire broke out on the night of May 3rd in the warehouse of Thomas Sonne, and in half an hour a large quantity of awnings, tarpaulins, and goods of a similar nature were destroyed. The loss is estimated at $20,000. On the same day a fire occurred at the Eastern Abattoir, and destroyed cattle chutes, cattle cars, etc., to the amount of from $5,000 to $7,000, all of which is said to be covered by insurance. But the most serious fire was on yesterday morning, in the wholesale quarter, when the stock of Waldron & Drouin, hatters and furriers, was damaged by fire, smoke and water, to the extent of $150,000. The firm claim to have $160,000 insurance.

SHIPMENTS of ore from the Rossland district of British Columbia for the week ending April 30th were as follows: Le Roi, 1,287 tons; Centre Star, 1,507 tons; War Eagle, 1,166 tons; Le Roi No. 2, 590 tons, milled 280 tons; Spitzee, 90 tons; I. X. L., milled, 100 tons; total for the week, 5,020 tons; for the year up to date, 137,793 tons. Shipments from the Boundary mines were: Granby mines to Granby smelter, 9,960 tons; Mother Lode to Greenwood smelter,

JAPANESE BANKING.

The United States consul at Yokohama has been collecting statistics and historical facts concerning the financial institutions of Japan. The national banks, organized on similar lines to those in the States, began at the time of the Restoration. In 1868 and in 1881 there were 260 of these institutions, with their branches. A difference between those of Japan and those in America consisted in that the former, instead of having their notes redeemable in specie or its equivalent, were redeemable in Government incontrovertible paper, of which there was then 170 million yen in circulation, and which was much depreciated. The Finance Minister of that day thought the lack of co-operation and community of interest amongst these institutions a hindrance to the prosperity of the country, and in 1882 he introduced a system of banking modelled on that of Great Britain and France. The Bank of Japan was established with a capital of ten million yen; the governor and vice-governor being appointed by the Government, and the directors are elected by the shareholders subject to the veto of the Minister of Finance, who also appoints the auditors. The bank has the privilege of issuing convertible notes under prescribed regulations, but it was not until 1885 that it was allowed to exercise this power. Meantime, the Yokohama Specie Bank was organized, and was employed by the Government in doing all its business abroad. In 1883 a scheme was devised for withdrawing, through the medium of the Bank of Japan, the notes of the national banks in circulation gradually and without disturbance. The progress continued for five years, when it was desired to hasten it, and the Bank of Japan got authority to issue 70 million yen of convertible notes in excess of its specie reserve, secured by Treasury bills and bonds and sound commercial bills. Part of this amount was lent to the Government for the redemption of the Government paper currency, and the latter ceased to circulate in 1898. The excess of paper money being thus dealt with, the Minister turned his attention to the condition of the silver currency; but it was not until the payment of the Chinese indemnity was made that he was able to adopt the gold standard, although a commission had strongly advised it in 1893. The consequence of Count Matsukata's reforms is that "Japan has to-day a financial system which will compare favorably with those of the oldest commercial nations of the world." As trade and prosperity increased, the powers of the Bank of Japan have been increased likewise. The paid-up capital has been increased to 30 million yen; the right to issue convertible notes in excess of specie reserve has been increased to 120 million yen. At the end of the last year the specie reserve stood at over 100 million yen. Similarly the capital and scope of the

TO THE SUBSCRIBERS OF THE CAPITAL STOCK OF THE CROWN BANK OF CANADA.

Public notice is hereby given that a meeting of the Subscribers of the Capital Stock of The Crown Bank of Canada will be held on the ninth day of May, 1904, at twelve o'clock noon, at the bank premises, No. 34 King Street West, in the City of Toronto, Ontario. The business of the meeting will be:

To determine the day upon which the annual general meeting of the bank is to be held.

To elect such number of Directors duly qualified under the Bank Act—not less than five, nor more than ten, as the subscribers may think necessary—who shall hold office until the Annual General Meeting of the year next succeeding their election.

To fix the quorum for a meeting of Directors, which shall not be less than three.

To fix the Directors' qualification, subject to the provisions of the Bank Act.

To fix the method of filling vacancies in the Board of Directors whenever the same occur during each year.

To fix the time and proceedings for the election of Directors in case of the failure of any election on the day appointed for it.

To determine when to close the stock books for subscription of the bank's stock by the public at $110 per share.

To prescribe the record to be kept of proxies, and the time, not exceeding thirty days, within which proxies must be produced and recorded prior to a meeting in order to entitle the holder to vote thereon.

And to regulate such other matters by by-law as the shareholders may regulate, pursuant to the terms of section 18 of the Bank Act.

Dated at Toronto, April 8th, 1904
By order of the Provisional Directors.

FRANK ARNOLDI,
Secretary of the Provisional Directors.

Specie Bank have been enlarged. Several other banks, with special privileges and special association with the Government, have been established for particular or local purposes, such as assisting agriculture, Formosa, and Yezo. Lastly, there are the private banks established under the general law, many of which are strong institutions, and some have branches in all the chief commercial centres of the world. At the end of 1900 the total paid-up capital of Japanese banks was 347,717,358 yen; the specie in circulation was 127½ millions, and the bank notes nearly 231 millions. The use of cheques for paying bills and accounts is increasing, and is encouraged by the Government. Clearing-houses also exist in all the large cities.

BRITISH IRON TRADE.

According to returns issued by the British Iron Trade Association, the total production of pig iron in the United Kingdom in 1903 was 8,811,204 tons, against 8,517,693 tons reported by the same authority for 1902, showing an increase of 293,511 tons. The production in 1901 was 7,851,830 tons. The production of Bessemer steel ingots in the United Kingdom in 1903 was 1,910,018 tons, against 1,825,779 tons in 1902, an increase of 84,230 tons. In 1902 the increase over 1901 was 219,526 tons. Increase in the last two years was, therefore, 303,765 tons.

Middlesex Four per Cent. DEBENTURES.

Sealed tenders endorsed "Tenders for Debentures," will be received at the office of the undersigned up to two o'clock p.m. on Monday, June 6th, 1904, for the purchase of $12,000.00 County of Middlesex Consolidated Debt Debentures, bearing interest at Four per cent., payable semi-annually, on the 15th of December and the 15th of June. Principal payable in gold on the 15th of June, 1924.

Each tender must state a lump sum, payable at the Bank of Toronto, in London, Ontario, on the 15th day of June, 1904,—where and when the Debentures will be delivered.

A. M. McEVOY,
Treasurer.

County Buildings,
London, Ont., May 5th, 1904.

ADDRESS
"BOOKKEEPER,"
Monetary Times, Toronto.

Of the production in 1903 there were produced by the acid process 1,316,915 tons and by the basic process 593,103 tons. The production of Bessemer steel rails in the United Kingdom in 1903 was 1,061,441 tons, against 903,216 tons in 1902, an increase of 158,225 tons. In 1902 the increase over 1901 was 170,956 tons over the production of 1901. The increased production of Bessemer rails in two years was 329,181 tons.

The production of open-hearth steel in the United Kingdom, in 1903, was 3,124,083 tons, against 3,083,288 tons in 1902, an increase of 40,795 tons. But in 1901 the production was 3,290,791 tons, or 166,708 tons more than in 1903. Of the production in 1903 there were produced by the acid process 2,613,274 tons and by the basic process 510,809 tons. The above figures indicate that the production in late years of Bessemer steel in Great Britain is increasing, while the production of open-hearth steel is not quite holding its own.

UNITED STATES FINANCIAL CONDITIONS.

Henry Clews & Co., New York, in their weekly circular under date of April 30th say:

In spite of unusual gold exports, unfavorable crop conditions, less satisfactory business reports and frequent declines in railroad earnings stock market

values showed only a moderate decline. Such a combination of adverse conditions would ordinarily precipitate a sharp reaction and afford the basis of an active bear campaign; but, as a matter of fact, these influences had relatively little effect upon values, and outside of the Steel shares, which weakened under a growing belief that the preferred dividend would be reduced, the market displayed excellent resisting powers. This was chiefly because liquidation has thoroughly eliminated weak spots, and apparently at the same time discounted any business reaction. It is pretty well recognized that values are now generally upon a sound basis, for good railroad shares are often selling below intrinsic value and upon a 5 per cent. basis, while desirable short-time obligations are to be had upon a 4½ to 5 per cent. basis; and though the investment demand has been much curtailed by recent business depression, there is still a steady demand for really desirable securities. The low rates and abundance of money have largely counteracted depressing influences, and to this fact, as well as that current prices represent real values, must be attributed the present resisting qualities of the market. The feature of the week was the unusually heavy exports of gold, amounting to about $13,000,000. If we are not mistaken, these are record shipments, and they may have been stimulated by preparations for payment for the Panama Canal. Aside from this special demand, however, this is the season for gold exports, and the recent decline in our merchandise shipments foreshadowed an efflux of gold.

Domestic conditions have not been as satisfactory as desired. The weather was unfavorable for agricultural operations, and the backwardness of the season is anything but stimulating to either merchants or farmers. Still, a few days of bright sunshine would do much to better the situation in this respect. In some departments of business a better tone is reported, notably in the iron trade; in others more or less depression exists, especially in the textile industries.

—Dr. Barrick reminds us that fresh impetus was given to the co-operative plan of the Toronto Anti-Consumption League for fighting the White Plague in Canada by the action of the Canadian Association at its annual meeting in Ottawa last week. There was then arranged an influential deputation, which waited upon the Premier of Canada, urging federal aid in establishing one small sanatorium in each province as an educator and object lesson, leading on to a municipal sanatorium in each county. He reminds us of the vote by Toronto ratepayers on January 1st of $50,000 towards a sanatorium exclusively for this city. But the conditions necessitate the raising of $25,000 by voluntary contributions before any part of this $50,000 becomes available. In this connection the Imperial Bank has consented to receive contributions at the head office and at all its city branches.

Economy in Lumber Cutting.

A prominent lumberman stated recently that, in his opinion: **Every gauge saved** on your saw meant **twenty cents per thousand** added to the value of your entire cut.

The ordinary **circular** cutting forty thousand per day is **6 gauge**. The **Band** never over **14 gauge**.

Its use therefore adds $1.60 per thousand to value of lumber produced.

Double Cutting-steam Feed Steam Niggers, Loaders, Kickers and Steam Setters — add larger percentage to daily cut reducing cost per thousand.

This Pony Band—Single or Double Cutting—using **15** or **16 gauge short saws** is within the reach of all. You should get into line—get posted —make the change—it's simple. Many hundred Bands running in Canada.

THE DRY GOODS SITUATION.

The seasonably warm weather of the past few days has resulted in a marked improvement in the general dry goods trade in Ontario; the sorting trade in Toronto has become active, and in Montreal it is all the more active because of the Toronto fire. Without a doubt, too, the recent conflagration which swept away so many large and important Toronto stocks helped materially in the same direction. The sufferers from that calamity, while naturally they were put to a great deal of inconvenience, have shown wonderful energy and adaptability, and, on one plan or another, are transacting considerable business. And the efforts of those who fortunately did not prove victims are doing all in their power, which is meeting with thorough appreciation from the retail trade, to smooth the retailers' path, so that there is every possibility that Toronto as a wholesale centre will have received nothing more than a temporary setback. One section of the trade which seems more than ordinarily disadvantaged is the tailors, who make it a practice to keep on hand no more trimmings, etc., than are usually required for a short time in advance. Stocks of these lines at present in hand are very scanty.

Another result of the destruction of dry goods stocks is that the looked-for advances in price in several articles are likely to come all the sooner. The goods being sold now at old prices were bought prior to several upward movements, and it has been known for a long time past that repeats could only be obtained at considerably enhanced values. Now that so many supplies have become non-existent, and that retailers have been induced to hurry in their orders, the period for these repeats becomes perceptibly nearer.

For dress goods, the prospects are good. Heavier kinds have met with a very good sale owing to the prolonged cool weather, and the indications are that summer lines will meet with a keen demand. Business throughout the country districts is picking up rapidly, making up for time lost through the poor transportation and blocked roads of the late winter. Probably a material percentage of business has been irredeemably lost from the above cause, but the trade philosophizes with the remembrance that the water in the stream that is past has gone for good.

THE LIVE STOCK MARKET.

Trading in cattle has been pretty good this week, with moderate receipts. At the western market in Toronto there was a keen demand for butchers' animals and stockers, though exporters experienced a somewhat slow sale. The Toronto Junction yards, however, are doing an increasingly large share of the business in export cattle. This week, though considerable divergence existed between drovers and dealers, eventually everything was sold at good prices. These ranged around $4.50 to $4.80 per cwt., with $4.95 occasionally for an extra choice lot. The butchers' cattle which apparently are most wanted, are those of about 1,150 or 1,200 pounds, and these have been selling at about $4.55 to $4.65 for best, $4.30 to $4.50 for good, and $3.85 to $4.25 for fair to medium, with a considerable falling off for common grades. Milch cows, best quality, are quoted usually at about $60, and from that down to $30 each. Sheep, lambs and calves are all selling readily, though for the former the tone of the market is easier.

According to a recent report from Liverpool, supplies coming to hand there have been scantier, and, as a consequence, buyers have had to face a stiffening of values. A few good sides fetched 11¼c., though the general run of sales was at 11c. Good, useful carcases made 10½ to 10¾c.; medium, 10 to 10¼c.; cows and bulls, 8 to 9½c. In London, really good bullocks fetched as high as 12½ to 12¾c., and some sheep realized 15 to 20c.

In Liverpool, interest has been aroused by the action of the animal and meat trade section of the Chamber of Commerce of that city. A telegram from Sir Alfred L. Jones had been read before that body, asking the body to press the British Government for removal of the embargo on Canadian stockers. The result of the discussion which ensued was the passing of a resolution, which read as follows:

"That the present restrictions on the importation of Canadian cattle into Great Britain are unjust, so far as they are based on the dread of disease existing

among such cattle, since any outbreak of disease is as rigidly guarded against in Canada as in Great Britain, and no infectious disease exists in Canada; and that such restrictions are also undesirable, as they result in the interference with the free development of trade, decreased supply of cattle, and increased cost of meat to the British consumer; and that in the opinion of this section the present regulations of His Majesty's Board of Agriculture, so far as they relate to the importation into the United Kingdom of Canadian live cattle, under reasonable precautions, should at once be reconsidered."

WEATHER IN THE WEST.

Manitoba and the Territories are giving Ontario and Quebec some lessons in weather. That is to say, they have been prompter than we to show creditable spring temperatures. On Saturday last the mercury went up to 78 degrees in Winnipeg. At Edmonton on Friday the temperature was 78. But April had been warm up there almost throughout. The snow was all gone on the 9th says a despatch, robins arrived on the 4th, rooks on the 7th, and seeding began on the 19th, wheat being all sown by Saturday, April 29th.

Hot weather in the early part of April at New Westminster, British Columbia, compensated for backward conditions in March, and the season is up to the average at that place. Plums, pears and cherries are in full blossom, and apples are showing bloom [i.e., at the end of April]. Seeding is well under way, and a splendid fruit crop is in sight. Qu'Appelle and Medicine Hat, both in the territory of Assiniboia, report spring seeding progressing fast.

Our private despatches from the Territories and Manitoba, received at noon yesterday, May 5th, say that the weather conditions prevailing throughout Western Canada are very favorable for putting in this year's crops. Reports from all points show seeding to be general and well under way, forty-five to fifty per cent. of land being finished. The acreage to be sown in the Territories as well as the Province this year will be considerably in excess of last year. The farmers are well pleased with the condition of the land, which insures a good seed bed. They are already predicting, indeed, an early harvest and a bumper crop on account of the amplitude of moisture in the earth, the present warm weather and the early commencement of vegetation.

CANADA'S TRADE OUTSIDE GREAT BRITAIN AND THE UNITED STATES.

It should always be of interest to observe the growth of Canada's commerce outside Great Britain and the United States, with whom seven-eighths of our total trade is done. We, therefore, take the Trade and Commerce Return for the last fiscal year and look at the Statement on page 27 of the value of the aggregate trade of Canada with all countries during 1903.

The aggregate of our trade for the twelve months, both inward and outward, amounted to $467,064,685, a handsome sum, of which $241,214,961 was imports and $225,849,724 exports. With the United Kingdom of Great Britain and Ireland we did a trade of $190,271,027, equal to 40.72 per cent.; with the United States, $216,548,299, or 46.25 per cent.; with other foreign countries, $33,132,380, or 9.37 per cent, and with British colonies or dependencies, $17,112,979, or 3.66 per cent.

Germany is the foreign country with which we traded most largely, after the United States. From her we bought cement, cotton, silk and woolen goods, chemicals, earthenware, fancy goods, glassware, metal manufactures, paints, silks and sugar to the extent of $12,127,867, and to her we sold breadstuffs, fish, fruits, agricultural implements, seeds, and wood goods to the extent of only $2,097,699. The total trade with Germany is thus $14,225,566.

Next among European countries comes France. We bought from her, books, cotton goods, drugs and chemicals, fancy goods, furs, fruits, skins, metal wares, precious stones, silks, wines and spirits, wool goods amounting in value to $6,503,928, and sold to her breadstuffs, lobsters, agricultural implements, asbestos, furs and wood goods to the value in all of $1,341,618, making the total trade with France $7,845,546.

Belgium deserves separate notice as a country with which we have done a considerable and increasing trade, reaching from four to six millions a year for half a dozen years. The average for the last five years has been $4,632,000. Belgium sells to Canada cement, window glass, dyes and chemicals, fire-arms, steel rails, paints, metal goods, and takes from Canada live animals, breadstuffs, canned lobsters, seeds, asbestos, deals, boards and wood pulp. Our trade with her last year was $4,800,040, consisting of $2,649,490 imports and $2,150,550 exports.

Our dealings with the British Empire outside of the United Kingdom was larger last year than in any of five years since 1898, amounting as we have seen to $17,112,979. The proportions of import and export in this trade will be shown by the following table:

	Imports.	Exports.
British Africa	$ 49,121	$1,948,126
Australian Commonwealth	98,532	2,929,861
New Zealand	41,903	462,538
British East Indies	2,160,458	96,940
British Guiana	585,355	514,334
British West Indies	1,830,253	2,184,833
Fiji	231,379	46,671
Hong-Kong	143,714	37,755
Newfoundland	1,197,372	2,516,576
All other British colonies	1,227	36,031
Totals	$6,339,914	$10,773,665

TORONTO'S DUTY.

The business community of Toronto has just suffered the loss of millions by a devastating fire. The course of this fire, as well as the extent of it, offers lessons to those who are willing to learn. Among such lessons are the following:

That if conflagrations are to be avoided there must be wider streets or else lower buildings; wider lanes and iron shutters; thicker walls of houses and division walls carried up to the very roof; broad, open spaces at intervals, to arrest the flames—all this in addition to more substantial construction, the use of material known to be fire-proof, and the avoidance of openings shown to invite the spread of a fire.

For months past the best designing and building experts of the United States, warned by the experi-

ence of Baltimore and Rochester, have been urging upon the authorities of all large cities that attention must be paid to laying out commercial districts and the rebuilding of them upon such lines as are indicated above.

We have taken some interest in the application of these principles in the reconstruction of the twelve acres now lying waste in Toronto as the result of the fire of April 19th, thinking it the part of wisdom for landed proprietors, business men, and the city authorities to act together in such a manner as shall prevent the occurrence of another huge fire in the business quarter.

Visiting on Wednesday last the still smoking ruins on Bay Street, Front Street, Wellington Street, we have put the question to various merchants: "Are you willing to do your share towards having these ruined blocks rebuilt in a safer way?" As a specimen of the feeling in this direction we cite the replies of a group of property owners, whose properties lie upon Front and Bay Streets. The reply of all is that they purpose rebuilding with either fireproof or slow-burning construction. Also that seeing the necessity of widening the lanes running north and south and east and west behind these properties, the proprietors will give two-thirds the cost in order to effect the improvement necessary in the interests of safety, if the city will give the other third.

But upon making request to this effect of the city authorities, they are met, so they tell us, with the objection that it is not city improvement, and the city cannot consent to bear any part of the cost of it. "Let those who are going to benefit by this improvement bear the expense of it. We have nothing to to say." This is one view to take of the city's duty in a case of needed public improvement. We venture to think it a narrow one. As a justification for it, we are reminded that the city is burdened with debt, and has no money to spare even for improvements needed much more than the widening of down-town lanes. We do not go, at present, into the question of what the city council can and cannot legally do in the direstion of joining in the expense of a betterment which shall lessen the risk of conflagration. But we do consider that the city council, the city engineer, the city architect, have a duty to join with merchants and proprietors and assist any plan which will enhance the future safety of the commercial district. A plot fourteen acres in extent, in the congested district is surely important enough to justify the interest of the city's guardians and servants in its proper reconstruction. We have a mayor possessed of some public spirit. He can certainly make his influence felt in welcoming and assisting every effort to have the burned section of Toronto rebuilt in such a way that it will not be permitted to be a menace to the rest.

LIFE INSURANCE IN CANADA IN 1903.

The official figures descriptive of the life assurance done in Canada during 1903 have just been made public by the Superintendent of Insurance for the Dominion. We present on another page a copy of the Abstract made by the Blue Book. The total amount of life assurance effected in Canada during the past year was $91,577,805, which is more than $11,000,000 greater than the amount taken in any previous year. The increases made during the past twenty years are quite marked. We show them by comparisons of amounts at five-year periods since the year 1883. The growth in the last five years is especially noteworthy:

Life insurance effected in	1883.....	$21,572,960
" " "	1888.....	41,226,529
" " "	1893.....	45,202,847
" " "	1898.....	54,764,673
" " "	1903.....	91,577,805

There are three classes of companies operating in the Dominion, viz., British, United States and Canadian. Fifty-one companies in all are doing business, 21 Canadian, 15 British, 15 American. Eight British companies and four from the United States show no new business in 1903. The number doing industrial business is three. Last year's volume of new business was divided among the different groups of companies as follows:

Canadian companies transacted $55,170,604, or 60.3 per cent. of the whole.

United States companies transacted $33,274,297, or 36.3 per cent. of the whole.

British companies transacted $3,132,904, or 3.4 per cent. of the whole.

It is satisfactory to find that our home companies are securing the bulk of the business, although this would naturally be expected in view of the larger number of them. At the close of December, 1903, the grand total of all the assurances in force in Canada came to no less than $548,436,200. This is an increase of forty millions for the year. The growing appreciation by Canadians of the system of life assurance is best illustrated by the following:

Aggregate insurance in force in	1883....	$124,196,875
" " "	1888....	211,761,583
" " "	1893....	295,622,722
" " "	1898....	368,523,985
" " "	1903....	548,436,200

The distribution of the figures of insurance in force for 1903 is as follows:

Canadian companies, $335,625,096, or 61.2 per cent. of the whole.

United States companies, $170,676,800, or 31.1 per cent. of the whole.

British companies, $42,134,304, or 7.7 per cent. of the whole.

The amount invested, or paid in premiums, by Canadians for life assurance is increasing annually, and in 1903 amounted to $18,243,099, being an advance of $1,165,539 over the receipts for the previous year, double what they were in 1892, and five times greater than the premiums for 1882. The amount paid in for premiums is classified as follows:

Canadian companies, $10,883,174, 59.6 per cent. of the whole.

United States companies, $5,924,608, 32.5 per cent. of the whole.

British companies, $1,435,317, 7.9 per cent. of the whole.

The increase in life assurance is apparently keeping pace with the progress and prosperity of the country. There seems no doubt that the aggressive methods of the United States companies have incited the home companies to greater efforts, resulting in increased business for the latter; while the conservative tendencies of British companies may have been

responsible for their lack of advancement. It must not be considered, however, that bulk constitutes the best in life assurance. The company that is doing a fair amount of new business, keeping its expenses within the "loading" which is added to the net premium to cover expenses, is probably the one that will do best for policyholders.

DEBENTURES.

The word debenture, although one that is very widely used is a very difficult word to define by reason of the fact that its connotation is not always the same. The word itself is derived from the Latin, meaning to owe; and the essential feature, therefore, of a debenture is an acknowledgment of an indebtedness. Many companies issue what they call debentures which are merely promises to repay and acknowledgments of debts owing, and are not secured in any way on the assets of the company issuing them. On the other hand, it is usual for the debentures issued by a company to be secured by way of mortgage on its property.

With the foregoing remarks, therefore, the following tentative definitions may be of service: Lord Lindley: "What is called a debenture may be a mere promise to pay, a covenant to pay under seal, or a mortgage or charge under seal of the company."

Chitty, L.J.: "In my opinion a debenture means a document which either creates a debt or acknowledges it, and any document which fulfils either of these conditions is a debenture."

There is, therefore, no particular magic in the word debenture itself, and there is no reason for this class of security being of any more value than any other class of security unless the debenture is secured as a first charge on the property of the particular company issuing it.

The question of the priority of the claims of debenture holders over depositors arose some time ago in Canada in the winding up of the Farmers' Loan and Savings Company, and in that case the debenture holders secured priority over depositors in a contest which was primarily tried by the Master-in-Ordinary, and which was afterwards appealed to the Divisional Court. When this came to the knowledge of the Provincial Legislature in 1900 they passed a Loan Companies' Act, Sect. 7 of which provides that "In respect of deposits creditors shall rank upon the assets of the corporation pari passu with the holders of debentures and debenture stock," having in mind the decision in the Farmers' Loan case, which apparently had worked an injustice; and in passing the amendment above, to the Loan Companies' Act the Ontario Legislature evidently forgot that it was covering only a small part of the field and that it had left unprovided for some very important phases of the question.

Finally in the liquidation of the Atlas Loan Company, a contest similar to the one in the Farmers' Loan Company case arose, and when the matter came again before the Master-in-Ordinary, he was, of course, bound by the statute above and therefore found that debenture holders and creditors should rank equally on the estate. His judgment in this case, which is quite a lengthy one, deals not so much with the interpretation of the above statute, which is perfectly plain, but with the question as to whether it was within the power of the Ontario Legislature to pass such an act. He came to the conclusion that under the British North America Act the Loan Companies' Amendment Act of 1900 was entirely intra vires.

As far as the investments of trustees are concerned, they are authorized by the Trustee Investment Act R. S.O. Ch. 130 Sect. 5, to invest in only a limited class of debentures, viz., those debentures which afford ample security for trust funds and which form a first charge on the property and which have been approved of by the Lieutenant-Governor as being in compliance with said Investment Act.

A trustee therefore not being allowed to invest in all securities which are called debentures, but in only a limited class as above of such debentures it becomes his duty to exercise his own judgement and discretion as to the kind of debentures in which he invests trust funds. If he, therefore, is careful to pick out debentures that form a first charge on the property of the company which issues them, which he should do, the enactments of the Legislature will not affect him particularly, so that it is only in exceptional cases, as in the case of Loan Companies which do a small banking business, that he can be prejudiced under the special terms of the statute mentioned above, which in the plain case compels him to rank pari passu with depositors.

The Legislature therefore has in the exercise of its best judgement laid down rules for the guidance of trustees in their investments; and by reason of the various kinds of debentures which are issued, some being of questionable value and others offering the best possible security, it behooves a trustee to examine carefully the kind of debenture which he is purchasing and if he suffers a loss in consequence of his investment it should not be attributed to the frailty of the Legislature, which has endeavored to protect and guide him, but to his own bad judgement.

PLUMBERS' STRIKE.

The plumbers' strike in Montreal is naturally causing a good deal of inconvenience, but we would judge that the employers are not very likely to give way to the demands of the men, which can hardly be described as reasonable. Letting alone the very high wages claimed, $2.80 for eight hours, there are so many harassing conditions sought to be imposed on employers' relations with their hands that if acceded to it would be practically impossible to carry on business. The "closed shop" clauses are objectionable enough, but apart from them there are the apprenticeship requirements of the union which make it difficult for a boy to learn the trade. Another fantastic demand is that employers should bind themselves in advance to consent to employees joining in sympathetic strikes whenever they deem fit to do so. As the Gazette rightly remarks: "It is quite possible that in thus pledging himself, the employer might lay himself open to serious loss. If he had contracted to complete a job by a certain date and was prevented from doing so by a sympathetic strike of his employees, it is at all likely that his excuse would be held good when it was shown that he was a consenting party to the strike? The union fails to remember that the employer is not free from pecuniary liability like itself, and that the courts interpret contracts according to certain well defined rules which only include potection to the contractor when he is the innocent victim and not the consenting partner to the strike abuse."

It is noted in our Montreal market report to-day, that there is a very noticeable increase in orders received by wholesale houses in that city from the West. This is a consequence of the great fire in Toronto. Some considerable purchases of lots by Toronto jobbers are announced in Montreal.

OUR HALIFAX LETTER.

The business men of this city are much agitated over the decision of the Board of Underwriters to advance the fire insurance tariff in the commercial portion of the city. Some time ago the standard was $1.50 on the hundred dollars, but this was subsequently advanced to $1.75. Since the Toronto fire, the Board, acting on instructions from the head offices, increased the rate to $2.50 on the hundred dollars. Naturally this has called forth very loud protests from the Board of Trade, the City Council, and the Nova Scotia branch of the Canadian Manufacturers' Association, but apparently without effect, and the higher rate will likely go into effect on the 15th of the month. Alderman Doyle, who is understood to speak for the Board of Underwriters, informed the City Council and Board of Trade that all their talk was merely "hot air," and that the insurance companies knew their business, and would not be dictated to in the matter. The increase is due not to any defect in the Fire Department or water service, but is owing to the heavy losses incurred by the companies in recent Canadian and United States conflagrations. There has been a good deal of talk of forming a mutual protective fire insurance association, and it is understood that a gentleman who has hitherto been associated with insurance interests, is engaged in a canvass with this end in view. Halifax has so far been singularly free from heavy fire losses, and it is felt that the proposed rate of $2.50 per hundred dollars is abnormally high.

At the quarterly meeting of the Board of Trade a report was read on behalf of the committee in charge of the forward movement I have already mentioned. The collectors have so far surpassed the estimate made in the prospectus, and it is now certain the Board will be well supplied with funds to carry out its projects. Already an annual income of three thousand dollars is assured by guarantees covering a five-year period. A very encouraging feature is the large number of persons applying for membership, forty-five new members being elected at last week's meeting.

It is with some regret that I record the abolition of the Halifax Tourist Association, as a separate organization. At the annual meeting on Thursday, its accounts were wound up, and its work and assets handed over to the Board of Trade. This association, sustained by the volunteer efforts of a few gentlemen, has in the past done a good work for the city and province, but the time has now come when it was felt that the work required more attention than its supporters could give, and it has been turned over to the Board of Trade, whose permanent secretary, assisted by a special tourist committee, will, it is hoped, be in a position to attend to this department more successfully than under the former arrangement.

At a special meeting of the Nova Scotia branch of the Canadian Manufacturers' Association, held in this city last week it was decided to ask Mr. Miller, the transportation expert of the association, to visit Nova Scotia and take up transportation difficulties, which have been found to hamper trade. Mr. George Henderson brought up the subject of South American trade, and a resolution was adopted asking the Halifax Board of Trade and the Executive Council of the Association to take this matter up and ascertain if it would not be feasible to establish direct steamship connection between Canada and South American ports. Mr. Henderson, who has just returned from a business trip to South America, is enthusiastic regarding the possibility of developing trade in that quarter. A resolution was adopted calling on manufacturers to practise the doctrine they preach, and in purchasing give a preference to the Canadian article provided it is as good and as cheap as the foreign.

An unfortunate state of affairs exists at the Joggins' Colliery, in Cumberland County. Last winter this mine took fire and the output of coal has since been much reduced. For some time the directors advanced the money to pay the miners until a normal output could be re-established, but they finally decided they could do this no longer, and as a result the mine and railway have been closed down. The only way that work can be resumed, apparently, is by the appointment of a receiver, and the Supreme Court has granted a winding-up order. The matter will come up for a hearing in the Supreme Court, at Halifax, on Tuesday, May 10th. About 300 miners are employed at the mine ordinarily, and the output is about 200 tons daily. The operating company is known as the Canada Coals and Railway Company, and most of the stock is held in Montreal.

Dalhousie University conferred degrees last week upon fifty-nine students, who had completed their respective courses in Arts, Science, Law and Medicine. Ten of the graduating students were ladies, of whom Medicine claimed four and Arts, six. The honorary degree of LL.D. was conferred upon Principal Gordon, of Queen's, and Rev. Dr. Sawyer, formerly of Acadia. President Forrest referred to the success of the Summer School of Mining held last year at Sydney. This year it is to be held at Glace Bay, and at that great colliery centre the school will no doubt be of increased usefulness and importance.

Halifax, Nova Scotia, 2nd May, 1904.

A LETTER FROM MONTREAL.

If I had been writing next week instead of this, the probabilities are I could have made a more animated picture of the business of Montreal, for I should have had the assistance of many ocean steamers to the picture. They are on the way, however, some of them now reported coming up the Gulf. We have already coal-carrying steamers from Sydney, and the "Campana," which came up from Quebec on Sunday. We are fully two weeks later in opening than in 1903. But in this we are no exception, for I find the same thing prevailing all along the Great Lakes. The "Corinthian," inward bound, left Halifax on Saturday last for Montreal, and is arriving. The "Lake Champlain," however, found so much ice in the Gulf, when she tried to make Quebec direct, that she ran back to Halifax and landed passengers on Sunday.

A rather serious feature affecting the building trades here is that something like two thousand stone and marble workers, plumbers and steamfitters, sculptors and carvers, painters and decorators are on strike. They all want better terms of some sort. The plumbers and steamfitters ask an eight-hour day, and not less than 35 cents an hour. The carpenters and bricklayers are still at work, hoping for consideration of their demands later. The bricklayers ask 45 cents an hour as a minimum wage, and the carpenters ask for the nine-hour day and 35 cents an hour at least. It is the ordinary story of a "hold-up" to those who propose to build. The union workers stand for recognition of what they call "their rights," which commonly means the yielding to them of whatsoever their unions ask. The master plumbers of this city have a good deal of influence in the building trades, and they are doing what they can in a quiet way to check the unreasonableness of the union managers.

You may remember that a year ago this very month Montreal was in the throes of a strike by the 'longshoremen of the harbor and the teamsters for the railways, the latter being sympathetic strikers, and having no grievance of their own; the result was temporary paralysis of the movement of freight. It cost the country a very pretty penny, too, for the Dominion Government ordered regular troops to guard the wharves and their merchandise during the strike. This sort of strike we are likely to escape this year, but activity in other directions may be much hampered if the building trades continue stubborn. A good deal of wholesale trade is coming our way, because of the disastrous fire that destroyed many of Toronto's warehouses and factories two weeks ago. In hardware, metals, paper, woolens, this is very noticeable.

Have you noticed the remarkable splurge made here last week by the Independent Foresters? I know you keep an eye on the doings of the managers who come down here at intervals with uniforms, flags, and music to take advantage of the love which French-Canadians have for the spectacular, and usually rope in some new members. The Montreal local branch, assisted I have no doubt by the head body up in Toronto, planned and carried out a "Welcome" to the Supreme Chief Ranger, Oronhyatekha, Esquire. It was held in Sohmer

Park pavilion, and I am told that enormous place was practically filled. They had women as well as men; children as well as grown folks; "Royal Foresters" with guns, bows and arrows, battle-axes, or whatever foresters carried in the brave days of old; the Harmony Brass Band, and sundry local or imported singers; lots and lots of bunting; anything to make the "grande flourish." The something-or-other from among the Montreal members welcomed the gathering; the P.S.V.C.R., Mr. Morin, presented some 500 candidates for membership (who were promptly accepted), and read letters of regret from some politicians. Then the S.C.R. was flattered and replied, demolishing the critics of the I.O.F. and adroitly winding up with a few words in the Indian language for the benefit of some Caughnawaga Indians who were present. It was a memorable circus, and makes one wonder the more how the clever jugglers or end-men of the I.O.F. troupe manage to keep up their successful incantations?

Montreal, 3rd May, 1904.

CONFLAGRATION IN FERNIE.

Hardly were the ashes left in the ruins of the Toronto conflagration cold, before news arrived of a blaze in the British Columbia town of Fernie, which, while of course much smaller in the loss incurred, was yet, taking the size of the two places into consideration, of an even more serious character. The fire started (on the 29th ult.), in Richards' general store, and swept over by far the larger portion of the business centre of the town. The fire brigade, aided by hundreds of volunteers, made strenuous efforts to check the progress of the flames, but they were hampered by lack of water. The final result was the wiping out of practically every dry goods and grocery store in town. The total loss is figured at about $750.000, the principal victims being as follows: Trites-Wood Co., three hardware and general stores, loss. $160,000; insurance, $92,000; Purdy's, fancy goods, loss $20,000; insurance, $2.000; Senkbeil, boots and shoes, loss, $15,000; insurance, $6,000; Crow's Nest Trading Co., loss, $30.000; insurance. $20,000; Royal Hotel, loss, $30,000; insurance, $10,000; Alberta Hotel, loss, $24,000; insurance, about $8,000; Pollock Wire Co., loss, $10,000; insurance, $2,000; Richards' general store, loss, $40,000; insurance, $28,000; Fernie Drug Store, loss, $8.000; insurance, $4,000; Victoria Hotel, loss. $15,000; insurance, $7,500. After the horse is gone the stable-door is locked. And so, the hope is expressed that better precautions will be taken in Fernie to obviate the risk from fire. At any rate, its wooden buildings are likely to give place to those of a more substantial character.

DEATH OF A. S. IRVING.

A large number of Toronto's business men gathered on Monday last at the funeral of Mr. Andrew Scott Irving, to pay the last tribute of respect to a kindly and worthy man whose last illness had been a long and trying one. Mr. Irving had lived for more than forty years in Toronto, and partaken of its business in many directions. Born in Annan, Scotland, in 1837, he migrated to Pennsylvania about 1856. A year or two afterward, he removed to Hamilton, where he began as a bookseller, and thence to Toronto, where he opened the well-remembered book distributing store or news agency on the corner of King and Jordan streets, the very first of its kind in this city. He afterwards acquired the premises now occupied by H. A. Wilson & Co., on the south side of King near Bay street, and there remained extending his business year by year until about 1882, when he removed to the premises on Yonge street long occupied by the Toronto News Co., which he founded, and of which he was president.

At the time of his death, Mr. Irving was a director of the Ontario Bank, a director of the Great North-Western Telegraph Co., a trustee on the Board of the Hospital for Sick Children, and a churchwarden of St. James' Cathedral. He was president, and, we believe, principal proprietor of the Toronto News Company and of the Montreal News Company, which he founded.

AMHERST BOARD OF TRADE.

The annual meeting of the Amherst Board of Trade was held on Friday night, 29th April, at Amherst, Nova Scotia. The officers for the past year submitted interesting reports, showing good work done. Several matters of importance were outlined for the new officers, among them being some action for the betterment of the streets of Amherst. For a town of six thousand people or more, and a stirring town at that, the condition of the streets is not creditable. The town is the seat of several very important and well known Canadian industries, among them the Robb Engineering Co.; Rhodes, Curry & Co., the car builders; the Hewson Woolen Mills, and the Amherst Boot and Shoe Co. The following persons were elected officers for the ensuing year: President, John McKeen, manager Bank of Nova Scotia; vice-president, ex-Mayor C. A. Lusby; sec.-treasurer, A. D. Ross, editor Evening News.

LA CHAMBRE DE COMMERCE DE LEVIS.

The Levis Board of Trade, the French title of which is La Chambre de Commerce de Levis, opposite Quebec, held its annual meeting on Thursday, 28th April. The chambre has now more than a hundred members, and gives signs of decided activity. Officers for the year 1904-05 were elected as under: President, M. Etienne Dussault; vice-president, M. A. Lambert; sec.-treasurer, M. P. G. Roy; directors, MM. Cléophas Auger, Eusèbe Belelau, J. C. Blouin, M.P.P.; C.-H. Carrier, Chs. Derveau, Jos. Fontaine, Alf. Gravel, Almanzar Lamontagne, J. B. Michaud, Thomas Powers, Pierre Robitaille, George D. Danie.

FIRE AND MARINE INSURANCE.

There are a number of companies in France, both stock and mutual, which devote themselves to insuring against loss by hail. The results of their operations for 1903, are as here set forth: Policies issued, 168,313, insuring, $148,122,340; premiums received, $1,987,762; losses paid, $834,910; underwriting profit, $750,358. The business appears to be uniformly profitable, for in the past sixteen years, all but three yielded satisfactory returns to the insurance companies.

As a result of the Toronto fire, we hear of two considerable transactions in real estate on York street, west side, just north of the building of the W. R. Johnston Company. This land, which belonged to David Walker, has been purchased, it is said, by two of the firms who were burned out in April, the Merchants' Dyeing and Finishing Company, and Garside & White, wholesale shoe dealers. The properties have a frontage on York street of about 75 feet, and run back 110 feet. The price is believed to be about $300 per foot, and both firms are about to erect buildings.

In the Toronto City Hall, on Wednesday last, when the report of the Fire and Light Committee came up, recommending an expenditure of $20,375 for additional fire protection, including two new fire engines, two large hose wagons, repairs to Yonge street engine, and a quantity of new hose, it was decided to take up by itself, by-and-bye, presumably, the whole question of additional fire protection. In the meantime, however, they did something, they agreed to provide a horse and buggy and telephone for Deputy Chief Noble, three gongs for the district chief and $2,000 for a new hook and ladder truck for the Lombard street fire hall.

The Liverpool Underwriters' Association has recently added to its many important statistical classifications periodical returns of the salvage awards made by the Admiralty Court. During the three months ended March 31st last, there were twenty awards, dealing with vessels valued at about £800,000, inclusive of cargo and freight. The amount awarded was £26,565, or 3.3 per cent. of the value salved. During the year 1903 there were 73 awards, amounting to £125,798. The most interesting recent case was that of the steamer "Lake Michigan," of which the total value was £142,000 and the award to tugs and lifeboat men was £2,850, or 2 per cent.

It is announced that the eighth annual meeting of the National Fire Protection Association of the United States is to be held in New York City on Tuesday, Wednesday and Thursday, May 24th, 25th, and 26th. On that occasion it is likely that final reports will be made by the committees on steam fire pumps, fireproof construction, rotary fire pumps, heavy current protectors on wires of signaling systems, cast-iron pipe and fittings, fire hose and hydrants, gate valves, electric fire pumps, fire-protecting coverings for window and door openings, etc. It will be worth the while of Canadian underwriters to pay close heed to the conclusions reached on these important subjects.

LIFE AND ACCIDENT EXPERIENCE.

On Thursday, the 28th April, the officers and staff of the North American Life Assurance Company presented Mr. D. E. Kilgour, MA., A.I.A., of the actuarial department of that company with a handsome silver tea and coffee service, on the eve of his marriage. Mr. Goldman, the managing director, also handed him a substantial cheque on behalf of the company. Complimentary references were made to Mr. Kilgour, showing the high esteem in which he is held by the officers of the company, and his associates.

In a recent lecture at Yale University, the president of the Travelers' Insurance Company, Sylvester C. Dunham, presented a classified experience of that company in its personal accident department which affords some interesting data. The figures are as follows: Accidents to pedestrians, 24.14 per cent.; at home (indoors), 18.80 per cent.; horses and vehicles, 18.16 per cent.; at home (outside), 15.98 per cent.; recreation, 6.15 per cent.; railroad travel, 4.77 per cent.; bicycle accidents, 4.06 per cent.; street car travel, 2.74 per cent.; use of firearms, 1.73 per cent.; animal bites, 1.52 per cent.; assaults, 1.20 per cent.; steamship travel, .70 per cent.; miscellaneous, .05 per cent.

The average property owner or tenant, says "The Aetna," is slow to recognize the existing dangers which lurk in and around his residence or place of business, but the marked increase in the number of policyholders of this class is an indication of the care with which the present real estate owner or lessee protects himself. In cases of injuries to the public, rather than to an employee, the courts have been more liberal in the award of damages. Litigation along this line has been caused by: Icy sidewalks; falling of eaves, cornices, or signs from buildings; defective coal-holes and hatchways; uneven sidewalks; ash-barrels misplaced on the sidewalk. In the interior of buildings liability may result from: Improperly lighted halls and stairways; splintered stair-treads; projecting nail heads; defective stair coverings; interior fixtures falling; explosions of lamps, chemicals, or boilers for heating or steam purposes.

AN ALLURING BLOW-OUT.

There must be something lacking in the canvassing systems of the average life assurance company in Canada. Surely they have left out of count some valuable adjuncts to the talk of agents and the literature of companies in their efforts to secure policyholders. They have neglected the fireworks, the tinsel, the band, the palaver, all of which seem to count for so much with a certain class. We commend the suggestion to the Canadian Association of Life Managers. Let them take for an example of the adroit use of blare and flare, the original and only Dr. Oronhyatekha, the head of the Independent Order of Foresters. A letter from Montreal this week refers to the display this Order made recently in that city.

Why do not the old line companies cultivate the public curiosity and stimulate the wonder of the passing crowd by "bunching" their policyholders, as the Doctor does, until they get 501, or 896, or 1,023 to be "initiated" at a time. Why don't they have quarterly meetings at some theatre, with flags, flowers, pretty women, crowds, music, speeches, ritual and refreshments? Wouldn't it pay? The Foresters do it, and it seems to pay—anyhow, somebody pays for the blow-out. Cannot the life underwriters of Canada devise some such scheme of prizes and rewards, as was *en evidence* at a recent Friday's gathering in the Forestric Temple? A grand cross of merit for the P.H.C.R.; gold watches by the half-dozen for "meritorious work" by various brethren; a gold locket for a handsome young brother who had sung his way to the hearts of the gathering—such was the scheme of rewards at the last big gathering of the I.O.F. And it is the sort of stimulus that does not, as a rule, fail of its effect.

Would that we had space to tell of the features of this gathering. The Companion Guard of Honor for the S.C.R. composed of young women—the special corps of vocalists—the bugle band—the gorgeous dais with its footlights, its palms, lilies and azaleas—the Premier of Ontario in the chair, who had left his lieutenants to look after the rather overladen ship of state for the night—the fulsome flattery of the committee's address—the clever adaptation of Oronhyatekha's reply to the tastes and capacities of his audience—the made-to-order adulation of the friendly functionaries from Ohio and Michigan. Oh! it was a great night.

It may possibly be, however, that some brethren initiated then felt a desire to have their minds set at rest about the indemnity their families would receive from membership in this flippant forestric family. While the bulk of the 1,025 candidates from Hamilton and Toronto were happy in the idyllic scene of fantastic frippery, of self-praise and mutual admiration, presented to their admiring gaze, we have a notion that a few would be calm enough to ask whether anything solid was behind all this fuss? For the information of these few, and in the interest of the whole, we may look for a moment at the incidents and figures cited by the eloquent speakers to inspire confidence in the concern as a life assurance society. The total assets of the I.O.F., according to the Insurance Blue Book for 1903, amounted to $7,326,502—a sum much vaunted by the officers of the Order, and one which looks large until the obligations that are to come against it are considered. The amount of insurance in this body terminated by death, surrender, expiry, and lapse during 1903 was no less than $4,572,500; and there were 219,492 certificates in force at the close of last year in all countries, representing an insurance of $238,124,000, which is at the rate of $1,085 each. The deaths, we remark, were (calculated at the rate of $1,085 per member on the $596,079 certificates terminated by death), at the rate of twenty-five per thousand.

The great sum of this company's liability to its members called in the Blue Book insurance in force, is $238,124,000. Put against this, sum on hand, $7,326,582, and we have the munificent sum of $3.07—three dollars and seven cents—for each policy of $1,000 in force. This is the true import of the "magnificent surplus" over which the eulogists of the I.O.F. go into raptures!

If any old line life company were to present such a statement as this, expecting the admiration or confidence of the public therefore, any bookkeeper or business man would laugh the boasts to scorn. Evidently, the I.O.F. managers do not want their confiding brethren to look too closely into results hereafter. But if the aforesaid brethren show any anxiety to peer into the future, the sweet singers of the Order will be ready to calm their anxieties by singing, in the words of Charles Mackay's hopeful song:

"There's a good time coming, boys,
Wait a little longer."

ANSWERS TO ENQUIRERS.

Banker, Ontario, writes: "In glancing over the Bank Statements for the last three months, I notice that the Bank of Nova Scotia shows 'Loans to other Banks,' some twenty odd thousand each month, which apparently does not appear in the corresponding column among the liabilities. Allowing for delays, which would not apply in this case, these columns should agree. Evidently some bank has been borrowing from the Bank of Nova Scotia, but has not been showing the amount in the proper place." [The circumstance which our subscriber quotes, illustrates a practice which used to prevail quite commonly among the smaller banks in former

years. Again and again it was pointed out in the columns of this journal that while the larger banks, which were usually those which loaned sums indicated in the assets column, "Loans to Other Banks Secured," admitted these loans without any hesitation, the borrowing banks, did not acknowledge them in the corresponding liabilities' column. The thing became so discreditable that the Government stirred up the offending banks in a strenuous way, and of late the discrepancy had almost disappeared. In the present case it seems that while La Banque Provinciale acknowledges having borrowed $680,491, which corresponds very nearly to what the Merchants Bank and the Quebec Bank lent it. by the March Return, some bank has omitted to put down the $26,831 it borrowed from the Bank of Nova Scotia. —Ed. Monetary Times.]

A. McC. C. writes from Vancouver, 25th April: "Your issue of April 8th inst., page No. 1349, article entitled, 'The Fire Waste,' is very interesting: can you give us approximate figures for the total losses for the first four months of 1904? The recent fire in your city will keep the average high." [The reply we make to this is to append the figures of the fire waste for the first four months of several past years and compare them with the first four months of this year—the April figures of 1904 being estimated:

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February ...	21,010,500	16,690,800	90,051,000
March	12,056,600	9,967,650	11,202,150
April	13,894,600	13,549,300	27,000,000
Four months	$62,994,500	$53,374,100	$150,043,350

Here is a total of a hundred and fifty millions of dollars' worth of property gone up in smoke and flame since New Year's Day—more than a million dollars a day wasted, on this continent. The figures for April are double those of previous Aprils; even without the Toronto fire they would have been larger than either April, 1903, or April, 1902. We are getting no more careful, apparently.—Ed. Monetary Times.]

FINANCIAL AND BANKING ITEMS.

A corporation has been formed in Omaha, Nebraska, with Winnipeg as its Canadian headquarters, and a capital stock of $500,000, which has for its purpose the establishment of private banks in Western Canada. Mr. W. V. Bennett, of Omaha, is one of the projectors of the plan.

We are informed that Mr. W. A. Meldrum, formerly one of the staff at the Toronto branch of the Merchants Bank of Canada, has been appointed manager of the Westport branch of that bank. Westport, which is on the line of the Brockville, Westport, and Sault Ste. Marie Railway, is due north of Kingston, about forty miles, situated in the beautiful lake country of Leeds and Frontenac.

The regime of Mr. Thomas Tait, who left the Canadian Pacific Railway to assume management of the State Railways of Victoria, Australia, would appear from all accounts to have met with gratifying success. An annual saving has already been effected in working expenses alone of £175,000. The gross revenue for the past year was not so large as in some previous years, because of the small traffic during the first half of it, but it is expected that the net profits will be larger than for a long time past.

It could not but come as a shock to any person familiar with his usual urbanity of manner and correct use of language to hear the Canadian premier accused of insulting so well known and independent a man as E. B. Osler, M.P., by calling him in the House of Commons an "owned man." The meaning of this was taken to be that Mr. Osler is owned by the Canadian Pacific Railway, of which he is a director. Naturally, Mr. Osler would be annoyed at such a characterization. But the Premier explained that he had not made the accusation attributed to him, having used a phrase from Sir Walter Scott, rendered by the daily papers or the press despatches, "ownied man." which was declared to be quite different from "owned". The average reader, not familiar with the passage quoted, and not finding owneyed or ownied in any dictionary, felt this explanation hardly adequate. But we find in Tuesday's Globe a statement that the passage which Sir Wilfrid Laurier had in his mind was taken from Sir Walter Scott's Journal. The Great Magician is describing his connection with the Edinburgh Assurance Company, of which he was, as he modestly calls himself, "one of those graceful and useful appendages called Directors Extraordinary." In the same strain, Sir Walter continues: "An extraordinary director I should prove had they elected me an ordinary one." * * * "There were there moneyers and great oneyers, men of metal—counters and discounters—sharp, grim, prudential faces—eyes weak with ciphering by lamplight—men who say to gold, Be thou paper; and to paper, Be thou turned into fine gold." The word "oneyer", says the Century Dictionary, is probably a misprint for "moneyer," as found only once in Shakespere, viz. 1. Henry IV, ii. 1.84. in the following context. "With nobility and tranquillity, burgomasters and great oneyers, such as can hold in." Malone explains the word as meaning "an accountant of the exchequer." Sir Wilfrid may find in this incident an illustration of the ticklishness of using little-known quotations where they may be misconstrued.

WESTERN AND BRITISH-AMERICAN INSURANCE COMPANIES.

The directors of the two large Canadian fire insurance companies, the Western and British America, have done a proper and a plucky thing in resolving to meet the conflagration losses of the companies in Rochester and Toronto by cutting down the present stock of the companies and subscribing new capital. At meetings of the boards of each on Wednesday last, the resolution was taken to write $1,000,000 off the $2,000,000 capital of the Western, and to issue a like amount of new stock, while in the case of the British America, its capital of $1,000,000 will likewise be cut in two and $500,000 of fresh stock offered for subscription. At a later day the sense of the shareholders will be taken collectively as to the issuing of this new stock, but in the meantime a number of the largest holders express their intention to subscribe for the fresh shares, and, as one of the directors expresses it, "put the company's losses behind us."

By the course pursued, it is intended to effect the continuance of dividends, upon the reduced basis indicated. The losses by these great fires have been made and must be met, and the plan proposed is better than the cessation of dividends. It is designed to give the companies a surplus over capital and all other liabilities, while not reducing the intrinsic value of the holdings. The step is approved by underwriters generally, who sympathize with the attitude of these two prominent companies and desire to see them continue as dividend payers. Representatives of two British companies said yesterday: "The Western and British America folks have done just right, and we wish them well. It is of moment to us [the British fire companies], to have some Canadian companies of good repute and strength. It is not only a good thing for the country, but a good thing for fire underwriting to have experienced and honorably managed local organizations in the business." The course taken is not a new one: it has been adopted by various companies in the United States that have suffered by conflagrations. The greater care in rebuilding burned areas substantially, and the lessened carelessness as to fire conditions generally on this continent will, it is hoped, reduce the fire-waste of recent years; while the exaction of more adequate rates and the probably greater volume of insurance taken out in consequence of recent events must have the effect of making fire underwriting more profitable.

—A peculiar life-saving apparatus has been invented. It is in the shape of a globe about 8 ft. in height, very strongly constructed, with two port holes big enough to allow men to enter, and it always contains a large supply of provisions. It is so ballasted that it will keep upright in any weather. The idea is that if the ship by any accident is about to sink, the men will get inside the globe, shut the ports, hoist a flag of distress, and then patiently wait to be picked up.

A CANADIAN GUARANTEED BOND,
Absolutely First Mortgage, to Yield
FIVE Per Cent.
TO THE INVESTOR. Particulars from
OSBORNE & FRANCIS, STOCK AND BOND BROKERS, Mail Building, TORONTO.

PROGRESS IN THE NORTH-WEST.

The South Alberta Land and Colonization Company has been recently incorporated for the purpose of colonizing wheat lands near Lethbridge. The president is Mr. R. C. McLure, and the manager, Mr. C. W. Simmons. The company has acquired a large body of land from the C.P.R. similar to that of the Spring Coulee district farther south, and is in the same climate line. "It is a heavy black loam, the accumulation evidently of thousands of years of decay of heavy grasses. It has been among the best grazing land in southern Alberta, but like a good many other areas said by the old-timers to be good only for grazing, it has shown a capacity to yield good returns for cultivation also, and it is sufficiently near the mountains to receive a liberal share of precipitation. It is expected that a fine settlement tributary to Lethbridge will spring up on this new land. Steam plows are running near the new settlement, and applications are already filed for section, halves and quarters." Another point worth making a note of is the great progress which has been made by the settlement of Raymond, a town which was only established in 1901. Its population now numbers 2,200. We hear that town lots there have in three years advanced in value from $50 to $400 each, and that farm lands have gone up from $6 to $25 per acre. Much of the enhanced value is due, no doubt, to the fact that it lands have been proved highly susceptible to successful beet-sugar culture.

TORONTO FIRE LOSSES.

The Toronto General Committee of Fire Insurance Companies, in dealing with the conflagration risks in these two weeks, have done hard and very valuable work. Up to Saturday night last, 338 individual claims of Toronto insurants had been presented to the committee. There were 2,043 policies of insurance, the aggregate of which was $8,549,000. This statement does not include many individual losses, the rule being that when alone on a risk the company interested may adjust, nor does it include any insurance which may have been placed, for example, with foreign companies not authorized to do business in Canada. Fifty companies, British, American and Canadian, are represented in this General Committee. Up to the present time eighteen completed adjustments have been reported to the committee and in addition to this the work of adjustment is practically completed in several of the larger losses of which reports should be in hand in the course of a day or two.

FIRE INSURANCE RATES RAISED.

Nothing else was to be expected than a rise in the rates of fire insurance in Toronto, as a consequence of the April conflagration, but there were some unprepared for the advances made elsewhere. At the meeting of the Canadian Fire Underwriters in this city, immediately after the fire, a resolution was carried which added $1 to the rate in the congested district. On all mercantile schedule in outside district, except dwellings and contents, fifty cents was added to existing rates in Toronto.

Now we learn that, as a result of the meeting of the C.F.U.A., in Montreal on Wednesday, $1 has been added to the rate in the congested district of Winnipeg, and 50 cents outside. Also, that an increase is decreed on mercantile risks in Ontario and Quebec generally, London, Hamilton, Toronto, Montreal, Quebec and Ottawa excepted, with a larger increase in congested areas. Special and schedule rated risks are advanced 20 cents. The rates in London, Hamilton, etc., which are being schedule rated, have been somewhat advanced. In Halifax, too, as our correspondent notes, there has been an advance. The tax is an unpopular one, but there is no escaping it. Forming new companies will not cure the fire loss.

—We are told that a congress of boards of trade and kindred bodies in the Canadian Territories and Eastern British Columbia is to be held in Calgary in May 15th and 16th. The committee making the necessary arrangements has determined that the congress shall last two days, and there will probably be a banquet at which the Premier of the Territories, Mr. Haultain, and the second vice-president of the Canadian Pacific Railway, Mr. Wm. Whyte, are among the most prominent invited guests.

—Attention with regard to immigration into Canada is largely monopolized by the new-comers into Manitoba and the North-West. It will surprise some people to know, therefore, that, according to the report of Hon. E. J. Davis, Commissioner of Crown Lands for Ontario, the number of immigrants who bought tickets to Toronto and western Ontario points during the year 1903 was no less than 12,725. In the previous year the number was 5,567, and in 1901 it was 2,520. In 1903 the land sales to actual settlers in New Ontario consisted of 81,440 acres, besides 1,381 farms of 220,960 acres in all in the shape of free grants, and 320,000 acres in the form of 2,000 military land grants.

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing House for the week ended with Thursday, May 5th, 1904, compared with those of the previous week:

	May 5th, 1904.	April 28th, 1904.
Montreal	$20,837,689	16,400,539
Toronto	15,164,362	12,840,328
Winnipeg	6,394,972	4,266,757
Halifax	1,889,750	1,559,018
Hamilton	1,326,432	1,007,903
St. John	1,117,599	914,154
Vancouver	1,421,824	1,278,603
Victoria	500,552	556,798
Quebec	1,718,178	1,279,575
Ottawa	2,489,317	1,838,061
London	972,523	753,839
	$52,411,374	$42,695,575

ABSTRACT OF LIFE INSURANCE IN CANADA FOR THE YEAR 1903.

PRELIMINARY REPORT OF INSURANCE SUPERINTENDENT.

THE CHANCE OF DEATH IN WAR AND PEACE.

The risks of war are great and are appreciated; the risks of everyday life are great, but are not appreciated. It is only by comparing the risks of everyday life with those of war that we see the real need of life insurance. In war great battles are fought only now and then; in time of peace the battle is on every day. The man who is best prepared makes the best fight, and no preparation is complete without life insurance. During the Civil War one great insurance company in New York charged a war extra of $50 per annum per $1,000 insured to those who engaged in military or naval service. It issued 731 war permits on policies amounting to $1,151,950, and paid 73 war losses, amounting to $107,000. The total mortality above the probable was $91,897, of which $52,-801.82 was under policies in force at the beginning of the war, and $39,095.18 was under new risks. An extra charge of 81 cents annually per $1,000 insured upon all the insurance in force at the beginning of the war would have paid the extra losses incurred under old policies.

"The average annual death-rate from all causes among the soldiers in the Federal army during the Civil War was about 52 per 1,000; or, say, about the same as for men aged 68. Among men aged 25 the death risk for three years was not quite so great as in time of peace during the twenty years following age 25. Men aged 37 incur the same risk during the fifteen years next following, and men aged 48 incur a life risk during the next ten years. The severest battles of the war involved a risk equal only to a few years of peace. For example, the risk of being killed or mortally wounded in the Federal army at Gettysburg was only equal to the risk of death incurred by the civilian from age 49 to 52."—The Insurance Herald.

UNITED STATES MONEY.

To the Editor of the Montreal Star.

Sir,—I have just read in the Star the letter signed "Briton and Canadian" in reference to the United States money. I have long believed that the only way to prevent the circulation of United States money in Canada was to so arrange our currency system that such money could only be circulated at a loss.

This could be done by assimilating our currency to that of Great Britain. Make the Canadian dollar equal in value to one-fifth of an English pound. It will then be worth a fraction less than ninety-eight cents in United States money. While the United States dollar would thus be worth more than the Canadian dollar, its purchasing power in Canada would be no greater than that of the dollar of Canada. If a purchaser of an article priced one dollar, tendered a United States dollar in payment he would get no change back, while the dealer would, by sending the United States dollar over the border, secure a profit of more than two per cent. There would thus always be a loss in bringing United States money into Canada and again in sending it out; consequently, it would cease to come in, and what was already in would soon flow out. W.

Berwick, N.S.

THE rod mill of the Dominion Iron and Steel Company at Sydney was started up last week.

CHARITIES.

A man came into the bank with tears in his eyes. His only son was sick unto death in a distant State among strangers. He must go to him, and at once. And he had no money. Would the bank lend him the money to go? Perhaps he would have to bring the dead body of his son back home to be buried. He was a poor man, he said; he had nothing, but he would pay! Would the bank loan him the money?

The officer kindly spoke of the bank's rules requiring security, and asked what or whom he could give. The answer came quick, with a faint note of anger mingled with the sorrow, that he had nothing to give and no personal security. The case was so urgent he must make his preparations. He must have the money, indeed, at once. Time was precious; the first train must be taken. Even then the boy might die ere the father could arrive. Would the bank, under the circumstances, loan him the money, and at once?

Reluctantly, and with the kindest manner, the officer said, "No!" The man looked for a moment at the speaker, pain, anger, and even horror, mingled together in his countenance, turned on his heel and left the bank.

In a short time he came back with a patron of the bank who was willing to become an accommodation security for the man; and the loan was readily granted. The applicant said not a word. He took the money and departed immediately, as was learned, on his sad errand. His son recovered. He returned home, conscious of having done his duty, his heart gladdened by the thought that his dear boy was returning fast to complete health. But he never forgave the bank. It was known that he spoke of it afterward as one of the most hard-hearted acts he had ever known. He probably blamed the bank to his own dying hour. He felt that a

TO GET SATISFACTION

From your steam plant is the crucial basis of economy to all manufacturers. A satisfactory steam plant is one that produces the greatest needed power at the lowest cost.

great wrong had been done.

Did the banker do wrong? No!

The facts were, and they were well known to the banker, the man, while honest, was not good for the sum asked. Not only that, but he was not one of the men who at the age of sixty push out at any cost and by hard work pay a necessity debt of this sort. The officer would have been recreant to his duty to the bank if he had made the loan without security. He was not the author of the urgent circumstances under which the loan was asked, and he could not take note of them and serve the stockholders of the institution properly. Every country banker knows how often he could supply the funds for a funeral if he would. He knows how often he could loan monies on the prospects of returning health. But, alas, it is a fact that no man has a lease on health or life. It is a further fact that not all live, healthy men are capable of making a living and paying their debts.

The bank is not a charitable institution.

One of the first requisites of a good banker, as the books and experiences of all men will affirm, is the power to say "no." The calls for charity at the bank are incessant. Persons think because there is money in the bank vaults at all times that the bank has the power at all times to give. They do not stop to think the money is in the bank vault in trust for others. It is there! The power to give is abundant. The bank should give freely. If the officer says "no" he is hard-hearted and the corporation is soulless!

In the organization of the bank scheme there is no place for charity.—Chas. W. Stevenson, in the Bankers' Monthly.

MONTREAL MARKETS.

Montreal, May 4, 1904.

Ashes—A few fair lots are reported on the way down by first river boats from the West, some of which are said to have been sold at $6.27½ to $6.30 for first pots, but there are all told only six barrels of ashes at present in store. Second pots would probably realize $5.80; for pearls $7 to $7.25 is a nominal quotation.

Cements, Firebricks, etc.—There is a good deal more enquiry, but the volume of actual business is not up to that of last year's. Prices at the moment are as last quoted, but several vessels are shortly due with new supplies, and prices ex wharf will be about ten cents a barrel less on cements, and from $1.50 to $2 per thousand less for firebricks.

Dairy Products.—There has been no improvement in the cheese market; indeed, the Liverpool cable shows a further decline of a shilling, and from 7 to 7¼c. is considered a full quotation for new cheese; fall goods are hard to move at 8 to 9c. As regards butter, the situation is not greatly altered since a week ago; new creamery is quoted at 15 to 16c. as to quality; dairy at about 13c., and rolls at 12c.

Dry Goods.—Bright sunny days and warm, balmy airs this week have made glad the heart of the city retailer, and country stocks are evidently moving off more freely now, as there is a marked increase in the number of letter orders coming to hand, while travellers' reports also speak with satisfaction of the changed weather conditions. April has been a poor month both for sales and collections, but it is now hoped to make up some of the shortage. The increase in Western orders, due in part to the Toronto fire, is quite noticeable, and some considerable purchases are reported as being made in this market by Toronto jobbers. Neither in domestic or foreign fabrics is there any change reported.

Furs—Business in raw furs is now very dull, only a few small lots of generally poor quality being offered of late, and there will be very little of interest during the next several months, so that we will drop quotations after this issue until September. Prices are as follows: Beaver, $5.00 to $6.50 for large; medium, ditto, $4 to $4.75; No. 1 choice bear, $12 for large, $8 for medium, and $5 for small; badger, 30 to 50c.; fisher, No. 1, dark, $3.50 to $4.50; ditto brown, $3 to $4; pale ditto, $2 to $3; red fox, $2.25 to $4; cross fox, $5 to

Managers and Underwriters.

$10 for No. 1, as to color; Wolverine, $2.50 to $5; lynx, $3 to $6 for No. 1 marten, $2 to $2.50 for Ontario and Quebec skins; fine B.C. and Northwest pelts bring higher prices; mink, $2 to $4 for No. 1; fall rats, 8 to 17c.; winter ditto, 15 to 20c.; spring ditto, 23c. for extra large, 22c. for large, 20c. for medium, and 18c. for small; otter, $8 to $12; fine Labradors and Northeastern would bring $12 to $20; coon, $1.50 to $2.50 for No. 1 black, and from $1 to $1.75 for No. 1 dark; prime skunk, $1.50 for No. 1, all black; short stripe, $1.10; long stripe, 60c.; and broad stripe, 20c.

Groceries.—As river steamers are now on their regular routes, and the canals open, there is a brisk despatch of orders for river points, which have been in hand for some time, but the general demand is not greatly increased. Immediately after writing last week there was a further advance of 5c. a cental on all grades of refined sugars as was anticipated might be possible, and the market continues a strong one. The present factory price for standard granulated is $4.25, with the lowest figure for yellows $3.65. Molasses still rules, the latest cable from the island being equivalent to a laid down cost of about 23½c. Late cables from Smyrna report confirmation of frost damage to the Sultana

THE COMMERCIAL
Established 1882
The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, THE BEST BUYING PROVINCES IN CANADA?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

raisin vines, and prices of last year's crop have advanced two shillings. Currants are also cabled firmer at Patras. Large stocks of shelled walnuts are reported, and exporters are accepting lower prices. Recent orders for Valencia almonds could not be filled, stocks at producing points being exhausted, but Jordan almonds are in abundant supply.

Hides.—The market presents no new features. Lambskins have not been advanced this week as was expected, and remain at 10c. each. Beef hides are coming in slowly, and are bought by dealers on the basis of 7c. for No. 1. Calfskins are in good supply, and bring 13c. for No. 1, and 11c. for No. 2.

Metals and Hardware.—There has been quite a rush of shipments by first river boats this week, and on the whole there is rather more doing, but the plumbers' supply trade is affected by the plumbers' strike which we referred to several weeks ago as likely to go into effect the 1st of May, the masters not feeling at all disposed to concede an eight-hour day and 35c. an hour. With regard to pig iron and iron products no changes are reported; Canada and tinplates are reported a little firmer in Britain, but nothing to affect local prices, which, if anything, will likely be subject to some shading with the arrival of new stocks now afloat in the gulf. Lead is a shade easier at $3.40, and copper a little firmer at 13¾ to 14c. There were reports current last week of a lack of harmony among the wire nail men, which might lead to some cutting, but matters have been satisfactorily adjusted. The combination of washing machine manufacturers has advanced prices about 5 per cent.

Oils, Paints and Glass.—With the settled fine weather suitable for outdoor work in the way of painting, etc., some improvement is noted in the demand, and there is considerable bustle among the wholesale warehouses in the shipping of orders held some time for the opening of navigation. Linseed oil is again easier, and general quotations are 46c. for raw and 49c. for boiled, in a jobbing way, but fair lots are being done at lower figures. In other lines no changes are reported.

TORONTO MARKETS.

Toronto, May 5, 1904.

Chemicals, Drugs, etc.—A fair volume of trade continues to be transacted. A firm feeling prevails in quinine, while opium is still very dull and inactive. An advance of about a cent has taken place in carbolic acid, probably due to the demands of belligerents in the Far East. Camphor has experienced a considerable drop. Cream of tartar is in much better demand, as is usual at this period of the year when summer is approaching. Cod liver oil is easier, with more plentiful supplies from Newfoundland. Linseed is less firm than it was; menthol and Jamaica ginger are a little lower.

Flour and Grain.—For ninety per cent. patents the ruling price is $3.60 in buyers' bags, with extra choice brands a little higher. Rolled oats are steady at $4.50 per bag on track. No change has occurred in millfeed. Wheat has gone up 1 to 3c., and so have oats. Peas are firm. Rye has advanced a cent or two.

Fruits and Vegetables.—The wholesale fruit stores look now more spring like. Strawberries are beginning to arrive in quantity from the South. Pineapples are fairly plentiful. Spring onions, tomatoes, lettuce and other spring delicacies are selling steadily. Prices range as follows: Cocoanuts, $3.75 per sack; oranges, California navels, $2.75 to $3.50; Valencias, ordinary, $4.50 to $5; large, $5.50 to $6; lemons, Messina, 360's, $2.50 to $2.75; 300's, $2.75 to $3; bananas, 8's, $1.25 to $1.50 per bunch; 1st, $2 to $2.50; celery, $5 to $5.50 per case, and 75c. to 90c. per dozen; Malaga grapes, $6.50 to $7.50 per barrel; dates, Sair, 3½c. per lb.; Hallowee, 4c.; figs, 8c. to 12c.; tap figs, 3½c.; pineapples, $3 to $4 per case; strawberries, 15c. per pint box, and 20 to 25c. for quarts; Egyptian onions, $3.50 per sack.

Groceries.—No further change has taken place in sugar, but it continues firm at the recent advance. The feeling in New York continues strong. Teas here are now selling somewhat remarkably freely, and values are very firm. In canned goods, especially peas, corn and tomatoes, there is a very strong feeling. General trade may be described as fair to good, though, perhaps, hardly up to what might have been expected after such a long tie-up in the country districts.

Hardware.—The spring movement has no doubt commenced, but a good deal

Merchants Fire Insurance Co.

CAPITAL AND ASSETS OVER HALF A MILLION

HEAD OFFICE TORONTO.

Agents Wanted in All Unrepresented Districts.

of inconvenience has been caused by the fire. In spite of this setback, however, the Toronto merchants are showing their customary enterprise, and will not allow themselves to be upset for long from this cause. Orders from the country are coming in in satisfactory quantities, especially for such things as farming tools, fencing, screens, nails and similar goods. Metals are experiencing a normal movement.

Provisions and Dairy Products.—Liberal offerings of butter are coming in, but much is of poor and stale quality, being in many cases what would have been shipped weeks ago had it not been for the poor state of the roads. From this cause stocks are accumulating here to a certain extent, and the market is very dull. Cheese also is easy. The egg market is firm in spite of somewhat heavy receipts; in fact, from a pickler's standpoint prices are still too high. Not much is being done in hops, the price for Canadian being about 28 to 31c. Prices for hog products are steady, and trade is likely to show ample improvement with the opening of navigation.

Seeds.—Only a moderate demand, considering the season, is being experienced for seeds, but prices keep steady as quoted last week.

Hides and Leather.—Prices for hides have gone up about a cent, owing to light receipts. Sheepskins are quiet and lambskins scarce. Calfskins are in fair demand. Tallow is dull and a fraction lower. Leather is on the dull side just now, but improvement is looked for.

Wool.—A little unwashed fleece is coming forward, but on the whole the market is a very quiet one at 9 to 10c. The enquiries for pulled wools come in very slowly. At the last London wool sale on Tuesday last a large number of buyers attended. The offering numbered 14,556 bales, mainly crossbreds. The buying was chiefly by the home trade, but Americans secured several lots of medium and fine crossbreds, and also suitable parcels of good Romney wools at full rates. The offerings of merinos were light, and they sold well. Cape of Good Hope and Natal fine grades were unchanged, but heavy greasies were somewhat easier. Punta Arenas were in fair demand at unchanged prices.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy-holders and addition to Reserve.
$53,841.18 per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1,800,000.00.
